ENVIRONMENTAL PROGRESS

Titanium Sands Limited ("TSL" or "the Company") is pleased to confirm further progress on the environmental studies for the Mannar Heavy Mineral Project (the Project) in Sri Lanka¹.

The Project's environmental consultants in Sri Lanka are progressing field investigations, technical assessments and data collection at the Mannar Project Site. This has included the ecological field assessment, focusing on flora and an initial field visit by the Water Resources Board and Department of Agriculture.

A revised work schedule is expected to be submitted to the Company on completion of the remaining field visits, outlining the balance of work and timing of the completion of the required Environmental Impact Assessment.

Titanium Sands Managing Director Dr James Searle said "the Environmental Impact Assessment process is progressing in conjunction with many other aspects of creating this world class mining project. The team in Sri Lanka has done a great job to date and they all remain focused on building one of Sri Lanka's most significant HMS projects".

The Company will provide further updates as available.

Ends-

The Board of Directors of Titanium Sands Ltd authorised this announcement to be given to the ASX.

COMPLIANCE STATEMENTS

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning the Company's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "expect," "intend," "may", "potential," "should," "further" and similar expressions are forward-looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that further exploration will result in additional Mineral Resources.

Competent Persons

Except where indicated, exploration and technical information above have been reviewed and compiled by James Searle BSc (hons), PhD, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy, with over 37 years of experience in metallic and energy minerals exploration and development, and as such has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Searle is the Managing Director of Titanium Sands Limited and consents to the inclusion of this technical information in the format and context in which it appears.

Previously Reported information foot notes for reference

This report includes information that relates to announcements previously made to the ASX. The information was extracted from the Company's previous ASX announcements as follows:

¹ ASX:TSL Announcement : 26th March 2025, Terms of Reference for environmental study provided for Mannar Heavy Mineral project.
