Dear Sir/Madam

GHANA EXPLORATION REPORT

The Board of Tribune Resources Limited (ASX code: TBR) has pleasure in providing the attached Ghana Exploration Report which has been received from the Dr John Chisholm, the consultant geologist to the Company.

Yours faithfully

Tribune Resources Limited

A handwritten signature in black ink, appearing to read 'Peter Webse', is written over a faint, illegible stamp.

June Quarter Exploration Report
for
Tribune Resources (Ghana) Limited

Tribune Resources (Ghana) Limited

Japa concession - Ghana

During the June quarter, a short programme of thirty (30) holes for 2,653 metres were drilled on the Adiembra prospect. The drilling consisted of testing extension to known mineralisation with some infill exploratory drilling holes. Figure 1 shows the location of RC drilling completed during the quarter at Adiembra. Four of the holes intersected mineralisation of >2g Au/t over an interval of 3m (Table 1).

Table 1 Significant drill intersections (>2g Au/t over 3m)

Hole	East	North	From	To	Interval	Au (g/t)
ACRC322	605364	644167	36	39	3	2.09
ACRC323	605328	644183	0	3	3	4.27
AWRC318	605667	644960	24	33	9	2.53
		including	24	27	3	5.25
AWRC326	605513	644845	0	3	3	2.38

All drill intersections, assayed this financial year and containing > 1 g Au/t over down-hole intersections of 3m, are listed in Appendix 1.

- A line of nine holes (KNRC349 to 357) drilled at the extreme northeast end of the prospect appear to mark the limit of the mineralised zone.
- Three lines of four holes each were drilled on the western side of the main Adiembra zone testing for extensions to the west. Two of the western most holes (AWRC318 & 326) intersected gold mineralisation, the extent of which will be tested during the next quarter.
- Drilling along the southern extension of the Adiembra mineralised zone was largely unsuccessful although two holes (ACRC322 & 323) intersected mineralisation.

Following the short drilling programme all of the geological, geophysical, geochemical and drilling data was integrated and reviewed in preparation for resource definition drilling at Adiembra. Detailed geological mapping has commenced on the Adiembra prospect and a specialist structural geologist has been contracted to provide advice on the geometry of the known mineralisation prior to commencing a programme of diamond drilling and resuming the RC drilling.

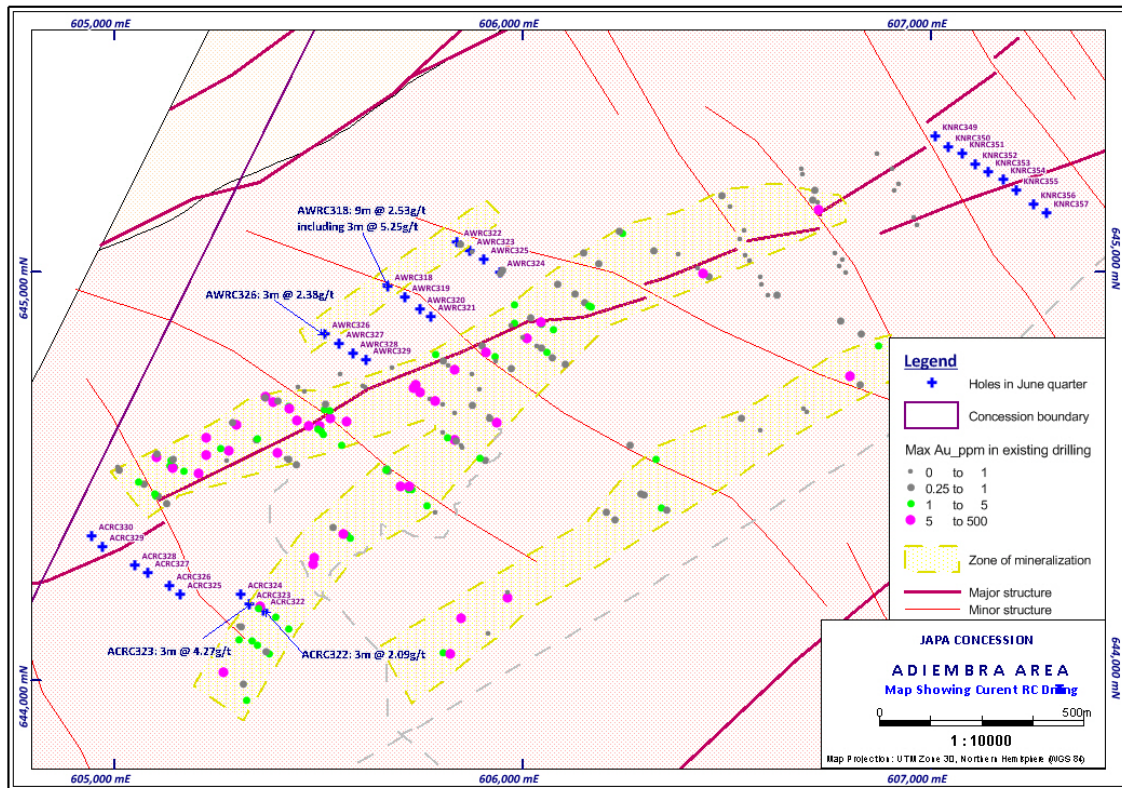

Figure 1 Location of RC drilling completed during the quarter at Adiembra

In accordance with Listing Rule 5.6 of the Australian Stock Exchange Limited, the geological information in this report that relates to Exploration Results, Mineral Resources and Ore Reserves is based on data compiled by Dr John Chisholm, a Fellow of The Australasian Institute of Mining and Metallurgy. Dr Chisholm has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Chisholm consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Appendix 1

Listing of drill intersections > 1 g Au/t over 3m
