Acquisition of GX2
Technology
3 November 2017

About GX2 Technology

GX2 is a leading provider of managed guest WiFi connectivity including design, installation and support via their leading GX2 software platform. GX2 supports high performance WiFi network solutions for its customers from hospitality, student accommodation, US national parks and education sectors.

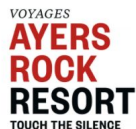

GX2's unique product integrates seamlessly with a vast array of wired and wireless technologies to provide a highly configurable internet access gateway, cloud based management tools, and 24/7/365 technical support.

GX2 has been connecting customers to the Internet for 20 years.

The acquisition of GX2 has significant strategic benefits for the Superloop Group and addresses each of the previously stated objectives for investment or acquisition. In particular, the acquisition:

- is strategically aligned to our vision to be the most trusted enabler of connectivity and managed services in Asia Pacific;
- accelerates our ability to significantly expand our community broadband campus solutions to our broader customer base in Australia and overseas;
- has a team that is focused, dedicated and culturally aligned with Superloop's existing team;
- is earnings accretive; and
- has technology, software and systems that will add significant value to the combined group and assist in further strengthening our offerings to the market.

GX2 operates a compelling software platform providing a managed service for over 200 customers at over 350 sites with 75% in the Asia Pacific region and the balance across the United States and United Kingdom. It is able to service more than 50,000 guests daily and offers strong customer technical support with a customer service centre that operates 24 hours a day, from Australia, United Kingdom and the United States, following the sun.

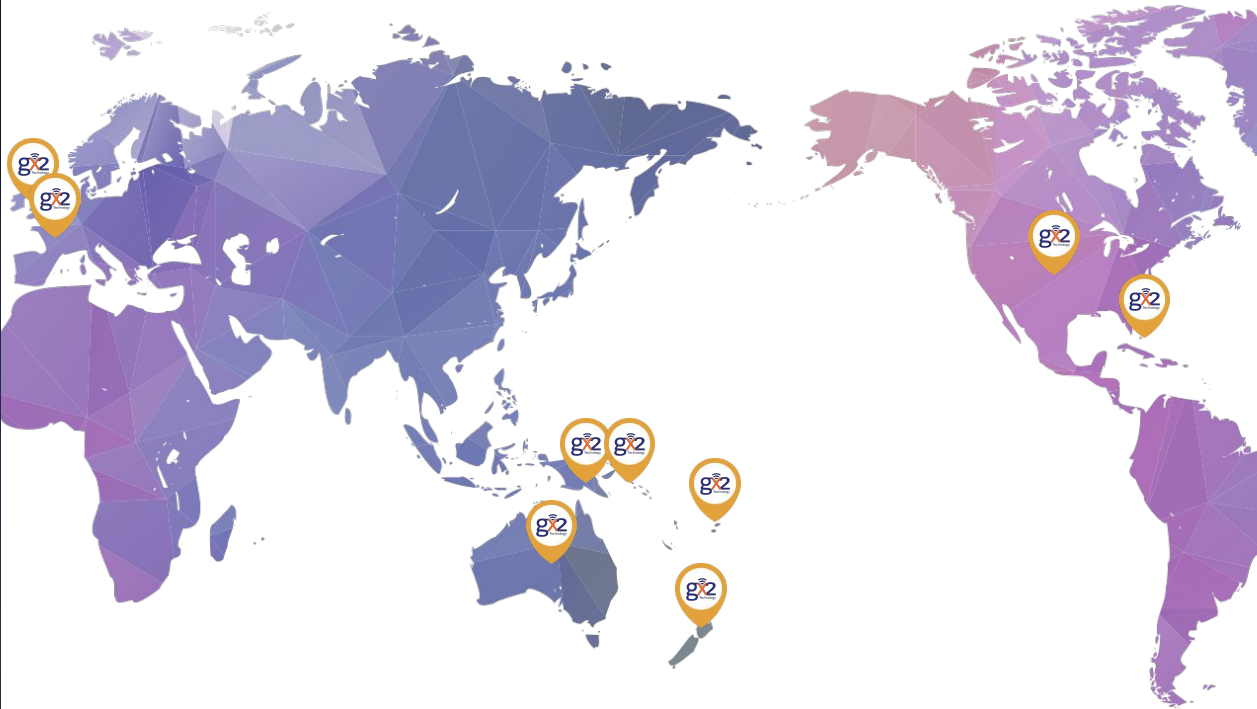

GX2 International

GX2 Coverage Map

Australia, New Zealand and Pacific Region accounts for 76% of the GX2 customer base. The strategic move will create new opportunities utilising the Superloop core network reach.

The GX2 web management portal provides up to the minute reporting on the status of customer networks and user activity along with many other useful reporting and monitoring tools. The system employs a highly configurable, multi-tenant architecture, developed by GX2, and allows for a wide range of secure device authentication options.
