ASX RELEASE 30 APRIL 2012

Superior Resources Commences Drilling at One Mile

Superior Resources Limited (ASX Code: SPQ) is pleased to announce that it has commenced drilling at its One Mile Mining Lease (ML6750) which is located 210km west-northwest of Townsville in northeast Queensland (Figure 1).

A 15 hole reverse circulation (RC) and diamond drilling (DD) program completed at One Mile in the second half of last year indicated a consistent increase in width and grade of the One Mile massive and semi-massive sulphide body at depth at the southern limit of the drilling.

The current drilling program will target the area to the south and at depth of the previously drilled area. Some RC holes will also target potential higher-grade supergene copper beneath the most prospective parts of the 800m strike length of the outcropping gossan within the mining lease area.

Ken Harvey
Managing Director
