Strickland's Managing Director, Paul L'Herpiniere, said: "The progress made since the Rogozna acquisition last year has delivered outstanding exploration results. However, this is only the beginning. We have ambitious plans to continue this extraordinary growth and establishing Rogozna as a pre-eminent development project through further exploration and studies.

The placement allows us to advance our 70,000m drilling programme to continue to define the potential of Rogozna, alongside the delivery of a Pre-Feasibility Study with the benefit of this drilling. The Company considers now is the

Table Notes:

- A. For Gradina (December 2025) estimates include Au equivalent values for consistency with the other Rogozna deposits. The AuEq grade includes only gold grades. Estimates for this deposit reflect a price and metallurgical recovery for gold of \$US2,500/oz and 90% respectively on the basis of Strickland's interpretation of potential long term commodity prices and their interpretation of initial metallurgical test work and gives the following formula: Au Equivalent (g/t) = Au (g/t). It is the Company's opinion that the gold included in the metal equivalents calculations has a reasonable potential to be recovered and sold. A 1.5 g/t Au cut-off has been used for the Gradina Mineral Resource Estimate.
- B. For Medenovac (February 2025) and Shanac (March 2025) AuEq grade is based on metal prices of gold (US\$2,250/oz), copper (US\$10,000/t), silver (US\$25/oz), lead (US\$2,200) and zinc (US\$3,000/t) and overall metallurgical recoveries of 80% for these metals. These estimates are based on Strickland's interpretation of potential long term commodity prices and their interpretation of initial metallurgical test work and give the following formula: Au Equivalent (g/t) = Au (g/t) + 1.38 x Cu(%) + 0.011 x Ag (g/t) + 0.304 x Pb(%) + 0.413 x Zn(%). It is the Company's opinion that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. A 1.0 g/t AuEq cut-off has been used for the Medenovac Mineral Resource Estimate. A 0.60 g/t AuEq cut-off has been used for the Shanac Mineral Resource Estimate.
- C. For Copper Canyon (October 2021) AuEq grade based on metal prices of gold (US\$1,750/oz), copper (US\$10,000/t), and metallurgical recoveries of 80% for both metals. These estimates are based on Strickland's assumed potential commodity prices and recovery results from initial and ongoing metallurgical test work and give the following formula for Copper Canyon: AuEq (g/t) = Au (g/t) + 1.55 x Cu (%). It is the Company's opinion that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. A 0.4g/t AuEq cut-off has been used for the Copper Canyon Resource Estimate.
- D. Rounding errors are apparent in the summation of total resources.
