30 June 2010 Financial Statements

Highlights

The Company achieved an underlying net profit after tax of \$14.5 million (2009: underlying profit of \$0.2 million).

Cash on hand at 30 June 2010 was \$102.2 million (2009: \$53.7 million), and total debt amounted to \$15.9 million (2009: \$97.5 million).

Details of the result for the financial year ended 30 June 2010 are set out in the Appendix 4E and financial statements attached.

The major achievements in the year included:

- Significant improvement in operational performance;
- Restructured balance sheet, through the repayment of convertible notes with a face value of \$75.9 million, providing an excellent platform to pursue growth opportunities;
- Funds in place from the equity raising in late 2009 to develop the King of the Hills project and provide working capital flexibility; and
- Established new banking facilities including a \$25 million performance bond facility, replacing a cash-backed facility, and a 250,000 ounce gold put and call structure for King of the Hills.

The underlying net profit after tax was before significant items comprising:

- Asset impairment write-off in relation to Southern Cross operations of \$37.0 million;
- Negative mark-to-market movement on the gold put and call options for King of the Hills of \$19.5 million, representing the unrealised loss related to time value as at 30 June 2010; and
- Gain on the sale of investments in other companies, mainly Bendigo Mining Limited, of \$2.7 million.

The reported result after these significant items was a loss after tax of \$40.2 million (2009: net loss of \$76.3 million).

Amended 30 June 2010 Financial Statements

Attached is an amended Appendix 4E and 30 June 2010 financial statements to reflect a correction to the “EBITDA – excluding significant items”.

For the year ended 30 June 2010, “EBITDA – excluding significant items” was reported as \$62,165,000 and is corrected to \$73,163,000.

The EBITDA disclosure is provided on page 3 of 8 in the Appendix 4E and on page 3 of 85 in the full year statutory accounts.

ST BARBARA LIMITED

ABN 36 009 165 066

APPENDIX 4E

FOR YEAR ENDED 30 JUNE 2010

Preliminary Final Report

Financial year ended 30 June 2010

This information should be read in conjunction with the St Barbara Limited 2010 Financial Report attached.

Name of entity

St Barbara Limited

ABN or equivalent company reference

36 009 165 066

Results for announcement to the market

		% Change		A\$'000
Revenue and other income	up	6%	to	303,464
Profit after tax before significant items attributable to members of the parent entity ("underlying profit") (Prior year underlying profit: \$209,000)	up	6,860%	to	14,547
Loss from ordinary activities after tax attributable to members of the parent entity (Prior year loss: \$76,344,000)	down	47%	to	40,188
Net loss attributable to members of the parent entity (Prior year loss: \$76,344,000)	down	47%	to	40,188

During the year there were a number of significant items that had a material impact on the income statement of the consolidated entity as set out in the table below:

	Year ended 30 June 2010 A\$'000	Year ended 30 June 2009 A\$'000
Net loss after tax as reported	(40,188)	(76,344)
<u>Significant Items After Tax</u>

Unrealised loss on available for sale assets	-	6,192
Gain on sale of available for sale assets	(2,724)	-
Asset impairment write downs	37,946	66,042
Restructuring provision and redundancy payments	-	5,834
Underlying net profit after tax	14,547	209

Dividends

The Company did not declare or pay any dividends during the year or in the prior year.

Any other significant information needed by an investor to make an informed assessment of the entity's financial performance and financial position.

Overview

St Barbara completed the 2010 financial year in a strong financial position, reporting an underlying net profit after tax of \$14,547,000 (2009: \$209,000), cash on hand at 30 June 2010 of \$102,157,000 (2009: \$53,692,000) and debt of \$15,909,000 (2009: \$97,541,000). In the past twelve months the Company achieved significant improvement in operational performance and restructured its statement of financial position by repaying a substantial amount of its debt.

The result reported by the Group for the year ended 30 June 2010 was a net loss after tax of \$40,188,000 (2009: net loss of \$76,344,000), which included significant items amounting to a net loss of \$54,735,000 (2009: net loss of \$76,553,000). The consolidated results for the year is summarised as follows:

The table below summarises the results of the consolidated entity:

	30 June 10 \$'000	30 June 09 \$'000
Sales revenue	296,760	281,129
EBITDA (including significant items)	33,793	39,701
EBIT (including significant items)	(38,081)	(70,403)
Reported net loss after tax for the year	(40,188)	(76,344)
Total net significant items	(54,735)	(76,553)
EBITDA – excluding significant items	73,163	52,445
EBIT – excluding significant items	16,654	6,150
Underlying net profit after tax	14,547	209

The major achievements in the year included:

- Significant improvement in operational performance and implementation of a more rigorous approach to exploration activities;
- Restructured the balance sheet, with the repayment of convertible notes worth \$75.9 million, funded from proceeds from an equity raising completed in November and December 2009;
- Funds in place from the equity raising to develop the King of the Hills mine at Leonora and give working capital flexibility;
- Divested the Company's 9.7 per cent holding in Bendigo Mining Limited for proceeds of \$9.9 million;

- Established new banking facilities with National Australia Bank Limited (NAB) and Barclays Bank PLC (Barclays) secured by assets of the Group. NAB provides a \$25 million performance bond facility, replacing a cash-backed facility. Barclays and NAB provided a 250,000 ounce hedge facility to underpin the return from the King of the Hills operation; and
- Executed a gold bought put option and sold call option zero cost collar structure to provide price protection for King of the Hills production. The collar structure comprises gold bought put options at a strike price of \$1,425 per ounce and gold sold call options at a strike price of \$1,615 per ounce over 250,000 ounces. The collar structure means that King of the Hills production will receive a minimum gold price of \$1,425 per ounce and benefit from higher spot gold prices up to \$1,615 per ounce.

Discussion and Analysis of Operating Results and the Income Statement

For the year ended 30 June 2010 St Barbara reported an underlying profit after income tax of \$14,547,000 (2009: underlying profit of \$209,000), representing a substantial improvement on the previous year. The higher underlying profit for the year was attributable to increased production at the Gwalia mine and a strong Australia dollar gold price in the second half of the year.

The reported result for the year was a net loss after income tax of \$40,188,000 (2009: net loss of \$76,344,000), which included significant items amounting to a loss of \$54,735,000 (2009: loss of \$76,553,000). The significant items in the year comprised the unrealised loss on gold put and call options of \$19,513,000, asset impairment write offs in relation to the Southern Cross operations of \$37,946,000 and a gain on the disposal of Bendigo Mining Limited shares and other available-for-sale assets of \$2,724,000.

Total sales revenue of \$296,760,000 (2009: \$281,129,000) was generated from gold sales of 237,264 ounces (2009: 231,318 ounces) at an average achieved gold price of A\$1,244 per ounce (2009: A\$1,210 per ounce). Production at Leonora was 109,148 ounces (2009: 82,795 ounces) for the year. Production at Southern Cross was 121,870 ounces (2009: 156,105 ounces) for the year. A summary of the production performance for the year ended 30 June 2010 is provided in the table below.

Details of 2010 Production Performance

	Southern Cross		Leonora	
	2009/10	2008/09	2009/10	2008/09
Open Pit Ore Mined	23,413	1,119,997	-	372,206
Grade g/t	5.7	1.9	-	1.3
Underground Ore Mined	969,519	1,003,202	621,930	304,544
Grade g/t	4.0	3.8	5.7	6.9
Ore Milled	1,279,751	2,233,367	632,573	835,843
Grade g/t	3.4	2.5	5.6	3.3
Recovery %	86	88	95	94
Gold Production	121,870	156,105	109,148	82,795
Cash Cost ⁽¹⁾	883	888	686	719
Total Cost	1,070	1,040	945	948

(1) Before significant items

Development of the Gwalia mine at Leonora continued during the year, with the primary access, the Hoover Decline, reaching 1310 metres below surface. The majority of the production in the year was sourced from the lower grade South Gwalia Series stopes between 1050 and 1220 levels. The grades improve as the proportion of South West Branch stopes increases in financial year 2011. The Gwalia mine produced 621,930 tonnes in its first full year of operation, having commenced production in October 2008, for 109,148 ounces. In March 2010 the mill resumed full time operation due to the higher tonnage from the Gwalia underground and in preparation for the introduction of third party ore on a trial basis during the June 2010 quarter. The trial treatment of 36,000 tonnes of open pit ore from Navigator Resources Limited's Mertondale operations was processed in the June 2010 quarter on a batch basis. The process plant performed reliably throughout the year, consistently returning 95% recovery from Gwalia ore.

During the year Southern Cross operations successfully transitioned to campaign milling and ceased all open pit mining. Treatment of open pit stockpiles continued throughout the year, and by June 2010 Marvel Loch underground mine became the exclusive ore source for Southern Cross operations. The Marvel Loch underground mine continued to perform well during the year producing 969,519 tonnes, which was marginally down on the previous year. Production for the year was 121,870 ounces (2009: 156,105 ounces). Treatment of lower grade ore stockpiles, mined in the previous year, reduced the average grade of ore processed in the year. Treatment of high-grade Mercury open pit stockpiles during the year reduced overall recoveries from the plant, but by year end with depletion of Mercury stockpiles and commissioning of an Acacia Reactor in the gravity circuit, recoveries stabilised at 93%.

Other revenue of \$6,765,000 (2009: \$5,411,000) comprised mainly interest earned during the year of \$5,210,000 (2009: \$3,044,000). During the second half of the year the Company had substantial cash held on deposit ahead of the repayment and redemption of convertible notes. During the year the Company earned interest at an average rate of 4.69% compared to the average cash rate of 3.74%.

The Leonora cash cost for the year was \$686 per ounce (2009: \$719 per ounce), reflecting the benefit of a full year of production from Gwalia and of the cessation of high cost open pit mining in the previous year. The Southern Cross cash cost for the year was \$883 per ounce, which was in line with the previous year. Total cash operating costs at Leonora operations of \$74,470,000 were higher in the year compared with the prior year (2009: \$52,438,000), due mainly to increased mining activity for a full twelve months at the Gwalia underground mine. At Southern Cross operations total cash operating costs, before significant items, were \$110,637,000 (2009: \$131,122,000). The lower Southern Cross operating costs was due to the cessation of open pit mining in the first quarter of the year.

Exploration expensed in the income statement in the year was \$5,184,000 (2009: \$13,442,000), with total exploration expenditure amounting to \$7,946,000 (2009: \$15,990,000). The Company policy in relation to accounting for exploration permits capitalisation of expenditure where it results in an increase in reserves and is likely to be recouped from successful development and exploitation of the area of interest, or alternatively, by its sale. The Company reduced the exploration budget for the year to allow consolidation of the exploration efforts and to focus on proof of concept work to better delineate drilling targets.

Corporate & support costs for the year amounted to \$21,382,000 (2009: \$27,089,000), which included expenses related to the corporate office, rates and taxes associated with the Company's landholdings, compliance costs and operations support and technical services. In the previous year corporate & support costs included redundancy and restructuring costs and provisions totalling \$5,834,000.

The royalties expense for the year of \$11,790,000 (2009: \$11,042,000) comprised the state royalty in Western Australia and payments for a corporate royalty on gold revenue.

Depreciation and amortisation of fixed assets and capitalised mine development totalled \$71,874,000 (2009: \$110,104,000) for the year, which included \$15,365,000 (2009: \$63,809,000) in significant items. The higher underlying depreciation and amortisation charge in the year was attributable to increased mine development at Gwalia and the production for a full twelve months. The depreciation and amortisation reported in significant items represents the impairment write off of plant and equipment and capitalised exploration at Southern Cross.

Finance costs were lower than the previous year at \$7,317,000 (2009: \$8,996,000) due mainly to the buy-back of convertible notes during the year.

The net loss on derivatives reported in the income statements of \$19,513,000 represents the unrealised loss related to time value of gold put and call options as at 30 June 2010. The gold put and call options provide price protection over 250,000 ounces of King of the Hills production. The mark-to-market value of the gold put and call options is calculated at each reporting date and will fluctuate over time to maturity of the contracts.

The realised gain on available for sale assets of \$2,724,000 (2009: unrealised loss of \$6,332,000) comprises mainly the gain on the sale of Bendigo Mining Limited shares.

Discussion and Analysis of the Cash Flow Statement

Operating activities

Cash flow from operating activities for the year was \$81,805,000 (2009: \$24,324,000), representing a significant increase compared to the prior year. Increased operating cash flows were attributable to higher receipts from customers, reflecting the benefit of higher gold production and a strong average achieved gold price, and lower payments to suppliers and employees. Payments to suppliers and employees were significantly lower than the prior year at \$209,774,000 (2009: \$251,928,000) due mainly to the cessation of open pit mining at both Leonora and Southern Cross. Interest received of \$4,575,000 (2009: \$2,940,000) was higher than in the prior year due to increased level of cash on hand during the second half of the year. Interest paid in the year of \$4,829,000 (2009: \$7,653,000) was lower than the prior year as a result of the buy-back of convertible notes during the year.

Investing activities

Net cash flows used in investing activities amounted to \$93,621,000 (2009: \$128,328,000) for the year. The prior year included substantial expenditure to complete construction of the Gwalia project, which was commissioned in October 2008. Investing expenditure incurred during the year was in the following major areas:

- Underground mine development and infrastructure at Gwalia - \$57,739,000;
- Underground mine development and infrastructure at Marvel Loch - \$27,223,000;
- Pre-commissioning expenditure at King of the Hills - \$2,125,000
- Purchase of property, plant and equipment at both operations - \$10,210,000; and
- Exploration expenditure - \$5,821,000.

During the year a decision was taken to develop the King of the Hills project as a supplemental ore source for the Leonora process plant. Pre-development expenditure incurred in the June 2010 quarter

included refurbishment of offices at the King of the Hills site, dewatering at the Tarmoola open pit and expansion at the Leonora accommodation village.

Investing activities included proceeds from the sale of the Bendigo Mining shares amounting to \$9,907,000.

Financing activities

Net cash flows from financing activities were \$60,281,000 (2009: \$122,179,000), with major movements in cash flows including:

- Net proceeds from equity raisings during the year of \$118,821,000 in November and December 2009;
- Release of cash previously held as security for a bank guarantee facility of \$23,951,000;
- Payments for the buy-back and redemption of convertible notes during the year of \$75,588,000; and
- Scheduled repayments of finance leasing and equipment financing facilities amounting to \$7,437,000.

Discussion and Analysis of the Statement of Financial Position

Net Assets and Total Equity

St Barbara's net assets and total equity increased during the year by \$52,996,000 to \$349,468,000, due mainly to proceeds from the equity raising completed in November and December 2009.

The available cash balance at 30 June 2010 was \$102,157,000 (2009: 53,692,000) reflecting the benefit of the proceeds from an equity raising and release of cash previously held as security for a bank guarantee facility.

Property, plant and equipment, mine properties and capitalised exploration had a combined value at 30 June 2010 of \$334,361,000 (2009: \$317,660,000), which was after the impairment write off of \$15,365,000 million taken against Southern Cross plant and equipment and capitalised exploration. The impairment write off at Southern Cross also included deferred operating mine development of \$22,581,000.

Net debt

Net debt, comprising total borrowings less cash on hand, was net cash of \$86,248,000 at 30 June 2010 (2009: net debt of \$43,849,000). During the year proceeds from the equity raising was used to repay and redeem convertible notes amounting to \$75,588,000. The remaining debt reported at 30 June 2010 comprised the remaining convertible notes and the outstanding balance on finance leases and an equipment finance facility, used to fund the acquisition of assets within the mining operations.

The original liability to convertible note holders was \$100,000,000. In the previous financial year \$400,000 in face value of notes was converted to St Barbara shares at a conversion price of 67 cents per share (597,014 shares issued). In the same year the Company bought back convertible notes with a face value of \$22,500,000, at a 6 percent discount, for \$21,150,000. In the current year the Company conducted a number of buy backs of notes with a total face value of \$55,150,000, for \$54,837,750. On 4 June 2010 note holders holding notes with a total face value of \$20,750,000 elected to exercise their put option to redeem the notes at face value. The remaining convertible notes at 30 June 2010 amounting to \$1,200,000 were compulsorily redeemed on 4 July 2010.

Subsequent Events

No significant events have occurred after balance date for the year ended 30 June 2010, except for the following items:

- On 4 July 2010, the Company compulsorily redeemed convertible notes with a face value of \$1,200,000. There are no more convertible notes outstanding.
- On 4 August 2010 the Company reached agreement for the sale of its Tarmoola process plant, which is on care and maintenance and is surplus to the Company's requirements, for a cash consideration of \$3,000,000.

Net tangible asset backing

	Current period	Previous corresponding period
Net tangible assets per ordinary security	0.18	0.20

Statement about the audit status

This preliminary final report is based on the St Barbara Limited and controlled entities financial report as at 30 June 2010, which has been audited by KPMG. The 30 June 2010 financial report contains the independent audit report to the members of St Barbara Limited.

Dated: 24 August 2010.

DIRECTORS' REPORT

The Directors present their report on the Group "St Barbara Group", consisting of St Barbara Limited and the entities it controlled at the end of, or during, the financial year ended 30 June 2010.

Directors

The following persons were Directors of St Barbara Limited at any time during the year and up to the date of this report:

- S J C Wise Chairman
- T J Lehany Managing Director & CEO
- D W Bailey Non-executive director
- B J Gibson Non-executive director
- P C Lockyer Non-executive director
- R K Rae Non-executive director

The qualifications, experience and special responsibilities of the directors is presented on pages 9 to 11.

Principal activities

During the year the principal activities of the Group were mining and the sale of gold, mineral exploration and development. There were no significant changes in the nature of activities of the Group during the year.

Dividends

There were no dividends paid or declared during the financial year.

Overview of Results

St Barbara completed the 2010 financial year in a strong financial position, reporting an underlying net profit after tax of \$14,547,000 (2009: \$209,000), cash on hand at 30 June 2010 of \$102,157,000 (2009: \$53,692,000) and debt of \$15,909,000 (2009: \$97,541,000). In the past twelve months the Company achieved significant improvement in operational performance and restructured its statement of financial position by repaying a substantial amount of its debt.

The result reported by the Group for the year ended 30 June 2010 was a net loss after tax of \$40,188,000 (2009: net loss of \$76,344,000), which included significant items amounting to a net loss of \$54,735,000 (2009: net loss of \$76,553,000). The consolidated result for the year is summarised as follows:

	30 June 10 \$'000	30 June 09 \$'000
Sales revenue	296,760	281,129
EBITDA (including significant items)	33,793	39,701
EBIT (including significant items)	(38,081)	(70,403)
Reported net loss after tax for the year	(40,188)	(76,344)
Total net significant items	(54,735)	(76,553)
EBITDA – excluding significant items	73,163	52,445
EBIT – excluding significant items	16,654	6,150
Underlying net profit after tax	14,547	209

The significant items are detailed in the following table.

DIRECTORS' REPORT

Significant Items	30 June 10 \$'000	30 June 09 \$'000
Net realised/unrealised (loss)/gain on gold options ⁽¹⁾	(19,513)	1,515
Write down of listed investments to fair value	-	(6,192)
Gain on sale of available for sale assets ⁽²⁾	2,724	-
Included within corporate and support costs		
• Restructuring provision	-	(1,957)
• Redundancy payments	-	(3,877)
Asset impairment write-downs		
• Open pit mine development	-	(16,904)
• Marvel Loch underground operating development ⁽³⁾	(22,581)	-
• Southern Cross plant and equipment ⁽³⁾	(11,583)	(40,488)
• Marvel Loch capitalised exploration ⁽³⁾	(3,782)	(8,650)
	<u>(54,735)</u>	<u>(76,553)</u>

(1) The gold bought put and sold call options (collar structure) were put in place during the year to manage the Australian dollar gold price risk associated with 250,000 ounces of future King of the Hills production. At 30 June 2010 the unrealised mark-to-market value of the collar structure was negative \$38,674,000. In accordance with accounting standards, the unrealised loss related to time value of the options of \$19,513,000 was recognised immediately in the income statement. The unrealised loss related to the intrinsic value of the options of \$19,161,000 was recognised in the hedging reserve in equity. Over time this unrealised mark-to-market loss will reverse either through a change to the mark-to-market value of the options or maturity of the contracts.

(2) At 31 December 2008 an impairment loss of \$6,192,000 in relation to the investment in Bendigo Mining Limited was recognised in the income statement. A mark-to-market gain as at 30 June 2009 in relation to this investment of \$6,687,000, which would ordinarily have reversed the impairment loss recognised in the income statement in the period ended 31 December 2008, was recorded in the investment fair value reserve in accordance with Australian Interpretation 10. In August 2009 the investment in Bendigo Mining Limited was sold for \$9,909,000, resulting in the transfer of the amount in the investment fair value reserve to the income statement, giving a net gain on sale of \$2,724,000 and recognised as "Other Income".

(3) Based on an assessment of the Southern Cross operations cash-generating unit at 30 June 2010, an impairment write down was taken against assets of the unit. The impairment write down was caused by lower than expected future net cash flows from the Southern Cross operations as a result of a reduction in the estimated mine life, based on drilling during the year that encountered pegmatite intrusions which closed off the resources potential. The revised cash flow estimates from the base case mine plan no longer supported full recovery of the carrying value of the Southern Cross cash-generating unit assets, including capitalised mine operating development, plant and equipment and capitalised exploration.

The major achievements in the year included:

- Restructured the balance sheet, with the repayment of convertible notes worth \$75.9 million, funded from proceeds from an equity raising completed in November and December 2009;
- Funds in place from the equity raising to develop the King of the Hills mine at Leonora and give working capital flexibility;
- Divested the Company's 9.7 per cent holding in Bendigo Mining Limited for proceeds of \$9.9 million;
- Established new banking facilities with National Australia Bank Limited (NAB) and Barclays Bank PLC (Barclays) secured by assets of the Group. NAB provides a \$25 million performance bond facility, replacing a cash-backed facility. Barclays and NAB provided a 250,000 ounce hedge facility to underpin the return from the King of the Hills operation; and
- Executed a gold bought put option and sold call option zero cost collar structure to provide price protection for King of the Hills production. The collar structure comprises gold bought put options at a strike price of \$1,425 per ounce and gold sold call options at a strike price of \$1,615 per ounce over 250,000 ounces. The collar structure means that King of the Hills production will receive a minimum gold price of \$1,425 per ounce and benefit from higher spot gold prices up to \$1,615 per ounce.

DIRECTORS' REPORT

Discussion and Analysis of Operating Results and the Income Statement

For the year ended 30 June 2010 St Barbara reported an underlying profit after income tax of \$14,547,000 (2009: underlying profit of \$209,000), representing a substantial improvement on the previous year. The higher underlying profit for the year was attributable to increased production at the Gwalia mine and a strong Australia dollar gold price in the second half of the year.

The reported result for the year was a net loss after income tax of \$40,188,000 (2009: net loss of \$76,344,000), which included significant items amounting to a loss of \$54,735,000 (2009: loss of \$76,553,000). The significant items in the year comprised the unrealised loss on gold put and call options of \$19,513,000, asset impairment write offs in relation to the Southern Cross operations of \$37,946,000 and a gain on the disposal of Bendigo Mining Limited shares and other available-for-sale assets of \$2,724,000.

Total sales revenue of \$296,760,000 (2009: \$281,129,000) was generated from gold sales of 237,264 ounces (2009: 231,318 ounces) at an average achieved gold price of A\$1,244 per ounce (2009: A\$1,210 per ounce). Production at Leonora was 109,148 ounces (2009: 82,795 ounces) for the year. Production at Southern Cross was 121,870 ounces (2009: 156,105 ounces) for the year. A summary of the production performance for the year ended 30 June 2010 is provided in the table below.

Details of 2010 Production Performance

	Southern Cross		Leonora	
	2009/10	2008/09	2009/10	2008/09
Open Pit Ore Mined	23,413	1,119,997	-	372,206
Grade g/t	5.7	1.9	-	1.3
Underground Ore Mined	969,519	1,003,202	621,930	304,544
Grade g/t	4.0	3.8	5.7	6.9
Ore Milled	1,279,751	2,233,367	632,573	835,843
Grade g/t	3.4	2.5	5.6	3.3
Recovery %	86	88	95	94
Gold Production	121,870	156,105	109,148	82,795
Cash Cost ⁽¹⁾	883	888	686	719
Total Cost ⁽¹⁾	1,070	1,040	945	948

(1) Before significant items

Development of the Gwalia mine at Leonora continued during the year, with the primary access, the Hoover Decline, reaching 1310 metres below surface. The majority of the production in the year was sourced from the lower grade South Gwalia Series stopes between 1050 and 1220 levels. The grades will improve as the proportion of South West Branch stopes increases in financial year 2011. The Gwalia mine produced 621,930 tonnes in its first full year of operation, having commenced production in October 2008, for 109,148 ounces. In March 2010 the mill resumed full time operation due to the higher tonnage from the Gwalia underground and in preparation for the introduction of third party ore on a trial basis during the June 2010 quarter. The trial treatment of 36,000 tonnes of open pit ore from Navigator Resources Limited's Mertondale operations was processed in the June 2010 quarter on a batch basis. The process plant performed reliably throughout the year, consistently returning 95% recovery from Gwalia ore.

During the year Southern Cross operations successfully transitioned to campaign milling and ceased all open pit mining. Treatment of open pit stockpiles continued throughout the year, and by June 2010 Marvel Loch underground mine became the exclusive ore source for Southern Cross operations. The Marvel Loch underground mine continued to perform well during the year producing 969,519 tonnes, which was marginally down on the previous year. Production for the year was 121,870 ounces (2009: 156,105 ounces). Treatment of lower grade ore stockpiles, mined in the previous year, reduced the average grade of ore processed in the year. Treatment of high-grade Mercury open pit stockpiles during the year reduced overall recoveries from the plant, but by year end with depletion of Mercury stockpiles and commissioning of an Acacia Reactor in the gravity circuit, recoveries stabilised at 93%.

DIRECTORS' REPORT

Other revenue of \$6,765,000 (2009: \$5,411,000) comprised mainly interest earned during the year of \$5,210,000 (2009: \$3,044,000). During the second half of the year the Company had substantial cash held on deposit ahead of the repayment and redemption of convertible notes. During the year the Company earned interest at an average rate of 4.69% compared to the average cash rate of 3.74%.

The Leonora cash cost for the year was \$686 per ounce (2009: \$719 per ounce), reflecting the benefit of a full year of production from Gwalia and of the cessation of high cost open pit mining in the previous year. The Southern Cross cash cost for the year was \$883 per ounce, which was in line with the previous year. Total cash operating costs at Leonora operations of \$74,470,000 were higher in the year compared with the prior year (2009: \$52,438,000), due mainly to increased mining activity for a full twelve months at the Gwalia underground mine. At Southern Cross operations total cash operating costs, before significant items, were \$110,637,000 (2009: \$131,122,000). The lower Southern Cross operating costs was due to the cessation of open pit mining in the first quarter of the year.

Exploration expensed in the income statement in the year was \$5,184,000 (2009: \$13,442,000), with total exploration expenditure amounting to \$7,946,000 (2009: \$15,990,000). The Company policy in relation to accounting for exploration permits capitalisation of expenditure where it results in an increase in reserves and is likely to be recouped from successful development and exploitation of the area of interest, or alternatively, by its sale. The Company reduced the exploration budget for the year to allow consolidation of the exploration efforts and to focus on proof of concept work to better delineate drilling targets.

Corporate & support costs for the year amounted to \$21,382,000 (2009: \$27,089,000), which included expenses related to the corporate office, rates and taxes associated with the Company's landholdings, compliance costs and operations support and technical services. In the previous year corporate & support costs included redundancy and restructuring costs and provisions totalling \$5,834,000.

The royalties expense for the year of \$11,790,000 (2009: \$11,042,000) comprised the state royalty in Western Australia and payments for a corporate royalty on gold revenue.

Depreciation and amortisation of fixed assets and capitalised mine development totalled \$71,874,000 (2009: \$110,104,000) for the year, which included \$15,365,000 (2009: \$49,138,000) in significant items. The higher underlying depreciation and amortisation charge in the year was attributable to increased mine development at Gwalia and the production for a full twelve months. The depreciation and amortisation reported in significant items represents the impairment write off of plant and equipment and capitalised exploration at Southern Cross.

Finance costs were lower than the previous year at \$7,317,000 (2009: \$8,996,000) due mainly to the buy-back of convertible notes during the year.

The net loss on derivatives reported in the income statement of \$19,513,000 represents the unrealised loss related to time value of gold put and call options as at 30 June 2010. The gold put and call options provide price protection over 250,000 ounces of King of the Hills production. The mark-to-market value of the gold put and call options is calculated at each reporting date and will fluctuate over time to maturity of the contracts.

The realised gain on available for sale assets of \$2,724,000 (2009: unrealised loss of \$6,332,000) comprises mainly the gain on the sale of Bendigo Mining Limited shares.

Discussion and Analysis of the Cash Flow Statement*Operating activities*

Cash flow from operating activities for the year was \$81,805,000 (2009: \$24,324,000), representing a significant increase compared to the prior year. Increased operating cash flows were attributable to higher receipts from customers, reflecting the benefit of higher gold production and a strong average achieved gold price, and lower payments to suppliers and employees. Payments to suppliers and employees were significantly lower than the prior year at \$209,774,000 (2009: \$251,928,000) due mainly to the cessation of open pit mining at both Leonora and Southern Cross. Interest received of \$4,575,000 (2009: \$2,940,000) was higher than in the prior year due to increased level of cash on hand during the second half of the year. Interest paid in the year of \$4,829,000 (2009: \$7,653,000) was lower than the prior year as a result of the buy-back of convertible notes during the year.

DIRECTORS' REPORT*Investing activities*

Net cash flows used in investing activities amounted to \$93,621,000 (2009: \$128,328,000) for the year. The prior year included substantial expenditure to complete construction of the Gwalia project, which was commissioned in October 2008. Investing expenditure incurred during the year was in the following major areas:

- Underground mine development and infrastructure at Gwalia - \$57,739,000;
- Underground mine development and infrastructure at Marvel Loch - \$27,223,000;
- Pre-commissioning expenditure at King of the Hills - \$2,125,000
- Purchase of property, plant and equipment at both operations - \$10,210,000; and
- Exploration expenditure - \$5,821,000.

During the year a decision was taken to develop the King of the Hills project as a supplemental ore source for the Leonora process plant. Pre-development expenditure incurred in the June 2010 quarter included refurbishment of offices at the King of the Hills site, dewatering at the Tarmoola open pit and expansion at the Leonora accommodation village.

Investing activities included proceeds from the sale of the Bendigo Mining shares amounting to \$9,907,000.

Financing activities

Net cash flows from financing activities were \$60,281,000 (2009: \$122,179,000), with major movements in cash flows including:

- Net proceeds from equity raisings during the year of \$118,821,000 in November and December 2009;
- Release of cash previously held as security for a bank guarantee facility of \$23,951,000;
- Payments for the buy-back and redemption of convertible notes during the year of \$75,588,000; and
- Scheduled repayments of finance leasing and equipment financing facilities amounting to \$7,437,000.

Discussion and Analysis of the Statement of Financial Position*Net Assets and Total Equity*

St Barbara's net assets and total equity increased during the year by \$52,996,000 to \$349,468,000, due mainly to proceeds from the equity raising completed in November and December 2009.

The available cash balance at 30 June 2010 was \$102,157,000 (2009: \$53,692,000) reflecting the benefit of the proceeds from the equity raising and release of cash previously held as security for a bank guarantee facility.

Property, plant and equipment, mine properties and capitalised exploration had a combined value at 30 June 2010 of \$334,361,000 (2009: \$317,660,000), which was after the impairment write off of \$15,365,000 million taken against Southern Cross plant and equipment and capitalised exploration. The impairment write off at Southern Cross also included deferred operating mine development of \$22,581,000.

Net debt

Net debt, comprising total borrowings less cash on hand, was net cash of \$86,248,000 at 30 June 2010 (2009: net debt of \$43,849,000). During the year proceeds from the equity raising was used to repay and redeem convertible notes amounting to \$75,588,000. The remaining debt reported at 30 June 2010 comprised the remaining convertible notes and the outstanding balance on finance leases and an equipment finance facility, used to fund the acquisition of assets within the mining operations.

DIRECTORS' REPORT**Significant changes in the state of affairs**

The significant changes in the state of affairs of the Company during the financial year are as follows:

- a) Net loss for the year
The Group reported a net loss for the year of \$40,188,000, which included significant items amounting to a loss of \$54,735,000. The net loss for the year increased the accumulated losses of the Group to \$248,852,000 at 30 June 2010.
- b) Impairment write-off
At 30 June 2010 the Company recognised an impairment write-off in relation to plant and equipment, mine development expenditure and capitalised exploration at Southern Cross operations amounting to \$37,946,000.
- c) Derivative financial liabilities
During the year the Company bought gold put options at a strike price of A\$1,425 per ounce and sold gold call options at a strike price of A\$1,615 per ounce (zero cost collar structure) to provide price protection over 250,000 ounces of King of the Hills production. The mark-to-market value of the collar structure at 30 June 2010 was negative \$38,674,000, which is reflected in current and non current liabilities.
- d) Repayment and redemption of convertible notes
During the year the Company applied the proceeds from an equity raising to repay and redeem convertible notes amounting to \$75,588,000. At 30 June 2010 the outstanding balance in convertible notes was \$1,200,000, and this outstanding balance was compulsorily redeemed subsequent to the balance date in July 2010.
- e) Changes in issued capital
In November 2009 the Company received net proceeds from the issue of new shares to institutional shareholders of \$70,792,000. A total of 274,094,788 new shares were issued at an issue price of \$0.27 per share.
In December 2009 the Company received net proceeds from the issue of new shares to retail shareholders of \$48,029,000. A total of 184,640,669 new shares were issued at an issue price of \$0.27 per share.

Likely developments and expected results of operations

The Company will continue to focus on achieving profitable production with an emphasis on lower cost, higher margin gold production in Australia. The Company will complete the development of the King of the Hills mine at Leonora in financial year 2011 and commence production in the June 2011 quarter. The future of the Southern Cross operations is under review with the base case remaining mine life having reduced to twenty two months from 1 July 2010.

Further information about anticipated developments in the operations of the Company and the anticipated results of those operations in future financial years have not been included in this report because there is insufficient certainty to warrant disclosure.

Regulatory environment

The Company's mining activities are all in Western Australia and are governed by Western Australian legislation, including the *Mining Act 1978*, the *Mines Safety and Inspection Act 1994*, *Dangerous Goods Safety Act 2004* and other mining related and subsidiary legislation. The Group is subject to significant environmental regulation, including, *inter alia*, the *Western Australian Environmental Protection Act 1986*, *Contaminated Sites Act 2003*, *Wildlife Conservation Act 1950*, *Aboriginal Heritage Act 1972* and the *Commonwealth Environmental Protection and Biodiversity Conservation Act 1999*, as well as safety compliance in respect of its mining and exploration activities.

The Company is registered under the National Greenhouse and Energy Reporting Act under which it is required to report energy consumption and greenhouse gas emissions for its operations for the twelve months ending 30 June. The Company has established data collection systems and processes to meet these reporting obligations.

DIRECTORS' REPORT**Information on Directors****S J Colin Wise LL.B, FAICD, FAusIMM** *Chairman – Non Executive*

Mr Wise is an experienced corporate lawyer, consultant and company director with significant expertise in the mining and exploration industry and resources, energy and corporate sectors. He spent 24 years with WMC Limited, 10 of which as General Counsel and subsequently, 4 years as Counsel to a New York law firm. He has extensive practical experience in Australia and internationally with a wide range of corporate, operational and legal matters.

He has been Chairman of St Barbara since mid 2004, and is a Fellow of both the Australian Institute of Company Directors and the Australasian Institute of Mining and Metallurgy. He is a member of the Advisory Board to the Dean of Medicine, Nursing and Health Sciences at Monash University and was a Non Executive Director for 5 years of Southern Health, the largest health care service in Victoria, Chair of its Quality Committee, and a member of the Audit Committee.

Remuneration report (Audited)

The remuneration report is part of the Directors' Report set out under the following main headings:

- A Principles used to determine the nature and amount of remuneration
- B Details of remuneration
- C Share based compensation
- D Service agreements

This report for the year ended 30 June 2010 was prepared by the Directors in accordance with the Corporations Act 2001 for the Company and the Group. Information regarding the compensation of individual directors and key management personnel is required by Corporations Regulations 2M3.03. This information has been audited as required by section 308(3C) of the Act. Key Management Personnel have the authority and responsibility for planning, directing and controlling the activities of the Company and the Group. The Key Management Personnel, excluding Non Executive Directors, will be collectively referred to as senior executives of the Company and the Group for the purposes of this report.

The remuneration committee is responsible for making recommendations to the Board on the remuneration arrangements for non executive directors and senior executives.

The members of the Remuneration Committee as at the date of this report are:

- B J Gibson - Chair, Non Executive Director
- D W Bailey - Non Executive Director
- R K Rae - Non Executive Director
- S J C Wise - Non Executive Director

The responsibilities of the Remuneration Committee are to review and make recommendations to the Board as appropriate with respect to:

- The remuneration of Non Executive Directors, including the Chair of the Board;
- Every aspect of remuneration for the Managing Director & CEO, including total remuneration, its fixed and variable components, short-term and long-term incentives and the determination of Key Performance Indicators (KPIs);
- The Managing Director & CEO's recommendation in relation to the annual salary review, in per cent and total amount, for the Company as a whole;
- The recommendations of the Managing Director & CEO on the remuneration of the senior executives reporting to him, the fixed and variable components of that remuneration, the participation of these executives in short and long term incentive schemes and in the determination of their Key Performance Indicators (KPIs);
- Managing Director & CEO's recommendations on the appointment or termination of senior executives reporting directly to him;

DIRECTORS' REPORT

- Any matters relating to employment and remuneration policies brought forward by the Managing Director & CEO, or the Chair of the Remuneration Committee;
- The operation and effectiveness of the Company's Employee Option Plan; and
- The Company's obligations in relation to employee benefits (including superannuation) and employee entitlements in general.

A ***Principles used to determine the nature and amount of remuneration***

(i) Summary of principles

The Company's remuneration policy and strategies are overseen by the Remuneration Committee on behalf of the Board, in accordance with ASX Corporate Governance Principles and Recommendations – Principle 8: Remunerate Fairly and Responsibly. The remuneration policy is designed to attract, reward and retain high calibre executives capable of delivering the business objectives.

Reward structures are transparent and are aligned with shareholders' interests by rewarding individual high performance, recognising the contribution of each executive to the continued growth and success of the Group, and ensuring that long term incentives are based on total shareholder return outperformance over a period of several years.

Each year, the Remuneration Committee considers the appropriate level of remuneration, as well as the mix and structure of fixed and "at risk" remuneration for each senior executive level. This is done by reference to independent data, independent professional advice where appropriate, and the Company's circumstances. The same processes apply in reviewing appropriate remuneration levels for non executive directors.

Specific remuneration strategies have been developed for senior executives to

- reward performance and delivery against agreed business objectives;
- encourage alignment between the interests of employees and shareholders;
- attract, motivate and retain high performing employees; and
- encourage productive discretionary effort.

Set out in the table below is an overview of the elements of remuneration. A more detailed discussion of each element is contained in this report.

	Elements of remuneration	Non Executive Directors	Senior Executives	Discussion in Report
Fixed remuneration	Fees	✓	✗	Page 14
	Salary	✗	✓	Page 14
	Superannuation	✓	✓	Page 15
	Other benefits	✓	✓	Page 15
At risk remuneration	Short term incentives	✗	✓	Page 15
	Long term incentives	✗	✓	Page 15
Conclusion of employment	Termination payments	✗	✓	Page 22

Strategically, Total Fixed Remuneration for each role is positioned between the median and the 75th percentile of prevailing comparable market rates, to ensure that the Company is able to attract and retain a talented and capable workforce appropriate to meet its current and anticipated needs.

The Managing Director & CEO's remuneration comprises a fixed component of 40% and a variable component of 60%. Senior executive's remuneration comprises a fixed component of 55% and variable component of 45%.

DIRECTORS' REPORT

(ii) Non Executive Directors' fees

Non Executive Directors' fees are determined within an aggregate Directors' fee pool limit, which is set and varied only by approval of a resolution of shareholders at the annual general meeting. The fee pool limit from which Non Executive Directors' fees can be drawn is currently \$750,000 per annum in aggregate (approved by shareholders in November 2005).

Fees paid to Non Executive Directors are set at levels which reflect both the responsibilities of, and the time commitments required from, each Non Executive Director to discharge his or her duties. Non Executive Directors' fees are reviewed annually by the Board, guided periodically by the advice of independent remuneration consultants to ensure fees are appropriate for the duties performed and in line with the market. In order to maintain their independence and impartiality, the fees paid to Non Executive Directors are not linked to the performance of the Company.

Superannuation contributions, in accordance with legislation, are included as part of each director's total remuneration. Directors may elect to increase the proportion of their remuneration taken as superannuation subject to legislative requirements.

For the 2010 financial year, with the exception of the Chairman, Non Executive Director fees comprised fees of \$80,000 plus an allowance for chairing a Board Committee of \$15,000, plus a fee for serving as a (non-Chair) member of a Board Committee of \$7,500. The Chairman received a fixed fee of \$190,000 as well as benefits in the form of a car park, mobile telephone allowance and other administrative benefits.

The Chairman's fee is determined independently based on comparative roles and responsibilities in the external market for companies comparable with St Barbara Limited. The Chairman is not present at any discussions relating to the determination of his own remuneration.

Non Executive Directors, including the Chairman, resolved not to increase Non Executive Director fees for the 2010 fiscal year.

(iii) Retirement allowances for Directors

Non Executive Directors are not entitled to retirement benefits.

(iv) Senior executive remuneration

Senior executive remuneration comprises both a fixed component and an at risk component, which is intended to remunerate senior executives for increasing shareholder value, achieving financial targets and effective execution of business strategies. It is also designed to attract and retain high calibre executives. The remuneration of senior executives has three components:

- fixed remuneration, comprising base salary (which is calculated on a total cost basis and includes any fringe benefits tax charges related to employee benefits), employer statutory contributions to superannuation and other defined benefits;
- short term incentives; and
- long term incentives.

The aggregate of the three components comprises a senior executive's total remuneration.

(a) Fixed remuneration – Key Management Personnel(i) Base salary

The base salary is influenced by the scope of the role and the knowledge, skills and experience required for the position. External remuneration consultants provide periodic analysis and advice to ensure the base salary is competitive for a comparable role.

Base salary for senior executives is reviewed annually as part of the Company's overall remuneration review process and is assessed against the Company's and the individual's performance. A senior executive's salary is also reviewed on promotion.

DIRECTORS' REPORT**(ii) Superannuation**

In addition to statutory superannuation contributions, senior executives may elect to contribute additional amounts, subject to legislative requirements.

(iii) Benefits

Senior executives may receive benefits, including car parking, living away from home allowances, and payment for certain professional memberships.

(b) Short term incentives (STI)

The STI is an annual “at risk” component of remuneration for the senior executives and the net amount after allowing for applicable taxation is payable in cash. The objective of the STI is to remunerate senior executives for achieving annual Company targets and their own individual performance targets. Company and individual performance targets each account for 50 percent of the maximum STI. The STI payment to senior executives is based on achievements measured against key performance indicators (KPIs) set at the beginning of the financial year. The maximum STI opportunity varies according to the role. KPIs require performance in improving operational effectiveness and the achievement of strategic financial and non-financial measures, linked to the drivers of performance in current and future reporting periods.

The Remuneration Committee is responsible for assessing the extent to which the KPIs of the Managing Director & CEO and senior executives have been achieved. To assist in making this assessment, the Committee receives detailed reports and presentations on the performance of the business from the Managing Director & CEO and independent remuneration consultants as required.

The Remuneration Committee recommends for Board approval the STI to be paid to the Managing Director & CEO and senior executives.

(c) Long term incentives (LTI)

LTI's are structured to reward senior executives for the long term performance of the Company and are granted in the form of employee options.

All employee options have been issued pursuant to the St Barbara Limited Employee Share Option Plan. Vesting of options granted during the year is conditional on the Company achieving a Total Shareholder Return relative to a peer group of companies over a three year period, as a minimum at the 50th percentile.

Refer page 20 for further information.

DIRECTORS' REPORT

B Details of remuneration*(i) Remuneration paid*

Details of the remuneration of Directors and the senior executives of the Company and the Group are set out in the following tables.

The Directors of the Company and the Group during the year ended 30 June 2010 were:

- S J C Wise Chairman
- T J Lehany Managing Director & CEO
- D W Bailey Non-executive director
- B J Gibson Non-executive director
- P C Lockyer Non-executive director
- R K Rae Non-executive director

The senior executives with the authority and responsibility for planning, directing and controlling the activities of the Company and the Group during the year ended 30 June 2010, were:

- | | | |
|------------------------|--|--|
| • Tim J Lehany | Managing Director & CEO | |
| • David Rose | Chief Operating Officer | Appointed 7 September 2009 |
| • Martin Reed | Chief Operating Officer | Resigned 11 September 2009 |
| • Garth Campbell-Cowan | Chief Financial Officer | |
| • Ross Kennedy | Executive General Manager Corporate Services/Company Secretary | |
| • Phil Uttley | Executive General Manager Discovery & Growth | Appointed 28 September 2009 |
| • Adrian McArthur | Acting General Manager Exploration | Ceased acting in position
30 September 2009 |

(1) Mr Reed resigned as Chief Operating Officer on 11 September 2009

(2) Mr Rose was appointed as Chief Operating Officer on 7 September 2009. The STI payment represents the pro-rata amount from commencement to 30 June 2010.

(3) Mr Uttley was appointed Executive General Manager Discovery & Growth on 28 September 2009. The STI represents the pro-rata amount from commencement to 30 June 2010.

(4) Mr McArthur ceased acting as General Manager Exploration on 30 September 2009.

(5) The value of options disclosed as remuneration is the portion of the fair value of the options recognised in the reporting period.

(6) For current employees, the amount represents the long service leave expense accrued for the period.

(7) Termination payments include amounts for accrued annual leave owing at the date of the employee's resignation, payment in lieu of service and other contracted payment.

(8) Represents carpark, mobile phone, and other administrative benefits.

(9) Represents a sign-on payment.

(1) Mr Lehany was appointed as Chief Executive Officer on 2 March 2009

(2) Mr Eshuys resigned on 2 March 2009.

(3) Mr Reed was appointed as Chief Operating Officer on 12 January 2009

(4) Mr Bird and Mr Thompson resigned on 4 July 2008.

(5) Mr Viska was made redundant on 30 January 2009

(6) Mr McArthur commenced as Acting General Manager Exploration on 4 July 2008.

(7) The value of options disclosed as remuneration is the portion of the fair value of the options recognised in the reporting period.

(8) For current employees, the amount represents the long service leave expense accrued for the period. For employees who resigned during the year, the amount represents the payment made to them on termination relating to pro-rated long service leave owing.

(9) Termination payments include amounts for accrued annual leave owing at the date of the employee's resignation.

(10) Living away from home allowance.

(11) Stamp duty paid on house purchase upon relocation.

(12) Represents carpark, mobile phone, and other administrative benefits.

DIRECTORS' REPORT

(ii) Cash bonuses included in remuneration (short term incentive)

The table below provides the percentage of fixed remuneration earned by senior executives under the short term incentive (STI), based on relevant performance measures having been met.

2010	Maximum potential STI		Actual STI included in remuneration	% of maximum 'Target' STI earned	% of maximum potential total STI earned	% of maximum potential total STI foregone
	Target	Stretch	\$			
T J Lehany	400,000	400,000	566,500	100%	71%	29%
D Rose	150,000 ⁽¹⁾	150,000 ⁽¹⁾	175,744	100%	59%	41%
G Campbell-Cowan	158,800	158,800	228,990	100%	72%	28%
P Uttley	105,000 ⁽¹⁾	105,000 ⁽¹⁾	140,595	100%	67%	33%
R Kennedy	140,000	140,000	168,354	100%	60%	40%

(1) Applied pro-rata for period of employment.

Target performance represents challenging but achievable levels of performance. The performance measures are split 50/50 between Company and individual executive performance measures, and comprise financial and non financial measures. The individual performance measures vary depending on the individual executive's position.

Stretch performance requires significant performance above and beyond normal expectations and if achieved is anticipated to result in a substantial improvement in key operational areas, financial results, and/or the financial position of the Company. The stretch performance measures are also split 50/50 between Company and individual executive performance measures.

Amounts included in remuneration as actual cash STI for the financial year represent the amounts accrued in relation to the 2010 financial year, based on achievement of the specified performance criteria. No additional amounts vest in future years in respect of the bonus scheme for the 2010 financial year.

Short term incentives paid in respect of the 2010 financial year reflected achievement of Company and some individual performance measures. Achieved Company measures comprised improved safety performance and the achievement of significant improvement in underlying profitability and cash position.

Individual performance measures achieved reflected value accretive and/or risk mitigation achievements for the benefit of the Company and Shareholders.

(iii) Performance of St Barbara Limited

In assessing the Group's performance and improvement in shareholder wealth, consideration is given to the following measures in respect of the current financial year and the previous four financial years:

Earnings	2010 \$	2009 \$	2008 \$	2007 \$	2006 \$
Sales revenue	296,760,000	281,129,000	143,129,000	130,911,000	115,263,000
EBITDA	33,793,000	39,701,000	12,340,000	28,364,000	13,577,000
Reported net profit/(loss) after tax	(40,188,000)	(76,344,000)	(17,333,000)	(2,894,000)	6,019,000
Underlying net profit/(loss) after tax	14,547,000	209,000	(29,291,000)	(20,653,000)	(12,435,000)

The table below provides the share price performance of the Company's shares in the 2010 financial year and the previous four financial years.

Share price history	2010	2009	2008	2007	2006
Period end share price (cents per share)	35	23	37	49	57
Average share price for the year (cents per share)	28	29	64	54	40

During the 2010 financial year, the Company's daily closing share price traded in a range of 18 to 45 cents per share (2009: 19 to 52 cents per share).

DIRECTORS' REPORT

C Share based compensation***(i) Options***

Employee options issued to Mr Lehany, Managing Director & CEO, were approved by shareholders at the Extraordinary General Meeting held on 5 May 2009. All options were granted under the St Barbara Limited Employee Option Plan, which was approved by shareholders at the 2001 Annual General Meeting of shareholders. All full time employees are eligible to participate in the plan.

Details on options over ordinary shares in the Company that were granted as compensation to each senior executive during the financial year and details of options that vested in the financial year are as follows:

2010	Number of options granted during 2010	Exercise price per option (Cents per share)	Grant date	Expiry date	Fair value per option at grant date (Cents per share)	Number of options vested during 2010
T J Lehany	5,857,320	0.287	23 Sept 2009	23 Sept 2014	0.35 ⁽¹⁾	-
D Rose	1,976,846	0.287	23 Sept 2009	23 Sept 2014	0.34	-
G Campbell-Cowan	1,744,017	0.287	23 Sept 2009	23 Sept 2014	0.34	-
P Uttley	1,537,547	0.287	23 Sept 2009	23 Sept 2014	0.34	-
R Kennedy	1,537,547	0.287	23 Sept 2009	23 Sept 2014	0.34	-

Note (1): Mr Lehany's options were issued prior to the equity raising in November 2009 and December 2009. The remaining options were issued in June 2010, and the fair value of these options reflected the effect of this equity raising.

The options were provided to the senior executives as part of their total remuneration package. The vesting of options granted in 2010 is subject to a continuing service condition as at each vesting date, and achieving a relative Total Shareholder Return for the period from the option pricing date to 30 June 2012. No options have been granted since the end of the financial year.

The Total Shareholder Return is measured against a defined peer group of companies and the percentage of options that vest is in accordance with the following rules:

Relative TSR Performance Over Measurement Period	% of Right to Vest
< 50 th percentile	0%
50 th percentile	50%
>50 th & < 75 th percentiles	Pro-rata between 50% & 75%
75 th percentile and above	100%

The peer group against which Total Shareholder Return is measured comprises:

Company	
Newcrest Mining Limited	Independence Group NL
Lihir Gold Limited	Dominion Mining Limited
Saracen Mineral Holdings Limited ⁽¹⁾	Catalpa Resources Limited ⁽¹⁾
Kingsgate Consolidated Limited	Apex Minerals NL
Avoca Resources Limited	OceanaGold Corporation

(1): During 2010, Saracen Mineral Holdings Limited and Catalpa Resources Limited replaced Sino Gold Mining Limited and Lion Selection Limited as these companies ceased to be listed on the Australian Stock Exchange.

The Board reserves the right to make changes to the peer group to allow for changing circumstances (e.g. takeover) for peer group companies.

All options expire on the earlier of their expiry date, thirty days after resignation of the relevant executive or twelve months after retirement or retrenchment.

DIRECTORS' REPORT

Options granted under the plan carry no dividend or voting rights. When exercisable, each option is convertible into one ordinary share.

The assessed fair value at grant date of options granted to the individuals is allocated equally over the period from grant date to vesting date, and the amount is included in the remuneration tables in section B. Fair values at grant date are independently determined using a Black Scholes option pricing model that takes into account the exercise price (ordinarily linked to the average closing market price for the 5 business days immediately preceding the grant date), the term of the option, the performance hurdle (relative Total Shareholder Return) the share price at grant date and expected price volatility of the underlying share, no expected dividend yield and the risk free interest rate for the term of the option.

Further information on the options is set out in Note 37 to the Financial Statements.

(ii) Exercise of options granted as compensation

During the reporting period, there were no options exercised.

(iii) Analysis of movements in the value of options granted and exercised

2010	A	B	C
	Granted in year \$	Exercised in year \$	Lapsed in year \$
T J Lehany	1,466,000	-	-
G Campbell-Cowan	401,300	-	-
D Rose	454,800	-	-
P Uttley	353,700	-	-
R Kennedy	353,700	-	-

- A The value of options granted in the year is the fair value of the options calculated at grant date using a Black-Scholes option-pricing model. The total value of the options granted is included in the table above. This amount is allocated to remuneration over the vesting period.
- B The value of options exercised during the year is calculated as the market price of shares of the Company on the Australian Securities Exchange as at close of trading on the day the options were exercised after deducting the price paid to exercise the option.
- C The value of the options that lapsed during the year represents the benefit forgone and is calculated at the date the option lapsed using a Black-Scholes option-pricing model.

(iv) Analysis of options granted as compensation

2010	Options granted					Value yet to vest	
	Number	Date	% vested in year	% forfeited in year	Financial year options vest	Minimum (A) \$	Maximum (B) \$
T J Lehany	1,508,099	6 May 2009	-	-	30 June 2012	Nil	191,165
	5,857,320	19 Nov 2009	-	-	30 June 2013	Nil	1,113,900
G Campbell-Cowan	1,744,017	23 Sep 2009	-	-	30 June 2013	Nil	154,329
	1,207,160	6 May 2009	-	-	30 June 2012	Nil	300,975
D Rose	1,976,846	23 Sep 2009	-	-	30 June 2013	Nil	341,000
Phil Uttley	1,537,547	23 Sep 2009	-	-	30 June 2013	Nil	265,275
R Kennedy	1,537,547	23 Sep 2009	-	-	30 June 2013	Nil	120,033
	940,644	6 May 2009	-	-	30 June 2012	Nil	265,275

- A The minimum value of options yet to vest is \$nil as the vesting service conditions, which are continuing service conditions and relative Total Shareholder Returns over a three year period, are still to be satisfied.
- B The maximum value of the options yet to vest represents the amount of the grant date fair value of the options that is still to be expensed in the income statement.

DIRECTORS' REPORT**D Service agreements**

Remuneration and other terms of employment for the Managing Director and CEO and the senior executives are formalised in service agreements. These agreements provide, where applicable, for the provision of performance related cash bonuses, other benefits including allowances, and participation in the St Barbara Limited Executive Option and Employee Option Plans. Other major provisions of the agreements relating to remuneration are set out below.

All contracts with senior executives may be terminated early by either party giving the required notice and subject to termination payments as detailed below.

T J Lehany – Managing Director & CEO

- Term of agreement – permanent employee commencement 2 March 2009
- Payment of a termination benefit or early termination by the Company, other than for serious misconduct or serious breach of duty:
 - a) Where 6 months notice of termination is given; an additional 6 months base salary and superannuation payment, and any entitlement to a 'stretch performance' payment plus an amount equivalent to six months of notional 'target performance' payment (at the discretion of the Board), or
 - b) Where notice of immediate termination is given, 12 months base salary and superannuation, plus an amount equivalent to 12 months of a notional 'target performance' payment (at the discretion of the Board).

D Rose – Chief Operating Officer

- Term of agreement – permanent employee commencement 11 September 2009.
- Payment of a termination benefit on early termination by the Company, other than for gross misconduct, equal to 8 months base salary and superannuation.

G Campbell-Cowan – Chief Financial Officer

- Term of agreement – permanent employee commencement 11 September 2006.
- Payment of a termination benefit on early termination by the Company, other than for gross misconduct, equal to 8 months base salary and superannuation.

R Kennedy – General Manager Corporate Services/Company Secretary

- Term of agreement – permanent employee commencement 29 September 2004.
- Payment of a termination benefit on early termination by the Company, other than for gross misconduct, equal to 6 months base salary and superannuation.

P Uttley, Executive General Manager Discovery & Growth

- Term of agreement – permanent employee commencement 28 September 2009.
- Payment of a termination benefit on early termination by the Company, other than for gross misconduct, equal to 6 months base salary and superannuation

Loans to Directors and executives

There were no loans to Directors or executives during the year (2009: Nil).

Auditor independence

A copy of the Auditor's Independence Declaration required under section 307C of the Corporations Act 2001 is set out on page 25. The Directors are satisfied that the provision of these services did not impair the auditor's independence.

DIRECTORS' REPORT

Indemnification and insurance of officers

The Company indemnifies all Directors of the Company named in this report, and a number of former Directors (including Mr Richard Knight, Mr Hank Tuten, Mr Mark Wheatley and Mr Eduard Eshuys) and current and former executive officers of the Company and its controlled entities against all liabilities to persons (other than the Company or a related body corporate) which arise out of the performance of their normal duties as Director or executive officer, unless the liability relates to conduct involving bad faith. The Company also has a policy to indemnify the Directors and executive officers against all costs and expenses incurred in defending an action that falls within the scope of the indemnity and any resulting payments.

During the year the Company paid an insurance premium for Directors and Officers Liability and Statutory Liability policies. The contract of insurance prohibits disclosure of the amount of the premium and the nature of the liabilities insured under the policy.

During the year the Company also paid the premium on a Personal Accident insurance policy on behalf of directors, to insure them for travel while on Company business.

Proceedings on behalf of the company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the Corporations Act 2001.

Environmental management

The Company regards compliance with environmental regulations as the minimum performance standard for its operations. The Company's operations in Western Australia are subject to environmental regulation under both Commonwealth and State legislation.

There were two non-compliances registered and externally reported for the Southern Cross operations during the 2010 financial year. At Leonora, there were four non-compliances registered and externally reported. This was a significant decrease in the number of incidents reported from Leonora the previous year and reflects the increased level of environmental awareness by mining and process personnel. None of the reported incidents were material in that there was minimal, if any, adverse impact on the environment. The formal reporting of two of the Leonora incidents did however generate requests from regulators for additional investigation and reporting on measures to be taken to prevent recurrence.

Non-audit services

During the year the Company did employ the auditor on assignments additional to their statutory audit duties. Details of the amounts paid or payable to the auditor, KPMG, for audit and non-audit services provided during the year are set out in Note 27 to the financial statements.

The Board of Directors has considered the position and, in accordance with the advice received from the Audit Committee, is satisfied that the provision of non-audit services during the year is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The Directors are satisfied that the provision of non-audit services by the auditor, as set out in Note 27 to the financial statements, did not compromise the auditor independence requirements of the *Corporations Act 2001* for the following reasons:

- All non-audit services have been reviewed by the Audit Committee to ensure they do not impact the impartiality and objectivity of the auditor;
- None of the services undermine the general principles relating to auditor independence as set out in APES 110 *Code of Ethics for Professional Accountants*; and
- The Audit Committee annually informs the Board of the detail, nature and amount of any non-audit services rendered by KPMG during the most recent financial year and an explanation of why the provision of these services is compatible with auditor independence. If applicable, the Audit Committee recommends that the Board take appropriate action in response to the Audit Committee's report to satisfy itself of the independence of KPMG.

DIRECTORS' REPORT**Events occurring after the end of the financial year**

The Directors are not aware of any matter or circumstance that has arisen since the end of the financial year that, in their opinion, has significantly affected or may significantly affect in future years the Company's operations, the results of those operations or the state of affairs, except for the following items:

- On 4 July 2010 the Company redeemed convertible notes with a face value of \$1,200,000. There are no more convertible notes outstanding.
- On 13 August 2010 the Company signed an asset sale agreement for the sale of its Tarmoola process plant, which is on care and maintenance and surplus to the Company's requirements, for a cash consideration of \$3,000,000.

Rounding of amounts

St Barbara Limited is a Company of the kind referred to in Class Order 98/100 approved by the Australian Securities and Investments Commission and issued pursuant to section 341(1) of the Corporations Act 2001. As a result, amounts in this Directors' Report and the accompanying Financial Report have been rounded to the nearest thousand dollars, except where otherwise indicated.

This report is made in accordance with a resolution of Directors.

For and on behalf of the Board

Dated at Melbourne this 24th day of August 2010

Timothy J Lehany
Managing Director & CEO

DIRECTORS' REPORT

*Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001*

To: the directors of St Barbara Limited

I declare that, to the best of my knowledge and belief, in relation to the audit for the financial year ended 30 June 2010 there have been:

- (i) no contraventions of the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audit; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the audit.

A handwritten signature in black ink, appearing to read 'MB', followed by a large checkmark.

DIRECTORS' DECLARATION	83
INDEPENDENT AUDIT REPORT	84

This financial report covers both St Barbara Limited as an individual entity and the Group consisting of St Barbara Limited and its subsidiaries. The financial report is presented in the Australian currency.

St Barbara Limited is a company limited by shares, incorporated and domiciled in Australia. Its registered office is:

St Barbara Limited
Level 14, 90 Collins St
Melbourne VIC 3000

A description of the nature of the Group's operations and its principal activities is included in the review of operations and activities in the directors' report, which is not part of this financial report.

The financial report was authorised for issue by the Directors on 24 August 2010. The Company has the power to amend and reissue the financial report.

FINANCIAL REPORT

CONSOLIDATED INCOME STATEMENT
For the year ended 30 June 2010

		Consolidated	
		2010	2009
	Notes	\$'000	\$'000
Revenue from continuing operations	6	296,760	281,129
Mine operating costs	9	(207,688)	(185,794)
Gross profit		89,072	95,335
Other revenue	6	6,765	5,411
Other income	7	939	223
Exploration expensed		(5,184)	(13,442)
Corporate and support costs		(21,382)	(27,089)
Royalties		(11,790)	(11,042)
Depreciation and amortisation	8,9	(71,874)	(110,104)
Other expenditure		(2,628)	(1,759)
Operating loss		(16,082)	(62,467)
Finance costs	8	(7,317)	(8,996)
Net realised/unrealised (loss)/gain on derivatives	9	(19,513)	1,451
Net realised/unrealised gain/(loss) on available for sale assets	9	2,724	(6,332)
Loss before income tax		(40,188)	(76,344)
Income tax expense	10	-	-
Loss after income tax for the year		(40,188)	(76,344)
Earnings per share for loss attributable to the ordinary equity holders of the Company:			
Basic loss per share (cents per share)	36	(2.27)	(5.63)
Diluted loss per share (cents per share)	36	(2.27)	(5.63)

The above Consolidated Income Statement should be read in conjunction with the accompanying notes.

FINANCIAL REPORT

CONSOLIDATED STATEMENT OF FINANCIAL POSITION
As at 30 June 2010

		Consolidated	
		2010	2009
	Notes	\$'000	\$'000
Assets			
Current assets

Convertible note reserve transferred to income statement	25(a)	-	(432)	-	(432)
Comprehensive income for the year		-	(25,848)	(40,188)	(66,036)
Balance at 30 June 2010		614,997	(16,677)	(248,852)	349,468

	Note	Attributable to equity holders of the Company			Total \$'000
		Contributed Equity \$'000	Reserves \$'000	Retained Earnings \$'000	
Balance at 1 June 2008		366,466	2,518	(132,320)	236,664
Equity issues (net of transaction costs)	24	128,507	-	-	128,507
Convertible notes converted to shares	24	400	-	-	400
Exercise of options	24	803	(213)	-	590
Share-based payments expense	25(a)	-	181	-	181
Unlisted options expired	25(a)	-	(213)	-	(213)
Comprehensive income for the year		-	6,687	(76,344)	(69,657)
Balance at 1 July 2009		496,176	8,960	(208,664)	296,472

The above Consolidated Statement of Changes in Equity should be read in conjunction with the accompanying notes.

FINANCIAL REPORT

CONSOLIDATED CASH FLOW STATEMENT
For the year ended 30 June 2010

	Notes	Consolidated 2010 \$'000	2009 \$'000
Cash Flows From Operating Activities:			
Receipts from customers (inclusive of GST)		293,619	282,380
Payments to suppliers and employees (inclusive of GST)		(209,774)	(251,928)
Interest received		4,575	2,940
Interest paid		(4,829)	(7,653)
Finance charges – finance leases		(1,232)	(1,223)
Borrowing costs		(554)	(192)
Net cash inflow from operating activities	34	81,805	24,324
Cash Flows From Investing Activities:			
Proceeds from sale of property, plant and equipment		276	73
Proceeds on sale of available for sale financial assets		9,907	428
Payments for property, plant and equipment		(10,210)	(48,567)
Payments for development of mining properties		(84,962)	(71,502)
Payments in respect of mines under construction		-	(28,682)
Payments for tenements and land		(686)	(388)
Proceeds on close out of put options		-	36,300
Exploration and evaluation expenditure		(7,946)	(15,990)
Net cash outflow from investing activities		(93,621)	(128,328)
Cash Flows From Financing Activities:			
Proceeds from issue of shares on conversion of options		-	590
Proceeds from borrowings: - finance leases		559	1,696
- insurance premium funding		-	2,632
Proceeds from equipment financing facility		-	20,000
Equipment financing facility transaction costs		-	(365)
Buy back and redemption of convertible notes		(75,588)	(20,565)
Convertible notes buy back transaction costs		(25)	(791)
Proceeds from equity raising		123,859	133,861
Equity raising transaction costs		(5,038)	(5,354)
Movement in unclaimed monies		-	(4)
Movement in restricted cash		23,951	(3,742)
Principal repayments - finance leases		(989)	(669)
- equipment financing facility		(4,542)	(2,621)
- insurance premium funding		(1,906)	(2,489)
Net cash inflow from financing activities		60,281	122,179
Net increase in cash and cash equivalents		48,465	18,175
Cash and cash equivalents at the beginning of the year		53,692	35,517
Cash and cash equivalents at the end of the year	11	102,157	53,692

The above Consolidated Cash Flow Statement should be read in conjunction with the accompanying notes.

FINANCIAL REPORT

Note 1 Summary of significant accounting policies

St Barbara Limited (the "Company") is a company domiciled in Australia. The consolidated financial statements of the Company as at and for the year ended 30 June 2010 comprise the Company and its subsidiaries (together referred to as the "Group"), and the Group's interest in associates and jointly controlled entities. The Group is primarily involved in the exploration for, and mining of, gold.

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation*Statement of compliance*

The financial report is a general purpose financial report, which has been prepared in accordance with Australian Accounting Standards (AASBs) (including Australian Interpretations) adopted by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*. Where required by accounting standards comparative figures have been adjusted to conform to changes in presentation in the current year. The consolidated financial report of the Group complies with International Financial Reporting Standards (IFRSs) and interpretations issued by the International Accounting Standards Board.

The financial statements were approved by the Board of Directors on 24 August 2010.

Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis, except for the following material items:

- Derivative financial instruments are measured at fair value
- Available-for-sale financial assets are measured at fair value
- Share based payment arrangements are measured at fair value
- Rehabilitation provision is measured at net present value

Critical accounting estimates

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 4.

(b) Principles of consolidation*(i) Subsidiaries*

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of St Barbara Limited ("Company" or "parent entity") as at 30 June 2010 and the results of all subsidiaries for the year then ended. St Barbara Limited and its subsidiaries together are referred to in this financial report as the Group or the Group.

Subsidiaries are all those entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies so as to obtain benefits from its activities, generally accompanying a shareholding of more than one-half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are consolidated from the date on which control commences until the date control ceases.

FINANCIAL REPORT

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Investments in subsidiaries are accounted for at cost within the Parent Entity disclosures at Note 26.

(ii) Associates and jointly controlled entities

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of voting rights. An interest in an associate and a jointly controlled entity is accounted for in the consolidated financial statements using the equity method and is carried at cost by the parent entity. Under the equity method, the share of the profits or losses of the partnership is recognised in the income statement, and the share of movements in reserves is recognised in reserves in the balance sheet.

Profits or losses on transactions establishing the joint venture entity and transactions with the joint venture are eliminated to the extent of the Group's ownership interest, until such time as they are realised by the joint venture entity on consumption or sale, unless they relate to an unrealised loss that provides evidence of the impairment of an asset transferred.

(iii) Jointly controlled operations and assets

Details of unincorporated joint ventures and jointly controlled assets are set out in Note 32.

Where material, the proportionate interests in the assets, liabilities and expenses of a joint venture activity are incorporated in the financial statements under the appropriate headings.

(c) Segment reporting

As of 1 July 2009, the Group determines and presents reportable segments based on the information that internally is provided to the CEO, who is the Group's chief operating decision maker. Refer to Note 2 for further information on new standards adopted for the 30 June 2010 financial year. Comparative segment information has been re-presented in conformity with the transitional requirements of such standard. Since the change only impacts presentation and disclosure aspects, there is no impact on earnings per share.

A reportable segment is a component of the Group that engages in business activities from which it may earn revenues or incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. The operating results of all reportable segments are regularly reviewed by the Group's CEO to make decisions about resources to be allocated to the segment and assess its performance, and for which financial information is available.

Segment results that are reported to the CEO include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly corporate assets and depreciation, and corporate expenses.

Segment capital expenditure represent the total cost incurred during the period for mine developments and acquisitions of property, plant and equipment.

(d) Foreign currency translation

(i) Functional and presentation currency

The consolidated financial statements are presented in Australian dollars, which is St Barbara Limited's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies, are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

FINANCIAL REPORT

Translation differences on non monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non monetary financial assets and liabilities, such as equities held at fair value through profit or loss, are recognised in the income statement as part of the fair value gain or loss. Translation differences on non monetary financial assets, such as equities classified as available for sale financial assets, are included in the fair value reserve in equity.

(e) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of amounts collected on behalf of third parties. The Group recognises revenue when the significant risks and rewards of ownership have been transferred to the buyer, the amount of revenue can be reliably measured, and the associated costs and possible return of goods can be estimated reliably, and it is probable that future economic benefits will flow to the Group.

Revenue is recognised for the major business activities as follows:

(i) Product sales

Amounts are recognised as sales revenue when there has been a transfer of risk to a customer, and:

- the product is in a form suitable for delivery and no further processing is required by, or on behalf of, the Group;
- the quantity, quality and selling price of the product can be determined with reasonable accuracy; and
- the product has been despatched to the metals refinery and is no longer under the physical control of the Group, or the metals refinery has formally acknowledged legal ownership of the product, including all inherent risks.

Gains and losses, including premiums paid or received, in respect of forward sales, options and other deferred delivery arrangements, which hedge anticipated revenues from future production, are deferred and included in sales revenue when the hedged proceeds are received.

(ii) Interest income

Interest income is recognised on a time proportion basis using the effective interest method.

(iii) Dividends

Dividends are recognised as revenue when the right to receive payment is established.

(iv) Gains on disposal of available-for-sale financial assets and property, plant and equipment

Revenue is recognised when the risks and rewards of ownership have been transferred, which is usually considered to occur on settlement.

(v) Toll treatment revenue

Toll treatment revenue represents revenue earned for processing third party ore through the Group's processing facilities. Revenue is recognised when the third party's product is in a form suitable for delivery, and no further processing is required by the Group, and there has been a transfer of risk to the third party.

(f) Exploration and evaluation/mine properties**(i) Exploration, evaluation and feasibility expenditure**

All exploration and evaluation expenditure incurred up to establishment of reserves is expensed as incurred. From the point in time when reserves are established, exploration and evaluation expenditure is capitalised and carried forward in the financial statements, in respect of areas of interest for which the rights of tenure are current and where such costs are expected to be recouped through successful development and exploitation of the area of interest, or alternatively, by its sale.

Exploration and evaluation expenditure consists of an accumulation of acquisition costs and direct exploration and evaluation costs incurred, together with an allocation of directly related overhead expenditure.

Feasibility expenditure represents costs related to the preparation and completion of a feasibility study to enable a development decision to be made in relation to that area of interest. Feasibility expenditures are expensed as incurred until a decision has been made to develop the area of interest.

FINANCIAL REPORT

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability, and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount (see impairment policy, Note 1(k)). For the purpose of impairment testing, exploration and evaluation assets are allocated to cash-generating units to which the exploration activity relates.

When an area of interest is abandoned, or the Directors determine it is not commercial, accumulated costs in respect of that area are written off in the period the decision is made.

(ii) Mines under construction

Mine development expenditure is accumulated separately for each area of interest in which economically recoverable reserves have been identified. This expenditure includes direct costs of construction, an appropriate allocation of overheads and borrowing costs capitalised during construction. Once a development decision has been taken, all past and future capitalised exploration, evaluation and feasibility expenditure in respect of the area of interest is aggregated with the costs of construction and classified under non-current assets as mine development.

(iii) Mine development

Mine development expenditure represents the acquisition cost and/or accumulated exploration, evaluation and development expenditure in respect of areas of interest in which mining has commenced.

When further development expenditure is incurred in respect of a mine development, after the commencement of production, such expenditure is carried forward as part of the mine development only when substantial future economic benefits are thereby established, otherwise such expenditure is classified as part of production and expensed as incurred.

Mine development costs are deferred until commercial production commences, at which time they are amortised on a unit-of-production basis over mineable reserves. The calculation of amortisation takes into account future costs which will be incurred to develop all the mineable reserves. Changes to mineable reserves are applied from the beginning of the reporting period and the amortisation charge is adjusted prospectively from the beginning of the period.

(g) Deferred mining expenditure

Certain mining costs, principally those that relate to the stripping of waste and operating development in underground operations, which provide access so that future economically recoverable ore can be mined, are deferred in the statement of financial position as deferred mining costs.

The amount of mining costs deferred is based on the ratio obtained by dividing the waste tonnes mined by the quantity of gold ounces contained in the ore. Mining costs incurred in the period are deferred to the extent that the current period waste to contained gold ounce ratio exceeds the life of mine waste to ore ratio.

Deferred mining costs are then charged against reported earnings to the extent that, in subsequent periods, the ratio falls below the life of mine ratio. The life of mine ratio is based on economically recoverable reserves of the operation.

The life of mine ratio is a function of an individual mine's design and therefore changes to that design will generally result in changes to the ratio. Changes in other technical or economic parameters may impact reserves, which will then impact the life of mine ratio. Changes to the life of mine ratio are accounted for prospectively.

In the production stage of some operations further development of the mine requires a phase of unusually high overburden removal activity that is similar in nature to pre-production mine development. The costs of such unusually high overburden removal are deferred and charged against earnings in subsequent periods on a unit-of-production basis.

In underground operations mining occurs progressively on a level-by-level basis. In these operations an estimate is made of the life of level average underground mining cost per tonne of ore mined to expense underground costs in the income statement. Underground mining costs in the period are deferred to the extent that the actual cost per tonne of ore mined on a level in the period exceeds the life of level average. Previously deferred underground mining costs are released to the income statement to the extent that the actual cost per tonne of ore mined in the period is less than the life of level average.

FINANCIAL REPORT

(h) Taxes**(i) Income tax**

The income tax expense for the year is the tax payable on the current period's taxable income using the income tax rate applicable at the reporting date, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and by changes to unused tax losses.

Deferred tax assets are recognised for deductible temporary differences and carry forward unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Current and deferred tax balances attributable to amounts recognised directly in equity are also recognised directly in equity.

The Company and its wholly owned Australian entities have not yet elected to implement the tax consolidation legislation.

(ii) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are included in the statement of cash flows on a gross basis. The GST component of cash flows arising from investing or financing activities, which are recoverable from, or payable to, the taxation authority are classified as part of operating cash flows.

(i) Leases

Leases of property, plant and equipment, where the Group has substantially all the risks and rewards of ownership, are classified as finance leases. Finance leases are capitalised at inception of the lease at the lower of the fair value of the leased property and the present value of the minimum future lease payments. The corresponding rental obligations, net of finance charges, are included in other long term payables. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases are depreciated over the shorter of the asset's useful life and the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

(j) Business combinations

The acquisition method of accounting is used to account for all business combinations. For every business combination, the Group identifies the acquirer, which is the combining entity that obtains control of the other combining entities or businesses. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Group takes into consideration potential voting rights that currently are exercisable. The acquisition date is the date on which control is transferred to the acquirer. Judgement is applied in determining the acquisition date and determining whether control is transferred from one party to another.

The group measures goodwill as the fair value of the consideration transferred including the recognised amount of any non-controlling interest in the acquire, less the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date.

FINANCIAL REPORT

Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. Consideration transferred also includes the fair value of any contingent consideration (where its fair value can be measured reliably) and share-based payment awards of the acquiree that are replaced mandatorily in the business combination. If a business combination results in the termination of pre-existing relationships between the Group and the acquiree, then the lower of the termination amount, as contained in the agreement, and the value of the off-market element is deducted from the consideration transferred and recognised in other expenses.

Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees, and other professional and consulting fees, are expensed as incurred.

(k) Impairment of assets

All assets values are reviewed at each half year to determine whether there have been any events or changes in circumstances that indicate that the carrying value may not be recoverable. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate which reflects current market assessments of the time value of money and the risks specific to the asset. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows, largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

An impairment loss is recognised if the carrying amount of an asset or its cash generating unit exceeds the recoverable amount. Impairment losses are recognised in the income statement.

(l) Cash and cash equivalents

For cash flow statement presentation purposes, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

(m) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, less provision for doubtful debts. Trade receivables are usually due for settlement no more than 30 days from the date of recognition.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off. A provision for doubtful receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the provision is recognised in the income statement.

(n) Inventories

Raw materials and stores, ore stockpiles, work-in-progress and finished gold stocks are valued at the lower of cost and net realisable value.

Cost comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure relating to mining activities, the latter being allocated on the basis of normal operating capacity. Costs are assigned to individual items of inventory on the basis of weighted average costs. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

FINANCIAL REPORT

(o) Non-current assets held for sale

Non-current assets that are classified as held for sale are stated at the lower of their carrying amount and fair value, less costs to sell, if their carrying amount is to be recovered principally through a sale transaction rather than through continued use.

An impairment loss is recognised for any initial or subsequent write down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell an asset, but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset is recognised at the date of de-recognition.

Non-current assets are not depreciated or amortised while they are classified as held for sale.

Non-current assets classified as held for sale are presented separately from the other assets in the balance sheet.

(p) Investments and other financial assets

The Group classifies its investments and other financial assets in the following categories: financial assets at fair value through profit or loss, loans and receivables, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at each reporting date.

Investments and other financial assets are recognised initially at fair value plus, for assets not at fair value through profit and loss, any directly attributable transaction costs, except as described below. Subsequent to initial recognition, investments and other financial assets are measured as described below.

(i) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading, which were acquired principally for the purpose of selling in the short term with the intention of making a profit. Derivatives are also categorised as held for trading, unless they are designated as hedges. Financial assets at fair value through profit or loss are measured at fair value and changes therein are recognised in the income statement. Attributable transaction costs are recognised in the income statement when incurred.

(ii) Loans and receivables

Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Loans and receivables are included in receivables in the balance sheet and are shown in Note 12.

Loans and receivables are measured at amortised cost using the effective interest method, less any impairment losses.

(iii) Available-for-sale financial assets

Available for sale financial assets, comprising principally marketable equity securities, are non derivative financial assets that are either designated in this category or not classified in any of the other categories. They are included in non current assets, unless management intends to and can dispose of the investment within 12 months of the balance sheet date.

Subsequent to initial recognition, available-for-sale financial assets are measured at fair value and changes therein, other than impairment losses, are recognised as a separate component of equity net of attributable tax. When an asset is derecognised the cumulative gain or loss in equity is transferred to the income statement.

(q) Derivative financial instruments

Derivative financial instruments may be held to protect against the Group's Australian dollar gold price risk exposures. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item

FINANCIAL REPORT

being hedged. The Group designates certain derivatives as either (1) hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or (2) hedges of the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedges).

The Group documents at the inception of the hedging transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been, and will continue to be, highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative financial instruments used for hedging purposes are disclosed in Note 22. Movements in the hedging reserve in shareholders' equity are shown in Note 25.

(i) Cash flow hedge

The fair value of option contracts comprises intrinsic value, that is, the extent to which the components of an option collar are in the money due to spot prices falling below or rising above the option strike prices, and time value.

The effective portion of changes in the intrinsic value of derivatives that are designated and qualify as cash flow hedges is recognised in equity in the hedging reserve. The gain or loss relating to the ineffective portion and time value is recognised immediately in the income statement.

Amounts accumulated in equity are recycled in the income statement in the periods when the hedged item will affect profit or loss (for instance, when the forecast sale that is hedged takes place). The gain or loss relating to the effective portion of the financial instrument hedging Australian dollar gold sales is recognised in the income statement within 'gold sales revenue'.

When a hedging instrument expires or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

(ii) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement.

(r) Compound financial instruments

Compound financial instruments issued by the Group comprise convertible notes that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in the fair value of the notes.

The liability component of a compound financial instrument is recognised initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognised initially at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortised cost using the effective interest method, unless it is designated at fair value through profit and loss. The equity component of a compound financial instrument is not remeasured subsequent to initial recognition.

(s) Fair value estimation

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement, or for disclosure purposes.

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available for sale securities) is based on quoted market prices at the balance sheet date. The quoted market

FINANCIAL REPORT

price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of financial instruments that are not traded in an active market (for example, over the counter derivatives) is determined using generally accepted valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance date.

The nominal value less estimated credit adjustments of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

(t) Property, plant and equipment

Buildings, plant and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation of assets is calculated using the straight line method to allocate the cost or revalued amounts, net of residual values, over their estimated useful lives, as follows:

- Buildings	10 – 15 years
- Plant and equipment	3 - 10 years
- Fixtures and fittings	10 – 15 years

Where the carrying value of an asset is less than its estimated residual value, no depreciation is charged. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount, if the asset's carrying amount is greater than its estimated recoverable amount (Note 1(k)).

Gains and losses on disposal are determined by comparing proceeds with carrying amount. These gains and losses are included in the income statement when realised.

(u) Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year, which remains unpaid as at reporting date. The amounts are unsecured and are usually paid within 30 days from the end of the month of recognition.

(v) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities, which are not incremental costs relating to the actual draw down of the facility, are recognised as prepayments and amortised on a straight line basis over the term of the facility.

The fair value of the liability portion of convertible debt is determined using a market interest rate for an equivalent nonconvertible debt. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or maturity of the debt. The remainder of the proceeds is allocated to the conversion option. This is recognised and included in shareholders' equity, net of income tax effects.

FINANCIAL REPORT

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

(w) Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time it is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are recognised as expenses in the period in which they are incurred.

(x) Provisions

Provisions, including those for legal claims and rehabilitation and restoration costs, are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring has commenced or has been announced publicly. Future operating costs are not provided for.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the balance sheet date. The discount rate used to determine the present value reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

(y) Employee benefits**(i) Wages and salaries, and annual leave**

Liabilities for wages and salaries, including non-monetary benefits and annual leave expected to be paid within 12 months of the reporting date are recognised in other payables in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid, including expected on-costs, when the liabilities are settled.

(ii) Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made, plus expected on-costs, in respect of services provided by employees up to the reporting date. Consideration is given to the expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(iii) Share-based payments

Share-based compensation benefits are provided to employees via the St Barbara Limited Employees' Option Plan and shareholder approved executive options. Information relating to these schemes is set out in Note 37.

The fair value of Executive Options and options granted under the St Barbara Limited Employees' Option Plan is recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date and recognised over the period during which the employees become unconditionally entitled to the options. The amount recognised is adjusted at each reporting date to reflect the actual number of share options not expected to vest.

The fair value at grant date is independently determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the vesting and performance criteria, the impact of dilution, the non-tradeable nature of the option, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk-free interest rate for the term of the option.

FINANCIAL REPORT

Upon the exercise of options, the balance of the share-based payments reserve relating to those options is transferred to share capital.

(iv) *Retirement benefit obligations*

Contributions to defined contribution funds are recognised as an expense as they are due and become payable. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

The Group has no obligations in respect of defined benefit funds.

(v) *Executive incentives*

Senior executives may be eligible for Short Term Incentive payments ("STI") subject to achievement of Key Performance Indicators, as recommended by the Remuneration Committee and approved by the Board of Directors. The Group recognises a liability and an expense for STIs in the reporting period during which the service was provided by the employee.

(vi) *Termination benefits*

Termination benefits are recognised as an expense when the Group is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to terminate employment before normal retirement date.

(z) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

If the entity reacquires its own equity instruments, e.g. as the result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the income statement and the consideration paid including any directly attributable incremental costs is recognised directly in equity.

(aa) Earnings per share

(i) *Basic earnings per share*

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the reporting period, adjusted for bonus elements in ordinary shares issued during the reporting period.

(ii) *Diluted earnings per share*

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

(ab) Restricted cash

Funds placed on deposit with financial institutions to secure bank guarantees are classified as current receivables.

(ac) Rehabilitation and mine closure

The Group has obligations to dismantle, remove, restore and rehabilitate certain items of property, plant and equipment and areas of disturbance during mining operations.

Under AASB 116 *Property, Plant and Equipment*, the cost of an asset must include any estimated costs of dismantling and removing the asset and restoring the site on which it is located. The capitalised rehabilitation and mine closure costs are depreciated (along with the other costs included in the asset) over the asset's useful life.

AASB 137 *Provisions, Contingent Liabilities and Contingent Assets* requires a provision to be made for the estimated cost of rehabilitation and restoration of areas disturbed during mining operations up to reporting date

FINANCIAL REPORT

but not yet rehabilitated. Provision has been made in full for all the disturbed areas at the reporting date based on current estimates of costs to rehabilitate such areas, discounted to their present value based on expected future cash flows. The estimated cost of rehabilitation includes the current cost of contouring, topsoiling and revegetation to meet legislative requirements. Changes in estimates are dealt with on a prospective basis as they arise.

There is some uncertainty as to the amount of rehabilitation obligations that will be incurred due to the impact of changes in environmental legislation and many other factors, including future developments, changes in technology and price increases.

At each reporting date the rehabilitation liability is remeasured in line with changes in the timing and /or amounts of the costs to be incurred and discount rates. The liability is adjusted for changes in estimates. Adjustments to the estimated amount and timing of future rehabilitation and restoration cash flows are a normal occurrence in light of the significant judgments and estimates involved.

As the value of the provision represents the discounted value of the present obligation to restore, dismantle and rehabilitate, the increase in the provision due to the passage of time is recognised as a borrowing cost.

(ad) Rounding of amounts

The company is of a kind referred to in Class Order 98/0100, issued by the Australian Securities and Investments Commission, relating to the “rounding off” of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, the nearest dollar.

(ad) New accounting standards and interpretations

The following standards, amendments to standards and interpretations have been identified as those which may impact the Group in the period of initial application. They are available for early adoption at 30 June 2010, but have not been applied in preparing this financial report.

- (i) AASB 9 *Financial Instruments* includes requirements for the classification and measurement of financial assets resulting from the first part of Phase 1 of the project to replace AASB 139 *Financial Instruments: Recognition and Measurement*. AASB 9 will become mandatory for the Group’s 30 June 2014 financial statements. Retrospective application is generally required, although there are exceptions, particularly if the entity adopts the standard for the year ended 30 June 2012 or earlier. The Group has not yet determined the potential effect of the standard.
- (ii) AASB 124 *Related Party Disclosures* (revised December 2009) simplifies and clarifies the intended meaning of the definition of a related party and provides a partial exemption from the disclosure requirements for government-related entities. The amendments, which will become mandatory for Group’s 30 June 2012 financial statements, are not expected to have any impact on the financial statements.
- (iii) AASB 2009-5 *Further amendments to Australian Accounting Standards arising from the Annual Improvements Process* impact various AASBs resulting in minor changes for presentation, disclosure, recognition and measurement purposes. The amendments, which become mandatory for the Group’s 30 June 2011 financial statements, are not expected to have a significant impact on the financial statements.
- (iv) AASB 2009-8 *Amendments to Australian Accounting Standards - Group Cash-settled Share-based Payment Transactions* resolves diversity in practice regarding the attribution of cash-settled share-based payments between different entities within a group. As a result of the amendments AI 8 *Scope of AASB 2* and AI 11 *AASB 2 - Group and Treasury Share Transactions* will be withdrawn from the application date. The amendments, which become mandatory for the Group’s 30 June 2011 financial statements, are not expected to have a significant impact on the financial statements.
- (v) AASB 2009-10 *Amendments to Australian Accounting Standards - Classification of Rights Issue* [AASB 132] (October 2010) clarifies that rights, options or warrants to acquire a fixed number of an entity’s own equity instruments for a fixed amount in any currency are equity instruments if the entity offers the rights, options or warrants pro-rata to all existing owners of the same class of its own non-derivative equity

FINANCIAL REPORT

instruments. The amendments, which will become mandatory for the Group's 30 June 2011 financial statements, are not expected to have any impact on the financial statements.

- (vi) IFRIC 19 *Extinguishing Financial Liabilities with Equity Instruments* addresses the accounting by an entity when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor of the entity to extinguish all or part of the financial liability. IFRIC 19 will become mandatory for the Group's 30 June 2011 financial statements, with retrospective application required. It is not expected to have any impact on the financial statements.

Note 2 New Standards adopted

(i) Determination and presentation of operating segments

The Company has applied the requirements of AASB 8 *Operating Segments* for the first time, which became effective for the current reporting date. The Company had previously reported segments based on the commodity and region it had operated in – being 'gold' and 'Australia'. AASB 8 requires segments to be identified based on internal reports that are reviewed and used by the chief operating decision maker in assessing performance and in determining the allocation of resources.

The Company has determined that two reportable segments exist: Leonora Operations and Southern Cross Operations. Discrete information for each of these operating business units are reported to the Chief Executive Officer and his management team on at least a monthly basis.

Segment information on the reportable segments is disclosed in Note 5 to the financial statements. Comparative information has been re-presented so it is in conformity with the new standard.

(ii) Presentation of financial statements

The Company has applied revised AASB 101 'Presentation of Financial Statements' for the first time, which became effective for the current reporting period. As a result the Company has presented in the consolidated statement of changes of equity all owner related changes in equity, whereas all non-owner changes in equity are presented in the statement of comprehensive income. Comparative information has been re-presented so it is in conformity with the revised standard.

(iii) Disclosure of parent entity statements

Amendments to the *Corporations Act 2001* contained in the *Corporations Amendment Bill 2010* received royal assent during the year. One of the key amendments was to remove the requirement to include full parent entity financial statements when preparing consolidated financial statements. The Company has applied these changes to these financial statements. Parent entity disclosures now required by the *Corporations Amendment Regulations 2010* are included in Note 26.

Note 3 Financial risk management

This note presents information about each of the financial risks that the Group is exposed to, the policies and processes for measuring and managing financial risk, and the management of capital. Further quantitative disclosures are included throughout this financial report.

The Group's activities expose it to a variety of financial risk, being: market risk (especially gold price and exchange rate risk), credit risk, liquidity risk and cash flow interest rate risk. The Group's overall risk management program focuses on the unpredictability of commodity markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group may use derivative instruments as appropriate to manage certain risk exposures.

Risk management is carried out by a centralised treasury function in accordance with policies approved by the Board of Directors.

(a) Market risk

Market risk is the risk that changes in market prices, such as commodity prices, foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments, cash flows and financial position. The Group may enter into derivatives, and also incur financial liabilities, in order to manage market risks. All such transactions are carried out within guidelines set by the Board.

FINANCIAL REPORT

i) *Commodity price risk*

The Group is exposed to Australian dollar gold price risk. This risk arises through the sale of gold.

The table below shows the effect of the 5 year average annual Australian dollar gold price movement on the trade receivables balance at year end:

	5 year average annual price movement	Change in trade receivables	
		2010 \$'000	2009 \$'000
Commodity: gold (AUD)	21%	1,759	889

The Group is managing commodity price risk in relation to a specific future mining operation, still to be developed and commissioned, by using a combination of gold put options and gold call options to create a zero-cost option collar structure as described in (b) below.

ii) *Currency risk*

The Group is exposed to currency risk on gold sales where the Australian dollar spot gold price is quoted as a function of US dollars and the prevailing exchange rate. The Group may from time to time use Australian dollar derivatives to manage the commodity and currency rates.

iii) *Interest rate risk*

The Group's main interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the Group to cash flow interest rate risk. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. The Group's interest rate policy does not require a fixed and pre-determined proportion of its interest rate exposure to be hedged. Any decision to hedge interest rate risk will be assessed at the inception of each floating rate debt facility in relation to the overall Group exposure, the prevailing interest rate market, and any funding counterparty requirements.

(b) Cash flow hedges

The Group may from time to time be party to derivative financial instruments in the normal course of business to protect future revenue from gold operations from a significant fall in the Australian dollar price of gold, in accordance with the Group's financial risk management policies.

During June 2010, the Company entered into a hedging facility for 250,000 ounces of gold over a five year period to manage Australian dollar gold price risk associated with the estimated production from the King of the Hills mine. The facility was fully drawn down by purchasing put options and selling call options over 250,000 ounces of gold (collar structure) with the following strikes:

- Bought put options at A\$1,425/oz
- Sold call options at A\$1,615/oz

The maturity profile of the put and call option contracts as at 30 June 2010 is provided in the table below.

Strike Price	Total ounces	6 months or less ounces	6 – 12 months ounces	1 – 2 years ounces	2 – 5 years ounces	More than 5 years ounces
Put: A\$1,425/oz	250,000	-	12,000	63,000	175,000	-
Call: A\$1,615/oz	250,000	-	12,000	63,000	175,000	-

At the date of entering into the collar structure, the net fair value of the put and call options was zero dollars. At 30 June 2010, the fair value of all remaining put and call option contracts was negative \$38,674,000. \$19,513,000 of this negative fair value represented an unrealised loss related to time value of the put options, and was recognised immediately in the income statement (refer to note 1(q)). The remaining \$19,161,000 of the negative fair value represented an unrealised loss related to the intrinsic value of the options, and was recognised in the hedging reserve in equity.

FINANCIAL REPORT

The relationship between currencies, spot gold price and volatilities is complex and changes in the spot gold price can influence volatility, and vice versa.

The following table summarises the impact of a A\$50 change in the Australian dollar gold price (all other variables held constant) on the valuation of the gold option fair values.

Gold Price Sensitivity	Impact on post-tax result		Impact on equity net of tax	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
+A\$50 change in AUD spot price	(2,460)	-	(8,752)	-
-A\$50 change in AUD spot price	2,460	-	8,752	-

(c) Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract. The Group is exposed to credit risk from its operating activities (primarily customer receivables) and from its financing activities, including deposits with banks and financial institutions and derivatives.

The maximum exposure to credit risk at the reporting date is the carrying amount of the financial assets, other than available for sale assets.

Credit risks related to receivables

The Group's most significant customer accounts for \$8,294,000 of the trade receivables carrying amount at 30 June 2010 (2009: \$4,192,000), representing receivables owing from gold sales. Settlement of the receivables relating to gold sales occurred on 2 July 2010. Based on historic rates of default, the Group believes that no impairment has occurred with respect to trade receivables, and none of the trade receivables at 30 June 2010 were past due.

Credit risks related to cash deposits and derivatives

Credit risk from balances with banks and financial institutions derivative counterparties is managed by the centralised Treasury function in accordance with Board approved policy. Investments of surplus funds are only made with approved counterparties (minimum Standard & Poor's credit rating of "AA-") and there is a financial limit on funds placed with any single counterparty.

Derivative transactions are only made with approved counterparties (minimum Standard & Poor's credit rating of "AA-"), and more than one counterparty is used when tranches of derivatives are entered into. Derivatives transactions cover only a small proportion of total Group production with maturities occurring over a period of time (refer Note 3(b)).

(d) Capital management

The Group's total capital is defined as total shareholders' funds plus net debt.

Consolidated capital	2010 \$'000	2009 \$'000
Total shareholders' funds	349,468	296,472
Borrowings	15,909	97,541
Cash and cash equivalents ⁽¹⁾	(15,909)	(53,692)
Total capital	349,468	340,321

(1) Cash and cash equivalents are included to the extent that the net debt position is nil.

The Group does not have a target debt/equity ratio. There were no changes in the Group's approach to capital management during the year.

The Group is not subject to externally imposed capital requirements other than normal banking requirements.

Cash and cash equivalents does not include cash held on deposit with a financial institution as security for a bank guarantee facility totalling \$388,000 (2009: \$24,339,000) at the reporting date.

FINANCIAL REPORT

Borrowings include \$1,200,000 of convertible notes on issue (2009: \$77,100,000). During the 2010 financial year, the company repaid \$75,900,000 of convertibles notes. The remaining \$1,200,000 was repaid by the Company in July 2010 (refer Note 33) under the terms of the notes, which allowed the Company to compulsorily repay the convertible notes if the outstanding balance was less than 10% of the face value of the notes when issued (\$100,000,000).

On 13 May 2010, the Company refinanced its performance bond facility. A \$25,000,000 performance bond facility was entered into with the National Australia Bank Limited (NAB) to provide security for performance obligations incurred in the ordinary course of business. The NAB facility replaced a cash backed facility previously provided by another counterparty. The NAB facility does not require cash backing. Security is provided in the form of a fixed and floating charge over the Company's assets (except those held as security for the GE facility and other finance leases), and mining tenements held by the Company. Under the terms of the NAB facility, there are a number of undertakings related to the performance of the Company, and non-compliance with these undertakings could constitute an event of default. Under the terms of the facility the Company has up to 90 days to remedy or rectify a non-compliance event in relation to the undertakings.

In November 2009 the Company received net proceeds from the issue of new shares to institutional shareholders of \$70,792,000. In December 2009 the Company received net proceeds from the issue of new shares to retail shareholders of \$48,029,000.

On 21 August 2009, the Company entered into a A\$50,000,000 Equity Line standby facility from US-based investment fund YA Global. Under the terms of the facility St Barbara may, at its discretion, issue ordinary shares to YA Global at any time over a 60 month period up to a total of A\$50,000,000. There has been no draw down under this facility.

Shares issued to YA Global will be priced at the lowest of the daily volume weighted average prices of the Company's shares traded on each of the 10 trading days following an advance draw down notice by St Barbara. A commission of 4% will be payable to YA Global on the proceeds of each issue of shares at the time of the issue. The Company nominates in advance the amount in relation to each draw down under the facility. The advance amount for the first and second draw down is limited to \$750,000 and \$1,500,000 respectively, and thereafter the advance amount shall not exceed \$3,000,000 in any 10-day trading period.

During 2008 the Company signed a \$20,000,000 loan facility agreement with GE Commercial Finance to fund the construction and purchase of certain infrastructure assets at Gwalia. The facility is secured against the equipment financed and is repayable over 48 months. The interest rate is the 90 day bank bill rate plus an interest margin of 2.8%. Under the terms of the GE facility, there are a number of undertakings related to the performance of the Company, and non-compliance with these undertakings could constitute an event of default. Under the terms of facility the Company has up to 90 days to remedy or rectify a non-compliance event in relation to the operational undertakings.

(e) Liquidity risk

Prudent liquidity risk management requires maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

The Group manages liquidity risk by continuously monitoring forecast and actual cash flows and matching maturity profiles of financial assets and liabilities.

Surplus funds are invested in instruments that are tradeable in highly liquid markets.

FINANCIAL REPORT

Maturities of financial liabilities

The table below analyses the Group's financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Maturity of financial liabilities - 2010						
\$'000	Less than 6 months	6 – 12 months	Between 1 and 5 years	Over 5 years	Total contractual cash flows	Carrying amount
Convertible notes	1,208	-	-	-	1,208	1,200
Finance lease liabilities	534	369	1,281	-	2,184	1,994
Equipment finance facility	2,957	2,977	8,090	-	14,024	12,921
Trade and other payables	37,558	-	-	-	37,558	37,558
Derivative financial liabilities ⁽¹⁾	-	338	38,336	-	38,674	38,674
	42,257	3,684	47,707	-	93,648	92,347

(1) Represents the mark-to-market valuation of the option collar structure, and does not represent a contractual cash flow. The mark-to-market valuations at 30 June 2010 will change over time as contracts mature, or with changes in the spot gold price and other option pricing variables.

Maturity of financial liabilities - 2009						
\$'000	Less than 6 months	6 – 12 months	Between 1 and 5 years	Over 5 years	Total contractual cash flows	Carrying amount
Convertible notes	3,084	80,184	-	-	83,268	77,100
Finance lease liabilities	564	466	1,671	-	2,701	2,484
Equipment finance facility	2,833	2,866	13,520	-	19,219	17,464
Insurance premium funding liability	1,345	620	-	-	1,965	1,906
Trade and other payables	38,376	-	-	-	38,376	38,376
	46,202	84,136	15,191	-	145,529	137,330

(f) Fair value estimation*On-Balance Sheet*

The net fair value of cash and cash equivalents and non-interest bearing monetary financial assets and financial liabilities of the Group approximates their carrying value. The net fair value of other monetary financial assets and financial liabilities is based upon market prices.

The fair value of the gold put and call options is as disclosed in Note 4(vii).

Off-Balance Sheet

The Group has potential financial liabilities that may arise from the contingency disclosed in Note 28. As explained in that note, no material losses are anticipated in respect of any of that contingency, subject to the outcome of the judgement and any subsequent appeal in the Kingstream matter. Fair values for off-balance sheet assets or liabilities are the Directors' estimate of amounts which would be payable by the Group as consideration for the assumption of those contingencies by another party.

FINANCIAL REPORT

Fair values

The carrying amounts and the net fair values of financial assets and liabilities of the Group at balance date are:

	2010		2009	
	Carrying Amount \$'000	Net Fair Value \$'000	Carrying Amount \$'000	Net Fair Value \$'000
Financial assets				
- Cash and cash equivalents	102,157	101,861	53,692	53,692
- Restricted cash	388	388	24,339	24,339

	92,347	92,328	137,330	133,614

Note 4 Critical Accounting Estimates and Judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates under different assumptions and conditions. Estimates and judgements are continually evaluated and are based on historical experience and on various other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognised in the period in which the estimate is changed and in any future periods affected.

The Group has identified the following critical accounting policies under which significant judgements, estimates and assumptions are made, and where actual results may differ from these estimates under different assumptions and conditions that could materially affect financial results or financial position reported in future periods.

(i) Ore reserve estimates

Reserves are estimates of the amount of gold product that can be economically extracted from the Group's properties. In order to calculate reserves, estimates and assumptions are required about a range of geological, technical and economic factors, including quantities, grades, production techniques, recovery rates, production costs, future capital requirements, short and long term commodity prices and exchange rates.

Estimating the quantity and/or grade of reserves requires the size, shape and depth of ore bodies to be determined by analysing geological data. This process may require complex and difficult geological judgements and calculations to interpret the data.

The Group determines and reports ore reserves under the Australian Code for Reporting of Mineral Resources and Ore Reserves December 2004, known as the JORC Code. The JORC Code requires the use of reasonable investment assumptions to calculate reserves. Due to the fact that economic assumptions used to estimate reserves change from period to period, and geological data is generated during the course of operations, estimates of reserves may change from period to period.

FINANCIAL REPORT

Changes in reported reserves may affect the Group's financial results and financial position in a number of ways, including:

- Asset carrying values may be impacted due to changes in estimated future cash flows.
- Depreciation and amortisation charged in the income statement may change where such charges are calculated using the units of production basis.
- Underground capital development and waste stripping costs deferred in the balance sheet or charged in the income statement may change due to a revision in stripping ratios.
- Decommissioning, site restoration and environmental provisions may change where changes in estimated reserves affect expectations about the timing or cost of these activities.

(ii) Units of production method of amortisation

The Group applies the units of production method for amortisation of its life of mine specific assets, which results in an amortisation charge proportional to the depletion of the anticipated remaining life of mine production. These calculations require the use of estimates and assumptions in relation to reserves and resources, metallurgy and the complexity of future capital development requirements; changes to these estimates and assumptions will impact the amortisation charge in the income statement and asset carrying values.

(iii) Impairment of assets

The Group assesses impairment of all assets at each reporting date by evaluating conditions specific to the Group and to the particular assets that may lead to impairment. The recoverable amount of each Cash Generating Unit (CGU) is determined as the higher of value-in-use and fair value less costs to sell, in accordance with accounting policy 1(k). These calculations require the use of estimates, which have been outlined in accounting policy 1(k). Value-in-use is generally determined as the present value of the estimated future cash flows. Present values are determined using a risk adjusted discount rate appropriate to the risks inherent in the asset.

Given the nature of the Group's mining activities, future changes in assumptions upon which these estimates are based may give rise to a material adjustment to the carrying value of the CGU. This could lead to the recognition of impairment losses in the future. The inter-relationships of the significant assumptions upon which estimated future cash flows are based, however, are such that it is impracticable to disclose the extent of the possible effects of a change in a key assumption in isolation.

Future cash flow estimates are based on expected production volumes, the short and long term forecasts of the Australian dollar gold price, ore reserves, operating costs, future capital expenditure and restoration and rehabilitation costs. Management is required to make these estimates and assumptions, which are subject to risk and uncertainty. As a result there is a possibility that changes in circumstances will alter these projections, which could impact on the recoverable amount of the assets. In such circumstances some or all of the carrying value of the assets may be impaired, giving rise to an impairment charge in the income statement.

Value in use in relation to the Group's Leonora and Southern Cross cash generating units at 30 June 2010 was determined by discounting the future cash flows generated from the continuing use of each operation and was based on the following key assumptions:

- Cash flows were projected based on the life of mine plan of each operation, which is predominantly based on ore reserves.
- Revenue was projected at an average gold price of A\$1,300 per ounce for the first year of the operation, and a long term gold price of A\$1,250 per ounce.
- Cash operating costs take into consideration an estimate of inflation.
- A pre-tax nominal discount rate of 11.4% based on the weighted average cost of capital.

The above estimates are particularly sensitive to a change in the gold price.

(iv) Exploration and evaluation expenditure

As set out in Note 1(f) exploration and evaluation expenditure is capitalised where reserves have been established for an area of interest and it is considered likely to be recoverable from future exploitation or sale. The accounting policy requires management to make certain estimates and assumptions as to future events and circumstances, in particular whether an economically viable extraction operation can be established. These estimates and assumptions may change as new information becomes available. If, after having capitalised the expenditure under the accounting policy, a judgement is made that recovery of the expenditure is unlikely, the relevant capitalised amount will be written off to the income statement.

FINANCIAL REPORT

(v) Rehabilitation and mine closure provisions

As set out in Note 1(x), the value of these provisions represents the discounted value of the present obligation to restore, dismantle and rehabilitate each site. Significant judgement is required in determining the provisions for mine rehabilitation and closure as there are many transactions and other factors that will affect the ultimate costs necessary to rehabilitate the mine sites. The discounted value reflects a combination of management's best estimate of the cost of performing the work required, the timing of the cash flows and the discount rate.

A change in any, or a combination of, the key assumptions used to determine the provisions could have a material impact on the carrying value of the provisions (refer to Note 23). The provision recognised for each site is reviewed at each reporting date and updated based on the facts and circumstances available at the time. Changes to the estimated future costs for operating sites are recognised in the balance sheet by adjusting both the restoration and rehabilitation asset and provision.

In estimating the rehabilitation provision at 30 June 2010, the following assumptions were made:

- Timing of rehabilitation outflows were based on the life of mine plan of each operation, with the rehabilitation of legacy areas of disturbance scheduled accordingly.
- Mine demolition costs are estimated on the basis of the expected mine life of each operation. Costs are adjusted for potential receipts through the sale of scrap metal.
- Inflation is not applied to cost estimates.
- A pre-tax real discount rate of 8% based on the weighted average cost of capital.

(vi) Deferred tax

The Group has not recognised a net deferred tax asset of \$71,626,000 as at 30 June 2010 (2009: \$53,247,000) on the basis that the ability to utilise the temporary differences and tax losses is not probable as at the reporting date.

(vii) Derivative financial instruments

The Group assesses the fair value of its gold bought put and sold call options (the "collar structure") at each reporting date.

At 30 June 2010, the fair value of the collar structure was negative \$38,674,000. An amount of \$19,513,000 represented an unrealised loss related to time value of the options, and was recognised immediately in the income statement (refer to note 1(q)). An unrealised loss related to the intrinsic value of the options of \$19,161,000 was recognised in the gold cash flow hedge reserve in equity.

Fair values have been determined using a 'Level 2' valuation method involving the use of a generally accepted option valuation model: inputs are based on market observable data for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices), at the reporting date and compared with valuations provided by the counterparties to the collar structure. These calculations require the use of estimates and assumptions. Any changes in assumptions in relation to gold prices and volatilities could have a material impact on the fair valuation attributable to the gold collar structure at the reporting date. When these assumptions change in the future the differences will impact the gold cash flow hedge reserve and/or income statement in the period in which the change occurs.

FINANCIAL REPORT

Note 5 Segment Information

The Company has two reportable segments, Leonora and Southern Cross Operations, which are also the Company's operating segments. The operational business units are managed separately due to their separate geographic regions.

Information regarding the operations of each reportable segment is included below. Performance is measured based on segment profit before income tax, as this is deemed to be the most relevant in assessing performance after taking into account factors such as cost per ounce of production.

	Leonora		Southern Cross		Total	
	2010	2009	2010	2009	2010	2009

FINANCIAL REPORT

Note 9 Significant items

Significant items are those items where their nature or amount is considered material to the financial report. Such items included within the consolidated results for the period are detailed below.

	Consolidated	
	2010	2009
	\$'000	\$'000
Included within net realised/unrealised gains on derivatives		
Net realised/unrealised (loss)/gain on gold cash flow hedges ⁽¹⁾	(19,513)	1,515
Included within corporate costs		
Redundancy payments	-	(3,877)
Restructuring provisions	-	(1,957)
	-	(5,834)
Impairment write downs included within mine operating costs		
Underground deferred operating mine development at Marvel Loch ⁽²⁾	(22,581)	-
Open pit mine development	-	(16,904)
	(22,581)	(16,904)
Impairment write downs included within depreciation and amortisation		
Southern Cross assets ⁽²⁾	(11,583)	(40,488)
Marvel Loch capitalised exploration ⁽²⁾	(3,782)	(8,650)
	(15,365)	(49,138)
Included within realised/unrealised (gain)/loss on available for sale assets		
Write down of listed investments to fair value	-	(6,192)
Gain on sale of Bendigo Mining Limited ⁽³⁾	2,724	-
	2,724	(6,192)
Total significant items	(54,735)	(76,553)

(1) Net realised/unrealised (loss)/gain on gold cash flow hedges

The gold bought put and sold call options (collar structure) were put in place during the year to manage the Australian dollar gold price risk associated with 250,000 ounces of future King of the Hills production. At 30 June 2010 the unrealised mark-to-market value of the collar structure was negative \$38,674,000. In accordance with accounting standards, the unrealised loss related to time value of the options of \$19,513,000 was recognised immediately in the income statement. The unrealised loss related to the intrinsic value of the options of \$19,161,000 was recognised in the hedging reserve in equity (refer note 25(a)). Over time this unrealised mark-to-market loss will reverse either through a change to the mark-to-market value of the options or maturity of the contracts.

(2) Impairment write down of Southern Cross assets

Based on an assessment of the Southern Cross operations cash-generating unit at 30 June 2010, an impairment write down was taken against assets of the unit. The impairment write down was caused by lower than expected future net cash flows from the Southern Cross operations as a result of a reduction in the estimated mine life, based on drilling during the year that encountered pegmatite intrusions which closed off the resources potential. The revised cash flow estimates from the base case mine plan no longer supported full recovery of the carrying value of the Southern Cross cash-generating unit assets, including capitalised mine operating development, plant and equipment and capitalised exploration.

(3) Gain on sale of Bendigo Mining Limited

At 31 December 2008 an impairment loss of \$6,192,000 in relation to the investment in Bendigo Mining Limited was recognised in the income statement. A mark-to-market gain as at 30 June 2009 in relation to this investment of \$6,687,000, which would ordinarily have reversed the impairment loss recognised in the income statement in the period ended 31 December 2008, was recorded in the investment fair value reserve in accordance with Australian Interpretation 10. In August 2009 the investment in Bendigo Mining Limited was sold for \$9,909,000, which gave rise to the transfer of the amount in the investment fair value reserve to the income statement resulting in a net gain on sale of \$2,724,000 recognised as "Other Income".

FINANCIAL REPORT

Term deposits	52,000	35,000
	102,157	53,692

Cash placed on deposit to secure a bank guarantee facility (classified as 'Restricted Cash') is reported as current 'Other Receivables' in Note 12.

(a) Cash at bank and on hand

Cash at bank at 30 June 2010 invested "at call" was earning interest at an average rate of 6.00% per annum (2009: 2.59% per annum).

(b) Deposits

The deposits at 30 June 2010 were earning interest rates of between 5.45% and 6.25% per annum (2009: between 2.95% and 3.80% per annum).

Note 12 Trade and other receivables

	Consolidated	
	2010	2009
	\$'000	\$'000
Current assets		
Trade receivables	8,328	4,192
Other receivables	3,910	3,928
Restricted cash ⁽¹⁾	388	24,339
Prepayments	2,854	2,477
	15,480	34,936

(1) Restricted cash at 30 June 2010 is cash placed on deposit to secure 23 bank guarantees in respect of obligations entered into for environmental performance bonds issued in favour of the Western Australian Department of Industry and Resources. These deposits earned interest at an average interest rate of 4.45%.

(a) Effective interest rates and credit risk

Information concerning the effective interest rate and credit risk of receivables is set out in Note 16.

Note 13 Inventories

	Consolidated	
	2010	2009

(a) Listed securities

During the year, the Group sold its investments in listed securities.

FINANCIAL REPORT

Note 16 Financial instruments**(a) Credit Risk Exposures**

Refer Note 3 for the Group's exposure to credit risk.

(b) Interest Rate Risk Exposures

The Group's exposure to interest rate risk and the effective weighted average interest rate by maturity periods is set out in the following tables. Exposures arise predominantly from assets and liabilities bearing variable interest rates as the Group intends to hold fixed rate assets and liabilities to maturity.

2010	Fixed Interest Maturing in				
	Floating Interest rate \$'000	1 year or less \$'000	Over 1 to 5 years \$'000	Non- interest bearing \$'000	Total \$'000

(a) Security

As at 30 June 2010, plant and equipment with a carrying value of \$30,302,553 (2009: \$31,854,000) is pledged as security for an equipment finance facility and finance leases (Note 21).

In accordance with the security arrangements in relation to commercial banking facilities, all remaining assets of the Group have been pledged as security to the National Australia Bank Limited and Barclays Bank PLC for a performance bond and hedging facilities. During the year, and as at 30 June 2010, there were no events of default or breaches in relation to these facilities.

(a) Interest rate risk exposures

Details of the Group's exposure to interest rate changes on borrowings are set out in Note 16.

FINANCIAL REPORT

(b) Convertible notes

On 4 December 2009, the Company accepted offers from holders of \$15,350,000 of notes to buy back the notes at a discount of 2% to the original issue price. The repayment was made in two tranches, with convertible notes with a face value of \$13,000,000 repaid on 4 December 2009, and convertible notes with a face value of \$2,350,000 repaid on 18 January 2010.

On 1 March 2010, \$1,750,000 of convertible notes was bought back for 99.7% of face value.

On 12 March 2010, \$38,050,000 of convertible notes was bought back at face value.

On 4 June 2010, convertible notes with a total face value of \$20,750,000 were redeemed as a consequence of note holders exercising their put options on this date.

As an event occurring after balance sheet date, on 4 July 2010, the remaining convertible notes were redeemed for the face value of \$1,200,000.

(c) Equipment finance facility

During 2008 the Company signed a \$20,000,000 loan facility agreement with GE Commercial Finance to fund the construction and purchase of certain infrastructure assets at Gwalia. The facility is secured against the equipment financed and is repayable over 48 months. The interest rate is the 90 day bank bill rate plus an interest margin of 2.8%. Under the terms of the GE facility there are a number of undertakings related to the performance of the Company, and non-compliance with these undertakings could constitute an event of default. Under the terms of facility the Company has up to 90 days to remedy or rectify a non-compliance event in relation to the undertakings. During the year there were no events of default or breaches under this facility.

(d) Set-off of assets and liabilities

The parent entity has established a legal right of set-off with a financial institution over cash on deposit to secure the issue of bank guarantees for the purpose of environmental performance bonds. At 30 June 2010 restricted cash for this purpose amounted to \$388,000 (2009: \$24,339,000).

(iv) Shares issued on exercise of unlisted options held by executives and employees
(v) Institutional rights issue completed on 13 November 2009
(vi) Retail rights issue completed on 10 December 2009

(c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the Company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

(d) Options

Information relating to the St Barbara Employee Option Plan and Executive Options, including details of options issued, exercised and lapsed during the financial year and options outstanding at the end of the financial year, is set out in Note 37.

FINANCIAL REPORT

Balance at start of year	432	432
Transfer to income statement	(432)	-
Balance at end of year	-	432

(b) Accumulated losses

Movements in accumulated losses were as follows:

	Consolidated	
	2010	2009
	\$'000	\$'000
Balance at start of year	(208,664)	(132,320)
Loss attributable to members of the Company	(40,188)	(76,344)
Balance at end of year	(248,852)	(208,664)

(c) Investment fair value reserve

Changes in the fair value arising on translation of investments, such as equities, classified as available-for-sale financial assets, are taken to the available-for-sale investments revaluation reserve, as described in Note 1(p). Amounts are recognised in the income statement when the associated assets are sold or impaired. During the year the cumulative gain recognised in the reserve in prior years, together with the movements in fair value for the year, was recognised in the income statement.

FINANCIAL REPORT

(d) Share based payments reserve

The share based payments reserve is used to recognise the fair value of options issued to executives and employees but not exercised.

(e) Gold cash flow hedge reserve

At each balance sheet date, a mark-to-market valuation of the Company's gold bought put options and sold call options (the "collar structure") is performed. Where the hedge is effective, changes in fair value relating to the intrinsic portion of the valuation are recognised in the gold cash flow hedge reserve. If the underlying options expire, the reserve relating to the expired options reverses against the derivatives liability.

Note 26 Parent Entity disclosures

As at, and throughout, the financial year ended 30 June 2010, the parent company of the Group was St Barbara Limited.

(a) Financial statements

	Notes	Company	
		2010 \$'000	2009 \$'000

Other services	4	-
Total remuneration for non-audit services	99	-

Note 28 Contingencies**(a) Contingent liabilities and assets**

The Company and consolidated entity have a contingent liability at 30 June 2009 in respect of the following legal claim:

Kingstream

On 2 July 2002, Kingstream Steel Limited (now Midwest Corporation Limited) ("Kingstream") commenced proceedings in the Supreme Court of Western Australia against the Company and its 100% owned subsidiary, Zygot Ltd ("Zygot") (together, "St Barbara"). In early 2005, Kingstream obtained the leave of the Court to substitute the trustees of Kingstream Steel's Creditors Trust as plaintiffs in these proceedings, namely Bryan Kevin Hughes and Vincent Anthony Smith. Mr Smith resigned as a trustee and Mr Hughes ("Hughes") has been the sole plaintiff since 30 January 2008.

Hughes's claim against St Barbara arose from the withdrawal by Zygot of three mining lease applications ("MLAs") in September 2001. Hughes alleged that these applications were part of the subject matter of an Option Deed between St Barbara and Kingstream dated 26 March 1997 as supplemented by a Deed dated 20 January 1998 and a letter dated 29 January 1999 from St Barbara's lawyers to Kingstream. Kingstream exercised the option in February 1999. Hughes sought damages from St Barbara relying upon causes of action based on rectification of the Supplemental Deed, allegations of breach of contract, breach of duty of care, estoppel and unilateral mistake.

The action was heard in the Supreme Court of Western Australia between 2 and 19 June 2009. The Trial Judge delivered his Reasons for Decision on 30 June 2010 in which he concluded that Hughes had failed to establish any liability on the part of St Barbara or its subsidiary, Zygot. On 30 June 2010 the Court ordered that the action be dismissed. All claims by St Barbara for its costs of proceedings have been resolved by Hughes' litigation funder, IMF (Australia) Limited, agreeing to pay the sum of \$1,500,000 to St Barbara in full satisfaction thereof. On 21 July 2010 Hughes served a Notice of Appeal, which is not likely to be heard before mid-2011.

FINANCIAL REPORT

(b) Bank guarantees

The Group has negotiated bank guarantees in favour of various government authorities and service providers. The total of these guarantees at 30 June 2010 was \$21,131,000 (2009: \$24,339,000). Security is provided to the National Australia Bank Limited ("NAB") (refer Note 17) for \$20,743,000 of this amount through a fixed and floating charge over the Group's assets. Cash held on deposit with the Commonwealth Bank of Australia secures the remaining \$388,000 as at 30 June 2010 (refer to Note 12).

Under the terms of the NAB facility, there are a number of undertakings related to the performance of the Company. Non compliance with these undertakings could constitute an event of default. In the year, and as at 30 June 2010, there were no events of default or breaches under the facility.

(c) Gold bought put and sold call options

The Company negotiated a 250,000 ounce hedge facility with National Australia Bank Limited (NAB) and Barclays Bank PLC ("Barclays"). During the year this facility was fully drawn down through the purchase of put options over 250,000 ounces at a strike price of A\$1,425 per ounce, and sale of call options over 250,000 ounces at a strike price of A\$1,615 per ounce.

Security is provided to NAB and Barclays through a fixed and floating charge over the assets of the Group, excluding assets securing an equipment finance facility and finance leases.

Under the terms of the hedge facility there are a number of undertakings related to the performance of the Company. Non compliance with these undertakings could constitute an event of default. In the year, and at 30 June 2010, there were no events of default or breaches under the facility.

Note 29 Commitments for expenditure**Exploration**

In order to maintain rights of tenure to mining tenements, the Group is committed to tenement rentals and minimum exploration expenditure in terms of the requirements of the Western Australian Department of Industry and Resources. This requirement will continue for future years with the amount dependent upon tenement holdings

(d) Weighted average number of shares

	Consolidated	
	2010	2009
	Number	Number
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share	1,768,083,968	1,356,057,153
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted earnings per share	1,768,083,968	1,356,057,153

(e) Information concerning the classification of securities**(i) Options**

Executive Options and Options granted to employees under the St Barbara Limited Executive Option and Employee Option Plans are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share to the extent to which they are dilutive. The options have not been included in the determination of basic earnings per share. Details relating to the options are set out in Note 37.

(ii) Convertible Notes

The outstanding balance of convertible notes on issue at 30 June 2010 was \$1,200,000. The convertible notes have not been included in the determination of diluted earnings per share for the 2010 year on the basis that the outstanding balance was repaid on 4 July 2010.

FINANCIAL REPORT

Note 37 Share-based payments

(a) Employee Option Plan

The establishment of the St Barbara Limited Employee Option Plan was approved by shareholders at the 2001 Annual General Meeting. Options are granted as part of an employee's total remuneration package. Options are granted for a three to five year period.

Options granted under the plan carry no dividend or voting rights.

When exercisable, each option is convertible into one ordinary share.

Set out below are summaries of options granted to employees under the St Barbara Limited Employee Option Plan approved by shareholders:

Consolidated and parent entity – 2010								
Grant Date	Expiry Date	Exercise Price	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Expired during the year Number	Balance at end of the year Number	Exercisable at end of the year Number

01 Jul 06	30 Jun 11	\$0.491	1,750,000	-	-	500,000	1,250,000	1,250,000
11 Sep 06	11 Sep 11	\$0.496	2,360,000	-	-	360,000	2,000,000	2,000,000
01 Dec 06	01 Dec 11	\$0.549	500,000	-	-	-	500,000	250,000
26 Mar 07	26 Mar 12	\$0.490	2,000,000	-	-	2,000,000	-	-
21 May 07	21 May 12	\$0.512	1,000,000	-	-	1,000,000	-	-
06 May 09	02 Mar 14	\$0.400	-	1,508,099	-	-	1,508,099	-
06 May 09	03 Apr 14	\$0.430	-	5,361,672	-	-	5,361,672	-
Total			13,610,000	6,869,771	5,000,000	3,860,000	11,619,771	4,500,000
Weighted average exercise price			\$0.34	\$0.42	\$0.12	\$0.50	\$0.44	\$0.45

The weighted average remaining contractual life of share options outstanding at the end of the year was 3.6 years (2009: 3.6 years).

FINANCIAL REPORT

Following the 4 for 13 accelerated non-renounceable entitlement offer to shareholders completed in December 2009, which raised \$124,000,000 (before costs), the exercise price of the unlisted options was adjusted pursuant to the formula contained in ASX Listing Rule 6.22.2. The adjustments were as follows:

Grant Date	No. of options	Original Exercise Price	Adjusted Exercise Price
30 September 2005	1,000,000	\$0.298	\$0.279
1 July 2006	1,250,000	\$0.491	\$0.472
11 September 2006	2,000,000	\$0.496	\$0.477
1 December 2006	500,000	\$0.549	\$0.530
6 May 2009	1,508,099	\$0.400	\$0.381
6 May 2009	5,361,672	\$0.430	\$0.411
23 September 2009	5,857,320	\$0.306	\$0.287

Fair value of options granted

The assessed fair value at grant date of options granted during the year ended 30 June 2010 was calculated for each issue of options. The fair value at grant date is independently determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option.

The model inputs for options granted during the year ended 30 June 2010 included:

- (a) Options are granted for no consideration. The vesting of options granted in 2010 is subject to a continuing service condition as at each vesting date, and relative Total Shareholder Returns over a three year period. The peer group against which Total Shareholder Return is measured is presented in the Directors' Report (page 21). The percentage of options that vest relative to Total Shareholder Returns is set out in the table below.

Relative TSR Performance Over Measurement Period	% of Option to Vest
< 50 th percentile	0%
50 th percentile	50%
>50 th & < 75 th percentiles	Pro-rata between 50% & 100%
75 th percentile and above	100%

Total Shareholder Return is measured against a peer group of companies.

- (b) Exercise price is ordinarily the closing market price on the grant date.
- (c) Grant date varies with each issue.
- (d) Expiry date is 5 years from grant date.
- (e) Share price varies at grant date with each issue and ranged from \$0.287 to \$0.306 per share.
- (f) Price volatility of the Company's shares as at the grant date varied with each issue, and ranged from 81.0% to 86.0%.
- (g) Risk-free interest rate at grant date is based on bond rates for a similar term as for the options.

FINANCIAL REPORT

(b) Expenses arising from share-based payment transactions

Total expenses/(gains) arising from equity settled share-based payment transactions recognised during the year as part of the employee benefit expenses were as follows:

	Consolidated	
	2010	2009
	\$'000	\$'000
Options issued/expired under employee option plan	643	(32)

(1) Mr Eshuys resigned on 2 March 2009. Movements in shareholdings (purchases, sales, and exercise of options) have been disclosed up to this date. 'Other Changes' represents the balance of Mr Eshuys's shareholdings at the date of his resignation.

FINANCIAL REPORT

DIRECTORS' DECLARATION

In the Directors' opinion:

- (a) the consolidated financial statements and notes set out on pages 26 to 82 are in accordance with the *Corporations Act 2001*, including:
 - i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
 - ii) giving a true and fair view of the Group's financial position as at 30 June 2010 and of their performance, as represented by the results of their operations, changes in equity and their cash flows, for the financial year ended on that date; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
- (c) the audited remuneration disclosures set out on pages 12 to 22 of the Directors' report comply with Accounting Standards AASB 124 *Related Party Disclosures* and the *Corporations Regulations 2001*.

The Directors have been given the declarations by the chief executive officer and chief financial officer for the year ended 30 June 2010 required by section 295A of the *Corporations Act 2001*.

The Directors draw attention to Note 1(a) to the financial statements, which include a statement of compliance with International Financial Reporting Standards.

This declaration is made in accordance with a resolution of the Directors.

Timothy J Lehany
Managing Director & CEO

FINANCIAL REPORT

**Independent auditor's report to the members of St Barbara Limited****Report on the financial report**

We have audited the accompanying financial report of the Group comprising St Barbara Limited (the Company) and the entities it controlled at the year's end or from time to time during the financial year, which comprises the consolidated statement of financial position as at 30 June 2010, and consolidated income statement and consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year ended on that date, a description of significant accounting policies and other explanatory notes 1 to 38 and the directors' declaration.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In note 1, the directors also state, in accordance with Australian Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial report, comprising the financial statements and notes, complies with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We performed the procedures to assess whether in all material respects the financial report presents fairly, in accordance with the *Corporations Act 2001* and Australian Accounting Standards (including the Australian Accounting Interpretations), a view which is consistent with our understanding of the Group's financial position and of its performance.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

Auditor's opinion

In our opinion:

(a) the financial report of the Group is in accordance with the *Corporations Act 2001*, including:

FINANCIAL REPORT

- (i) giving a true and fair view of the Group's financial position as at 30 June 2010 and of its performance for the year ended on that date; and
- (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001.

(b) the financial report also complies with International Financial Reporting Standards as disclosed in note 1.

Report on the remuneration report

We have audited the Remuneration Report included in pages 12 to 22 of the directors' report for the year ended 30 June 2010. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with Section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with auditing standards.

Auditor's opinion

In our opinion, the remuneration report of St Barbara Limited for the year ended 30 June 2010, complies with Section 300A of the *Corporations Act 2001*.
