

ASX ANNOUNCEMENT

Rumble Acquires Canegrass Project

Australian exploration company Rumble Resources Ltd (ASX: RTR) ("Rumble") has acquired the Canegrass Project in Western Australia.

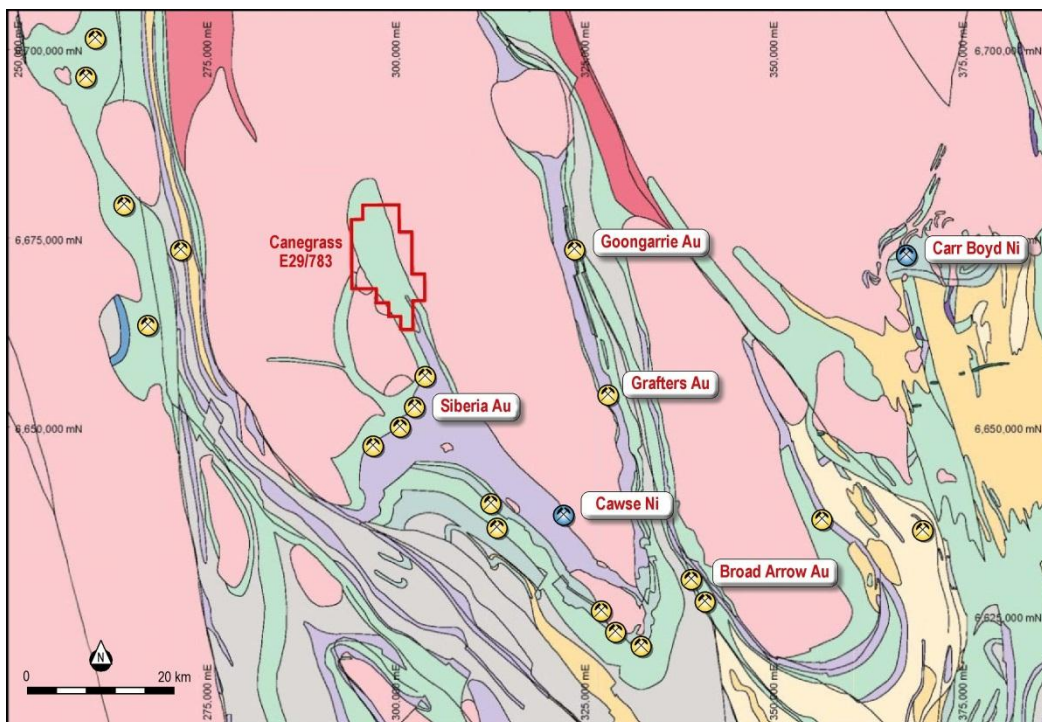

Highlights

- The Canegrass Project "Project" is located in the Eastern Goldfields of Western Australia.
- The Project covers over 100 sq km's of prospective greenstone belt.
- Rumble has acquired a 90% interest in the Project for a cash consideration of \$10,000 and the issue of 150,000 ordinary fully paid shares.

Canegrass Project

The Project consists of one granted exploration license, E29/783 and is located 100km north of Kalgoorlie and covers over 100 sq km of greenstone belt. The geology is dominated by a sequence of mafic and ultramafic rocks with minor felsic rocks and metasediments. This sequence has been intruded by fine grained felsic porphyry dykes and quartz veins.

The Project has favourable geology and structures to host significant gold mineralisation and is also prospective for nickel mineralisation. Exploration to date focussed on mapping and soil/auger geochemistry. The limited soil geochemistry has outlined low levels of anomalous gold mineralisation; no follow up drilling has been completed.
