

ASX ANNOUNCEMENT | 31 October 2025

ASX:  
**SRJ**

## BoltEx® order secured for a global leader in offshore energy solutions

### Highlights:

- **SRJ secures contract with global procurement specialist for the supply of BoltEx® to an FPSO operator in Guyana**
- **Contract value of US\$269k (A\$410k)**
- **SRJ's BoltEx® solution will support the client in delivering asset integrity for one of multiple FPSO's in the region**

**SRJ Technologies Group Plc (ASX: SRJ) ("SRJ" or "the Company")** is pleased to announce the award of its latest contract, secured with Storm Procurement Limited, a global procurement specialist. SRJ will supply its flange bolt integrity solution, BoltEx®, for onward provision to a leading global provider of floating production systems for the offshore energy industry.

The contract is for the sale, with immediate product deployment, of BoltEx® products, valued at US\$269k (A\$410k) to the Floating Production, Storage, and Offloading vessel (FPSO) operator located offshore Guyana. This order signifies the first adoption of the full BoltEx® range of clamps by one of several FPSOs the operator has in the region. The FPSO operator is a leading global provider of floating production systems for the offshore energy industry. It operates across multiple continents with a strong presence in Brazil and West Africa. The BoltEx® flange clamps will significantly enhance the operators' capabilities of providing cost-effective, safe, and longer-lasting solutions for this FPSO and potentially the wider fleet.

The order is not subject to SRJ's standard terms and conditions for a product sale as detailed on its website, the difference is in respect of payment terms - payment will constitute an advanced payment with the balance on delivery/collection

Comments from SRJ's Chair, George Gourlay:

"It is great to see operators taking advantage of SRJ's unique sales model that empowers our customers to adopt and use BoltEx® tool as their own and be more proactive and effective in their flange management and daily maintenance tasks. As all FPSOs tend to suffer from the flange corrosion issues, SRJ will continue working with the customer to help them achieve product adoption across their global fleet and maximise the benefits of safety and efficiency."

**ABOUT SRJ TECHNOLOGIES**

SRJ delivers a range of asset integrity products, consulting services and solutions to the energy and maritime industries.

Remote inspection services are provided utilising advanced robotics and custom UAV technologies. SRJ's specialised consulting services and range of containment management solutions enable customers to assure the integrity of new and ageing assets subject to ever more demanding regulatory pressures.

By providing advanced robotic and UAV systems, ACE (an SRJ Group company) is revolutionising asset inspection in terms of minimising human risk and providing accurate and repeatable inspection data. ACE is able to inspect the previously un-inspectable, delivering asset integrity assurance and management to the Energy and Marine industries. ACE has achieved accreditation with all the major Marine Class Societies.

SRJ's consulting expertise covers all areas of the asset integrity management value chain. Understanding the integrity risks our customers face generates high margin revenues and provides visibility of future product/solution needs particularly as assets degrade with age but require safe and efficient life extension.

SRJ's range of asset integrity products and solutions have gained industry approval across the energy sector and are now in use across the world. SRJ's products are designed to maintain and assure the integrity of pressure containment systems and therefore play an important role in the overall integrity of operating facilities.

Using pre-qualified service providers and manufacturers local to customer, SRJ is geolocation flexible and able to deliver a range of high quality, agile and cost-conscious solutions globally.
