

Australia's Next Tin Producer

*A critical mineral essential for decarbonisation
and electrification of the planet*

Corporate Presentation
8 November 2022

ASX:SRZ

Disclaimer

This presentation has been prepared by Stellar Resources Limited (ASX: SRZ) (SRZ or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only and is not a recommendation as to whether to invest in SRZ shares. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Unless otherwise specified, data and tables set out in this presentation are based on SRZ management estimates.

This presentation does not include all available information on SRZ, and any potential investor should also refer to SRZ's Annual Reports and ASX releases and take independent professional advice before considering investing in SRZ. For more information about Stellar Resources Limited, visit the website at www.stellarresources.com.au.

The Company confirms that it is not aware of any new information or data that materially affects the information contained in this presentation and, in the case of mineral resource estimates, all material assumptions and technical parameters underpinning the estimates included in this presentation continue to apply and have not materially changed.

The Company confirms that all the material assumptions underpinning the production target, and all forecast financial information derived from the production target made in the Company's 1st October 2019 ASX Announcement "Heemskirk Tin Scoping Study Confirms Attractive Economics" and included in this presentation continue to apply and have not materially changed.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of SRZ or its directors, or any of their employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, projections, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Past performance is no guarantee of future performance.

This presentation may contain "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance.

These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside the control of SRZ and any of its officers, employees, agents or associates. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward-looking statements and SRZ assumes no obligation to update such information.

Investment Highlights

Heemskirk Tin Project

Highest Grade Undeveloped Tin Project in Australia and Third-Highest Globally

Located in the **mining friendly** town of Zeehan, Tasmania

Scoping Study demonstrates **attractive & robust economics**

Excellent exploration potential to expand MRE at Heemskirk Project

Phase 2B Infill drilling underway focusing on infill drilling to increase indicated resource

MRE update in Nov 2022

PFS planned in 2023 H2

Board of Directors

SIMON O'LOUGHLIN
NON-EXEC CHAIRMAN | LAWYER

Founder of O'Loughlins Lawyers, an Adelaide based specialist commercial law firm. Extensive Experience of equity capital markets, ASX and ASIC rules. Has held many Non-Exec Directorships on ASX listed companies.

GARY FIETZ
TECHNICAL DIRECTOR | GEOLOGIST

Over 30 years technical and commercial experience in exploration, project development and mining. Principal consultant at WideRange Consulting. Experienced Managing Director, and Non-Exec Director of ASX and foreign listed companies.

THOMAS WHITING
NON-EXEC DIRECTOR | GEOPHYSICIST

Over 40 years in minerals Exploration both as a Geophysicist and Exploration Manager. Former VP Minerals Exploration at BHP Billiton. Non-Exec Director of a number of ASX listed and unlisted companies.

SIMON TAYLOR
NON-EXEC DIRECTOR | GEOLOGIST

Resource executive with over 25 years experience including technical, CEO and Board roles. Managing Director of Oklo Resources and Non-Exec Director of Chesser Resources.

MATHEW WATKINS
COMPANY SECRETARY | CHARTERED ACCOUNTANT

Specialises in Company Secretary and Accounting services for ASX listed and unlisted public companies in mining, biotech and industrial sectors.

Heemskirk Tin Project

Heemskirk Tin Project – An Enviably Location

Stellar 100% Owned Tin Projects:

Heemskirk Tin Project (Severn, Queen Hill, Montana and Oonah deposits)

Mount Razorback and St Dizier Satellite tin deposits

Large Exploration Licence package

- **Five major underground metal mines**, four currently operating, within 30km – a highly mineralised province with significant infrastructure and mining services
- **Port of Burnie:** 150km to the north, services all west coast mines providing access to world markets
- **Renewable power and water nearby**
- **Secure Tenure:** ML's over Heemskirk deposits, tailings pipeline and tailings storage and St Dizier satellite deposit
- **Large EL Package:** With a number of significant historic silver-lead mines providing further upside

Sustainable Tin Supply from OECD Country

Heemskirk Tin Project Strong ESG Credentials

- Underground mine, with limited surface footprint and environmental impact.
- Mine portal and processing plant to be located behind Queen Hill screening it from Zeehan.
- Tin is a critical mineral essential for de-carbonization and electrification of the planet.
- No environmental impediments identified by Stage 1 surveying of mine, tailings transport and storage sites.
- West Coast Council has inspected the project and provided positive feed back (WCC responsible for final mining approval).

Favorable location at Zeehan Mining Community

- Community supportive of Heemskirk Tin project development (additional local mining jobs).
- Established industrial and mining services base.
- Located in significant mining region; Renison, Henty, Rosebury, Mt Lyell and Averbury mines all within 30km.
- Historical mining town with extensive mining and processing.

Project to be
supplied by 100%
Renewable Energy
generation in Tasmania
with Granville Harbour
Wind Farm and 7
hydro power stations
within 30km.

Mineral Resource Estimate (May 2019)

Classification	Deposit	Tonnes (mt)	Sn (%)	Contained Sn (t)	Cassiterite % of total Sn (%)	Cu (%)	Pb (%)	Zn (%)

Outstanding Results from Severn Phase 2A Program Completed September 2022

Severn Cross Section 3,775 N (ZMG)

Hole No.	From (m)	To (m)	Length (m)	Est. True Thickness (m)	Sn (%)	Cu (%)
ZS150	471.5	509.8	36.6	34.6	1.07	0.19
Including:	485.0	497.0	12.0	11.3	2.12	0.23
ZS151	381.3	433.0	51.6	39.5	0.44	0.06
Including:	381.3	387.0	5.7	4.4	0.71	0.04
And:	429.8	433.0	3.2	2.4	1.91	0.09
ZS148	333.0	368.0	34.9	28.0	1.01	0.06
Including:	333.0	341.7	8.6	6.9	1.66	0.04
And:	355.3	368.0	12.7	10.2	1.19	0.07

Second Best Severn Intercept on record on Sn%*m basis

Second Widest Intercept on record on Sn%*m basis

Third Best Severn Intercept on record on Sn%*m basis

- **ZS148, ZS150 and ZS151 intercepts significantly thicker than the 2019 Mineral Resource defining a northerly plunging high tin grade*thickness (Sn%*m) zone in the northern part of Severn extending for ~200m down dip extending along strike for ~50m**
- **Phase 1A drillholes ZS143, ZS143W & ZS140 extend tin mineralisation ~200m further down dip than the current 2019 Mineral Resource, below historic hole ZS120**

Refer to: ASX Announcement, 27 July 2022, More Outstanding Tin Intersections from Severn Infill Holes

South Severn Magnetic and Conductive Target Hole

- Large magnetic and coincident conductive target identified at South Severn from geophysical modelling
- Phase 2A Hole ZS152 completed late-Sept to 1,194m testing this target. Drilling extended beyond target depth (900m). Results expected late-Nov
- Tasmanian Government Co-funded Exploration Drilling Grant (\$50,000) awarded towards cost of drilling
- ZS152 also passes through the projected position of the Severn deposit ~100m south of the defined Mineral Resource

Phase 2B Severn Infill Drilling

- Phase 2B Severn drilling program of 8 diamond holes for 3,860m, commenced 29 September
- Infill drilling program to further increase the Severn Indicated Mineral Resource Estimate targeting:
 - Northern Severn High Grade-Thickness Zone (6 holes)
 - Southern Severn Potential High Grade-Thickness Zone (2 holes)
- First hole ZS155 completed to 595m in late-Oct. Results pending
- Second hole ZS156 progressing well with 343m completed to 4th Nov 2022
- 24hr drilling trial and a new collar location / hole orientations have been successful in quickly drilling through poor ground in upper 300m of the first 2 Phase 2B holes
- Severn Mineral Resource update in Nov 2022 based on Phase 2A Drilling
- Further Severn Mineral Resource update planned in mid-2023 based on Phase 2B Drilling
- PFS planned in 2023 H2

2019 Scoping Study – Outline

- **~350,000tpa underground mine**, on site processing plant, tailings storage and surface infrastructure
- **Underground mining of Queen Hill and then Severn deposits for first 10 years**
- **Open pit mining of St Dizier satellite deposit** and trucking to Heemskirk processing plant included in year 11

- **Scoping study mine plan contains 58% Indicated Mineral Resource and 42% Inferred Mineral Resource over LOM.** First 4 years are based on mining 100% Indicated Resource
- The **high level of Inferred Mineral Resources** resulted in the study reported to Scoping Study rather than PFS level.
- **Tin concentrate trucked to Port of Burnie** (150km via sealed road) for export to Asian smelters

Refer to: ASX Announcement, 1 October 2019, Heemskirk Tin Scoping Study Confirms Attractive Economics

Attractive and Robust Economics

Stellar well positioned to take advantage of increasing tin demand and global supply shortages from sustainable ESG compliant Heemskirk Tin Project

Infill drilling underway to increase confidence in Mineral Resource

Heemskirk Tin Project Sensitivity Analysis (Pre-Tax NPV 10% A\$m)

AUD:USD Exchange Rate	Tin Price (US\$/t)				
	16,000	18,000	20,000	22,000	24,000
0.76	-9	23	55	88	120
0.73	2	35	69	102	136
0.70	13	48	83	118	153
0.67	26	62	99	135	172
0.64	39	78	116	154	192

Cautionary Statement - The Heemskirk Tin Project Scoping Study has been undertaken for the purpose of ascertaining whether a business case can be made to proceed to more definitive studies on the viability of the Heemskirk Tin Project. It is a preliminary technical and economic study of potential project viability based on low level technical and economic assessments that are not sufficient to support the estimation of ore reserves. Further exploration and evaluation work and appropriate studies are required before Stellar will be in a position to estimate any ore reserves or to provide any assurance of an economic development case

Refer to: ASX Announcement, 1 October 2019, Heemskirk Tin Scoping Study Confirms Attractive Economics

- Low All-In Sustaining Cost of ~US\$13,100/t of tin generated a ~34% operating margin based on US\$20,000/t tin price and 0.70 USD:AUD exchange rate
- Base Case NPV₁₀ of ~A\$71m post-tax and IRR of ~45% to an accuracy of ±35%
- Sensitivity analysis (left) highlights project robustness
- Low upfront capital cost of A\$57m

Advancing Heemskirk Tin Project to Development

Tin – A Technology Metal

Tin ranked as the No.1 metal best placed to benefit from new technology.

~50% of all tin is used as solder in electronics. Solder is the ‘glue’ that connects everything electronic.

Our clean, new technology future will be driven by robotics, computing, EV's, energy storage and renewables – these all use more electronics and semiconductors, **which all require more tin.**

Growing research showing tin may be a **more effective anode material in Li-ion batteries.**

Source: MIT; Rio TINTO, 2018; ITA

↑ Tin demand is growing strongly

- 'Electrification' driven by de-carbonization along with Covid and the rise of remote working has boosted global demand for electronics.
- Tin solder is the 'glue' connecting everything electronic, this has resulted in strongly growing demand for tin.
- Growing demand for use of tin in solar panels
- Continued demand for tin in traditional uses including tinplate, chemicals, lead-acid batteries, alloys and other.
- Global demand currently ~360,000 tpa

Global Tin Supply-Demand Balance

Source: ITA, SHFE, LME, Macquarie Strategy, Jun 2021

NE Tasmania Gold and Base Metals Exploration

NE Tasmania - A continuation of Victorian Western Lachlan Fold Belt

- NE Tasmania is a continuation of the Victorian Western Lachlan Fold Belt, which hosts the Fosterville Mine, other Tier 1 goldfields including Bendigo, Ballarat, Stawell, Walhalla and Woods Point and has produced >80 MOz gold.
- Stellar's ELA areas in NE Tasmania best align with the rich Walhalla-Woods Point belt in the eastern part of the Melbourne structural zone
- NE Tasmania hosts the Beaconsfield Mine (2.3 MOz), New Golden Gate Mine, the Lefroy Goldfield and hundreds of smaller historic gold mines and occurrences
- While Victoria is currently experiencing intense gold exploration activity, NE Tasmania has had very little modern gold exploration undertaken
- Both Orogenic and Intrusion Related Gold System (IRGS) style gold deposits occur in NE Tasmania.

Significant Ground Position in NE Tasmania

- 12 Stellar EL's granted over a total area of 2,212km² in NE Tasmania, prospective for gold, lithium, tin and base metals
- ~77 recorded historic gold occurrences and ~83 tin and base metals occurrences
- Advanced tin and base metals exploration targets with historic drilling on EL19/2020

Work Program

- 22 priority desktop exploration targets identified on SRZ EL's
- Very encouraging anomalous gold results from soil sampling program at Leura and Back Creek (EL12/2020)
- Encouraging anomalous gold and pathfinder results from initial sediment sampling program completed at Nabowla (EL11/2020)
- Lithium and Tin exploration program to commence 2023Q1 on recently granted EL3/2022 (blue)
- Field Reconnaissance of other targets underway 2022 Q3 to prioritise further field work programs

Refer to: ASX Announcement, 2 November 2022, Exploration Licence Granted over Prospective Lithium and Tin Ground in NE Tasmania

Lithium and Tin Targets on Recently Granted EL3/2022

- Recently Granted EL3/2022 Mt Paris Block prospective for tin and lithium
- Mount Paris Granite, a fractionated granite, equivalent to the nearby Lottah Granite which contains the **highest levels of lithium recorded in Tasmania**
- Exploration for lithium will target pegmatites near the Mt Paris Granite margins where there is the possibility of elevated concentrations of lithium occurring
- 8 recorded historic tin occurrences / mines
- Historic stream sediment samples up to 1,000 ppm Sn within the EL3/2022 Mt Paris Block, and up to 9,400 ppm Sn and 1,220 ppm Li from limited historic sampling close to the boundary

Refer to: ASX Announcement, 2 November 2022, Exploration Licence Granted over Prospective Lithium and Tin Ground in NE Tasmania

Leura and Back Creek Soil Sampling Results (EL12/2020)

- First NE Tasmania Gold Exploration field program completed by Stellar in 2022.
- Identified as a priority exploration target:
 1. High grade historic mines (~57 g/t ave grade mined Leura, 9 - 20 g/t mined at Back Creek goldfield)
 2. Similar structural setting to nearby Lefroy and Beaconsfield Goldfields
 3. Lack of modern exploration

Leura Gold Soil Anomaly

- 276 soil samples collected in 2022 Q1.
- **0.1 to 2.4 g/t Au over a 400-500m strike length over historic Leura Gold Mine,** with likely strike extensions of the historic mine under shallow cover (>5m).

Back Creek Soil Gold Anomalies

- 274 soil samples collected in 2022 Q1.
- **Lady Emily Reef - 0.02 to 0.16 g/t Au over ~200m strike length**
- **Nevermind Reefs - 0.02 to 0.23 g/t Au over ~100m and ~50m strike lengths**

Scamander (EL19/2020) Advanced Tin-Base Metals Exploration Targets

- Great Pyramid historic tin mine on RL2/2009 (TORC) – JORC resource of 5.2Mt @ 0.22% Sn at a 0.1% Sn Cut-Off, with average drilling depth of 46m.
- Regional NW-SE trending mineralised corridor including Pinnacles, Great Pyramid and North Scamander.
- **North Scamander Sn-Base Metals Target (EL19/2020)**
 - Outcropping mineralised gossan, strong stream sediment and soil tin geochem anomalies, rock chip results up to 1.07% Sn and coincident magnetic anomaly.
 - Historic drilling intersected pyrrhotite-cemented hydrothermal breccia associated with intense magnetite alteration with strongly anomalous Sn, Cu & Zn results.
- **Pinnacles Sn-Base Metals Target (EL19/2020)**
 - Outcropping sheeted quartz-cassiterite veins, strong stream sediment and soil tin geochem anomalies and coincident low intensity magnetic anomaly.
 - Historic drilling above target depth intersected up to 0.4% Sn.
- Tasmanian Government Co-funded Exploration Drilling Grants (\$83,750) awarded to drill North Scamander and Pinnacles in 2023.

EL19/2020 Stream Sediment Anomalies overlain on Regional Magnetics

Stellar is Competitively Valued

Refer to appendix 3 for peer company benchmark assumptions

Why Invest?

Highest grade undeveloped tin project in Australia and third highest globally

Advancing the Heemskirk Tin Project to PFS in 2022

Looming tin supply shortage

Exciting gold, tin, lithium and base metal exploration targets in NE Tasmania

Appendix 1

2019 Scoping Study – Major Project Studies are Well Advanced

Metallurgy and Processing

- Renison Tin style flow-sheet tested at bench scale using drill core from Severn, Queen Hill & St Dizier (testwork by ALS Burnie)
- 69% over-all tin recovery including St Dizier, with 49% tin concentrate
- Opportunities for optimisation of flow sheet and recovery including addition of ore sorting
- Processing plant to be located to NW of Queen Hill to minimize impact on Zeehan and Trial Harbour road

Environment and Community

- Notice of Intent submitted to Tasmanian EPA and environmental assessment program agreed (DPEMP)
- No environmental impediments identified by Stage 1 surveying of mine, tailings transport and storage sites
- Mining Leases granted for 12year initial period over mine site, tailings pipeline route and tailings dam site
- West Coast Council has inspected the project and provided positive feed back (WCC responsible for final mining approval)
- Zeehan is a mining community and is supportive of the project
