### **Review of operations**

In December 2008 Uscom signed a distribution partnership with Spacelabs Healthcare for North America, Latin America, Europe, Middle East and India. Spacelabs are a top tier medical device distributor with strong established marketing channels in these regions. The USCOM 1A is an important technology for them as it provides a differentiator in the highly competitive monitoring market. The agreement covers the in hospital market and allows Uscom to develop other market opportunities outside the hospital.

This was a very important achievement for the company as strategically we were very committed to this path and management placed a lot of effort towards achieving this outcome. In addition to the distribution agreement with Spacelabs Healthcare, Uscom also completed an equity investment with Spacelabs parent company, OSI Systems. This equity deal was for two million shares priced at \$0.30 which represented a slight premium to market at the time of the transaction along with a further two million options at a 25% premium. This equity investment provided Uscom with additional capital to help support Spacelabs launch the USCOM product through training and education.

First quarter sales were strong and we were on track to show good sales growth for the half year however this slowed significantly through the second quarter. This was attributable to many factors, firstly the economic environment led to many customers deferring purchases due to capital freezes that were put in place. Management attention was predominantly focused on completing the partnership with Spacelabs which resulted in fewer direct sales in North America and Australia. We are anticipating strong sales growth in North America as a result of having a strong sales force representing our product. Australian sales were low for the period largely due to a lack of resources in the region, we are reviewing options for the Australian region.

+ See chapter 19 for defined terms.

We continued to tightly control costs whilst maintaining core capabilities and this combined with the new equity has kept us in a strong cash position. Uscom will continue to closely manage costs whilst ensuring that we provide the optimum level of support to our distribution partners. Key developments in the half year include the release of a new hardware platform which keeps the Uscom technology up to date with the latest in technology and the enhancement of our education and training materials which will be essential in rolling the product out to a much larger sales force. Through solid financial management we were able to minimise costs and recognise foreign exchange gains at an ideal time.

Uscom continues to be well represented at international conferences and through publications and presentations on our technology. Management believes that our established product and solid scientific grounding, combined with our partnership with Spacelabs, will generate solid sales over the next period. This will position us well so that we will be able to extend into additional markets and begin to realise the strong potential of our patented technology.

Chartered Accountants

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

*Independence*

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.

*Conclusion*

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Uscom Limited is not in accordance with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2008 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 Interim Financial Reporting and *Corporations Regulations 2001*.
