Proposed Acquisition: Concrete Playground

Concrete Playground, launched in 2009, is a leading digital city guide that curates the most engaging events, experiences, and trends in Sydney, Melbourne, Brisbane, Auckland, and Wellington.

Its platform complements The Brag Media's go-to-market strategy by tapping into a similar agency network, yet serving a distinct set of clients and briefs, thereby broadening Vinyl Group's commercial reach and diversification.

Concrete Playground's unaudited revenues over the past twelve months amounted to \$4 million, with a pro-forma EBITDA of approximately \$1.5 million upon completion. Integrated under Vinyl Group's media division, the business is expected to deliver immediate operational efficiencies across sales and operations, while bringing forward our timeline to achieving positive cash flow by six months.

Vinyl Group has entered into a binding Heads of Agreement to acquire Concrete Playground for a total consideration of \$5 million, comprising \$3.5 million in cash and \$1.5 million in scrip.

* If the proposed transaction does not proceed for an unforeseen circumstance, the Company would look to identify another acquisition target that fits its strategy

Acquisitions Completed in FY25

A trusted name in the Australian media industry, Mediaweek has been the go-to source for media, agency, marketing, and thought leadership content since 1990. This **asset purchase**, which included key talent, presented a unique opportunity to fill a gap in our trade media strategy while adding a **positive profit of \$350K-400K²** overnight. By integrating Mediaweek with our existing media business, we realise immediate cost savings, enhance our existing trade operations, and provide an additional pipeline for Funkified events.

NFTs meet NFC: Serenade is a cutting-edge web3 music technology platform that has pioneered content-rich music products and experiences. Serenade is at the forefront of the rapidly growing **digital collectibles market** signing partnerships with over 200 global artists and more than 100 record labels. The deferred scrip compensation incentivises the team to become profitable by end FY25, whilst the acquisition will allow Vinyl.com to introduce exclusive artist products, enhance e-commerce capabilities, expand into the UK, and drive significant cross-sell opportunities across Vinyl Group.

Founded in 2009, Funkified Entertainment is a premier events and brand activations business, with a stellar reputation and a robust client base. As the in-house events arm of The Brag Media since 2021, Funkified has consistently delivered strong financial performance, with **\$4.03 million in revenue** and **\$430K profit in FY24¹**. Integrating Funkified into Vinyl Group and rolling it into **Brag Events** has consolidated our event operations while providing new revenue opportunities through cross-promotion and internal client referrals.

COMBINED REVENUES OF COMPLETED ACQUISITIONS = \$7M¹
COMBINED POSITIVE CASHFLOW IMPACT = ~\$1M²

NFT - Non Fungible Token, NFC - Near Field Communication

¹ Based on unaudited information of the acquisitions based on their FY2024 run rates

² Proforma impact based on their proforma run rates plus changes as part of integrating into Vinyl Group for FY2025.

Appendix C - Risks, continued

Risks specific to Vinyl Group's business

(a) Software risks

Vinyl Group is reliant on the availability and quality of its software. It is possible that an event could occur (for example, a software, hardware or connectivity outage, a software error or malfunction) that renders critical functionality that Vinyl Group relies on for business to become unavailable affecting Vinyl Group's ability to service its customers. This could significantly impact Vinyl Group's reputation and financial performance. Vinyl Group has built backup, redundancy and disaster recovery plans into its systems architecture to mitigate this risk, however Vinyl Group cannot guarantee these strategies and protections will be successful.

(b) Development risks

Vinyl Group's various platforms are in continuous development in cooperation with the industry and consumers, but our platforms include first of its kind features. The Company has built its business model to succeed at management's view of reasonable take up levels based on management's belief on what is a realistic base of assumptions. As with all software businesses, development time is crucial. Vinyl Group requires continuous development in order to grow the business by providing more features, new revenue streams and competitive barriers. Vinyl Group mitigates these risks by implementing agile software development practises to ensure its platforms can pivot and evolve based on changing requirements.

We utilise outside parties with the experience in building these types of platforms. There is a risk of delays by having multiple parties in a reduced timeline as the project management of such effort can exceed our resource capacity in the short term. Vinyl Group is mitigating this risk by limiting the scope of the initial release and build enhancements through incremental development which may be developed in house.

Vinyl Group has acquired platforms which have been developed by other parties with the experience in building these types of platforms. There is a risk that integration of these platforms and our own platforms may not occur as originally envisioned and may potentially delay affecting the timelines of the affected platforms.

All our platforms have development and maintenance dependencies, there is a risk of delay as we streamline the platforms by operating with a single development team that is allocated to the priority tasks at any given moment.

Appendix C - Risks, continued

(c) Future funding needs

The cash reserves as at the date of this Offer Document, together with the funds to be received in connection with the Entitlements Offer, are considered sufficient to meet the immediate objectives of the Company. Further funding may be required by the Company to support its ongoing operations and implement its strategies [in the short to medium term]. Accordingly, we may need to engage in future equity and debt financings, including other methods if applicable to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our existing shareholders could suffer additional significant dilution, and any new equity securities we issue could have rights, preferences, and privileges superior to those of holders of our ordinary shares. We may not be able to obtain additional financing on terms favourable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to support our business growth, acquire or retain Users, and to respond to business challenges could be significantly impaired. This may result in the delay or cancellation of certain activities or projects which would likely adversely affect the potential growth of the Company which in turn could harm our business.

Appendix C - Risks, continued

(i) **Computer system risk**

Our growth depends on the ability of our potential customers to access the Jaxsta, Vampr, Serenade and Vinyl Platforms, as well as the websites for The Brag Media and its publications, as well as Mediaweek website, at any time and within an acceptable amount of time. In addition, our intention is to rely almost exclusively on our website for the payment of product and service sales. We may in the future experience disruptions, data loss, outages and other performance problems with our infrastructure and website due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times as our products and website become more complex and our user traffic increases. If our products and websites are unavailable or if our users are unable to access our products within a reasonable amount of time, or at all, our business would be harmed. Moreover, we depend on services from various third parties, such as Amazon Web Services, to maintain our infrastructure and distribute our products via the Internet. Any disruptions in these services, outside of our control, would significantly impact the continued performance of our products. In the future, these services may not be available to us on commercially reasonable terms, or at all. Any loss of the right to use any of these services could result in decreased functionality of our products until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated into our infrastructure. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed. To mitigate these risks to the business we utilise cloud based infrastructure to back up across multiple regions covering our global market and endeavour to ensure architecture is scalable and systems are constantly evolving to take advantage of more performative technologies.

Appendix C - Risks, continued

(j) Data loss, theft or corruption

Techniques used to gain unauthorised access to data and software are constantly evolving, and we may be unable to prevent unauthorised access to data pertaining to our users, including credit card and debit card information and other personal data about our Users, business partners and employees. Like all internet services, our Service, which is supported by our own systems and those of third parties we work with, is vulnerable to software bugs, computer viruses, internet worms, break-ins, phishing attacks, attempts to overload servers with denial-of-service, data scraping or other attacks and similar disruptions from unauthorised use of our third-party computer system. Any of these could lead to system interruptions, delays or shutdowns, causing loss of critical data or the unauthorised access to personal data. We may incur significant costs in protecting against or remediating cyber-attacks.

Any failure or perceived failure, by us to maintain the security of data relating to our users, to comply with our privacy policy, laws and regulations, industry standards, and contractual provisions to which we may be bound, could create a loss of confidence in us. This could also result in actions against us by governmental entities or others, all of which could result in litigation and financial losses, and could potentially cause us to lose Users, data partners and revenue generating opportunities.

Vinyl Group has risks on both the data ingestion and data maintenance portion of the business. On the data ingestion side, Vinyl Group has developed and driven new standardised tools to ensure data that is ingested is translated into a Vinyl Group proprietary format before being made available to the public. This will ensure that no proprietary partner data is available in its original format. The ingestion process has also worked with industry groups and data partners to utilise standards to ensure the highest level of compatibility. Regarding data maintenance, Vinyl Group utilises various systems to manage their structures and assets to prevent unauthorised access and corruption of data. Vinyl Group will provide its services online through the axsta, Vampr, Serenade and Vinyl Platforms, as well as the websites for The Brag Media and its publications, as well as Mediaweek website.

Vinyl Group has strategies and protections in place to mitigate security breaches and to protect data.

Appendix C - Risks, continued

(k) Reputation Risk

Such negative publicity could have an adverse effect on the size, engagement, and loyalty of our User base and result in decreased revenue, which could materially adversely affect our business, operating results, and financial condition.

Negative publicity can spread quickly, whether true or false. Disgruntled customers posting negative comments about Vinyl Group, in public forums may also have a damaging effect on Vinyl Group's reputation and its ability to earn revenues and profits.

Our brand may be impaired by a number of other factors, including failure to keep pace with technological advances on the Jaxsta Platform, Vinyl Platform or with our Service, slower load times for our Service, a decline in the quality or quantity of the content available on our Service, a failure to protect our intellectual property rights, or any alleged violations of law, regulations, or public policy.

To mitigate these risks, Vinyl Group:

- (l) is working with publicists locally and internationally who will alert us to any bad press and help mitigate the fallout;
- (m) has an alerts system that notifies us of press for monitoring;
- (n) has a digital media agency that manages our social media and necessary responses working with the wider Vinyl Group team and our team of publicists;

Appropriate responses have been prepared, then reviewed and approved by senior management to ensure we can respond to questions and comments on social media in a timely manner with the best possible response;
- (q) has created clear escalation pathways to respond to comments that fall outside the scope of our prepared responses; and
- (r) created info@vinyl.group and investors@vinyl.group - both email addresses have multiple people receiving these emails so there is always someone to review, respond or escalate if required.

Appendix C - Risks, continued

Appendix C - Risks, continued

General risks

(a) Price of Shares

The Shares are subject to general market risks applicable to all securities listed on a stock exchange. This may result in fluctuations in the Share price that are not explained by the performance of the Company.

The price at which Shares are quoted on the ASX may increase or decrease due to a number of factors, some of which may not relate directly or indirectly to the Company's performance or prospects.

There is no assurance that the price of the Shares will increase in the future, even if the Company's earnings increase.

Some of the factors which may affect the price of the Shares include:

- fluctuations in the domestic and international markets for listed stocks;
- general economic conditions, including interest rates, inflation rates, exchange rates, commodity and oil prices or changes to government;
- fiscal, monetary or regulatory policies, legislation or regulation;
- inclusion in or removal from market indices;
- the nature of the markets in which the Company operates;
- general operational and business risks;
- variations in sector performance, which can lead to investors exiting one sector to prefer another; and
- initiatives by other sector participants which may lead to investors switching from one stock to another.

Deterioration of general economic conditions may also affect the Company's business operations, and the consequent returns from an investment in Shares.

In the future, the sale of large parcels of Shares may cause a decline in the price at which the Shares trade on ASX.

Appendix C - Risks, continued

(b) Shareholder dilution

In the future, the Company may elect to issue further Shares in connection with fundraisings, including to raise proceeds for acquisitions or investments. While the Company will be subject to the constraints of the Listing Rules regarding the percentage of its capital it is able to issue within a 12 month period (other than where exceptions apply), Shareholders may be diluted as a result of such fundraisings.

(c) Tax law and application

The application of and change in relevant tax laws (including income tax, goods and services tax (or equivalent), rules relating to deductible liabilities and stamp duty), or changes in the way those tax laws are interpreted, will or may impact the tax liabilities of the Company or the tax treatment of a Shareholder's investment. An interpretation or application of tax laws or regulations by a relevant tax authority that is contrary to the Company's view of those laws may increase the amount of tax paid or payable by the Company.

Both the level and basis of tax may change. Any changes to the current rate of company income tax (in Australia or other countries in which the Company operates) and / or any changes in tax rules and tax arrangements (again in Australia or other countries in which the Company operates) may increase the amount of tax paid or payable by the Company, may also impact Shareholder returns and could also have an adverse impact on the level of dividend franking / conduit foreign income and Shareholder returns. In addition, an investment in Shares involves tax considerations which may differ for each Shareholder. Each Shareholder is encouraged to seek professional tax advice in connection with any investment in the Company.

(d) Force majeure events

Events may occur within or outside Australia that could impact upon global, Australian or other local economies relevant to the Company's financial performance, the operations of the Company and the price of the Shares. These events include but are not limited to acts of terrorism, an outbreak of international hostilities, fires, floods, earthquakes, labour strikes, civil wars, natural disasters, outbreaks of disease or other man-made or natural events or occurrences that can have an adverse effect on the demand for the Company's services and its ability to conduct business. The Company has only a limited ability to insure against some of these risks.

Appendix C - Risks, continued

(e) Accounting standards

Australian Accounting Standards (AAS) are adopted by the AASB and are not within the control of the Company and its Directors. The AASB may, from time to time, introduce new or refined AAS, which may affect the future measurement and recognition of key statement of profit or loss and statement of financial position items. There is also a risk that interpretation of existing AAS, including those relating to the measurement and recognition of key statement of profit or loss or statement of financial position items may differ. Any changes to the AAS or to the interpretation of those standards may have an adverse effect on the reported financial performance and position of the Company.

(f) Trading in Shares may not be liquid

There is no guarantee that there will be an ongoing liquid market for the Shares. Accordingly, there is a risk that, should the market or the Shares become illiquid, the Shareholders will be unable to realise their investment in the Company.

(g) General economic and financial market conditions

The operating and financial performance of the Company is influenced by a variety of general domestic and global economic and business conditions that are outside the control of the Company. There is a risk that prolonged deterioration in general economic conditions may impact the Company's financial performance, financial position, cash flows, dividends, growth prospects and Share price.
