UNITH Releases Streaming Avatars — The Fastest Real-Time Digital Human Responses in the Industry (Alpha Phase)

Unith Ltd (ASX: UNT & FWB: CM3) is pleased to announce the **alpha launch of its breakthrough Streaming Avatars**, powered entirely by **UNITH's in-house streaming technology** — a proprietary real-time system developed and optimized by the company's own engineering team.

This innovation represents a **80% reduction in latency**. UNITH's digital humans now often responds in **under one second** delivering **image, voice, and accurate content generation** simultaneously. The result: a truly **real-time, human-like conversation experience**.

*"Being able to deliver lifelike answers in less than a second is a huge milestone for us," said **Rakan Sleiman, General Manager of UNITH**. "Everything — from architecture to performance optimization — has been built in-house. It's a reflection of our commitment to developing proprietary technology that defines the future of digital human interaction."*

The new **streaming framework** is currently live with selected strategic clients as part of UNITH's **alpha rollout program**. Purpose-built for **human-AI interaction**, the platform provides **unparalleled speed, scalability, and cost efficiency**, supporting deployments across **customer experience, education, healthcare, and entertainment** sectors.

Early testing has shown **dramatic improvements in responsiveness and scalability**, while maintaining **over 90% accuracy** in AI-driven conversations.

"Our new streaming system isn't just faster — it's smarter and more scalable," added Sleiman. "Because it's fully developed in-house, we have total control over performance, quality, and cost — making it the most flexible and efficient streaming solution in the market."

Following successful validation with early customers, UNITH expects to **expand access in the coming quarter**, marking a significant step toward its vision of making **realistic, interactive AI accessible to organizations worldwide**.

This achievement reinforces UNITH's position as a **pioneer in digital human technology** — and highlights the company's belief that the **future of digital communication must be built, owned, and perfected in-house**.

Unith Ltd (ASX:UNT) is a technology company that specialises in AI-driven digital human and conversation design solutions. Its focus is the design, development, and deployment of interactive, artificial intelligence (AI)-powered, conversational agents that are realistic, multilingual and scalable. This technology, which can take the form of AI avatars, interacts in a lifelike manner and enhances business clients' customer engagement, education, and entertainment metrics. Unith is now successfully implementing a strategy to monetise its proprietary AI and digital human capabilities.

Unith also operates a growing business-to-consumer (B2C) subscription division, which leverages the value-add created by the company's digital human and conversation design solutions technology. This division, which utilises literally thousands of Unith-created digital
