

ASX & MEDIA RELEASE

17 September 2015

Service Stream awarded five year agreement with nbn

Leading essential network services company Service Stream Limited (ASX: SSM) is pleased to announce that it has signed a new 5 year, Multi-technology Integrated Master Agreement (MIMA) with **nbn**.

Under the MIMA agreement, Service Stream will be responsible for allotted work in planning and implementing the construction of broadband infrastructure including Fibre to the Node (FTTN), Fibre to the Premise (FTTP) and Fibre to the Basement (FTTB).

Service Stream will commence the initial program of work in December 2015 in Victoria, and will continue to build on its expertise and capability following successful deployments of FTTN technologies in regions across New South Wales and Queensland.

Works under the new contract in FY16 are valued at approximately \$8-10 million. The agreement provides delivery partners with the potential to secure additional work volumes over subsequent years, based on performance, quality, speed, and importantly, safety.

*“Service Stream is proud to expand our role in supporting **nbn** as they undertake one of the Nation’s most significant infrastructure projects to provide better broadband to all homes and businesses. This MIMA provides an opportunity for our business to grow our program of works with **nbn**, and to increase work volumes across subsequent years”,* said Leigh Mackender, Managing Director.
