**ASX RELEASE** **29 October 2025**

# US$321k (A$489k) in purchase orders secured and strong pipeline from exclusive Indian distributor Euroteck

**New GR Series Jet Blowers expands scope to municipal contracts worth up to US$500k (A$762k) each**

**Highlights**

- **US$321k (A$489k) in new purchase orders received from exclusive Indian distributor Euroteck, reflect accelerating market traction across India's wastewater sector**
- **Orders follow co-branded Euroteck–Sprintex launch at IFAT Mumbai 2025 and commissioning of seven GR90 Jet Blowers at Delhi Jal Board's 45 MGD Kondli Sewage Treatment Plant – one of India's largest wastewater facilities**
- **Both parties well positioned to capitalise on near term pipeline valued at US$1.357m (A$2.067m), spanning over a dozen municipal, industrial, and pharmaceutical opportunities across India**
- **Several major Delhi Jal Board tenders expected in the coming weeks, with Kondli serving as a key reference installation for future large-scale projects**
- **New GR Series Jet Blowers offering ~20% higher efficiency and 80,000-hour oil-free operation for expands addressable project scope to municipal contracts worth up to US$500k (A$762k) each**
- **Sprintex units now being supplied to Hershey's Chocolate (India) to enhance wastewater treatment efficiency, complementing previous successful industrial installations**
- **Developments strengthen Euroteck's trajectory toward its US$4.56m (A$6.95m) three-year distribution commitment and reinforce SIX's emergence as a preferred clean-energy technology partner**

Sprintex Limited **(ASX: SIX)** (**Sprintex** or **Company**) is pleased to advise that it has received new purchase orders totalling US$321k (A$489k) from its exclusive Indian distributor, Euroteck Environmental Pvt Ltd ("Euroteck"), underpinning strong progress in the Indian market following several key strategic milestones.

These orders follow the successful co-branded Euroteck – Sprintex launch at IFAT Mumbai 2025, where Sprintex introduced its new GR Series (22–150 kW) high-capacity Jet Blowers, and the successful commissioning at the Delhi Jal Board ("DJB") Kondli 45 MGD Sewage Treatment Plant, which is one of India's largest wastewater facilities.

Sprintex and Euroteck are now positioned to capture substantial opportunities in India's fast-expanding wastewater sector, supported by Euroteck's weighted project pipeline of approximately US$1.357m (A$2.067m) and an expected wave of new DJB tenders to be awarded in the coming weeks.

**Strategic Expansion in India:**

These initial purchase orders are part of the Company's exclusive three-year distribution agreement with Euroteck (refer ASX announcement: 16 December 2024), which is valued at US$4.56m (A$6.95m) and contains a minimum commitment of 3,000 G-Series Jet Blowers.

Since stablishing the initial agreement, Euroteck has leveraged its nationwide presence and deep expertise in wastewater treatment to promote Sprintex's high-efficiency, oil-free Jet Blowers for municipal and industrial applications.

The partnership integrates Sprintex's ultra-high-speed blower technology with Euroteck's IntelHydro™ AI-based IoT monitoring platform, providing customers with real-time insights into aeration performance and energy consumption, reducing operational costs and supporting ESG compliance.

As part of the partnership, Sprintex's new GR Series (22–300 kW) were launched at the IFAT Mumbai 2025 conference, garnering strong industry interest. These next-generation systems deliver up to 20% higher efficiency than comparable turbo blowers, operate oil-free and maintenance-free for up to 80,000 hours, and enable Sprintex to target large-scale municipal wastewater tenders valued between US$200k (A$305k) and US$500k (A$762k) per project.

**Pipeline potential and tender outlook to underpin strong revenue generation from the Indian market:**

Highlighting further opportunities across the country, Euroteck have advised that its weighted project pipeline is currently valued at US$1.357m (A$2.067), which spans over a dozen opportunities across industrial, pharmaceutical, and municipal sectors nationwide.

Alongside this, Sprintex and Euroteck expect several Delhi Jal Board tenders to be announced in the coming weeks, with Kondli serving as a key reference installation. This has the potential to deliver additional revenue opportunities, prior to the end of CY25 and support ongoing expansion in-country.

**Delhi Jal Board (Kondli) commissioning completed:**

As part of the ongoing engagement with Euroteck, seven new Sprintex GR90 (90kW units) units have been successfully commissioned at DJB's Kondli 45 MGD plant, demonstrating superior energy efficiency and reliability under Indian operating conditions.

The commissioning of Sprintex Jet Blowers at DJB's Kondli 45 MGD Sewage Treatment Plant represents significant operational validation. Kondli is among the largest wastewater facilities managed by Delhi Jal Board, and performance data from this site is expected to inform design specifications for upcoming DJB tenders.

Sprintex and Euroteck anticipate this successful installation will accelerate the adoption of Sprintex's technology across multiple new DJB projects in the Delhi region.

**Global recognition for energy efficiency and additional sales opportunities:**

Alongside its growing presence in India, Sprintex continues to gain recognition from major multinational corporations seeking to reduce operating costs and improve sustainability outcomes.

In the coming weeks, two G25-820 Sprintex Jet Blowers will be supplied to Hershey's Chocolate's (HERSHEY INDIA PVT LTD.), supporting on-site treatment and energy optimisation within its factory operations.

This provides another opportunity for the Company to demonstrate the benefit of its technology with a major international counterparty. The work alongside Hershey's Chocolate is expected to complement a successful installation at SEA LIFE Sunshine Coast, where Sprintex technology delivered a 99% first-year return on investment and 72% energy reduction (refer ASX announcement: 7 April 2025).

These projects, alongside well-known international brands demonstrate Sprintex's emergence as the preferred choice for global leaders pursuing measurable OPEX and carbon-footprint savings through clean, oil-free aeration systems.

**Revenue impact of new India purchase orders:**

The new purchase orders reinforce Euroteck's strong trajectory toward its US$4.56m (A$6.95m) three-year commitment, with recurring orders demonstrating growing market confidence in Sprintex's technology.

With the introduction of the GR Series high-capacity Jet Blowers, Sprintex can now serve large municipal installations with project values four to five times higher than typical G15-based applications.

India has become Sprintex's second-largest market after Türkiye, supported by rising investment in energy-efficient wastewater infrastructure under the country's Smart Cities Mission and Ganga Rejuvenation Program.

**Management commentary:**

**CEO and Managing Director, Mr Jay Upton, said:** *"Euroteck's strong execution continues to demonstrate the scalability of Sprintex's technology in the Indian market. These new orders, the successful commissioning at Delhi Jal Board's Kondli plant, and the highly positive reception of our GR Series at IFAT Mumbai collectively confirm our strategic positioning as a leading supplier of clean energy solutions to a rapidly growing market.*

*The approval of the joint Euroteck – Sprintex brand will enhance customer recognition and further strengthen our competitive edge as we target the upcoming wave of major DJB tenders. With Euroteck's established service infrastructure and AI-enabled monitoring platform, we are well placed to deliver sustained growth in one of the world's most dynamic wastewater markets."*

*This ASX announcement has been authorised for release by the Board of Sprintex Limited.*

**About Sprintex:**

Sprintex, established in Australia in 2003, is a prominent company specialising in the engineering, research, product development, and manufacturing of ultra high-speed electric motors and clean air compressors. The Company is dedicated to creating energy-efficient solutions for various applications, significantly impacting both industrial and automotive sectors. Sprintex's innovation-driven approach has positioned it as a leader in the development of clean air technologies, continually advancing the standards in these industries.

In the industrial sector, Sprintex's G Series blowers are designed for high-speed air movement in wastewater treatment, aquaculture, paper milling, and pharmaceuticals, ensuring efficient and reliable performance. Additionally, Sprintex develops fuel cell compressors for clean energy applications, particularly in hydrogen and natural gas fuel cells, promoting sustainable energy solutions. In the automotive realm, the Company focuses on enhancing hybrid and petrol vehicles with high-speed electric motor-driven compressors, while its legacy in twin screw superchargers continues to influence modern advancements.

**Forward Looking Statements:**

This announcement contains 'forward-looking information' that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the Company's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this announcement are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance, or achievements to be materially different from those expressed or implied by such forward looking information.
