8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Yes, with exploration activities continuing at Zaranou in the September quarter it is anticipated that current net operating cash flows will continue on for at least the three months of July to September. Drilling will likely be completed by the September quarter end and it is forecast that a significant reduction in project expenditure will occur in the December quarter.		

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The Company continues to assess funding requirements based on the level of forecast exploration activity and other potential expenditure and will assess funding options, including raising equity funds, when appropriate. The Company has received strong support on previous equity raises and with the success of the current exploration program believes it would likely be successful in raising further funds as required.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes. The Board believes that the Company's current exploration activities are very positive, and when combined with strong historic support from its current institutional and retail shareholders, it is confident that future equity raises, as required to fund ongoing operations, will be successful.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.
