TARUGA GOLD LIMITED

Accelerating Exploration in West Africa

Annual General Meeting
Presentation 28 November 2013

Competent Person Statement & Disclaimer

The information contained in this presentation has been prepared by Taruga Gold Limited (**Company**).

The information in this Presentation that relates to exploration results and geological information is compiled by Mr Bernard Aylward. Mr Aylward is a full time employee of the Company and a member of the Australian Institute of Mining and Metallurgy. Mr Aylward has sufficient experience which is relevant to the styles of mineralisation and types of deposit under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Aylward consents to the inclusion in this Presentation of the information based on his work in the form and context in which it appears.

To the maximum extent permitted by law, the Company and their related bodies corporate, affiliates and each of their respective directors, officers, partners, employees, advisers and agents and any other person involved in the preparation of the presentation disclaim all liability and responsibility (including without limitation any liability arising from fault or negligence) for any direct or indirect loss or damage which may arise or be suffered through use or reliance on anything contained in, or omitted from, the presentation.

No representation or warranty, express or implied, is given as to the fairness, accuracy, completeness, likelihood of achievement or reasonableness of any assumptions, forecasts, prospective statements or returns contained in the presentation. Such assumptions, forecasts, prospective statements or returns are by their nature subject to significant uncertainties and contingencies, have been based on current expectations about future events and are subject to risks, uncertainties and assumptions that could cause actual results to differ materially from the expectations described. The Company has no responsibility or obligation to inform you of any matter arising or coming to their notice, after the date of this presentation document, which may affect any matter referred to in the presentation.

You must not rely on the presentation provided but make your own independent assessment of the presentation and seek and rely upon your own independent taxation, legal, financial or other professional advice in relation to the presentation and any action taken on the basis of the presentation. All information in this presentation is current as at 1 February 2012.

Investment Proposition

TARUGA GOLD

West African Focus

- World class gold province – Birimian Greenstone Belts
- Pro-mining jurisdictions

Well-Funded

- To accelerate aggressive exploration program

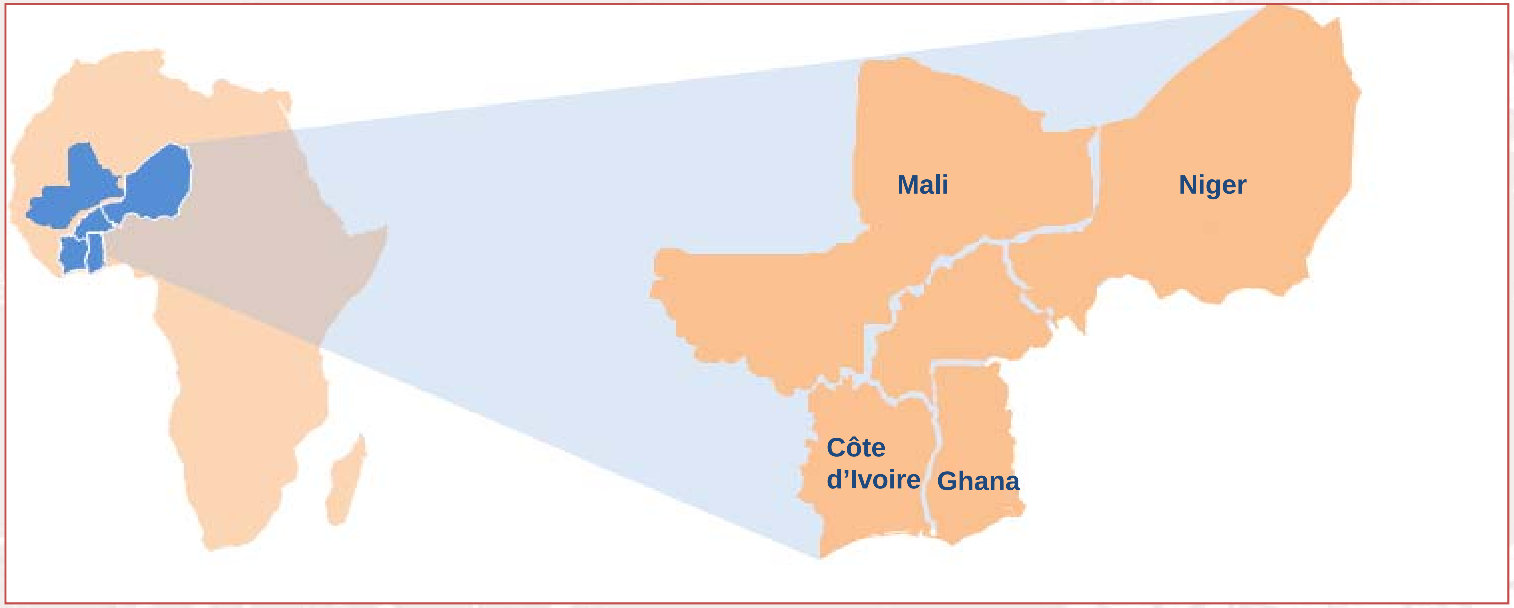
Strong Management

- Local experience
- Capital markets expertise
- Exploration, acquisition and project generation skills

Growth Strategy

- Active exploration program returning high-grade gold intersections
- Extensive gold mineralisation at the Kossa Project, Niger
- New discoveries in proven gold mineralised belts
- Recently acquired licences

Taruga Gold – West Africa



Focus on **West Africa** - world class gold province

Projects in **proven gold** mineralised districts

Highly **prospective exploration**

Licences in **pro-mining countries**: Niger, Ghana, Côte d'Ivoire and Mali

Capital Structure and Management

Taruga Gold:

Listed	February 7 2012
ASX Code	TAR
IPO Raise	A$6.12M
Placement – Oct 2013	A$1M
Market Cap	A$1.9M
Current Shares	160.6M
Cash at 30 September (pre-placement)	A$0.85M

Placement Highlights:

Completed an oversubscribed Capital raising of A$1million

Funds to continue exploration at Kossa and exciting new ground in Mali and Cote d"Ivoire

Bernard Aylward BSc (Hons – Geol)

Managing Director

20 years experience as Manager & Exploration Geologist across West Africa, Australia and Europe.

Frank Terranova

Non-Executive Chairman

Chartered Accountant with extensive experience in corporate finance, financial risk management and executive management of resource focussed listed companies. Non-Executive Director of Southern Cross Goldfields and a former director of Polymetals and Allied Gold

Peter Newcomb FCA (ICAEW)

CFO and Company Secretary

Chartered Accountant with over 30 years' experience in the resources & other industries in a number of countries, Company Secretary of Athena Resources Ltd, Scotgold Resources Ltd

Kossa Project, Niger

Kossa Project:

970km² granted licences

Birimian Greenstone Belt – Goroul Belt

Very encouraging grade and width - 1km of strike to date

Broad, high-tenor geochemical anomalies untested by drilling

Adjacent to IAMGOLD’s 5Moz Essakane Gold Mine - Same geological sequence and structural setting

Exploration:

Extensive gold mineralisation intersected at the Kossa-Borobon trend

Aircore drilling highlights extensions of known mineralised structures

High-grade surface geochemical anomalies up to 19.91g/t gold and auger geochemical anomalies up to 1.46g/t gold

Pipeline of exciting exploration prospects delineated

TARUGA GOLD

Niger:

Pro-mining country with world class Uranium mining industry

Under-explored for gold mineralisation – first mover advantage

SEMAFO (TSX:SMF), capitalised at C$2.43b, developed & operated Samira Hill gold mine since 2004.

Borobon Prospect, Kossa – Extensions and Targets

Mineralisation defined over 2.5km strike and remains open along strike to north and south

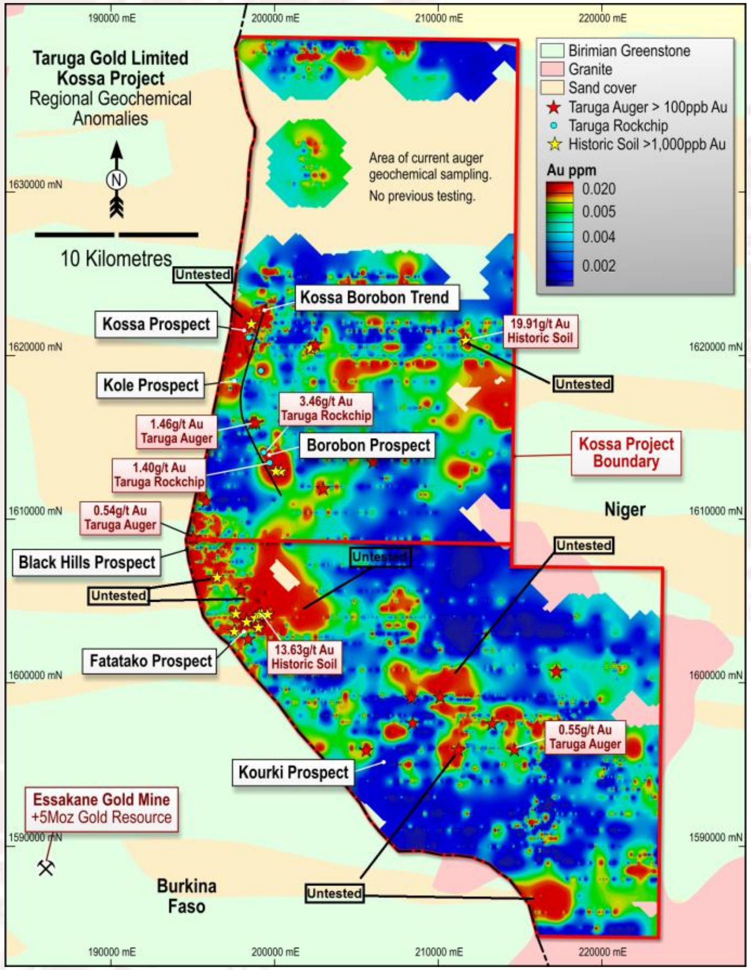
Aeromagnetic survey and Aircore drilling anomalism highlight immediate drill target to south

Target in excess of 5km strike

Link to Black Hill Prospect highlighted by aeromagnetic survey

Drilling continues highlight the continuity, parallel lodes and southern extensions with results including:

- 22m at **2.0g/t** gold from 108m in drill hole TKRC108
- 12m at **3.35g/t** gold from 9m in drill hole TKRC005
- 12m at **2.23g/t** gold from 15m &
- 9m at **1.47g/t** gold from 41m in drill hole TKRC010
- 2m at **19.97g/t** gold from 84m in drill hole TKRC017



Kossa Project – Porphyry Targets

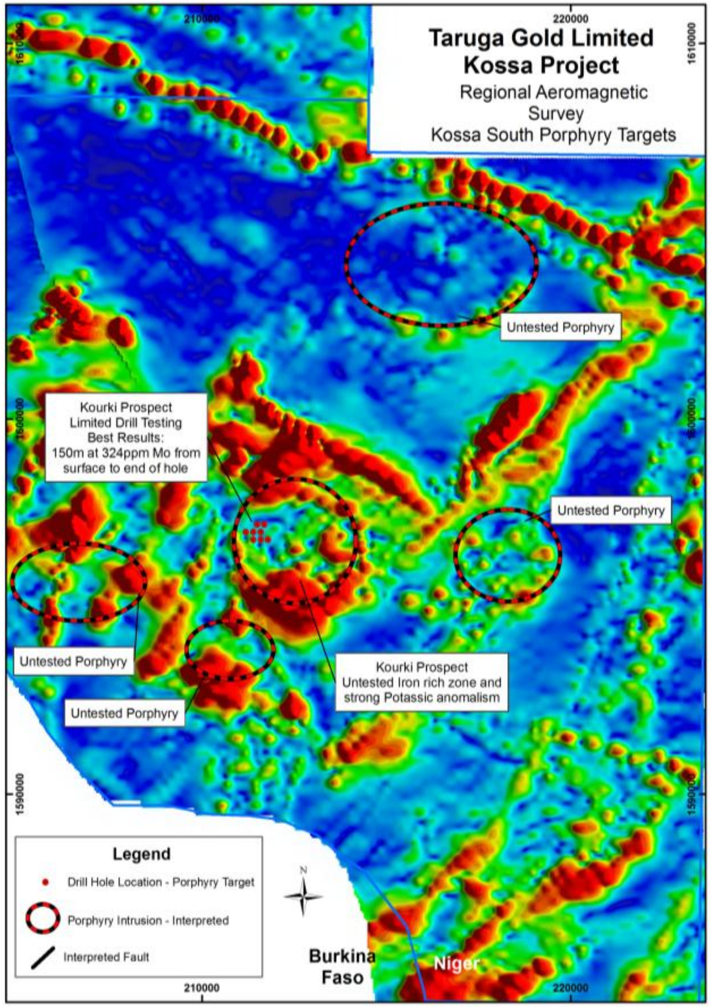
Detailed aeromagnetics highlights multiple Porphyry bodies

Surface Gold Anomalism associated with Porphyry intrusions and structures

Previous drilling only tested a very small part of target and returned best result of 150m at 324ppm Molybdenum (from surface to end of hole)

Potassic alteration system identified associated with Porphyry intrusions and major iron-rich zones are untested

Geological mapping and geochemical sampling commenced to define target for drilling has commenced

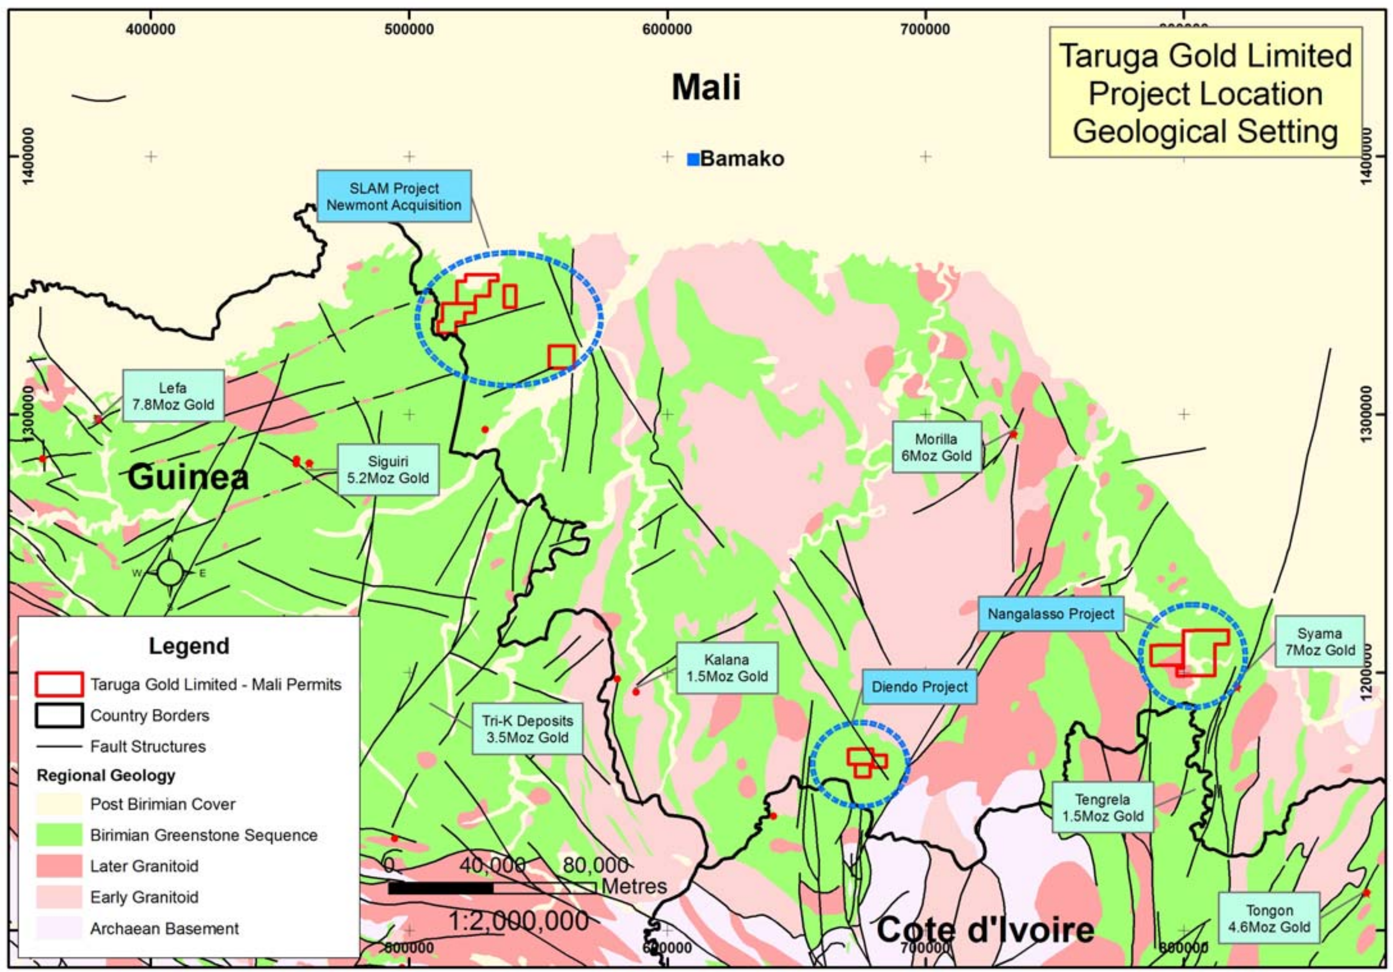


Mali Projects

Focus on exploration of highly prospective projects with defined gold anomalism

Located in highly mineralised southern Mali

Over 830km^2 in the Nangalasso, Diendio and recently acquired SLAM projects



Nangalasso Project

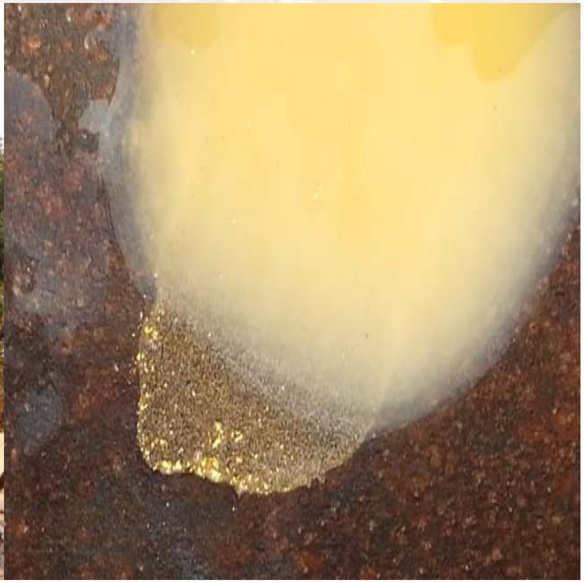
Acquired in July 2013, located just 30km from Syama. Initial exploration completed and highly encouraging.

Reconnaissance drilling returned:

- 1m at 7.8g/t gold in drill hole NAAC004
- 3m at 7.84g/t gold in drill hole NAAC021
- includes 1m at 13.5g/t gold from 16m

Field reconnaissance highlights extensive areas of artisinal workings with no previous drill testing

Initial drill intersections are along strike from workings and highlight potential of area

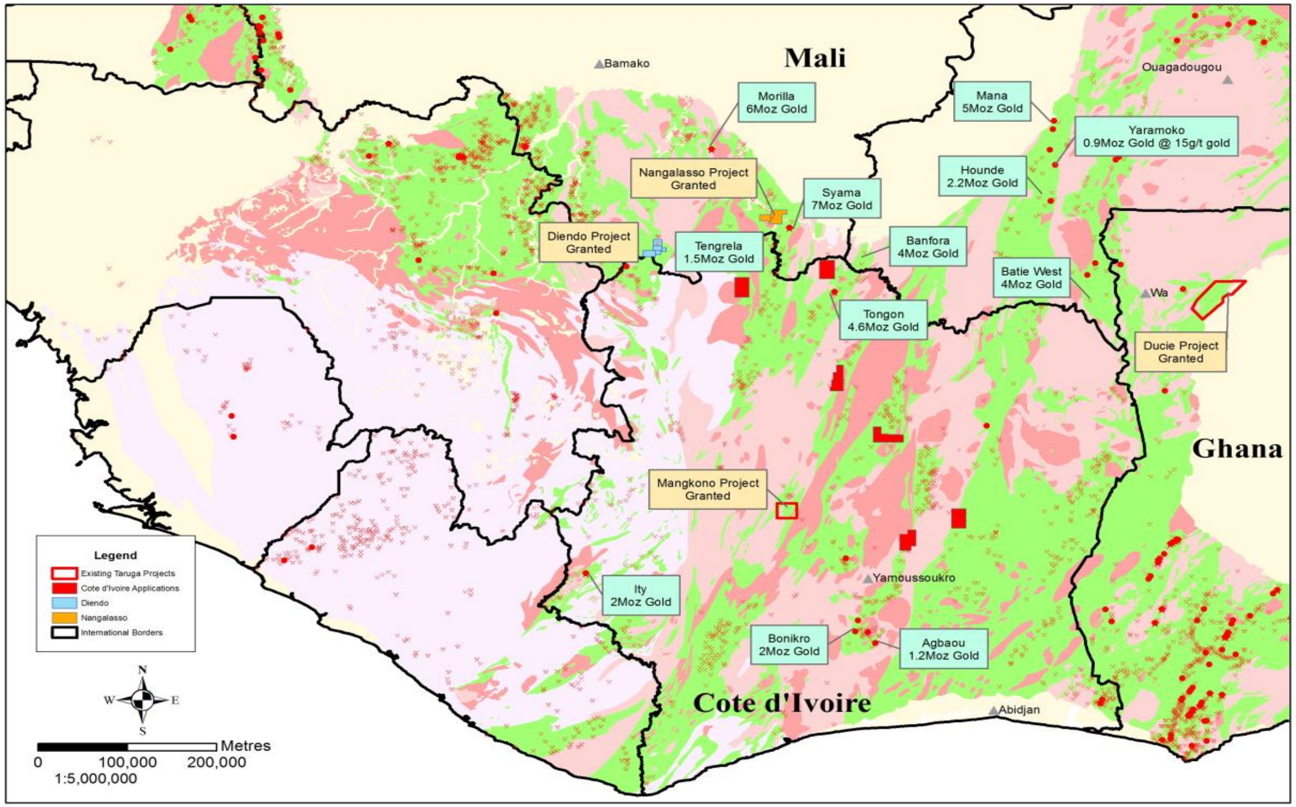


Côte d’Ivoire Projects

Located in the Tengrela-Tongon area, the Bonikro area and the extension of the Hounde greenstone belt

Mankono licence granted in June 2013

6 licence applications for 2,400km^2 - Licence applications accepted and registered by the Government



Use of Funds – Exploration Program

TARUGA GOLD

Kossa, Niger

RC drilling + geochemical surveys, following up high grade intersection (22m at 2.0g/t Au)

Initial testing of the exciting Cu-Au-Mo porphyry targets - **Auger complete, results pending**

Mali

Priority - Nangalasso project where previous wide-spaced drilling has returned intersections up to 1m at 7.8g/t Au and 3m at 7.84g/t Au – **Trenching and geochemical sampling in progress. Geological mapping and reconnaissance in progress in preparation for aircore drilling program**

Côte d'Ivoire

Reconnaissance exploration campaigns, commencing with Mangkono project

Then additional concessions as the granting of permits is finalised

Taruga Gold Limited – Exploring West Africa

TARUGA GOLD

West African Focus
- World class gold province – Birimian Greenstone Belts
- Pro-mining jurisdictions

Well-Funded
- To accelerate aggressive exploration program

Strong Management
- Local experience
- Capital markets expertise
- Exploration, acquisition and project generation skills

Growth Strategy
- Active exploration program returning high-grade gold intersections
- Extensive gold mineralisation at the Kossa Project, Niger
- New discoveries in proven gold mineralised belts
- Recently acquired licences
