

ASX and MEDIA RELEASE

28 June 2018

Service Stream extends its NMRA contract with nbn

Leading essential network services company Service Stream Limited (ASX: SSM) is pleased to announce that it has extended its Network MACs¹ and Restoration Activities (NMRA) contract with **NBN Co Ltd (nbn)** for an additional 18 month term to 31 December 2019. **nbn** has an option to extend the contract for a further 6 months thereafter to 30 June 2020.

Under the contract, which was initially executed in September 2012 as the Network Augmentation and Restoration Activities (NARA) contract and which has been extended a number of times since, Service Stream will continue to provide **nbn** with services relating to the improvement, maintenance and relocation of infrastructure across its fixed-line broadband network.

Revenue from the NMRA contract over the additional 18 month term is estimated to be in the order of \$45 million, supplementing that arising from the customer activation and service assurance activities undertaken for **nbn** under the much larger Operations and Maintenance Master Agreement (OMMA) which Service Stream has held since December 2015.

Managing Director, Leigh Mackender said: *"We are very pleased that by extending the NMRA, **nbn** has demonstrated further confidence in Service Stream's ability to support its operation of the National Broadband Network and the enhancement of its customers' experience. We look forward to continuing as one of **nbn**'s most trusted delivery partners."*

¹ MACs is an abbreviation for the design and implementation of small network moves, adds and changes.
