Enerji's First 3rd Generation Opcon Powerbox Ships

Highlights:

- **Unit 1 Leaves the Factory in Norrköping**
- **Unit 1 Arrives at Gothenburg**

Enerji Limited ("**Enerji**", the "**Company**") (**ASX:ERJ**) is pleased to announce that its first 3rd generation Opcon Powerbox, destined for Horizon Power's Carnarvon power station, has shipped from the factory in Norrköping, Sweden.

The 11m long Opcon Powerbox weighing approximately 36 tonnes was wrapped in a protective cover and loaded on to a low load trailer on Monday. The pictures below show the Powerbox being loaded on to the trailer.

Once loaded on the trailer, the Powerbox was transported 310km to the port of Gothenburg via road.

Having arrived in Gothenburg, unit 1 was transferred from the trailer to a MAFI roll trailer in preparation for loading on the ship. The pictures below show the Opcon Powerbox being transferred to the roll trailer. The ship, "Texas", will carry unit 1 to Bremerhaven in Germany where it will be transhipped to another vessel, "Ocean Challenge", for the voyage to Fremantle.

The Ocean Challenge is scheduled to sail on 22nd August and arrive in Fremantle on 1st October.

"The excitement of our first Opcon Powerbox arriving is really mounting now" Enerji's CEO, Greg Pennefather commented, "we are busy preparing all of the supporting systems for unit 1 ready for its arrival at Carnarvon. This will be the culmination of a long period of hard work for all concerned and will result in an impressive waste heat recovery system that generates power without burning additional fuel or creating additional emissions" Mr Pennefather said.

About Enerji

Enerji Limited is an emerging Perth-based green power utility company focussed on commercialising the **Opcon Powerbox** in Australia.

The Opcon Powerbox cogeneration technology transforms waste heat into electricity and therefore creates significant energy cost savings and reduced CO₂ emissions for its customers.

Enerji has exclusive sales and distribution rights for the Opcon Powerbox in Australia and options for Malaysia, Thailand, Singapore, and Sub-Saharan Africa.

The Opcon Powerbox, manufactured in Sweden by Opcon, represents a significant commercial opportunity through application to industrial, mining and power generation operations.

Enerji plans to maximise this opportunity and generate shareholder returns through long-term power purchase agreements.
