

“Making Victoria great again”

VHM Limited - Goschen Project

26th Annual Mineral Sands & Rare Earths Conference

26 March 2026

Disclaimer and forward-looking statements

Important Information

This presentation has been prepared by VHM Limited ACN 601 004 102 (Company). It contains general background information only which is current at the date of this presentation unless otherwise specified. It is not intended to be an investor presentation. It contains selected summary information only and does not purport to be all-inclusive or to contain all the information that may be relevant to a prospective investor or stakeholder.

The Company, its affiliates, officers, directors, employees and agents do not accept responsibility or liability for this Presentation or its contents (except to the extent that such liability cannot be excluded by law). No representation or warranty is made as to the Presentation's accuracy or completeness. Recipients must satisfy themselves as to the accuracy of all such information. The presentation has been prepared based on information available at the time of preparation and is subject to change without notice. In receiving this presentation, each recipient agrees to the terms and conditions stated in this slide, including any modification to them.

This presentation does not constitute investment or financial product advice. It is not intended to be used as the basis for making an investment decision, nor is it intended to constitute legal, tax, accounting or other advice. Any references to or explanations of legislation, regulatory issues, benefits or other legal commentary (if any) are indicative only, do not summarise all relevant issues and are not intended to be a full explanation of a particular matter. The information has been obtained from and based on sources believed by the Company to be reliable. Past performance is not an indication of future performance.

This presentation may contain forward-looking statements, guidance, forecasts, estimates, prospects, projections or statements in relation to future matters that may involve risks or uncertainties and may involve significant items of subjective judgement and assumptions of future events that may or may not eventuate (Forward Statements). Forward Statements can generally be identified by the use of forward-looking words such as "anticipate", "estimates", "will", "should", "could", "may", "expects", "plans", "forecast", "target" or similar expressions. Forward Statements including indications, guidance or outlook on future revenues, distributions or financial position and performance or return or growth in underlying investments are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. To the extent that certain statements contained in this presentation may constitute 'Forward Statements' or statements about forward-looking matters, then the information reflects the Company's (and no other party's) intent, belief or expectations as at the date of this presentation. No independent third party has reviewed the reasonableness of any such statements or assumptions. None of the Company, its related bodies corporate and its officers, directors, employees, advisers, partners, affiliates and agents (together, the VHM Parties) represent or warrant that such Forward Statements will be achieved or will prove to be correct or gives any warranty, express or implied, as to the accuracy, completeness, likelihood of achievement or reasonableness of any Forward Statement contained in this presentation. Except as required by law or regulation, the Company assumes no obligation to release updates or revisions to Forward .

Such forward looking statements involve known and unknown risks, uncertainties and other important factors beyond VHM Limited's control that could cause actual results, performance or achievements of VHM Limited to be materially different from future results, performance, or achievements expressed or implied by such forward looking statements.

Statements to reflect any changes. Recipients should form their own views as to these matters and any assumptions on which any of the Forward Statements are based and not place reliance on such statements.

Forward looking statements are based on numerous assumptions regarding VHM Limited's present and future business strategies and the environment in which VHM Limited will operate in the future. Among the important factors that could cause VHM Limited actual results, performance or achievements to differ materially from those in the forward-looking statements in this Presentation (without limitation) a significant change in VHM's performance (financial or otherwise) or operating environment, a material change to law or regulation (including changes to the regulatory policy or interpretation), and risks and uncertainties associated with the ongoing impacts of the COVID-19 pandemic, the conflict between Russia and Ukraine, and the Australian and global economic environment and capital market conditions.

These forward-looking statements speak only as at the date of this Presentation. Save as required by applicable law or regulation the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based. As a result of these factors, the events described in the forward-looking statements in this Presentation may not occur.

No party other than the Company has authorised, permitted or caused the issue, submission, dispatch or provision of this presentation, or takes any responsibility for, or makes or purports to make any statement, representation or undertaking in this presentation and there is no statement in this presentation that is based on any statement by any other party. No person, either as a director, partner or in the employment of the Company has any authority to make, imply, or give any representation or warranty whatsoever in relation to the information contained in this presentation. None of the VHM Parties take any responsibility for any information in this presentation or any action taken by you on the basis of such information.

To the maximum extent permitted by law, the VHM Parties:

- exclude and disclaim all liability, including (without limitation) any liability or negligence, for any expenses, losses, damages or costs incurred either as a result of the information in this presentation being inaccurate or incomplete in any way for any reason, or otherwise arising in connection with this presentation; and
- make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of information in this presentation.

Compliance Statement

The information in this presentation that it announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified.

Goschen project highlights

Well-positioned Tier 1 rare earths and minerals sands project with globally significant mineral assemblage

Compelling rare earths mineral assemblage: Orebody contains both light (Neodymium, Praseodymium) and heavy (Dysprosium, Terbium) rare earths, mineralised in sands

All material approvals received: Environment Effects Statement, Mining Licence, Environmental Protection and Biodiversity Conservation Act, Work Plan

Clear pathway to near-term production: 5.0Mtpa mine plan, with FID expected 1H 2026 (subject to financing) and target first production by Q4 2027; 100% land ownership

Offtake and funding support: Letters of Interest for up to US\$200 million (~A\$280m) from US EXIM Bank and A\$75 million from Export Finance Australia; MOUs in place with Mitsui and Currumbin and ongoing discussion across strategic partnership

Goschen project delivers compelling economics

5Mtpa, low-risk growth utilises <50% of reserves and has a 3.3 years payback with extensive expansion upside

Project returns	
NPV ₈ (pre-tax, pre-corporate costs)	\$943 million
IRR (pre-tax, pre-corporate costs)	36%
Payback (pre-tax, pre-corporate costs)	3.3 years
Operational metrics (LOM annual avg.)	
Mine throughput	5 Mtpa
Rare earth mineral concentrate	8,300 tpa
NdPr (in concentrate)	992 tpa
DyTb (in concentrate)	116 tpa
Zircon / Titania Heavy Mineral Concentrate	131,000 tpa
Financial metrics	
Project capital (nominal, 2025)	\$323 million
Total funding required (nominal, 2025)	\$438 million
REO full basket value (real 2025)	US\$50/kg
Unit operating cost (real 2025, net HMC credit)	A\$9 / kg REO
EBITDA (nominal, 2025)	\$159 million pa

- ✓ 5Mtpa plant throughput with robust project economics and cash flow
- ✓ Dual revenue stream with competitive unit opex of A\$9/kg REO (net of HMC credit)
- ✓ Rare earth contains balanced mix of both light (NdPr) and heavy (Dy and Tb)
- ✓ Pathway to extend mining licence beyond 20 years
- ✓ The current project plan utilises less than 50% of ore reserves and less than 12% of mineral resources

Diversified assemblage across light & heavy rare earth

Heavy rare earths (Dy, Tb) contribute a significant (21%) to the basket value of Goschen

- Full spectrum of magnet critical rare earths with significant light (Nd, Pr) and heavy (Dy, Tb) rare earths
- Dy and Tb are the most supply-constrained segment of the rare earths market
- Mineral sands co-products boost profitability and provide a hedge against potential volatility in REE pricing

Notes:

- (1) Goschen Rare Earth Mineral Concentrate has an average REO grade of 58.9%.
 (2) Calculated from Goschen REO assemblage and REO prices published on 12 February 2026 source from Asian Metal.
 (3) Mining license has been granted for Area 1 and Area 3 only with total ore reserves of 93Mt.

- (4) See Company ASX release dated 15 October 2025.
 (5) See Company ASX release dated 16 May 2023.
 (6) See Company ASX release dated 24 January 2024.

Proximity to critical infrastructure and regional centres

Road, rail and port access with secure water and energy infrastructure located near Swan Hill, Kerang and Ultima

All substantive approvals obtained

Work Plan approvals received in November 2025, enabling VHM to progress towards project FID in 1H CY26

Key approval	Status	Approval date
MOU with Gannawarra Shire Council ¹	✓	March 2023
MOU with Swan Hill Rural City Council ²	✓	May 2023
Victorian Minister for Planning approved public exhibition	✓	November 2023
Public hearing	✓	March – April 2024
Environment Effects Statement (EES) ³	✓	December 2024
Major Project Status ⁴	✓	February 2025
Mining Licence ⁵	✓	April 2025
Environmental Protection and Biodiversity (EPBC) Act 1999 Approval ⁶	✓	September 2025
Cultural Heritage Management Plan ⁷	✓	October 2025
Work Plan ⁸	✓	November 2025

Notes:

(1) See Company ASX release dated 20 April 2023. (2) See Company ASX release dated 1 May 2023. (3) See Company ASX release dated 10 December 2024. (4) See Company ASX release dated 20 February 2025. (5) See Company ASX release dated 11 April 2025.

(6) See Company ASX release dated 19 September 2025. (7) See Company ASX release dated 30 October 2025 (8) See Company ASX release dated 28 November 2025.

Victoria Tier 1 mining jurisdiction

-  Significant historical mining heritage and experience
-  Sophisticated Mining Equipment, Technology services
-  Backing world-leading innovative exploration techniques
-  Highly skilled workforce
-  Reliable transport connectivity
-  Strong environmental protections & regulatory framework
-  Streamlined approvals (40% reduction in approval times)
-  Readily available investment facilitation
-  Two fully permitted critical minerals mines (3 more in approvals process)

Clear pathway to production

5Mtpa plant targeting FID in 1H 2026 and first production in Q4 2027

*Indicates award as notice to proceed / subject to FID.

Community and land access

A transparent, community-first approach: partnering with landowners, councils and First Nations

Local engagement

- An **active presence in the region**
 - engaging regularly with landowners, councils, government agencies
 - First Nations groups and community stakeholders to build and retain social licence throughout all project stages
- A **Goschen Community Reference Group** will be established in early H1 to support transparent dialogue, provide a structured channel for community input and strengthen long-term relationships
- VHM is working with the **Wamba Wemba (Registered Aboriginal Party)** and **local Barapa Barapa representatives**, ensuring cultural considerations, consultation and partnership remain central to project development
- A **community benefits program** is being developed alongside the Neighbour Agreement program for landowners adjacent to the Project to acknowledge amenity impacts

Land ownership

- Land has been **secured for the life** of the approved Goschen Project

Indicative long-term funding support and offtake agreements

Indicative US and Australian government funding, engagement with potential financiers and continued strong interest from strategics and offtakers¹ provide long-term support for the project

 EXPORT-IMPORT BANK OF THE UNITED STATES		Other debt funding	Strategics, joint venture partners & offtakers	Public market equity
US\$200m ²	A\$75m ³			
- Letter of Interest for up to US\$200 million (~A\$280m) in project financing support - Subject to standard due diligence and compliance with EXIM's program, legal, and eligibility requirements - Up to 15 years	- Letter of Support for up to A\$75 million in project financing support - Subject to further due diligence	- Detailed discussions underway with major domestic and international banks and project financiers - BCH facility fully repaid; no intention to further draw down	- Detailed negotiations ongoing with Australian, American, Japanese, Korean and European strategics, including potential JV project partners and offtakers - MOUs in-place with Currumbin and Mitsui⁴	Additional public market equity funding subject to future requirements

Notes:
(1) The current binding offtake agreement is subject to conditions precedent. If these conditions are not satisfied by the time required under the relevant agreement, unless the parties agree to extend, waive or renegotiate the conditions, the agreement may be terminated. Please refer to Appendix D for further disclosure on key risks.
(2) See Company ASX release dated 6 October 2025.
(3) See Company ASX release dated 21 October 2025.
(4) See Company ASX releases dated 30 April 2025 and 2 July 2025.

Rare Earths market outlook

Widening supply/demand imbalances in NdPr & DyTb underscore an increasingly constrained REE landscape

NdPr outlook

- Global Nd-Pr supply is **heavily concentrated**, with ~90% of current refined supply from China, creating structural dependence and exposure to policy/price volatility
- New **Nd-Pr projects take many years to commission** due to technical, permitting and financing complexity, making new supply slow to market
- The industry needs as much ex-China Nd-Pr as possible to **support magnet demand growth**, strengthen supply resilience and reduce concentration risk, especially as demand for heavier rare earth modifiers continues to increase

Global Nd-Pr oxide supply / demand deficit

Dy & Tb outlook

- China's export controls and downstream dominance reinforce the need for **diversified, ex-China supply chains** across magnets, metals and oxides
- Significant global **Dy and Tb supply gaps** are expected as high-performance NdFeB magnets increasingly require heavy rare earth doping for thermal stability
- VHM's **Goschen product contains relatively high proportions** of Dy and Tb, putting it in structurally high demand due to scarcity and premium pricing for heavies
- With heavies as the **ultimate bottleneck**, Dy and Tb availability becomes the key constraint on scaling global magnet production, elevating the strategic value of HREE-rich suppliers

Global Dy and Tb oxide supply / demand deficit

Increasing western price divergence

Growing Western actual price premiums are prevalent in the market today

- Historically, rare earth pricing has been dictated by China due to its refining supply dominance globally especially on heavy rare earths
- There is a growing divergence of Chinese domestic price and European prices since the export control imposed from April 2025
- The price premiums against Chinese prices range from 500% to 3,600% for some heavy rare earths
- As supply continues to diversify in Western supply chain, a distinct ex-China price benchmark is emerging

Concluding remarks

**All mining approvals
attained and shovel ready**

**Diversified with two
revenue streams
(including heavy &
light rare earths)**

**Progressing funding
with EFA and EXIM**

**Skilled workforce and
existing infrastructure
in place in the region**

**Project NPV of
A\$943 million**

Appendix a | JORC tables

Appendix b | Board and management team

Board

IAN SMITH
Non-Executive Chairman

*BEng Mining (Honours), BFinAdmin,
FAusIMM, FIEAust*

40+ years executive and board experience with a career spanning domestic and international mining and mining services companies.

Mr Smith's technical, operational and commercial disciplines have been attributes of his successful delivery of major capital projects and business growth for several listed companies and has held managing director and chief executive officer positions for Orica and Newcrest Mining. Mr Smith's previous senior and executive positions include those with Rio Tinto, WMC Resources, CRA Limited and Pasminco.

2 years involvement with VHM.

RON DOUGLAS
Non-Executive Director

BE, FAIM, MAusIMM, MAICD

Extensive executive and operations delivery experience gained over a 40-year career with publicly listed global mining, energy, and manufacturing companies.

Mr Douglas expertise is in executive operations delivery positions with strengths in major capital program execution, and running corporate profit/loss centres, involving strategic program directorship, safety leadership and corporate transaction negotiation.
