

2016 Investor Presentation

Bank of America Merrill Lynch - Global Metals & Mining Conference
11 May 2016

ASX: SGM
USOTC: SMSMY
www.simsmm.com

Business Highlights

Company

- Global leader in metals and electronics recycling with over \$6 billion in annual sales revenue
- Operations in 20 countries with balanced sales mix across ferrous and non-ferrous metals
- Best in class people, technology, trading, and logistics

Strategy & Strengths

- Strong business processes with internal initiatives to deliver double-digit return on capital by FY18
- Ability to maintain healthy metal margins through the cycle and improve cost flexibility
- Net cash position, providing balance sheet strength and capital management

Strong core metals recycling business and diversification through electronics recycling

Metals Recycling

- 10.5m tonnes of secondary metals sales in FY15
- 200+ facilities with operations in 6 countries
- Export capabilities across North America, UK and Australasia, with 13 deep water ports globally
- Global market leader

Electronics Recycling

- 600,000 tonnes of electronics recycled annually
- 30+ facilities across 16 countries
- Emerging opportunities in IT asset management and engineering solutions
- Development of innovative recycling technology useful to both electronics and metals recycling businesses

**Sales Revenue
By Business (FY15)**

Balanced sales mix

~40% of sales generated by non-ferrous & other products

Ferrous Metals	
Heavy Melt Steel	Bundles & Bales
Shredded Steel	Plate & Structural
Non-Ferrous Shred Recovery	
Zorba (aluminium based)	Zurik (stainless steel based)
Non-Ferrous Metals	
Aluminium	Copper
Lead	Nickel
Zinc	Used Beverage Cans
Electronics Recycling	
Precious Metals	Copper
Shredded Circuit Boards	IT Asset Management
Municipal Recycling	
Plastics	Paper
Metals	Glass

**Sales Revenue
By Product (FY15)**

Diverse supply base

Post Industrial	%
Stampings & clippings	12-14%
Borings & turnings	3-5%
Other	1-3%
Total	~20%
Obsolete Material	%
Construction & demolition	20-30%
Passenger vehicles	15-25%
Major appliances	5-10%
Other light iron	5-10%
Stainless steel	3-5%
Other	15-20%
Total	~80%

Key Supplier Groups

Best in class assets and operations

- 27 high-powered metal shredders across 5 countries
- Best-in-class non-ferrous metals separation technology
- Dedicated engineering teams
- Industry leading metal-yield and waste reduction methods

Largest global trade network with export and domestic customers in 60 countries

Capturing export or domestic premiums through industry's deepest trading network

Export vs Domestic Price Premium

Export Advantages

- Exporting from the US, UK & Australasia, with 13 deep water ports globally
- 15 global trading offices across 5 continents, trading to 60 countries
- ~10% market share of global trade

Domestic Advantages

- Market leader across the largest cities in the US: New York, LA, and Chicago
- Low cost domestic freight channels through rail and barge assets

5 year strategic target to deliver double-digit return on capital by FY18

Internal initiatives to Optimise key profit drivers for stronger earnings through the cycle

Key Profit Drivers

Raw Material Availability

- Leading market position in large urban centers to **retain and grow volumes**

Supplier Relationships

- Strengthening supplier networks to **grow volumes** and market share

Logistics

- Improving inbound & outbound transport capabilities to **lower freight expense**

Operational Excellence

- Drive continuous improvement to **lower operational expenses**
- Improve processing yields on non-ferrous and **grow metal spreads**

Product Quality & Service

- Lead on product quality to **grow metal spreads** and market share

Volume break-even lowered with upside leverage retained when volumes recover

- Internal initiatives will have reduced the volume break-even point for EBIT by over 40% by the end of FY16
- Despite cost reductions, majority of processing capacity has been retained
- Retained capacity could process additional volumes of approximately 45%, with limited impact on fixed costs

Capital management strategy:

Maintaining a strong balance sheet is the first priority

Cash Management

- Preservation of cash for future working capital requirements

Sustaining Capex

- Ongoing maintenance, safety and Environmental
- Technology and equipment

Expansion Capex

- Capital spending to support optimising initiatives
- Invest in organic & acquisitive growth

Capital Management

- Share buy-back
- Dividends

Net Cash of \$373 million¹

- Strong and consistent free cash flow

Reinvesting back into the business

- FY16 capex expected to be between \$100 to \$120 million
- Balance sheet well positioned for expansionary opportunities

Share buy-back and dividends

- On-market share buy-back to repurchase up to 10% of issued capital
- Dividend payout policy 45-55% of NPAT

Market Update: Improved market fundamentals has driven higher ferrous demand and prices

Turkey: Import Ferrous Scrap vs Export Rebar Spread

- Market has dramatically changed during the first quarter of 2016, with China once again driving the market
- Steel mills in China tightened domestic supply and started to increase prices after their New Year holiday
- Turkey's billet imports from China dropped to half the levels in 2H 2015
- A mix of lower billet imports, short scrap supply, and wider spreads on export billet have been key factors in the increased scrap prices in Turkey
- More recent steel prices in China are down, however even a correction equal to half the recent gain would still be a manageable level for the industry

Market Update: Strong 2H FY16 earnings recovery

A\$m	FY13	FY14	FY15	FY16 Forecast
Underlying EBIT	67	119	142	Exit Run Rate \$140 million
Return on Capital	2.3%	4.6%	5.5%	Exit Run Rate 6%

2H FY16 Market Update

- Significant earnings recovery expected during 2H FY16, driven by incremental strategic initiatives to reduce operational costs, improve metal margins, and lower break-even point
- Ferrous metal prices have increased substantially since the start of 2H FY16, however intake volumes remain tight
- FY16 exit run-rate for underlying EBIT and return on capital is expected to be \$140 million and 6% respectively
- FY17 return on capital is expected to improve further, based on internal initiatives, even at current market conditions
- The Company is well positioned to benefit from volume improvement due to the significantly reduced cost base, lower volume break-even point, and available global processing capacity

Summary

- Global leader in metals and electronics recycling
- **Lifting through the cycle earnings** by lower costs and higher metal margins
- On track to deliver **double-digit return on capital by FY18**
- Significant **net cash position**, providing balance sheet strength and capital management flexibility
- **FY16 exit run-rate for underlying EBIT** and return on capital, expected to be **\$140 million** and 6% respectively, is confirmed
- FY17 return on capital is expected to improve further, based on internal initiatives, even at current market conditions
- The Company is **well positioned to benefit from volume improvement** due to the significantly reduced cost base, lower volume break-even point, and available global processing capacity
