The issue price for each Share is payable in full on application.

As at the Eligibility Date, Mundo has 229,581,454 Shares and 10,350,000 unlisted options on issue. Up to 40,000,000 Shares and 40,000,000 free attaching Options will be issued under the SPP Offer, raising up to \$5 million before costs.

There is no minimum subscription for the SPP Offer.

1.5 Timetable

1.6 Shareholder approval of Capital Raising

The Company has convened a General Meeting of Shareholders, scheduled to take place on Wednesday, 27 April 2011, in order to pass the following Resolutions:

- (a) **Resolution 1:** ratification of the issue and allotment of Tranche 1 Shares;
- (b) **Resolution 2:** approval of the issue and allotment of Tranche 1 Options;
- (c) **Resolution 3:** approval of the issue and allotment of Securities under the Tranche 2 Placement;
- (d) **Resolution 4:** approval of the issue and allotment of Securities under the SPP Offer; and
- (e) **Resolution 5:** approval of the issue and allotment of Shortfall Securities to Directors.

Resolutions 1 to 3 (inclusive)

Listing Rule 7.1 provides that a listed company may not issue equity securities in any 12 month period which exceeds 15% of the number of issued securities of the company held at the beginning of the 12 month period, except with the prior approval of shareholders of the company in general meeting unless another exception to Listing Rule 7.1 applies.

The purpose and effect of Resolutions 1 to 3 (inclusive), if passed, will be to exempt Securities issued under the Tranche 1 and Tranche 2 Placements from the 15% limit under Listing Rule 7.1. This will restore the Company's capacity under Listing Rule 7.1 to issue further Securities representing up to 15% of the Company's issued capital in the next 12 months to raise further funds, if required.

Resolution 4

An exception to Listing Rule 7.1 is the issue of securities under a securities purchase plan where the number of securities to be issued is not greater than 30% of the number of fully paid ordinary securities on issue, and certain other conditions are satisfied, including the issue price of shares under the SPP being at least 80% of the average market price of shares in the 5 days on which sales in shares were recorded, either before the day on which the offer was announced or before the offer was made.

Although the issue of Securities under the SPP Offer will not represent more than 30% of the existing number of Securities on issue, issues of Shortfall Securities do not fall within the exception referred to above. In the event that there are Shortfall Securities the approval of Shareholders is sought to enable the Company to issue the Shortfall Securities without relying on the 15% placement capacity under Listing Rule 7.1.

Should Shareholder approval of the SPP Offer not be obtained, the Directors intend to issue Shortfall Securities to applicants, from the 15% placement capacity allowed by Listing Rule 7.1.

The effect of Resolution 4, if passed, will be that the Shortfall Securities issued to investors will be exempt from the 15% limit under Listing Rule 7.1, and again, will restore the Company's capacity under Listing Rule 7.1 to issue further Securities representing up to 15% of the Company's issued capital in the next 12 months.

Resolution 5

The Directors will also seek Shareholder approval at the General Meeting to enable them to participate in the allocation of Shortfall Securities under the SPP Offer.

Each of the Directors is a significant Shareholder in the Company and each Director has indicated a desire to participate in the issue of Shortfall Securities, in the event that Eligible Shareholders do not subscribe to all of the SPP Offer in accordance with their Entitlement.

The nature of the SPP Offer is that by reason of the fixed maximum number of Securities that may be issued to each Shareholder, the SPP Offer will tend to dilute the percentage shareholding interests of the Company's larger Shareholders.

It is therefore considered appropriate that the Company's larger Shareholders, including Directors and their associates, who have been supportive of the Company since its inception be provided with an opportunity to maintain their percentage shareholding interests in the Company by subscribing for Shortfall Securities.

As the participation of Directors in the Shortfall constitutes a related party transaction, Shareholder approval pursuant to section 208 of the Corporations Act and Listing Rule 10.11 is required. If Shareholders do not approve Resolution 5, the Directors will be unable to participate in the Shortfall.

A copy of the notice of General Meeting has been released to ASX and can be accessed on the ASX website at www.asx.com.au.

1.7 Eligibility

Each Eligible Shareholder who is registered as the holder of Shares at 5:00pm (WST) on the Eligibility Date is entitled to participate in the SPP Offer. The maximum number of Shares to which each Eligible Shareholder is entitled to subscribe is up to 40,000 Shares at the Offer Price, with up to 40,000 free attaching Options for each Share subscribed for (**Entitlement**).

1.8 Allowing your Entitlement to lapse

If you elect to do nothing in respect of the SPP Offer, your Entitlement will lapse. Although you will continue to own the same number of Shares in Mundo, your percentage shareholding in Mundo will be diluted in the manner specified in Sections 3.4 and 3.5.

1.9 How to apply for Securities

If you decide to subscribe for all or part of your Entitlement you must:

- (a) complete and return the Application Form and return it to the Company's Share Registry with the relevant amount in Application Monies; or
- (b) if you have an Australian financial institution account that supports BPAY®, by paying by BPAY® before 5:00pm WST on the Closing Date (see below for further details),

in accordance with the payment instructions outlined in Section 1.11 below.

If the Application Monies provided fall short of the total amount owing in respect of the number of Shares applied for in the accompanying Application Form, Mundo will treat you as having applied for the total number of Shares able to be purchased in full with the amount of Application Monies provided, despite any inconsistent amount specified in the Application Form.

1.10 Application Form

A completed Application Form cannot be withdrawn and constitutes a legally binding application for, and acceptance of, the number of Securities specified in the Application Form on the terms set out in this Prospectus.

If the Application Form is not completed correctly it may still be treated as valid. The Company's decision as to whether to treat the acceptance as valid, and how to construe, amend or complete the Application Form is final.

1.11 Method of payment

If you have elected to subscribe for Shares pursuant to the SPP Offer you may use one of the following methods to pay Application Monies owing in respect of those Shares:

(a) Payment by cheque, bank draft or money order

Should you wish to pay by cheque, money order or bank draft you should complete your Application Form in accordance with the instructions set out on that form and return the Application Form accompanied by a cheque, bank draft or money order:

- (i) in Australian currency, drawn on an Australian branch of a financial institution;
- (ii) for an amount equal to \$0.125 multiplied by the number of Shares that you are applying for; and
- (iii) made payable to "Mundo Minerals Limited – Share Account" and crossed "Not Negotiable".

Cash payments will not be accepted.

Receipts for payment will not be issued. If your cheque is dishonoured, your Application will be rejected.

Completed Application Forms, together with your Application Monies, should be returned by post to:

Mundo Minerals Limited
c/- Security Transfer Registrars Pty Ltd
770 Canning Highway
APPLECROSS WA 6153

Completed Application Forms must be received by no later than 5pm (WST) on the Closing Date.

(b) Payment by BPAY®

If you wish to pay by BPAY® (only available to Eligible Shareholders who hold an account with an Australian financial institution that supports BPAY®), please follow the instructions on the Application Form (which includes the Biller Code and unique Reference Number) and take note of the following:

- (i) your BPAY® payment must be received by no later than 5:00pm WST on the Closing Date;

- (ii) applicants should be aware that their own financial institution may impose earlier cut off times with regards to electronic payment, and should therefore take this into consideration when making payment;
- (iii) it is the responsibility of the applicant to ensure that funds submitted through BPAY® are received by 5:00pm WST on the Closing Date; and
- (iv) if you have elected to make a payment by BPAY®, you do not need to submit your Application Form (by making a payment through BPAY® you will be taken to have made the declarations set out in the Application Form).

Any Application Monies received for more than your final allocation of Shares will be refunded. No interest will be paid on any application monies received or refunded.

1.12 Application Monies

Application Monies will be held in a trust account until the Shares are allotted to Eligible Shareholders. The trust account established by Mundo for this purpose will be solely used for handling Application Monies.

Any interest earned on Application Monies will be for the benefit of, and remains the sole property of, Mundo and will be retained by Mundo whether or not the allotment and issue of Shares takes place.

Applications and payments made under the SPP Offer may not be withdrawn once they have been received by Mundo.

1.13 Shortfall

Any Shares not subscribed for will form part of the Shortfall.

The Company reserves the right (in its sole discretion) to allocate the Shortfall in any manner that it sees fit, subject to the provisions of the Corporations Act and the Listing Rules. As indicated above in Section 1.6, the Directors may, subject to Shareholder approval, participate in the allocation of Securities forming part of the Shortfall.

1.14 Issue of Securities and dispatch of Holding Statements

Securities offered by this Prospectus are expected to be issued, and Holding Statements dispatched, on the date specified in the timetable on page 1 of this Prospectus. No issue of Securities will be made until ASX grants permission for the Official Quotation of the Securities.

The sale by the Applicant of Securities prior to the receipt of a Holding Statement is at the Applicant's own risk.

The Directors have the right to allocate the Securities offered under this Prospectus. The Company may reject any Application or allocate any Applicant fewer Securities than applied for under the SPP Offer. No Applicant under the SPP Offer has any assurance of being allocated all or any Securities applied for.

If an Application is not accepted, or is accepted in part only, the relevant part of the Application Monies will be returned without any interest.

1.15 ASX quotation of Shares and Options

Application for Official Quotation on ASX of the Securities issued pursuant to this Prospectus will be made within (7) days after the date of this Prospectus.

If the Securities offered pursuant to the SPP Offer are not admitted to Official Quotation within three (3) months after the date of this Prospectus, the Company will not allot or issue any Securities and all Application Monies received pursuant to this Prospectus will be repaid as soon as practicable, without interest.

The fact that ASX may agree to grant Official Quotation of the Securities is not to be taken in any way as an indication of the merits of the Company or the Securities.

1.16 Withdrawal

The Directors may at any time before allotment of Securities to the Applicants decide to withdraw this Prospectus and the SPP Offer, in which case the Company will return all Application Monies, without interest, within 28 days of giving notice of withdrawal.

1.17 Overseas Shareholders

The Company will not make an SPP Offer to Excluded Shareholders, being those Shareholders with a registered address outside Australia or New Zealand (**Eligible Jurisdictions**). The Company has decided that it is unreasonable to extend the Offer to Excluded Shareholders having regard to:

- (a) the number of Shareholders outside the Eligible Jurisdictions;
- (b) the number and value of Shares that would be offered to Shareholders outside the Eligible Jurisdictions; and
- (c) the cost of complying with the legal requirements and requirements of regulatory authorities in the overseas jurisdictions.

The Offer is being made to all Eligible Shareholders. The Company is not required to determine whether or not any registered Eligible Shareholder is holding Shares on behalf of persons who are resident outside the Eligible Jurisdictions (including nominees, custodians and trustees) or the identity or residence of any beneficial owners of Shares. 2. Company overview

2.1 Background to the Company

Mundo Minerals Limited (ASX: MUN) is building a long-term gold business in South America, with a near-term focus on commencing commercial production at its Torrecillas Gold Project in Peru and increasing production from its Engenho Gold Project in Brazil (both 100% owned).

Peru

The Company's key asset, the Torrecillas Gold Project in Peru, is currently producing around 8,000 ounces per annum from a single high-grade trial mining operation being undertaken as part of a Definitive Feasibility Study on a potential production profile of 80-100,000oz per annum at an average head grade of 15 gram per tonne based on narrow vein, high-grade mining.

Strong recent progress has been made with this Definitive Feasibility Study, including positive results from metallurgical and gravity test work, encouraging results from additional development along all three high-grade vein systems that will underpin the project, and significant advances with a review of the infrastructure required for the Project.

Commercial production is expected to commence in late 2012 on all three high-grade veins.

Brazil

The Engenho Gold Project, located in south-east Brazil, has been in production for 24 months and is growing its production profile from around 25,000 ounces per annum to approximately 43,000 ounces per annum with the development of a new satellite mining centre at Crista and an upgrade to the Engenho treatment plant.

It is the Company's short term plan to have three mines operating within the tenement boundary that will all utilise an existing central processing plant.

The introduction of ore from the second mine, the Crista open pit, which is located 2km north of the treatment plant, is expected to have a material positive impact on the Company's financial performance as a result of an increase in the average milled grade and additional efficiencies arising from the introduction of a second ore source to the Engenho plant.

Mundo has also identified other substantial new zones of gold mineralisation at the nearby Olhos anomaly, strengthening the potential to develop additional open pit and underground ore sources in this area in the short term with a targeted commencement date of mining in 2013, subject to further drilling success.

Mundo also has an option to acquire the Jaqueira Project, an advanced exploration/development project in Brazil, and holds a 51% interest in the Tocantins Joint Venture, which represents an attractive large-sale exploration opportunity covering extensive greenstone belts in central Brazil.

Competent person's statement

The information in this Prospectus that relates to exploration results and mineral resources is based on information compiled by Mr Armando Massucatto who is a member of the Australasian Institute of Mining and Metallurgy. Mr Massucatto is employed by the Company as Exploration Manager.

Mr Massucatto has sufficient experience which is relevant to the style of mineralisation and the type of deposits under consideration and to the activity which

he is undertaking to qualify as Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Massucatto consents to the inclusion in the Prospectus of the matters based on his information in the form and context in which it appears.

Target production statements

The information in this Prospectus that relates to production targets refers to targets that are conceptual in nature, where there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the determination of a mineral resource. Production targets are currently conceptual in nature and relate to future production goals based on the current resources.

Feasibility studies are currently underway to advance the economic evaluations. There remains at present insufficient certainty with respect to whether economically mineable mineralisation exists to reliably estimate future production rates. These production targets are also subject to the completion of necessary feasibility studies, regulatory approvals, financing arrangements, execution of relevant agreements and timely project construction.

As announced to ASX on 18 April 2011, it is proposed that the Company will appoint Mr Pattison as an Executive Director following the conclusion of the General Meeting to be held on 27 April 2011.

Mr Pattison has significant experience in the Australian resources sector, having been involved with advising companies in the resources sector through his involvement with a major accounting firm in the Corporate Advisory and Audit sections, managing the Corporate Advisory department of an Australian stockbroking firm and acting as CEO of a mining services company in Australia. Mr Pattison was previously chief financial officer of Mundo Minerals and has a strong understanding of the assets and strategies of the company and excellent contacts in the financial and broking communities.

3. Purpose and effect of the SPP Offer

3.1 Use of proceeds of the SPP Offer

The funds raised by the SPP Offer (and the Capital Raising in general) will be applied towards the continued development of Mundo's key gold assets in Peru and Brazil, including:

- (a) complete the current definitive feasibility study on the Torrecillas Gold Project in Peru, where development of a commercial high-grade gold mine is targeted to commence by the 4th quarter of 2011;
- (b) fund a major program of resource drilling at Torrecillas commencing in the 2nd quarter of 2011, targeting the finalisation of an initial JORC compliant resource;
- (c) provide additional working capital to support the development of the new Crista open pit, located 2km north of the Engenho underground mine in Brazil, and treatment facility; this new high-grade ore source is expected to enable production from Engenho to increase to 43,000oz pa from 25,000oz pa currently (sourced from the existing underground mine);
- (d) fund aggressive resource drilling at the Olhos anomaly, located adjacent to Crista, where an extensive zone of near-surface gold mineralization has been defined; and
- (e) fund resource drilling later this year at Crista to test depth extensions of the mineralization below 75m once the orientation and structure of the mineralization is better understood from initial mining activities.

Overall, the Directors believe that the funds raised pursuant to the Capital Raising will provide a stronger platform for the Company to drive its stated asset development strategy and that the financial structure of the Company will be more appropriately aligned with the potential growth requirements of the Company's assets. The funds raised will also strengthen the Company's balance sheet.

3.4 Effects of SPP Offer on control of the Company

If some Eligible Shareholders do not take up all of their Entitlement under the SPP Offer, then the shareholding interests of those Eligible Shareholders in the Company will be diluted.

The proportional interests of Excluded Shareholders may also be diluted because Excluded Shareholders are not entitled to participate in the SPP Offer.

3.5 Effect of Capital Raising on capital structure

The table below illustrates the effect of the Capital Raising on the Company's capital structure assuming full subscription under the Tranche 1 and 2 Placements and the SPP Offer:

Securities currently on issue	Securities already issued under the Tranche 1 Placement**	Securities issued under the Tranche 2 Placement	Securities issued under the SPP Offer	Total Securities on issue upon completion of Capital Raising***
229,581,454 Shares	28,200,000 Shares	51,800,000 Shares	40,000,000 Shares	321,375,177 Shares
10,350,000 Options*	28,200,000 Options	51,800,000 Options	40,000,000 Options	130,350,000 Options

* All Options are currently unlisted Options.

** These Securities form part of the Securities on issue, specified in column 1.

*** Assuming none of the Options issued pursuant to the Capital Raising have been exercised.

With the capital of the Company increasing by 120,000,000 Shares through the Capital Raising process, the total diluting effect on the shareholdings of existing Shareholders is 59.6%.

4. Risk factors

4.1 Introduction

Activities in the Company and its controlled entities, as in any business, are subject to risks which may impact on the Company's future performance.

Prior to deciding whether to take up their Entitlement, Eligible Shareholders should read the entire Prospectus and review announcements made by the Company to ASX (at www.asx.com.au under the code MUN) in order to gain an appreciation of the Company, its activities, operations, financial position and prospects.

An investment in Shares should be considered speculative. Shares carry no guarantee with respect to the payment of any dividends, returns of capital or the market value of those Shares.

Shareholders should also consider the risk factors set out below which the Directors believe represent some of the general and specific risks that Shareholders should be aware of when evaluating the Company and deciding whether to increase their shareholding in the Company. The following risk factors are not intended to be an exhaustive list of all of the risk factors to which the Company is exposed.

4.2 Specific risks

The following risks have been identified as being key risks specific to an investment in Mundo.

Future capital requirements

The Company's ongoing activities may require substantial further financing in the future for its business activities, in addition to amounts raised pursuant to the SPP Offer. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the current market price (or Offer Price) or may involve restrictive covenants which limit the Company's operations and business strategy.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations and this could have a material adverse affect on the Company's activities and could affect the Company's ability to continue as a going concern.

Country risk

The Company has projects located in the Federative Republic of Brazil and the Republic of Peru, which are less developed countries than Australia with associated political, economic, legal and social risks. There can be no assurance that the systems of government and the political systems in overseas countries will remain stable. There can be no assurance that government regulations relating to foreign investment, repatriation of foreign currency, taxation and the mining industry in these countries will not be amended or replaced in the future to the detriment of the Company's business and/or projects. The Directors are unaware of any such proposals as at the date of this Prospectus.

Gold price and exchange rate fluctuations

The revenue derived through the sale of gold exposes the potential income of the Company to gold price and exchange rate risks. Gold prices fluctuate and are

affected by numerous factors beyond the control of the Company. These factors include world demand for gold, forward selling by producers and the level of production costs in major gold-producing regions. Moreover, gold prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, gold.

Furthermore, the international price of gold is denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian and South American currencies, exposing the Company to the fluctuations and volatility of the rates of exchange between the United States dollar, the Australian dollar and South American currencies as determined in international markets.

4.3 Mining industry risks

Mineral exploration and mining may be hampered by circumstances beyond the control of the Company and are speculative operations which by their nature subject to a number of inherent risks, including the following:

Exploration risks

The success of the Company depends on the delineation of economically minable reserves and resources, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities.

Exploration on the Company's existing exploration and mining tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company and possible relinquishment of the exploration and mining tenements.

Resource estimates

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. These estimates were appropriate when made, but may change significantly when new information becomes available.

There are risks associated with such estimates. Resource estimates are necessarily imprecise and depend to some extent on interpretations, which may ultimately prove to be inaccurate and require adjustment. Adjustments to resource estimates could affect the Company's future plans and ultimately its financial performance and value.

Ability to exploit successful discoveries

It may not always be possible for the Company to exploit successful discoveries which may be made in areas in which the Company has an interest. Such exploitation would involve obtaining the necessary licences or clearances from relevant authorities that may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. Further, the decision to proceed to further exploitation may require participation of other companies whose interests and objectives may not be the same as the Company's.

Mining and development risks

Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management.

Mining and development operations can be hampered by force majeure circumstances, environmental considerations and cost overruns for unforeseen events.

Title risks

Interests in tenements in the Federative Republic of Brazil and the Republic of Peru are governed by legislation in their respective jurisdictions and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

Environmental risks

The operations and activities of the Company in Federative Republic of Brazil and the Republic of Peru are subject to environmental laws and regulations of those countries. As with most exploration projects and mining operations, the Company's operations and activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Joint venture parties, agents and contractors

There is a risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

Competition

The Company competes with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.

Key personnel

Recruiting and retaining qualified personnel are important to the Company's success. The number of persons skilled in the exploration and development of mining properties is limited and competition for such persons is strong.

Other

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of Mundo.

4.4 General investment risks

Stock market conditions

As with all stock market investments, there are risks associated with an investment in the Company. Share prices may rise or fall and the price of Shares might trade below or above the Offer Price for the Shares.

General factors that may affect the market price of Shares include economic conditions in both Australia and internationally, investor sentiment and local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity process, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

Liquidity risk

There can be no guarantee that there will continue to be an active market for Shares or that the price of Shares will increase. There may be relatively few buyers or sellers of Shares on ASX at any given time. This may affect the volatility of the market price of Shares. It may also affect the prevailing market price at which Shareholders are able to sell their Shares. This may result in Shareholders receiving a market price for their Shares that is less or more than the Offer Price paid under the SPP Offer.

Securities investment risk

Applicants should be aware that there are risks associated with any securities investment. Securities listed on the stock market, and in particular securities of mining and exploration companies have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the market price of the securities regardless of the Company's performance.

5. Continuous disclosure documents

5.1 Continuous disclosure obligations

This is a Prospectus for the offer of continuously quoted securities (as defined in the Corporations Act) of the Company and is issued pursuant to section 713 of the Corporations Act as a transaction specific prospectus. Accordingly, this Prospectus does not contain the same level of disclosure as an initial public offering Prospectus.

6. Additional information

6.1 Rights and liabilities attaching to Shares

The Shares issued under this Prospectus will be fully paid ordinary shares in the capital of the Company and will rank equally with the existing Shares on issue.

The following is a broad summary (though not necessarily an exhaustive or definitive statement) of the rights and liabilities attaching to the Shares. Full details of the rights and liabilities attaching to the Shares are contained in the Constitution of the Company and in certain circumstances, are regulated by the Corporations Act, the ASX Listing Rules, the ASX Settlement Rules and the common law. The Company's Constitution is available for inspection free of charge at the Company's registered office.

(a) Share capital

All issued ordinary fully paid shares rank equally in all respects.

(b) Voting rights

At a general meeting of the Company, every holder of Shares present in person, by an attorney, representative or proxy has one (1) vote on a show of hands and on a poll, one (1) vote for each Share held, and for every partly paid Share held, a fraction of a vote equivalent to the proportion which the amount paid (not credited) on the Share is of the total amounts paid and payable (excluding amounts credited) on the Share. Where there is an equality of votes, the chairperson has a casting vote.

(c) Dividend rights

Subject to the rights of persons entitled to Shares with special rights as to dividend (at present there are none), all dividends as declared by the Directors shall be payable on all Shares in proportion to the amount of capital paid or credited as paid on the Shares during any portion or portions of the period in respect of which the dividends is paid.

Dividends are payable as resolved by the Directors, but only to the extent that the Company's assets exceed its liabilities by at least the amount of the dividend to be paid, it is fair and reasonable to the Shareholders as a whole and the payment of the dividend does not materially prejudice the Company's ability to pay its creditors.

The Directors may, before declaring any dividend, set aside out of the profits of the Company such amounts as they may determine as reserves. The Directors may direct that payment of the dividend be made wholly or in part by the distribution of specific assets or other Securities of the Company.

(d) Rights on winding-up

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair upon any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit

of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other Securities in respect of which there is any liability.

(e) **Transfer of Shares**

Shares in the Company may be transferred by such means in accordance with the Company's Constitution, the Corporations Act, ASX Listing Rules and ASX Settlement Rules.

The Directors may refuse to register a transfer of Shares only in those circumstances permitted by the Company's Constitution, the ASX Listing Rules and ASX Settlement Rules.

(f) **Further increases in capital**

Subject to the Company's Constitution, the Corporations Act and ASX Listing Rules, Shares in the Company are under the control of the Directors, who may allot or dispose of all or any of the Shares to such persons, and on such terms, as the Directors determine.

Subject to ASX Listing Rules, the Directors have the right to grant Options or other Securities with rights of conversion to Shares or pre-emptive rights to any Shares, to any person, for any consideration and for any stock.

(g) **Variation of rights attaching to Shares**

The rights attaching to any class of Shares (unless otherwise provided by their terms of issue) may be varied by a special resolution passed at a separate general meeting of the holders of those Shares of that class, or in certain circumstances, with the written consent of the holders of at least seventy-five percent (75%) of the issued Shares of that class.

(h) **General meeting**

Each holder of Shares will be entitled to receive notice of, and to attend and vote at, general meetings of the Company and to receive notices, accounts and other documents required to be furnished to Shareholders under the Corporations Act and the ASX Listing Rules.

 - (i) a written exercise notice (in the form approved by the Board of the Company from time to time) specifying the number of Options being exercised and Shares to be issued; and
 - (ii) payment of the Exercise Price for the Options, the subject of the exercise notice, by way of bank cheque or by other means of payment approved by the Company.
