

Visionflex Awarded NSW Health Contract to Supply Remote Patient Monitoring Hardware

Highlights:

- **Visionflex awarded a contract for approximately \$0.8 million to supply proprietary Visionflex clinical hardware for NSW Health's statewide Remote Patient Monitoring (RPM) Digital Uplift initiative.**
- **Hardware delivery is expected to be completed in June 2026.**

Visionflex Group Limited ("**VFX**" or the "**Company**"), a leader in virtual healthcare technology, announces that it has been awarded a contract by NSW Health following a Request for Quote (RFQ) process. The project relates to the supply of proprietary Visionflex hardware supporting a statewide Remote Patient Monitoring (RPM) Digital Uplift initiative for Hospital in the Home (HITH) and Virtual Hospital programs.

The statewide RPM Digital Uplift initiative is designed to enhance the delivery of virtual healthcare services across NSW Health's Virtual Hospital and Hospital in the Home programs. Through the deployment of connected clinical devices and smart technologies, clinicians will be able to remotely monitor patient vital signs, support recovery within the home environment, and reduce avoidable hospital presentations.

The supply contract requires the Company to supply proprietary Visionflex hardware, including:

- 127 General Examination Cameras (GEIS); and
- 162 Video Examination Camera Glass Kits.

The deployment of the hardware is scheduled to be completed in June 2026 across multiple NSW hospitals and health service organisations.

The contract contains standard terms and conditions customary for contracts of this nature.

Visionflex Managing Director and CEO, Joshua Munday commented "This engagement reflects the increasing adoption of Visionflex technology within large scale virtual care programs and further validates the Company's capability to support enterprise healthcare deployments across Australia."

-- END --

This announcement was approved for release by the Board of Directors.
