About HomeStay:

The HomeStay Intelligent Home platform allows elderly Australians to live independently in their own home for longer. It uses artificial intelligence and data analysis, as well as human monitoring, to determine residents' routines and detect anomalies. These early insights allow for better decision-making by care providers and families, allowing more focused service, minimising unnecessary care and facilitating welfare checks in a more responsive manner.

HomeStay helps protect and connect our elderly with a scalable healthcare technology platform that allows them to live in their homes for longer. www.homestay.care
