ASX ANNOUNCEMENT

10 June 2026

Sparc Technologies Lists on the OTCQB Venture Market

HIGHLIGHTS

- **Sparc Technologies has obtained a dual listing on the OTCQB Venture Market (ticker: SPTCF) in the United States**
- **The listing supports growing interest from North American retail and HNW investors which has been evident over the past couple of months**
- **No new shares will be issued in connection with the OTCQB listing and the Company's primary listing remains on the ASX**

Sparc Technologies Limited (**ASX: SPN | FRA: NLR | OTCQB: SPTCF**) (**Sparc, Sparc Technologies** or the **Company**) is pleased to announce an expansion of its international investor profile with the Company obtaining a dual listing on the OTCQB Venture Market in the United States.

Sparc will commence trading on the OTCQB Venture Market for early stage and developing U.S. and international companies on 10 June 2026. Companies listed on the OTCQB Venture Market are current in their reporting and undergo an annual verification and management certification process. Investors can find Real-Time quotes and market information for the Company's OTCQB listing via the following link: https://www.otcmarkets.com/stock/SPTCF/overview

No new shares will be issued in connection with obtaining a listing on the OTCQB Venture Market which will replace the Company's current listing on the OTCID Basic Market (formerly called OTC Pink). The Australian Securities Exchange (ASX) will continue to be Sparc's primary exchange.

Sparc Managing Director, Mr Nick O'Loughlin commented:

> *"Our decision to uplist on the OTCQB Venture Market is a result of strong interest from North American retail and high net wealth investors, which has been particularly evident over the past couple of months. This investor interest aligns with the growing international profile and commercial success of our ecosparc® graphene additives. A listing on OTCQB aligns Sparc with a number of our international graphene peers and provides North American investors with the ability to trade Sparc shares in US dollars in a local timezone."*

-ENDS-

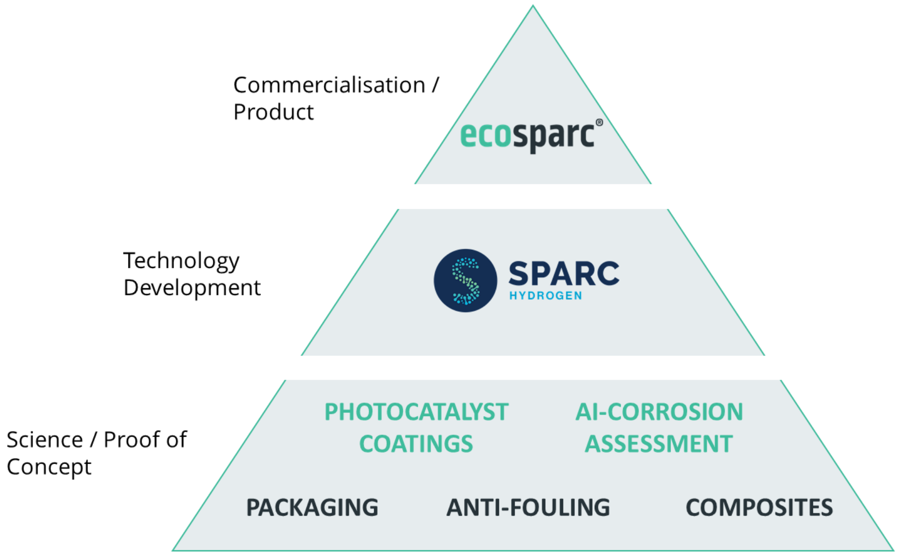
About Sparc Technologies



Sparc Technologies Limited ('Sparc', ASX: SPN) is an Australian technology company developing solutions that enhance environmental and sustainability outcomes for global industries. Sparc has two transformative technology areas in which it works: green hydrogen and graphene enhanced materials. Sparc conducts research and development in-house and has extensive engagement and relationships with the university sector in Australia and globally.

1. Sparc has developed and has commercialised a **graphene additive** product, **ecosparc®**, which at low dosages significantly improves the performance of commercially available epoxy-based protective coatings. Sparc has commissioned a manufacturing facility to produce **ecosparc®** and is engaging with global coatings companies and large asset owners on testing, trials and commercial partnerships.

2. **Sparc Hydrogen** is a joint venture between Sparc Technologies, Fortescue Ltd and the Adelaide University which is pioneering next-generation green hydrogen production technology. Photocatalytic water splitting (PWS) is an emerging method to produce green hydrogen without electrolysers - using only sunlight, water and a photocatalyst. Given lower infrastructure requirements and energy use, PWS has the potential to deliver cost and flexibility advantages over existing hydrogen production methods.
