Directors' Report

Securities Exchange

ASX:VRC

Your directors submit the financial report of Volt Resources Limited ("the Company" or "Volt") and its Controlled Entities (Consolidated Entity) for the year ended 30 June 2025.

DIRECTORS

The names of Directors who held office during or since the end of the year:

Asimwe Kabunga	Executive Chairman
Prashant Chintawar	Managing Director (resigned as MD on 2 June 2025, continues as Chief Executive Officer from 2 June 2025)
Giacomo Fazio	Non-Executive Director (resigned 22 August 2024)
Dominic Virgara	Non-Executive Director (appointed 22 August 2024)
Trevor Matthews	Non-Executive Director (appointed 2 June 2025)

PRINCIPAL ACTIVITIES

The principal activities of the Company during the financial year included:

- Release of Scoping Study for the planned Alabama Graphite Refinery
- Extension of provisional patent application to September 2025 for Company's novel graphite purification process to protect our technology.
- Successful installation, commissioning, and start-up of a specialized chemical reactor to optimize the process for bench-scale production of UHPG (Ultra-High Purity Graphite) using Company's patent pending technology
- Successful graphite production campaigns at Zavalievsky Graphite, Ukraine
- Progress with the Ministry of Minerals, Tanzania to conclude Framework Agreement and Shareholders Agreement which relate to the ownership, development, and management of the Company's Bunyu project
- Augmented the Board of Directors, maintained strict fiscal discipline, and raised capital in a challenging environment.

RESULTS

The loss after tax for the year ended 30 June 2025 was \$2,474,024 (2024: \$4,112,398).

REVIEW OF OPERATIONS

Overview

Key operational highlights during the 2025 financial year included:

Per Fastmarket, the prices for flake graphite (94%C, -100 mesh, FOB China) have gradually come down over the past financial year from ~US\$ 480 per tonne in July 2024 to ~US\$ 415 per tonne in June 2025. These prices may not be sustainable and industry consensus is they will rise over the years to or above ~US\$ 1,000 per tonne (CIF, Europe) from about 2029.

Critical minerals are a major focus for the US government. President Donald Trump declared a national emergency and invoked Defense Production Act (DPA) authorities to fast-track U.S. production of critical minerals vital to the economy and national security. Included in the list of critical minerals is graphite for electric vehicle batteries. Recently, US Defense Logistics Agency issued a Request for Proposal to procure about 49 k

tonnes of flake graphite over a five-year period (2025 – 2030) for addition to the National Defense Stockpile. These are positive developments for Volt’s graphite production plans and the execution of our downstream strategy in the US.

Volt believes that our strategy to focus on the production of HPG (High Purity Graphite) and UHPG (Ultra-high Purity Graphite) for existing markets is prudent. The Alabama Refinery Scoping Study indicates capital cost of US\$21 million for 12,000 tpa HPG and UHPG production.

Downstream Operation

Focus during this fiscal year was completion of the Scoping Study (Table 1) for the planned Alabama Graphite Refinery and financing for the project. The Study was released in June 2025 and reinforced that Company’s graphite purification process delivers strong project economics and the process has lower capital cost intensity compared to the competition (Table 2).

Table 1: Summary of Alabama Graphite Refinery Scoping Study (the financial model uses a real discount rate of 13%).

Financial Metrics	Unit	
Initial Capital Cost	US\$M	21
Capital Intensity	US\$/t	1,709
Average Annual EBITDA Over 21 Years	US\$M	38
Pre-tax NPV ₁₃ real	US\$M	136
Pre-tax IRR	%	58

Table 2: Purification Process Capital Cost Intensity Comparison

Graphite Purification Process	Capital Cost Intensity (US\$/annual product tonne)
Volt Process	US\$ 1,709
Thermal Purification	~US\$ 4,750
HF	~US\$ 2,750

The key advantages of Volt’s “Low-Cost HF Free Purification to Produce Battery Grade Graphite”, include

- Lower costs – initial capital costs and operating costs
- Easier permitting pathway
- Environmentally friendly & low ESG footprint

In September 2024, a provisional patent application for Company’s novel graphite purification process was extended to protect our technology (US Patent 63/696,244, Low-Cost HF Free Purification to Produce Battery Grade Graphite process).

With the Scoping Study confirming the Alabama Graphite Refinery’s strong economics, low-cost advantages, and strategic importance, Volt is now focused on executing a clear development pathway and is continuing to optimize the purification process via a planned pilot plant development and associated testwork. Subject to further testwork, pilot plant production, studies followed by offtake agreements, approvals, and financing, a Final Investment Decision (FID) will be made.

The identified site for the Alabama Graphite Refinery (Figures 1 and 2) is currently owned by the Tuscaloosa County Economic Development Authority. It is strategically located in Tuscaloosa County Alabama's Airport Industrial Park and has several key attributes that are important for constructing the graphite refinery.

- Access to Water and Waste Disposal Systems
- Energy Infrastructure – Electricity and Gas supply
- Telecommunications Services
- Transportation Infrastructure with direct access to roads, highways and rail
- Proximity to the Tuscaloosa National Airport

Figure 1: Potential Site - 1,000-acre Airport Industrial Park Site Map

Figure 2: Tuscaloosa County Airport Industrial Park Greenfield Site

During the year, momentum continued for market interest in HPG. In January 2025, the Company subsidiary, Zavalievsky Graphite, received two orders for a combined 60 tonnes from an existing customer. We also see a lot of interest in HPG, especially with low iron (Fe), from US customers and have sampled UHPG to a major chemical company.

To optimize the process for bench-scale testwork production of UHPG, a specialized chemical reactor was procured in September 2024. The reactor was successfully installed, commissioned, and started-up. To-date, the testwork programme has produced over 250 kg material of >99.9% purity.

In January 2025, the Company signed a Joint Development Agreement with Battri, a European company that buys, collects, and recycles various lithium-ion batteries used in electric vehicles and other electronics. The focus of the JDA is on the recovery, purification, and upgrading of graphite from recycled or end-of-life batteries, using Volt's purification process.

Bunyu Graphite Project - Tanzania

As described in the Bunyu Stage 1 Feasibility Study Update released in August 2023, we achieved improved financials compared to the 2018 Stage 1 Feasibility Study. However, due to the low price environment for graphite, this was not sufficient to secure financing. We believe that in the current graphite pricing scenario, capital and operating cost reductions (over the 2023 Feasibility Study) are necessary to improve the project financials. To achieve this, we identified and have been collaborating with a major strategic partner. These ongoing activities may pave the way for the commencement of Bunyu project mining operations although flake graphite pricing remains a challenge.

In May 2025, the Company held a meeting with the Ministry of Minerals in Tanzania to discuss and negotiate Framework Agreement and Shareholders Agreement which relate to the ownership, development, and management of Volt's Bunyu project, which will pave the way for development of Stage 1. Subsequent to the meeting, we have exchanged several drafts of marked-up agreements and financial model with the Ministry. We anticipate completing negotiations before December 2025. To facilitate these discussions, the Company has engaged a reputable law firm in Tanzania.

Zavaliievsky Graphite - Ukraine

During the year, Zavaliievsky Graphite undertook two successful production campaigns. In October 2024, the plant was successfully restarted with the goal to fulfil a customer order received and to produce ~550 tonnes of graphite concentrate. Zavaliievsky Graphite exceeded its production target, producing over 800 tonnes of graphite of various grades via a multi-shift operation and starting with high quality graphite ore.

In June 2025, ZG commenced second graphite production campaign targeting approximately 1,000 tonnes of graphite concentrate with purity ranging from 88% to 95% TGC. The ZG team was able to produce 830 tonnes of graphite concentrate highlighting the need for plant maintenance work to improve reliability. A portion of this concentrate will be further refined to 99.5 % purity to meet specific customer requirements.

Approximately 580 tonnes (around 70 % of the campaign output) have been contracted to existing customers and to a new customer. This demonstrates continuing demand and supports the Company's market position.

ZG's ability to maintain production in Ukraine's current environment demonstrates the dedication and resilience of the local management and workforce. The ongoing operations not only support the company's commercial objectives but also provide vital employment and stability for families in the Zavallya region during a time of uncertainty.

ZG's graphite is recognised as a strategic asset in the European Raw Materials Alliance (ERMA) investment pipeline and is well-positioned to supply the growing European and North American battery and industrial markets. Recent developments, such as the US-Ukraine Critical Minerals Agreement, further enhance ZG's market access and long term growth prospects.

In March 2025, His Excellency Mr. Vasyl Myroshnychenko, the Ambassador of Ukraine to Australia, visited the Company's Perth office to discuss the Zavaliievsky Graphite business as part of his broader initiative to explore business opportunities and tap into Australia's renowned mining expertise.

In September 2025, the Company had a legal win wherein the Ukraine Supreme Court ruled in our favour for Deferred Payment case. We remain confident that the warranty claims and the offset remove any requirement for cash outflow in relation to the deferred payment of US\$3.8 million for the acquisition of Zavaliievsky Graphite.

Lithium Project – Serbia

In 2021, Volt acquired 100% of the issued share capital of Asena Investments d.o.o. Beograd-Stari grad (Asena), a Serbian company which holds the rights to three licence applications prospective for lithium-borate mineralisation. The licence applications are referred to as Jadar North, Ljig, and Petlovaca. Edelweiss Mineral Exploration d.o.o Beograd-Novi Beograd (Edelweiss) applied for the Petlovaca Licence and Asena entered into an agreement with Edelweiss to acquire the Petlovaca Licence (if the Petlovaca Licence Application is successful).

During this year, with Company's consent, Edelweiss withdrew the Petlovaca Licence Application. Our remaining applications are in good standing, having been submitted and registered with the Ministry of Mining. The Company believes in the potential value of the lithium licenses and continues to monitor the situation in Serbia with respect to the status of our lithium exploration license applications.

Gold Exploration - Guinea

While Volt will continue to focus on the development and operation of its graphite mines and downstream graphite processing business, the potential value creation for shareholders from successful gold exploration in the current record gold price environment provides the incentive for the Company to recommence gold exploration activities. On 7 April 2025, Volt announced that it was in the process of reviewing the results of previous sampling and auger drilling programmes conducted on the Company's Guinea gold projects to plan the next stage of exploration activities.

On 8 May 2025, Volt announced that following a review of the results of the previous sampling and auger drilling programmes conducted on the Guinea gold assets, it is planning to undertake an initial drilling programme on the northeast section of the Kouroussa prospect.

In May 2025, media reports suggested potential cancellation of mining licences by the Guinea government. As of today, the Company has not received any formal communication from the Guinea government in relation to the status of our exploration tenements, Volt has initiated engagement with the relevant authorities to clarify the situation and will provide an update to the market as soon as further information becomes available.

Corporate Overview

During the year, the Company's Board was augmented. On 22 August 2024, Dominic Virgara, one of the largest shareholders of the Company and former owner and Managing Director of Techforce Personnel Pty Ltd, was appointed to the Board as a Non-Executive Director. Mr Virgara has a track record of business growth. Under his leadership, Techforce grew from startup to a turnover of \$100 million and EBITDA of \$9 million in 11 years. In 2021, Techforce was acquired by PeopleIn (ASX:PPE) for an enterprise value of \$33 million. Mr Virgara is a qualified CPA by profession and has been a high performing recruitment Director/Owner and CFO. In conjunction with Mr Virgara's appointment, Non-Executive Director Mr Giacomo Fazio resigned from the Board.

In June 2025, Prashant Chintawar resigned from the Board and continues in the role of CEO. Trevor Matthews, who brings extensive experience and intimate knowledge of Company's key projects, joined the Board as Non-Executive Director.

Also, during the year, Mr. Ostap Kostyuk was appointed as Director of ZG. Ostap is a graduate of the Kyiv Institute of Law and received his Doctor of Philosophy degree in Law in 2024. He has been working at ZG since 2019, is competent with ZG operations and is based in Ukraine.

The Company subsidiary, Volt Energy Materials LLC, recently relocated its head office from New Jersey to "The EDGE" at The University of Alabama's "Alabama Entrepreneurship Institute" — Tuscaloosa's hub for startups and job creation. The plan is to have production and R&D to be in close proximity to each other.

Financing

- On 2 July 2024, the Company secured a \$500,000 loan from shareholders Ven Capital Pty Ltd, Peter and Elaine Notman, and Dominic Virgara.
- On 15 August 2024 the Company announced it raised \$500,000 via the issue of convertible notes.
- On 23 April 2024, the Company entered into a funding agreement with RiverFort Global Capital Ltd for the provision of an aggregate loan of up to \$1,000,000 (Loan). RiverFort advanced \$250,000 to the Company with a Maturity Date of four months from the Execution Date and a 10% fixed coupon to be paid in cash on the Maturity Date. On 26 August 2024, the Company repaid the loan and interest in cash.

- On 27 September 2024, the Company announced that RiverFort Global Opportunities PCC Limited agreed to proceed with second advance of \$500,000 (the "Second Advance") pursuant to the terms of the Agreement dated 23 April 2024. This advance and interest was repaid on 24 January 2025.
- On 15 January 2025, the company announced it raised \$1.226 million via a share placement.
- As a part of ongoing Fiscal Discipline, the Company successfully reduced the cash outflows. The net cash outflow from operating and investing activities during FY 2025 was \$1,512,883 vs \$4,506,411 in FY 2024. In March 2025, the Company announced additional cost reduction measures for six months beginning 1 March 2025
 - Asimwe Kabunga, Executive Chairman, reduced director & consulting fee from \$15,000 per month to \$4,500 per month to be paid in equity
 - Prashant Chintawar, CEO & Managing Director, reduced consulting fees from US\$26,750 per month to US\$18,750 per month, to be paid in 50% equity and 50% cash
 - Dominic Virgara, Non-Executive Director, increased director and consulting fees from \$2,000 per month to \$4,500 per month to be paid in equity.

General Meetings

On 27 November 2024 the Company's annual general meeting of shareholders was held. All resolutions presented to the shareholders were passed by a poll.

Material business risks

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed. As the risks described in this section may impact upon the Company's future performance, the Company and its Directors have taken steps to safeguard the Company from, and to mitigate the Company's exposure, to these risks.

Risk related to the Graphite and Lithium Market and the Volt Group's Activities

General Economic and Political Risks

Changes in the general economic and political climate in the jurisdictions in which the Volt Group and its assets are located, or on a global basis that could impact on economic growth, the graphite price, interest rates, the rate of inflation, taxation and tariff laws, domestic security which may affect the value and viability of any mining activity that may be conducted by the Volt Group.

Title Risk

All licenses are subject to compliance with certain requirements, including but not limited to, meeting the minimum exploration work commitments, lodgement of reports, payment of annual license fees, royalties and compliance with environmental conditions and environmental legislation, and government policies. Consequently, the Volt Group could lose title to or its interest in any of the licenses to any of its assets if these requirements are not met.

Risks of Foreign Operations

The Volt Group operates in areas that may be considered politically unstable and is subject to the laws of foreign jurisdictions. The Volt Group's graphite operations and related assets are in Tanzania and Ukraine, lithium exploration license applications in Serbia, and its gold exploration projects are located in Guinea. Tanzania and Guinea rank in the lowest quartile of both the Human Development Index (World Bank) and the Ease of Doing Business Index (World Bank) and may be considered to be politically and/or economically

unstable. Ukraine and Serbia are highly ranked in terms of both indexes. Risks exist in terms of the relevant governmental approval for the various activities which mining licenses require and the timetable associated with obtaining such approvals.

Volt is subject to extensive laws and regulations governing prices, taxes, royalties, production, transport, pollution control, export of graphite and many other aspects of its business in its country of operations. There can be no assurance that the actions of present or future national governments will not materially and adversely affect the business, financial condition, or results of operations of the Volt Group.

Through its operations in foreign jurisdictions, the Volt Group may become subject to economic and political risks, such as:

- the renegotiation, cancellation or forced modification of existing contracts and product sharing agreements;
- expropriation or nationalization of property;
- changes in laws or policies or increasing legal and regulatory requirements, including those relating to tax, royalties, imports, exports, duties, currency or other claims by government entities (including retroactive claims or changes in administration of laws, policies and practices);
- uncertain political and economic environments, war, terrorism, sabotage and civil disturbances;
- delays or inability to obtain or maintain necessary government permits or to operate in accordance with such permits or regulatory requirements; and
- currency fluctuations.

Exploration, development or production activities in Tanzania, Guinea, Ukraine, and Serbia may require protracted negotiations with host governments and third parties and there is no guarantee that results of these negotiations will be favourable.

In addition, if a dispute arises with regards to Volt's graphite operations, Volt will be subject to the exclusive jurisdiction of the courts of Tanzania. Tanzania's legal system, developing since independence in 1961, is relatively emergent compared to, for instance, the 800 year old UK legal system, therefore Volt may have difficulty in obtaining effective legal redress in the national courts. Similarly in Guinea, the judicial system is based on French civil law, customary law, and decree; legal codes are under revision, and Guinea has not accepted compulsory ICJ jurisdiction. In 1958 and 1965, the government introduced some customary law but retained French law as the basic framework for the court system.

In Ukraine the law and legal system are subject to deep and complex changes. Since independence Ukraine has made progress in the creation of new legislation. On its way to incorporate international legal standards in its domestic legislation and make it consistent with international norms, Ukraine adopted in 1996 a new constitution and market-oriented laws.

The development of Ukrainian legal system has been significantly influenced by the declared European integration of the country. Ukraine is currently in the process of adapting its legislation to European norms and standards with a goal to acquire full membership to the European Union.

According to the Constitution of Serbia, the government:

- Determines and guides
- Executes laws and other general acts of the National Assembly
- Adopts regulations and other general acts for the purpose of enforcing laws
- Proposes to the National Assembly the laws and other general acts and gives an opinion on them when submitted by another proposer

- Directs and coordinates the work of public administration bodies and supervises their work, and
- Performs other duties determined by the Constitution and the law.

Also, the government is responsible to the National Assembly for the policy of the Republic of Serbia, for the implementation of laws and other general acts of the National Assembly and for the work of state administration bodies.

These risks may limit or disrupt Volt operations, restrict the movement of funds, or result in the deprivation of contract rights or the taking of property by nationalization or expropriation without fair compensation and may materially adversely affect Volt's financial position and results of operations. Volt operates in regions that may be subject to a higher degree of political, social and economic risks than more developed regions.

The occurrence of these several factors and uncertainties cannot be accurately predicted and could have an adverse effect on the operations or profitability of the Company. The Company has made its investment and strategic decisions based on the information currently available to its directors, however, should there be any material change in the political, economic, legal and social environments in Serbia, Tanzania, or Guinea, the directors may re-assess investment decisions and commitments to assets in the country.

Regulatory

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies may adversely affect the financial performance of the Company.

The Tanzanian government exercises significant influence over Tanzania's mining industry

In Tanzania, the state retains ownership of the minerals and consequently retains control of the exploration and production of mineral resources. Accordingly, these operations may be materially affected by the government through royalty payments, export taxes and regulations, surcharges, value added taxes, production bonuses and other charges.

The Company has operated in Tanzania for a number of years and management believes the Company has reasonably good relations with the current Tanzanian government. However, there can be no assurance that present or future administrations or governmental regulations in Tanzania will not materially adversely affect the operations or future cash flows of the Company.

Risks Associated with Changes in Legislation

Changes to mineral exploration or investment policies and legislation or a shift in political attitude within the jurisdiction in which the Volt operates may adversely affect the Volt's proposed operations and profitability. Government action or policy change in relation to access to lands and infrastructure, compliance with environmental regulations, export restrictions, taxation, royalties and subsidies may adversely affect Volt's operations and financial performance. Volt is governed by a series of national laws and regulations. Breaches or non-compliance with these laws and regulations can result in penalties and other liabilities. These may have a material adverse impact on the financial position, financial performance, cash flows, growth prospects and share price of the Company.

These laws and regulations may be amended from time to time, which may also have a material adverse impact on the financial position, financial performance, cash flows, growth prospects and share price for the Company. The legal and political conditions in Tanzania, Guinea, Ukraine, and Serbia and any changes thereto are outside the control of Volt.

The introduction of new legislation or amendments to existing legislation by the national government, developments in existing common law, or the interpretation of the legal requirements which govern Volt's operations or contractual obligations, could adversely affect the assets, operations and, ultimately, the financial performance of the Company and the value of its securities. In addition, there is a commercial risk that legal action may be taken against or by Volt in relation to commercial matters.

The evolution and interpretation of government legislation is uncertain and may impose restrictions on Volt

Volt's business is subject to various levels of government controls and regulations which are revised from time to time. The Company is unable to predict what legislation may be proposed that might affect its business or when any such proposals, if enacted, might become effective. Such changes could require increased capital and operating expenditures and could prevent or delay certain operations by Volt. To the extent Volt is unable to comply with any such legislation, whether in the future or past, the Company may be unable to continue to successfully operate.

The 'Natural Wealth Resources' Regulations

The introduction of new legislation such as the introduction in Tanzania of the Natural Wealth and Resources (Permanent Sovereignty) Act, 2017 and the Natural Wealth and Resources (Review and Renegotiation of Unconscionable Terms), 2017 which govern the Company's Tanzanian operations or contractual obligations, may adversely affect the assets, operations and, ultimately the financial performance of the Company and the value of its securities.

General Operational Risks

Developing mineral resources inherently involves a high degree of risk. The business of Volt is subject to all of the operating risks normally associated with the exploration for, and the production, storage, transportation and marketing of graphite and/or gold. These risks include explosions, fire, migration of harmful substances and waste production spills, any of which could cause personal injury, result in damage to, or destruction of, production facilities and other property, equipment, and the environment, as well as interrupt operations. In addition, Volt will be subject to the risks normally incident to the construction of graphite and/or gold mines and the operation and development of graphite and/or gold properties, including encountering unexpected mining conditions, premature declines of resources, equipment failures and other accidents, adverse weather conditions, pollution and other environmental risks.

New Projects and Acquisitions

The Company has to date and will continue to actively pursue and assess other new business opportunities. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, or direct equity participation.

The acquisition of projects or other assets (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence and prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or successful. If the proposed acquisition is not completed, monies already advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the Directors will need to reassess, at that time, the funding allocated to current projects and new projects or assets, which may result in the Company reallocating funds from other projects and/or the raising of additional capital (if available). Furthermore, notwithstanding that an

acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

Furthermore, if a new investment or acquisition by the Company is completed, ASX may require the Company to seek Shareholder approval and to meet the admission requirements under Chapters 1 and 2 of the ASX Listing Rules as if the Company were a new listing. There would be costs associated with re-complying with the admission requirements. The Company may be required to incur these costs in any event, were it to proceed to seek to acquire a new project which is considered to result in a significant change to the nature or scale of its existing operations.

Any new project or business acquisition may change the risk profile of the Company, particularly if the new project is in another jurisdiction, involving a new commodity and/or changes to the Company's capital/funding requirements. Should the Company propose or complete the acquisition of a new project or business activity, investors should re-assess their investment in the Company in light of the new project/business activity.

Ore Reserves and Mineral Resources Risks

Uncertainties in Estimating Reserves and Future Net Cash Flows

Ore reserve and mineral resource estimates are expressions of judgement based on knowledge, experience, and industry practice. Estimates that were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource and reserve estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional drilling and analysis, the estimates may change. This may result in alterations to development and production plans which may in turn adversely affect the operations of Volt.

There are numerous uncertainties inherent in estimating quantities of proved and probable reserves and cash flows to be derived therefrom, including many factors beyond the control of the Company. These evaluations include a number of assumptions relating to factors such as initial production rates, ultimate recovery of reserves, timing and amount of capital expenditures, marketability of production, mineral price differentials to forecasts, operating costs, transportation costs, cost recovery provisions and royalties, governmental "back-in" methodology and other government levies that may be imposed over the producing life of the reserves.

Estimates of the economically recoverable graphite reserves attributable to the project properties, classification of such reserves based on risk of recovery and estimates of future net revenues associated with reserves may vary from actual results, and those variations could be material. The process of estimating reserves requires interpretations and judgments on the part of mining engineers, resulting in imprecise determinations, particularly with respect to new discoveries. Different engineers may make different estimates of reserve quantities and revenues attributable thereto based on the same data.

The reserve evaluation is based in part on the assumed success of activities Volt intends to undertake in future years. The reserves and estimated cash flows to be derived therefrom and contained in the reserve evaluation will be reduced to the extent that such activities do not achieve the level of success assumed in the reserve evaluation. The reserve evaluation is effective as of a specific effective date and, except as may be specifically stated, has not been updated and therefore does not reflect changes in the reserves of Volt since that date.

The estimation of proved reserves that may be developed and produced in the future are often based upon probabilistic calculations and upon analogy to similar types of reserves rather than upon actual production history. Estimates based on these methods generally are less reliable than those based on actual production history. Subsequent evaluation of the same reserves based upon production history may result in variation or revisions in the estimates reserves, and any such variations or revisions could be material. Market driven fluctuations of commodity prices may render the recovery of certain reserves uneconomic.

Risk of Inability to Maintain or Replace Reserve Levels

Volt's ore reserves and production and, therefore, its cash flows and earnings are highly dependent upon Volt developing and increasing its current reserve base and discovering or acquiring additional reserves or resources. Without the addition of reserves through exploration, acquisition or development activities, the Volt Group's reserves and production will decline over time as they are depleted. To the extent that cash flow from operations is insufficient and external sources of capital become limited or unavailable, the ability of Volt to make the necessary capital investments to maintain and expand its graphite reserves will be impaired. There can be no assurance that Volt will be able to find and develop or acquire additional reserves to replace production at commercially feasible costs.

Environmental Risk

Risks Relating to Environmental and Other Regulations

Extensive environmental laws and regulations will affect Volt operations. These laws and regulations set various standards regulating certain aspects of health and environmental quality, provide for penalties and other liabilities for the violation of such standards and establish in certain circumstances obligations to remediate current and former facilities and locations where operations are or were conducted. In addition, special provisions may be appropriate or required in environmentally sensitive areas of operation. There can be no assurance that Volt will not incur substantial financial obligations relating to environmental compliance. Significant liability could be imposed on Volt for damages, clean-up costs or penalties in the event of certain discharges into the environment or non-compliance with environmental laws or regulations. Such liability could have a material adverse effect on Volt. Moreover, Volt cannot predict what environmental legislation or regulations will be enacted in the future or how existing or future laws or regulations will be administered or enforced. Compliance with more stringent laws or regulations, or more vigorous enforcement policies of any regulatory authority, could in the future require material expenditures by Volt for the installation and operation of systems and equipment for remedial measures, any or all of which may have a material adverse effect on Volt.

While management believes that Volt is currently in compliance with environmental laws and regulations applicable to its operations in the jurisdictions it operates, no assurances can be given that it will be able to continue to comply with such environmental laws and regulations without incurring substantial costs.

Volt's planned operations are subject to extensive governmental legislation and regulation and increased public awareness concerning environmental protection. The introduction of more stringent regulations and conditions may also adversely affect Volt.

The Company expects that the cost of complying with environmental legislation and regulations will increase in the future. Compliance with existing environmental legislation and regulations has not had a material effect on capital expenditures, earnings or competitive position of Volt to date. Although management believes that Volt's operations and facilities are in compliance with such laws and regulations

in all material respects, future changes in these laws, regulations or interpretations thereof or the nature of its operations may require Volt to make significant additional capital expenditures to ensure compliance in the future.

Personnel Risks

Reliance on Key Personnel

The Company is highly dependent upon its executive officers and key personnel (including contractors). An unexpected loss of the services of any of these individuals could have a detrimental effect on the Company. There is no guarantee that the Company will retain members of its management team, and if the Company were to lose a member of its management team unexpectedly, its business, prospects, financial condition, and results of operations may be adversely affected.

Volt may not be able to attract and retain qualified personnel

Volt may have difficulty attracting and retaining qualified local personnel to work on its projects due to shortages of qualified, experienced workers and competition for their services. It may also be difficult to attract, employ and retain qualified expatriate workers as a result of legal restrictions, socio-economic issues and security concerns in the jurisdictions in which the Company operates. In the event of a labour shortage, Volt could be forced to increase wages in order to attract and retain employees, which may result in higher operating costs and reduced profitability. A failure by Volt to attract and retain a sufficient number of qualified workers could have a material adverse effect.

Competition Risks

Competition from other mining companies

The graphite industry is competitive in all its phases. The Company competes with numerous other organizations in the search for, and the acquisition of, graphite properties and in the marketing of graphite products.

The Company's competitors include graphite companies that have substantially greater financial resources, staff and facilities than those of the Company. The Company's ability to increase its reserves in the future will depend on its ability to explore and develop its present properties. Competitive factors in the distribution and marketing of graphite include product quality, graphite flake size, price and methods and reliability of delivery and storage.

Increased competition in Tanzania may pose a threat to the Company's ability to market its products

A period of increased exploration activity in Tanzania, which has yielded significant discoveries of graphite that could, when developed, lead to increased competition for graphite markets and lower graphite prices in the future. In addition, various factors, including the effect of foreign regulation of production and transportation, general economic conditions, changes in supply due to mining by other producers and changes in demand may adversely affect the Company's ability to market its graphite production.

The Company may be affected by the inability to respond to changing technical development

The mineral resource industry is characterized by rapid and significant technological advancements and introductions of new products and services utilizing new technologies. Other companies may have greater

financial, technical and personnel resources that allow them to enjoy technological advantages and may in the future allow them to implement new technologies before the Company. There can be no assurance that the Company will be able to respond to such competitive pressures and implement such technologies on a timely basis or at an acceptable cost. One or more of the technologies currently utilized by the Company or implemented in the future may become obsolete. If the Company is unable to utilize the most advanced commercially available technology, its business, financial condition and results of operations could also be adversely affected in a material way.

Insurance

Insurance against all risks associated with graphite development and production is not always available or justifiable on a cost-benefit basis. The Company will maintain insurance where it is considered appropriate for its needs, however it will not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

Risks relating to Corruption and Bribery

Having assessed the Company's exposure to corruption in the jurisdictions in which it operates, it was concluded that the risk of the Company and/or its subsidiaries violating applicable laws prohibiting corrupt activities are mitigated or unlikely given the Company's controls relating to such risks and their effective operation. There can be no assurance, however that corruption may not directly or indirectly affect or otherwise impair the Company's ability to operate in Tanzania and effectively pursue its business plan in either country.

Information Technology Systems and Cyber-Security

The Company has become increasingly dependent upon the availability, capacity, reliability and security of our information technology infrastructure and our ability to expand and continually update this infrastructure, to conduct daily operations. The Company depends on various information technology systems to store and collate geological information, estimate resource and reserve quantities, process and record financial data, manage our land base, administer our contracts with our service providers and lessees and communicate with employees. Further, the Company is subject to a variety of information technology and system risks as a part of its normal course of operations, including potential breakdown, invasion, virus, cyber-attack, cyber-fraud, security breach, and destruction or interruption of the Company's information technology systems by third parties or insiders.

Unauthorized access to these systems by employees or third parties could lead to corruption or exposure of confidential, fiduciary, or proprietary information, interruption to communications or operations or disruption to our business activities or our competitive position. Further, disruption of critical information technology services, or breaches of information security, could have a negative effect on our performance and earnings, as well as on our reputation. The Company applies technical and process controls in line with industry-accepted standards to protect our information assets and systems; however, these controls may not adequately prevent cyber-security breaches. The significance of any such event is difficult to quantify but may in certain circumstances be material and could have a material adverse effect on the Company's business, financial condition and results of future operations.

Reputational Risk

Due to the Company's asset concentration, the Company's operations are dependent on positive relationships with a small number of organizations (including the European Commission, the governments of Tanzania, US, Serbia, and Guinea). Damage to the Company's reputation due to the actual or perceived occurrence of any number of events could negatively impact the Company. Reputation loss may lead to increased challenges in developing and maintaining community relations, decreased investor confidence, and the impediment of the Company's overall ability to advance its project developments, thereby having a material adverse impact on financial performance, cash flows and growth prospects.

Litigation and Dispute Risks

The Company may become involved in disputes with other parties in the future which may result in arbitration or litigation. The results of any future disputes cannot be predicted, and the Company may be subject to the exclusive jurisdiction of foreign bodies in settling these disputes. The costs of defending or settling these disputes may be significant. If the Company is unable to resolve these disputes favourably, it may have a material adverse impact on the Company's financial performance, cash flow and results of future operations.

Although the agreements in relation to the Company's assets all require international arbitration if there is a dispute in connection with its operations, the Company could still become subject to the jurisdiction of courts or arbitration tribunals in any country of operation or may not be successful in subjecting persons or government entities to the jurisdiction of the arbitrators or another country. There can be no assurance that if the Company becomes involved in a dispute that it will be dealt with in a satisfactory manner or in a way in which the Company expects. The delay or results of such dispute settlement could have a material adverse effect on the Company, its business, prospects, results of future operations and financial condition.

Risks Relating to the Availability of Additional Financing

The Company's ability to raise capital is dependent on, among other factors, the performance of its investments, the overall state of capital markets and investor appetite for investments in the Company's securities. From time to time the Company may enter into transactions to acquire assets or the shares of other companies. These transactions may be financed partially or wholly with debt, which may temporarily increase the Volt Group's debt levels above industry standards. To develop the productive capacity of its assets, depending on the timing, the Company may require significant additional capital. In addition, if capital costs for these projects exceed current estimates, or if the Company incurs major unanticipated expenses related to development or maintenance of its existing properties, it may be required to seek further additional capital to maintain its capital expenditures at planned levels.

Failure to obtain any financing necessary for the Company's capital expenditure plans may result in a delay in development or production on the Volt properties. There can be no assurance that the Company will be successful in its efforts to arrange additional financing in amounts sufficient to meet the Company's goals or requirements, or on terms that are acceptable to the Company. If additional financing is raised by the issuance of shares, control of the Company may change, and shareholders may suffer additional dilution.

External Influences on the Trading Price of Securities

The trading price of securities of mineral commodities issuers is subject to substantial volatility often based on factors related and unrelated to the financial performance or prospects of the issuers involved. Factors unrelated to the Company's performance could include macroeconomic developments, domestic and

global commodity prices or current perceptions of the graphite, lithium, and gold market. Similarly, the market price of any securities of the Company could be subject to significant fluctuations in response to variations in the Company's operating results, financial condition, liquidity and other internal factors.

Lower commodity prices may also affect the value of the Volt Group's ore reserves as certain reserves may become uneconomic. In addition, lower commodity prices may restrict the Volt Group's cash flow resulting in a reduced capital expenditure budget. As a result, the Volt Group may not be able to replace its production with additional reserves and both the production and reserves of the Volt Group could be reduced on a year over year basis. Any decrease in value of its reserves may reduce the borrowing base under future credit facilities, which, depending on the level of indebtedness, could result in the Volt Group having to repay a portion of its indebtedness. If market conditions were to decline resulting in a lack of confidence in the graphite, lithium, and/or gold industry, the Volt Group may have difficulty raising additional funds or if it is able to do so, it may be on unfavourable and highly dilutive terms.

Any substantial decline in the prices could have a material adverse effect on the Volt Group and the level of its reserves. Additionally, the economics of producing from some deposits may change as a result of lower prices, which could result in a suspension of production by the Volt Group. Accordingly, the price at which any securities of the Company will trade cannot be accurately predicted.

General economic and market conditions

The operating and financial position of the Company is influenced by a range of general domestic and global economic and business conditions that are outside the control of the Company. These conditions may include, but are not limited to, political movements, stock market movements, interest rates, industrial disruption, environmental impacts, natural disasters, taxation changes and legislative or regulatory changes. A prolonged deterioration in market, business or economic conditions may potentially have an adverse impact on the Company and its operations.

DIRECTOR AND COMPANY SECRETARY INFORMATION

Mr Asimwe Kabunga | Executive Chairman

Appointed 5 April 2017

Qualifications: Bachelor of Science, Mathematics and Physics.

Other current directorships of Listed Public Companies: Resource Mining Corporation Limited (Chairman).

Former directorships of Listed Public Companies in last three years: AuKing Mining Limited (Chairman – 19 October 2022 to 3 June 2024) and Lindian Resources Limited (Chairman – 8 June 2017 - 25 November 2024),

Interests in Shares and Options over Shares in the Company: 702,917,170 fully paid ordinary shares and 70,000,000 performance rights.

Asimwe Kabunga is a Tanzanian born Australian entrepreneur with multiple interests in mining and IT businesses around the world. Mr. Kabunga has extensive technical and commercial experience in Tanzania, Australia, United Kingdom, and the United States.

Mr. Kabunga has been instrumental in establishing the Tanzania Community of Western Australia Inc. and served as its first President. Mr. Kabunga was also a founding member of Rafiki Surgical Missions and Safina Foundation, both NGOs dedicated to helping children in Tanzania.

Mr Prashant Chintawar | Managing Director

Appointed 29 June 2023 and resigned 2 June 2025, continues as Chief Executive Officer from 2 June 2025

Qualifications: PhD in Chemical Engineering.

Other current directorships of Listed Public Companies: Nil

Former directorships of Listed Public Companies in last three years: Nil.

An experienced business leader with a track record of growing chemical or material businesses, creating and scaling new business (lithium ion battery material business), raising capital, industrialisation, and structuring deals. Key strengths, honed at large global organizations and a top tier consulting firm, include strategic planning and tactical execution by rallying teams. Possesses unique combination of commercial and technical skills along with PhD in Chemical Engineering & certificate in finance.

Mr Giacomo (Jack) Fazio | Non-Executive Director

Appointed 1 July 2019 and resigned 22 August 2024

Qualifications: Diploma in Geometry, Associate Diploma in Civil Engineering, Graduate Certificate in Project Management.

Other current directorships of Listed Public Companies: nil.

Former directorships of Listed Public Companies in last three years: Lindian Resources Limited (Non-Executive Director).

Mr Fazio is a highly experienced project, construction and contract/commercial management professional having held senior project management roles with Primero Group Limited, Laing O'Rourke and Forge Group Ltd. His experience ranges from feasibility studies through to engineering, procurement, construction, and commissioning of diverse mining resources, infrastructure, oil & gas and energy projects.

Mr Dominic Virgara | Non-Executive Director

Appointed 22 August 2024

Qualifications: Bachelor of Arts – Accountancy (CPA)

Other current directorships of Listed Public Companies: nil.

Former directorships of Listed Public Companies in last three years: nil.

Interests in Shares and Options over Shares in the Company: 286,733,760 fully paid ordinary shares and 1,666,667 unlisted options and 25,000,000 convertible notes.

Mr Virgara is a qualified CPA by profession and has been a high performing recruitment Director/Owner and CFO. During his tenure, Mr Virgara provided strategic, financial, HR, IT, marketing, and management guidance for his companies. His experience also includes CFO positions with Mitsubishi Motors, Spotless Group, and Elders. He brings strong financial discipline to the role.

Mr Trevor Matthews | Non-Executive Director

Appointed 2 June 2025

Qualifications: Bachelor of Commerce, Post Graduate Diploma in Applied Finance and Investment

Other current directorships of Listed Public Companies: Resource Mining Corporation (ASX:RMI).

Former directorships of Listed Public Companies in last three years: Executive Director Lindian Resources (ASX:LIN) and Non-Executive Chairman Victory Metals (ASX:VTM).

Interests in Shares and Options over Shares in the Company: 6,357,820 fully paid ordinary shares

Mr Matthews has an accounting and finance background with 35 years' experience in the resources industry, including roles with diversified mining houses North and WMC Resources in executive-level positions, and most recently, he was Managing Director/CEO of ASX-listed Volt Resources Limited for a six-year term. Previously he held the role of Managing Director at MZI Resources (2012-16), advancing the \$110 million Keysbrook mineral sands project from feasibility study stage through to production, and Murchison Metals (2005-12), developing an operating iron ore mine and associated logistics infrastructure in WA's Midwest as part of a larger JV with Mitsubishi Corporation to develop a large-scale iron ore mine and the multi-user Oakajee Port and Rail infrastructure project. Consequently, he has extensive executive management experience in feasibility studies, project planning/development, coordination, and effectively leveraging capital markets to secure the appropriate mix of debt/equity funding to successfully complete a mining project.

Mr Robbie Featherby | Company Secretary

Appointed 2 February 2022

Mr Featherby is a Corporate Advisor at SmallCap Corporate, a boutique corporate advisory firm specialising in providing company secretarial, CFO and transaction management services involving both listed and unlisted companies. He has over 5 years' experience in the financial services industry. Before joining SmallCap Corporate, Mr Featherby spent 4 years in London working at a leading investment research provider in the private equity sector. He has completed a Bachelor of Commerce Degree at the University of Notre Dame majoring in Finance and Economics. Mr Featherby currently serves as the Company Secretary of Victory Metals Limited (ASX: VTM), Cosmos Exploration Limited (ASX: C1X), Odessa Minerals Limited (ASX: ODE) and Volt Resources Limited (ASX:VRC).

MEETINGS OF DIRECTORS

The following table sets out the number of meetings of the Company's Directors (and committees of Directors) held during the year ended 30 June 2025, and the number of meetings attended by each Director.

Directors	Number of Meetings Eligible to Attend	Number of Meetings Attended
Mr. Asimwe Kabunga	1	1
Mr. Prashant Chintawar	1	1
Mr. Giacomo Fazio	-	-
Mr. Dominic Vigara	1	1
Mr. Trevor Matthews	-	-

SHARE OPTIONS

At the date of this report the following options have been granted over unissued capital.

Grant Date	Details	Expiry Date	Exercise Price	Number of Options
17 July 2024	Unlisted options	2 July 2027	\$0.0075	5,000,001
8 May 2024	Unlisted options	6 May 2027	\$0.0075	10,000,000
14 June 2024	Unlisted options	27 May 2027	\$0.0066	10,000,000
27 September 2024	Unlisted options	27 Sep 2027	\$0.0063	23,804,990
				48,804,991

PERFORMANCE RIGHTS

There were no performance rights issued during the year. 70,000,000 performance rights are still currently vesting.

REMUNERATION REPORT

The "Remuneration Report" which forms part of the Director's Report, outlines the remuneration arrangements in place for the Key Management Personnel of Volt Resources Limited for the year ended 30 June 2025 and is included from page 23.

EVENTS SUBSEQUENT TO REPORTING DATE

On 17 July 2025 the Company, extended the \$500,000 Convertible Note maturity date by an additional 12 months, extending the maturity date to August 2026. No change were noted to the other terms.

On 22 July 2025 the Company received an additional \$500,000 (before costs) from Riverfort Global.

Other than the above, there are no events subsequent to reporting date.

LIKELY DEVELOPMENTS

The Consolidated Entity will continue to advance discussions with strategic investors and financial institutions with the aim of receiving funding proposals for Bunyu Project. Subsequent to development funding being approved and available, and a positive final investment decision for Stage 1, the Company would then be in a position to commence resettlement of affected landowners, upgrade of access roads and water supply, preparation of the plant site, and commencement of construction works.

The Company will progress natural graphite purification testwork and commercial negotiations with HPG and UHPG end users.

ENVIRONMENTAL REGULATION

The Consolidated Entity has a policy of exceeding or at least complying with its environmental obligations. During the financial year, the Consolidated Entity did not materially breach any particular or significant regulation in respect to environmental management in any of the jurisdictions in which it operates.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

There have been no significant changes in the state of affairs of the group to the date of this report, other than those disclosed in the subsequent events note.

DIVIDENDS

No dividends have been declared, provided for or paid in respect of the financial year ended 30 June 2025 (2024: nil).

INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

The Company has agreed to indemnify all the Directors and Officers of the Company for any liabilities to another person (other than the Company or related body corporate) that may arise from their position as Directors or Officers of the Company and its controlled entities, except where the liability arises out of conduct involving a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract insuring the Directors and Officers of the Company and its controlled entities against any liability incurred in the course of their duties to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

PROCEEDINGS ON BEHALF OF COMPANY

No person has applied for leave of court to bring proceedings on behalf of the Consolidated Entity or intervene in any proceeding to which the Consolidated Entity is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings. The Consolidated Entity was not a party to any such proceedings during the year.

CORPORATE GOVERNANCE

A copy of Volt's 2025 Corporate Governance Statement, which provides detailed information about governance, and a copy of Volt's Appendix 4G which sets out the Company's compliance with the recommendations in the fourth edition of the ASX Corporate Governance Council's Principles and Recommendations is available on the corporate governance section of the Company's website at www.voltresources.com

NON-AUDIT SERVICES

No fees for non-audit services were paid or payable to the external auditor of Volt during the year ended 30 June 2025 (2024: nil).

AUDITOR'S INDEPENDENCE DECLARATION

The auditor's independence declaration for the year ended 30 June 2025, which forms a part of the Directors' Report, has been received and is included within this annual report at page 31.

REMUNERATION REPORT (Audited)

This remuneration report outlines the key management personnel remuneration arrangements of the Consolidated Entity in accordance with the requirements of the Corporations Act 2001 and its Regulations. For the purposes of this report, key management personnel (KMP) of the Consolidated entity are defined as those persons having authority and responsibility for planning, directing, and controlling the major activities of the Consolidated Entity, directly or indirectly, including any Director (whether executive or otherwise) of the parent company, and includes the specified executives. For the purposes of this report, the term 'executive' encompasses the chief executive, senior executives, and secretaries of the Parent and the Consolidated Entity.

Remuneration Committee

The Company is not of a sufficient size to justify the establishment of a remuneration committee and so the Board of Directors of the Company fulfils this obligation and is responsible for determining and reviewing remuneration arrangements for the directors and executives. The Board of Directors assesses the appropriateness of the nature and amount of remuneration of executives on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high quality, high performing Director and executive team.

Remuneration Philosophy

The performance of the Company depends upon the quality of its Directors and executives. To prosper, the Company must attract, motivate, and retain highly skilled directors and executives. To this end, the charter adopted by the remuneration committee aims to align rewards with achievement of strategic objectives. The remuneration framework applied provides for a mixture of fixed and variable pay and a blend of short and long term incentives as appropriate.

Remuneration Structure

In accordance with best practice corporate governance, the structure of Non-Executive Director and executive remuneration is separate and distinct.

Non-Executive Directors

The maximum aggregate amount of fees that can be paid to Non-Executive Directors is subject to approval by shareholders at a General Meeting and was capped at \$360,000 in November 2018. The Company's policy is to remunerate Non-Executive Directors at market rates (for comparable companies) for time, commitment, and responsibilities. Fees for non-executive directors are not linked to the performance of the Company however, to align Directors' interests with shareholders' interests, Directors are encouraged to hold shares in the Company, and subject to approval by shareholders, are permitted to participate in the Employee Incentive Plan.

Retirement Benefits and Allowances

No retirement benefits or allowances are paid or payable to directors of the Company (other than statutory or mandatory superannuation contributions, where applicable).

Performance on Shareholder Wealth

In considering the Group's performance and benefits for shareholder wealth, the Board have regarded the following indices in respect of the current and previous four financial years:

	2025	2024	2023	2022	2021
EPS loss (cents)	(0.06)	(0.10)	(0.36)	(0.60)	(0.12)
Net profit / loss (\$'000)	(2,474)	(4,112)	(13,331)	(16,397)	(2,564)
Exploration and Evaluation expenditure (\$'000)	183	1,138	1,215	528	1,450
Share price (\$)	0.0035	0.005	0.010	0.017	0.035

Executives

Base Pay

Executives are offered a competitive level of base pay, which is comprised of a fixed (unrisks) component of their pay and rewards. Base pay for senior executives is reviewed annually to ensure market competitiveness. There are no guaranteed base pay increases included in any senior executives' contracts.

As CEO, Mr Chintawar will receive a monthly fee of US\$26,750. Mr Chintawar's agreement includes termination without cause by either party following a 12 month notice period and immediate termination by the company with cause. Performance rights are to be agreed by the Volt Board and approved by shareholders. Effective from 1 March 2025 to 31 August 2025, there will be a reduction of consulting fees from US\$26,750 per month to US\$18,750 per month, to be paid in 50% equity and 50% cash. This arrangement has been extended a further 3 months to 30 November 2025.

Short Term Incentives

Payment of short-term incentives is dependent on the achievement of key performance milestones as determined by the Board of Directors. No bonuses have been paid or are payable in respect of the year to 30 June 2025. There have been no forfeitures of bonuses by key management personnel during the current or prior periods and no cash bonuses remained unvested at year-end.

Long Term Incentives - Share-Based Compensation

Performance rights have been issued to Directors and executives as part of their remuneration. Share-based compensation instruments are not issued based on performance criteria, however, they are issued with vesting conditions set specifically to increase goal congruence among Directors, executives and shareholders. Performance rights granted carry no dividend or voting rights. The Company currently has no policy in place to limit an individual's risk exposure in relation to the issue of company securities as remuneration.

Use of Remuneration Consultants

No remuneration consultants were utilised during the 2025 financial year.

Remuneration of Directors and Key Management Personnel

2025	Short term			Performance rights	Post employment		
	Base salary & annual leave	Director fees	Consulting fees	Share based payments	Superannuation	Total	Performance related
	\$	\$	\$	\$	\$	\$	%
Directors/KMP							
Asimwe Kabunga ^{4,5}	-	-	138,000 ⁴	314,733	-	452,733	69.52%
Giacomo Fazio ^{1,6}	-	2,000	-	(127,713)	-	(125,713)	-
Dominic Virgara ^{2,5}	-	30,500 ⁴	-	-	-	30,500	-
Trevor Matthews ³	-	-	18,487	-	-	18,487	-
Prashant Chintawar ⁵	-	-	443,374 ⁴	-	-	443,374	-
	-	32,500	599,861	187,020	-	819,381	-

¹ Giacomo Fazio resigned from the board on 22 August 2024.

² Dominic Virgara was appointed to the board on 22 August 2024.

³ Trevor Matthews was appointed to the board on 2 June 2025. The fee includes services provided prior to appointment.

⁴ Asimwe Kabunga converted fees to the value of \$90,000 to shares during the year, Dominic Virgara converted 4.5 months' worth to the value of \$8,500 to shares during the year and Prashant Chintawar converted fees to the value of \$88,457 (approximate AUD) to shares during the year.

⁵ Effective 1 March 2025 to 31 August 2025 the following remuneration changes are in place:

- Reduction of Asimwe's monthly fees to \$7,500 per month to be paid in equity
- Reduction of Prashant's monthly fees to US\$18,750 to be paid in 50% equity and 50% cash
- Increase of Dominic's monthly fees to \$5,000 per month to be paid in equity
- The issue of ordinary shares for the payment of fees in lieu of cash will require shareholder approval at a general meeting.

⁶ Giacomo's previously recognised vesting expense of \$127,713 recognised in relation to forfeited performance rights.

2024	Short term			Performance rights	Post employment		
	Base salary & annual leave	Director fees	Consulting fees	Share based payments	Superannuation	Total	Performance related
	\$	\$	\$	\$	\$	\$	%
Directors							
Asimwe Kabunga	-	36,000	144,000	789,218	-	969,218	81.43%
Giacomo Fazio	-	24,000	-	112,745	-	136,745	82.45%
Prashant Chintawar ¹	-	-	484,720 ¹	-	-	484,720	-
	-	60,000	628,720	901,963	-	1,590,683	55.19%

1. This include 1 month of fees converted (\$40K AUD).

Share Based Compensation

Options

There were no options granted, exercised, or lapsed during the financial year, in relation to key management personnel remuneration.

Performance Rights

On 19 October 2022, shareholders approved the issue of series 1, 2 and 3 performance rights to Chairman Asimwe Kabunga, Managing Director Trevor Matthews and Non-Executive Director Giacomo Fazio.

The Performance Rights granted have the following vesting conditions:

- Mr Matthews (or his nominee): 17,500,000 Series 1 Performance Rights, 17,500,000 Series 2 Performance Rights and 35,000,000 Series 3 Performance Rights;
 - Mr Kabunga (or his nominee): 17,500,000 Series 1 Performance Rights, 17,500,000 Series 2 Performance Rights and 35,000,000 Series 3 Performance Rights; and
 - Mr Fazio (or his nominee): 2,500,000 Series 1 Performance Rights, 2,500,000 Series 2 Performance Rights and 5,000,000 Series 3 Performance Rights
- Each Performance Right is a right to subscribe for one Share
 - No amount will be payable by the holder for any Shares issued in respect of any Performance Rights that vest and are converted.
 - The expiry date of the Performance Rights is 31 December 2025
 - The Performance Rights granted have the following vesting conditions:
 - o Series 1 Performance Rights will be subject to the condition that:
 - the person remains as a Director as at the date that is 18 months after grant date; and
 - at any time between grant date and the date that is 30 months after grant date, the VWAP of Shares calculated over any 5 consecutive trading day period on which trades in Shares were recorded is \$0.05 or more;

o Series 2 Performance Rights will be subject to the condition that:

- the person remains as a Director as at the date that is 24 months after grant date; and
- at any time between grant date and the date that is 30 months after grant date, the VWAP of Shares calculated over any 5 consecutive trading day period on which trades in Shares were recorded is \$0.075 or more; and

o Series 3 Performance Rights will be subject to the condition that:

- the person remains as a Director as at the date that is 30 months after grant date; and
- at any time between grant date and the date that is 30 months after grant date, the VWAP of Shares calculated over any 5 consecutive trading day period on which trades in Shares were recorded is \$0.10 or more

On 22 August 2024, Jack Fazio resigned as a Director of the company and the series 1, 2 and 3 performance rights granted to him lapsed. Trevor Matthews previously resigned as Director before his appointment to the board on 2 June 2025 and series 1, 2 and 3 performance rights granted to him lapsed prior to his reappointment.

Shareholdings

Key Management Personnel	Balance at Beginning of Year	Balance on appointment date	Issued as Remuneration	Purchase of Shares	Balance on resignation date	Balance at End of Year
2025						
Asimwe Kabunga	595,994,093		30,000,000	76,923,077	-	702,917,170

Convertible Note details

Initial term and maturity date: 12 months from the Execution Date being 16 August 2024 (extended another 12 months post year end)

Interest rate - 12% fixed coupon paid in cash on the Maturity Date

The Notes are 100% Secured with security being over the company's Bunyu Graphite project effective 31 August 2024

Conversion price - Conversion of the notes are at the election of the investor anytime, at \$0.005 per share into VRC shares

The above relates to Dominic Virgara convertible note terms.

Other Transactions with Key Management Personnel of the Consolidated Entity

As at 30 June 2025 \$48,000 is outstanding for Director and consulting fees to Mr. Kabunga (excluding GST), 22,000 is outstanding for Director fees to Mr. Virgara (excluding GST), \$18,487 is outstanding for Director and consulting fees to Mr. Matthews (excluding GST) and approximately A\$100,000 outstanding to Mr. Chintawar for consulting fees.

Other than the above, there were no other transactions with Key Management Personnel.

End of Remuneration Report

Signed in accordance with a resolution of directors.

Asimwe Kabunga
Executive Chairman

The accompanying notes form part of these financial statements.

Notes to the Consolidated Financial Statements

1. Statement of material accounting policies

(a) Basis of preparation

These financial statements are general purpose financial statements, which have been prepared in accordance with the requirements of the Corporations Act 2001, Accounting Standards and Interpretations and comply with other requirements of the law. The accounting policies detailed below have been consistently applied to all of the years presented unless otherwise stated. The financial statements are for the Consolidated Entity consisting of Volt Resources Limited and its subsidiaries.

The financial statements have also been prepared on a historical cost basis. Cost is based on the fair values of the consideration given in exchange for assets. The Company is a for-profit listed public company, incorporated in Australia.

The principal activities of the Consolidated Entity during the financial year included restarting the production of Zavalievsky Graphite Ltd (“Zavalievsky Graphite Business” or “Zavalievsky”) in Ukraine, developing its downstream battery anode material business in the US and Europe and continuing funding activities to advance to the development stage of its Bunyu Graphite Project in Tanzania.

(b) Going Concern

The financial report has been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and the settlement of liabilities in the normal course of business.

At 30 June 2025, the Consolidated Entity had cash of \$219,725 a working capital deficiency of \$7,008,045 and net assets of \$19,453,647 primarily represented by deferred exploration expenditure of \$26,456,830 on its Graphite prospecting tenements in Tanzania. During the year, net cash outflows from operating activities totalled \$1,167,544 primarily in relation to corporate compliance, management, marketing and investor relations costs of the listed parent entity.

The following events occurred subsequent to year end:

- On 22 July 2025, the Company announced the receipt of the Riverfort Global loan of \$500,000 before cost

US\$3.8 million (A\$5.7 million) was due to be paid on 26 July 2022 for the second and final consideration payment for the ZG Group acquisition. Volt continues to work with Avellum, its legal advisor based in Ukraine, and other advisors in relation to offset claims for the deferred payment. During the year the Company had launched a counterclaim against the sellers for US\$12.7M for breach of warranties and misrepresentations. Under the Sale and Purchase Agreement (“SPA”), there is a mechanism that allows the Company the right to withhold from the Deferred Payment claims for breach of warranties. Whilst there is a present obligation based on the original agreement and an outcome of a settlement or expert determination is yet to be decided, the liability will remain until an independent counsel’s determination of a final and binding determination of the warranty claim, or an arbitrated outcome is made or both parties agreed to a settlement. The Board believe that the warranty claims have strong merits, and the deferred consideration will not result in a cash outflow to the Company and will lead to a potential inflow instead.

Notwithstanding the above, the Directors are of the opinion that the Consolidated Entity is a going concern due to the following factors:

- (i) The Company has the ability to raise additional working capital in the shorter term from:
 - a. a capital raising;
 - b. issue of convertible securities; and
- (ii) The Company has the ability to sell assets, or an interest in assets.

Whilst the Directors are confident that the above initiatives will generate sufficient funds to enable the Consolidated Entity to continue as a going concern for at least the period of 12 months from the date of signing this financial report, should these initiatives be unsuccessful, there exists a material uncertainty that may cast significant doubt on the ability of the Consolidated Entity to continue as a going concern and, therefore, whether it will be able to realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the financial report.

(c) **Adoption of new and revised standards**

In the year ended 30 June 2025, the Directors have reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to the Consolidated Entity and effective for the current annual reporting periods beginning on or after 1 July 2024. As a result of this review, the Directors have determined that there is no material impact of the new and revised Standards and Interpretations on the Consolidated Entity and therefore no material change is necessary to the Consolidated Entity's accounting policies.

(d) **Standards and Interpretations issued but not yet adopted.**

The Directors have also reviewed all Standards and Interpretations issued and not yet adopted for the year ended 30 June 2025. As a result of this review, the Directors have determined that there is no material impact of the new and revised Standards and Interpretations in issue but not yet adopted and therefore no material change is necessary to the Group's accounting policies.

(e) **Statement of compliance**

The financial report was authorised for issue on 26 September 2025. The financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards (AIFRS). Compliance with AIFRS ensures that the financial report, comprising the financial statements and notes thereto, complies with International Financial Reporting Standards (IFRS).

(f) **Basis of consolidation**

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement in with the investee; and
- has the ability within its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements listed above. Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss from the date the Company gains control until the date when the

Company ceases to control the subsidiary. Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests.

Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the controlling interest having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Consolidated Entity's accounting policies. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members are eliminated in full on consolidation.

(g) Impairment of assets

The Consolidated Entity assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Consolidated Entity makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of its fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets and the asset's value in use cannot be estimated to be close to its fair value. In such cases the asset is tested for impairment as part of the cash-generating unit to which it belongs.

When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset or cash-generating unit is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses relating to continuing operations are recognised in those expense categories consistent with the function of the impaired asset unless the asset is carried at revalued amount (in which case the impairment loss is treated as a revaluation decrease). An assessment is also made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated.

A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

(h) Critical accounting judgements and key sources of estimation uncertainty

The application of accounting policies requires the use of judgements, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions are recognised in the period in which the estimate is revised if it affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Share-based payment transactions:

The Consolidated Entity measures the cost of equity-settled transactions by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined using either the Black

and Scholes or Trinomial Options formula taking into account the terms and conditions upon which the instruments were granted.

Joint Arrangements

Note 22 describes that the ZG Group is an associate of Volt even though Volt has a 70% ownership interest. The directors have assessed whether Volt has control over ZG group based on whether Volt has the practical ability to direct the relevant activities of ZG Group unilaterally, or whether unanimous agreement of the parties to the joint arrangement is required. After assessment, the directors concluded that Volt does not have sufficiently dominant voting interest and that joint control exists between the parties to the arrangement. As a result, Volt accounts for its interest in the associate using the equity method of accounting.

Exploration and evaluation expenditure:

The application of the Group's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits are likely either from future exploitation or sale or where activities have not reached a stage which permits a reasonable assessment of the existence of reserves.

The determination of a Joint Ore Reserves Committee (JORC) resource is itself an estimation process that requires varying degrees of uncertainty depending on sub-classification and these estimates directly impact the point of deferral of exploration and evaluation expenditure.

The deferral policy requires management to make certain estimates and assumptions about future events or circumstances, in particular whether an economically viable extraction operation can be established. Estimates and assumptions made may change if new information becomes available.

Volt's Management has made the decisions to not to support any substantive expenditure on further exploration for and evaluation of mineral resources with respect to Guinea Gold and is neither budgeted nor planned and as a result the carrying value date has been impaired.

Derivative financial instrument:

The Group measures the fair value of the derivative financial instruments based on the share price movement of Volt. The instrument is revalued at each reporting date and at the date of the conversion to equity.

Impairment of non-financial assets other than goodwill and other indefinite life intangible assets

The consolidated entity assesses impairment of non-financial assets at each reporting date by evaluating conditions specific to the consolidated entity and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions. Refer to notes 22 and 9 regarding impairment recognised on the Group's investment in the ZG Group and the exploration and evaluation carrying value of Guinea Gold.

On 2 July Investors advanced A\$250,000 to the Company on or soon after the Execution Date. Any amounts drawn and outstanding shall be known as “Principal”. 10% fixed coupon paid in cash on the Maturity Date. 5% of the Drawdown paid in cash and deducted from gross proceeds, treated as cost of finance. On the First Drawdown Date the Company will issue 5 million and one options with a 3-year maturity and exercise price of A\$0.0075 (0.75 cents), the cost of finance \$13,333.

On 18 March 2025, the loan has been extended for an additional 12 months at a reduced interest rate of 7% (non-compounding) per annum. The parties agreed that should the loan not be repaid in full (including principal and interest) by November 2025, any amounts owing shall be repaid by the issue of fully paid ordinary shares in the Company at an issue price of A\$0.0026 per share.

Volt Resources Limited (“VRC”) announced that it had entered into a convertible loan agreement with RiverFort Global Opportunities PCC Ltd (“RiverFort”) in the previous period, a United Kingdom-based investment company focused on investing in junior listed companies by way of debt or equity-linked debt investments. The Company drew down the first \$250,000 during the 30 June 2024 year. During the year end 30 June 2025 the Company repaid the first drawdown and proceeded to draw down another \$500,000 and also repaid the second draw plus interest for a total repayment of \$550,000.

The terms are summarised as follows:

- Investor: RiverFort Global Opportunities PCC Ltd (“RiverFort”)
- Total facility value: \$1,000,000 AUD
- Second Drawdown Amount of \$500,000 AUD to be drawn on the date of execution of the agreement
- 500,000 Convertible Securities to be issued at the Extension Date for the First Drawdown Amount, being trading day immediately after the Maturity Date
- Initial term and maturity date: 4 months from the Execution Date
- Interest rate - 10% fixed coupon paid in cash on the Maturity Date
- Drawdown Fee - 5% of the Drawdown paid in cash and deducted from gross proceeds or 7% of the Drawdown if settled in shares being calculated at the Reference Price.
- Drawdown options - On the second Drawdown Date the Company Issued 23,804,990 options with a 3 year maturity and exercise price of A\$0.0063 (0.63 cents). The options have a fair value of \$68,426.
- Repayment - The Principal and Interest to be repaid in cash on or before the Maturity Date. On election any outstanding Principal and/or Interest balances Extension Terms will apply
- Extension Terms – Should VRC choose not to repay all or any of the interest and/or principal outstanding prior to the maturity date on the Extension Date RiverFort will be issued:
 - 15 million options (Extension Options) with a 3-year expiry from issue and exercise price of \$0.0075 (0.75 cents).
 - Convertible Securities with a face value of \$1 equating to the outstanding Principal at the Maturity Date.
- Extension date – the day after the maturity date
- Conversion rights – RiverFort have the right but not the obligation to convert the Convertible Securities in to shares at the lower of the Variable Conversion Price and the Fixed Premium Conversion Price
- Variable Conversion Price - 90% of the lowest daily VWAP over the 10 consecutive Trading Days preceding the Conversion Notice Date; or if the VWAP is zero, the lower of the day prior to the VWAP zero and the day after the VWAP zero.
- Fixed Premium Conversion Price - 150% of the Extension Price
- The Extension Price - the average of 5 daily VWAPs preceding the Extension Date
- Upon issue of the Conversion Shares the Principal will be reduced by the Conversion Amount and the relevant number of the Convertible Securities redeemed.

- On the Extended Maturity Date to the extent not already redeemed, VRC must redeem the Convertible Securities by paying the Investor the applicable portion of the Outstanding Principal.
- Extended Maturity Date - 12 months from the Extension Date
- VRC may at any point prior to or on the Extension Date redeem the Amount Outstanding in full by paying RiverFort the Amount Outstanding by giving 5 days written notice

Value per convertible note	\$0.0017

Accounting policy: Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Compound instruments

On the issue of compound instruments, the fair value of the liability component is determined using a market rate for an equivalent non-convertible debt instrument and this amount is carried as a non-current liability on the amortised cost basis until extinguished on conversion or redemption. The increase in the liability due to the passage of time is recognised as a finance cost. The remainder of the proceeds are allocated to the conversion option that is recognised and included in shareholders’ equity as a reserve, net of transaction costs. The carrying amount of the conversion option is not subsequently remeasured. The corresponding interest on the compound instruments is expensed to profit or loss.

Hybrid instruments

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. Derivatives embedded in hybrid contracts with hosts that are not financial assets within the scope of AASB 9 (e.g. financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL. Subsequent to recognition, the embedded derivative is revalued at each reporting and conversion date with fair value movements recognised in profit and loss. An embedded derivative is presented as a non-current asset or non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and is not expected to be realised or settled within 12 months.

4. Income tax

	2025 \$	2024 \$
Numerical reconciliation between aggregate tax expense recognised in the income statement and the tax expense calculated in the statutory income tax return		
Accounting loss before tax	(2,474,024)	(4,112,398)
Total loss before income tax expense	(2,474,024)	(4,112,398)
Prima facie income tax benefit @ 30% (2024: 30%)	(742,208)	(1,233,719)
Share based payments	56,106	278,138
Other non-deductible expenditure	46,441	319,760
Tax effect of impairment and losses attributable to investments	-	-
Section 40-880 deduction	29,570	(115,277)
Income tax losses and movement in deferred tax not brought to account	610,091	751,098
Aggregate income tax benefit	-	-
Unrecognised Deferred Tax Balances		
<i>The following deferred tax assets and liabilities have not been brought to account:</i>		
Deferred tax assets at 30% (2024: 30%)		
Carry forward revenue and capital losses	11,378,541	11,067,617
Other deferred tax balances	172,925	79,237
Total Deferred tax assets	11,551,466	11,146,854
Deferred tax liabilities at 30% (2023: 30%)		
Exploration	1,241,166	1,310,415
Other deferred tax balances	105,814	37,773
Total Deferred tax liabilities	1,346,980	1,348,188

The tax rates used in the above reconciliation are the corporate tax rates of Australia 30% and Tanzania 30% (2024: Australia 30%, Tanzania 30%). The 25% tax rate on taxable profits for small businesses does not apply to Australian corporate entities under Australian tax law if greater than 80% passive income is expected. The Consolidated Entity has tax losses arising in Australia of \$28,468,389 (2024: \$28,331,863) that are available indefinitely for offset against future taxable profits of the companies in which the losses arose.

The availability of these losses is subject to the satisfaction of either the business continuity or continuity of ownership tests. Tax losses arising in Tanzania to 30 June 2025 totalled A\$6,668,354 (2024: \$6,413,312). Deferred tax assets have not been recognised in respect of these items because it is not sufficiently probable that future taxable profit will be available against which the Consolidated Entity can utilise the benefits thereof.

Accounting policy: other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position. Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows. Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

5. Loss per share

	2025	2024
	\$	\$
Loss attributable to owners of Volt Resources Limited used in calculating basic and dilutive EPS	(2,476,232)	(4,116,287)

	2025	2024
	Number	Number
Weighted average number of ordinary shares used in calculating basic and diluted (loss) per share (*):	4,350,653,053	4,058,204,962
Basic / diluted loss per share	Cents per share (0.06)	Cents per share (0.10)

*As the Consolidated Entity is loss making in both 2025 and 2024, no potential ordinary shares are considered to be dilutive as they would act to decrease the loss per share.

The options on issue (Note 11) represent potential ordinary shares but are not dilutive and accordingly have been excluded from the weighted average number of ordinary shares and potential ordinary shares used in the calculation of diluted loss per share.

Balance at the beginning of the year	4,769	5,774
Acquisitions	355	215
Depreciation expense	-	(971)
Disposal	-	-
Foreign currency translation	(262)	(249)
Balance at the end of the year	4,862	4,769

Accounting policy: property, plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses. Depreciation is calculated on a straight-line basis over the estimated useful life of the assets as follows:

Plant and equipment – over 3 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year end.

Impairment

The carrying values of plant and equipment are reviewed for impairment at each reporting date, with recoverable amount being estimated when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of plant and equipment is the higher of fair value less costs to sell

and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, recoverable amount is determined for the cash-generating unit to which the asset belongs, unless the asset's value in use can be estimated to be close to its fair value. An impairment exists when the carrying value of an asset or cash-generating units exceeds its estimated recoverable amount. The asset or cash-generating unit is then written down to its recoverable amount. For plant and equipment, impairment losses are recognised in profit or loss for the year as a separate line item.

Derecognition and disposal

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year the asset is derecognised.

9. Deferred exploration and evaluation expenditure

	2025	2024
	\$	\$
Exploration and evaluation phase – at cost		
At beginning of the year	26,047,716	25,085,654
Exploration expenditure during the year	182,590	1,138,091
Impairment of Guinea Gold Project ⁽¹⁾	-	(145,719)
Foreign currency translation	226,524	(30,310)
Total exploration and evaluation	26,456,830	26,047,716

(1) Guinea Gold was impaired during the prior year as substantive expenditure on further exploration for and evaluation of mineral resources in the specific area was neither budgeted nor planned. This is indicative of impairment under AASB6 and Directors fully impaired the balance. The ultimate recoupment of the expenditure is dependent upon the successful development and commercial exploitation or, alternatively, sale of the respective areas of interest.

Accounting policy: exploration and evaluation

Exploration and evaluation expenditures in relation to each separate area of interest are recognised as an exploration and evaluation asset in the year in which they are incurred where the following conditions are satisfied:

- a) the rights to tenure of the area of interest are current; and
- b) at least one of the following conditions is also met:
 - (i) the exploration and evaluation expenditures are expected to be recouped through successful development and exploration of the area of interest, or alternatively, by its sale; or
 - (ii) exploration and evaluation activities in the area of interest have not at the reporting date reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are initially measured at cost and include acquisition of rights to explore, studies, exploratory drilling, trenching and sampling and associated activities and an allocation of depreciation and amortised of assets used in exploration and evaluation activities. General and administrative costs are only

included in the measurement of exploration and evaluation costs where they are related directly to operational activities in a particular area of interest.

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The recoverable amount of the exploration and evaluation asset (for the cash generating unit(s) to which it has been allocated being no larger than the relevant area of interest) is estimated to determine the extent of the impairment loss (if any).

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in previous years.

Where a decision has been made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then reclassified to development.

Capitalised exploration and evaluation expenditure represents the accumulated cost of acquisition and subsequent cost of exploration and evaluation of the properties. Ultimate recoupment of these costs is dependent on the successful development and commercial exploitation, or alternatively, sale, of the respective areas of interest.

10. Trade and other payables

	2025	2024
	\$	\$
Trade payables and accruals	663,917	504,834
Zavaliievsky Graphite deferred consideration ⁽¹⁾	5,801,527	5,691,179
Trade payables and other payables	6,465,444	6,196,013

⁽¹⁾ Under the terms of the SPAs entered into by Volt and the Sellers, Volt paid the Sellers the first instalment of the purchase price of US\$3.8 million in July 2021. Shares representing a 70% interest in each of the ZG group companies were transferred to Volt at this time.

A second and final deferred payment of US\$3.8 million was to be paid in July 2022 which is effectively an unsecured loan provided to Volt by the Sellers. Volt continues to work with Avellum, its legal advisor based in Ukraine, and other advisors in relation to offset claims for the deferred payment. The Company is currently finalising its claims which we believe will put Volt in a strong position. Volt expects to be able to either significantly reduce the deferred payment, or completely offset the deferred payment liability.

During the previous year the Company had launched a counterclaim against the sellers for US\$12.7M for breach of warranties and misrepresentations and is currently on-going with the sellers. Under the Sale and Purchase Agreement (“SPA”), there is a mechanism that allows the Company the right to withhold from the Deferred Payment claims for breach of warranties. Whilst there is a present obligation based on the original agreement and an outcome of a settlement or outcome is yet to be decided, the liability will remain until an independent counsel’s determination of a final and binding liability or a court outcome is made or both parties agreed to a settlement. The Board believe that the counterclaims have strong merits and the deferred consideration will not result in an outflow to the Company and will lead to a potential inflow instead. The Company continues to engage their lawyers to overturn the claim and received confirmation on 5 August 2025 there has been no change to the above circumstance.

This reserve is used to record exchange differences that arise from the translation of the financial statements of controlled foreign subsidiaries.

Share-based payment reserve

This reserve is used to recognise the value of share-based payments issued to employees and directors as part of their remuneration, plus share-based payments issued to third parties as compensation for their services.

Convertible note reserve

This reserve is used to record the value of options issued as transactions costs for issuing convertible notes.

Movement in Reserves

	Note	2025 \$	2024 \$
Share based payments reserve			
Balance at the beginning of the year		1,782,758	855,630

Convertible Note (option) value	3	189,661	23,500
Exercised		-	-
Balance at the end of the year		702,161	512,500
Foreign currency translation reserve			
Balance at the beginning of the year		1,255,058	1,493,187
Currency translation differences		390,700	(238,129)
Balance at the end of the year		1,645,758	1,255,058
Total reserves		4,399,256	3,550,316

Accounting policy: foreign currency translation

Both the functional and presentation currency of Volt Resources Limited and its Australian subsidiaries is Australian dollars. Each entity in the Consolidated Entity determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the reporting date. All exchange differences in the consolidated financial report are taken to profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. The functional currency of foreign operations through Dugal Resources Lda and Xiluva Mozambi Lda, is Mozambique New Metical (MZN). The functional currency of foreign operations through Volt Graphite Tanzania Limited is Tanzanian Shillings (TZS) and US Dollars (USD). The functional currency of foreign operations through Zavalievsky Graphite is Ukraine hryvnia (UAH) and US Dollars (USD). Volt Energy Materials functional currency is United States dollars (USD).

As at the reporting date the assets and liabilities of these subsidiaries are translated into the presentation currency of Volt Resources Limited at the rate of exchange ruling at the reporting date and their statements of

comprehensive income are translated at the weighted average exchange rate for the year. The exchange differences arising on the translation are taken directly to a separate component of equity, being recognised in the foreign currency translation reserve. On disposal of a foreign entity, the deferred cumulative amount recognised in equity relating to that particular foreign operation is recognised in profit or loss.

13. Share based payments

Performance Rights

Refer to prior page 24 and page 26 of the Director’s Report, for details of performance rights issued to Directors during the year, vesting conditions, the valuation methodology used and key inputs to the valuation. A share based payment of \$187,020 was recognised in the accounts.

All tranches contain market-based vesting conditions and have been valued using an up-and-in single barrier option pricing model with a Parisian barrier adjustment. The model takes into consideration that the rights will vest at any time during the performance period given that the VWAP exceeds the determined barrier over the specified number of days. The model incorporates a trinomial option pricing model.

The fair value of the rights was valued using a trinomial lattice up-and-in option pricing model with a Parisian barrier adjustment. The inputs to the model were as follow:

Assumption	Series 1	Series 2	Series 3
Grant Date	19-Oct-2022	19-Oct-2022	19-Oct-2022
Spot Price	\$0.031	\$0.031	\$0.031
Exercise Price	Nil	Nil	Nil
Vesting Date	19-Apr-2025	19-Apr-2025	19-Apr-2025
Barrier Price	\$0.050	\$0.075	\$0.100
Expiry Date	31-Dec-2025	31-Dec-2025	31-Dec-2025
Expected Future Volatility	100%	100%	100%
Risk Free Rate	3.5%	3.5%	3.5%
Dividend Yield	Nil	Nil	Nil

The company has determined the expected vesting period to be the life of the rights with vesting expense recognised on a straight-line basis over the vesting period. \$187,020 of vesting expense was recognised on the rights during the year this was including \$187,020 recognised for one Director less a reversal of \$127,713 (2024: \$901,964), less forfeited of \$314,733 on a Director’s resignation.

Options

The Advisor Options are defined as share-based payments. The valuation of share-based payment transactions is measured by reference to fair value of the equity instruments at the date at which they are granted. The fair value is determined using the Black-Scholes model, taking into account the terms and conditions upon which the options were granted.

Assumption	Series 1	Series 2
Grant Date	1 July 2024	27 September 2024
Spot Price	\$0.0050	\$0.004
Exercise Price	0.0075	0.0063
Expiry Date	2-July-2027	27 May 2027
Expected Future Volatility	100%	136%
Risk Free Rate	4.19%	3.57%
Dividend Yield	Nil	Nil
Fair Value Per Option	\$0.0026	\$0.0029
No. of Options	5,000,001	23,804,990

Series 1 – Relates to the shareholder Loan. Total valuation \$13,133

Series 2 – Relates to Riverfort Option. Total Valuation \$68,426

Accounting policy: share-based payment transactions

Equity settled transactions:

The Consolidated Entity provides benefits to employees (including senior executives) of the Consolidated Entity in the form of share-based payments, whereby employees render services in exchange for shares or rights over shares (equity-settled transactions). The cost of these equity-settled transactions with employees is measured by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by an external valuer using a Black-Scholes model.

In valuing equity-settled transactions, no account is taken of any performance conditions, other than conditions linked to the price of the shares of Volt Resources Limited (market conditions) if applicable. The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award (the vesting period).

The cumulative expense recognised for equity-settled transactions at each reporting date until vesting date reflects:

- a) the extent to which the vesting period has expired; and
- b) the Consolidated Entity’s best estimate of the number of equity instruments that will ultimately vest.

No adjustment is made for the likelihood of market performance conditions being met as the effect of these conditions is included in the determination of fair value at grant date. The consolidated statement of profit or loss and other comprehensive income charge or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period. No expense is recognised for awards that do not ultimately vest, except for awards where vesting is only conditional upon a market condition.

If the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee, as measured at the date of modification.

If an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award, as described in the previous paragraph. The dilutive effect, if any, of outstanding options is reflected as additional share dilution in the computation of earnings/loss per share (see Note 5).

14. Financial instruments

a) Capital risk management

The Consolidated Entity manages its capital to ensure that entities in the Consolidated Entity will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Consolidated Entity’s overall strategy remains unchanged from 2023. The capital structure of the Consolidated Entity consists of debt, cash and cash equivalents and equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings. None of the entities are subject to externally imposed capital requirements. Operating cash flows are used to maintain and expand operations, as well as to make routine expenditures such as tax, and general administrative outgoings. Gearing levels are reviewed by the Board on a regular basis in line with its target gearing ratio, the cost of capital and the risks associated with each class of capital.

	2025	2024
	\$	\$
Financial assets		
Cash and cash equivalents	219,725	84,634
Trade and other receivables	14,525	48,396
	234,250	133,030
Financial liabilities		
Trade and other payables	6,465,444	6,196,013
Borrowings	776,851	184,974
Derivative Liability	-	168,019
	7,242,295	6,549,006

All of the above have a maturity within 12 months

b) Financial risk management objectives

The Consolidated Entity is exposed to market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk. The Consolidated Entity seeks to minimise the effect of these risks, by using derivative financial instruments to hedge these risk exposures where appropriate. The use of financial derivatives is governed by the Consolidated Entity’s policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by management on a continuous basis. The Consolidated Entity does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

c) Market risk

The Consolidated Entity’s activities expose it primarily to the financial risks of changes in foreign currency exchange rates, commodity prices and exchange rates. There has been no change to the Consolidated Entity’s exposure to market risks or the manner in which it manages and measures the risk from the previous period.

d) Foreign currency risk management

The Consolidated Entity undertakes certain transactions denominated in foreign currencies, hence exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters. No forward contracts or other hedging instruments have been used during the current or prior year as the Consolidated Entity’s foreign exchange exposure is not considered to be sufficiently material to justify such activities. The carrying amounts of the Consolidated Entity’s foreign currency denominated monetary assets and monetary liabilities at the balance date expressed in Australian dollars are as follows:

	Assets		Liabilities	
	2025	2024	2025	2024
US dollars	3,119	3,119	8,332,584	7,625,335
Tanzanian shillings	247,299	247,299	9,990	4,298

Foreign currency sensitivity analysis

The Consolidated Entity is exposed to US Dollar (USD) and Tanzanian shillings (TZS) currency fluctuations. The following table details the Consolidated Entity’s sensitivity to a 10% increase and decrease in the Australian dollar against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management’s assessment of the possible change in foreign exchange rates.

The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. A positive number indicates a weakening against the respective currency. For a strengthening of the Australian Dollar against the respective currency there would be an equal and opposite impact on the result and other equity and the balances below would be negative.

	2025	2024
	\$	\$
USD impact		
Result for the year	833,570	(762,845)
TZS impact		
Result for the year	24,631	24,300

e) Interest rate risk

As at and during the year ended on reporting date the Consolidated Entity had no significant interest-bearing assets or liabilities, other than liquid funds on deposit and various loans. As such, the Consolidated Entity’s income and operating cash flows (other than interest income from funds on deposit and interest expense on the loans) are substantially independent of changes in market interest rates.

The Consolidated Entity’s exposure to interest rate risk for each class of financial assets and liabilities is set out below:

		Weighted Rate %	2025 \$	Weighted Rate %	2024 \$
Financial assets					
Cash and cash equivalents	Floating	0.85%	219,725	0.85%	84,634
Trade receivables	Floating		-		-
Financial liabilities					
Trade and other payables		0%	6,465,444	0%	6,549,006
Borrowing	Fixed	10.34%	776,851	10%	184,974

Consolidated Entity and Parent Company sensitivity

The sensitivity analyses below have been determined based on the exposure to interest rates at the balance date and the stipulated change taking place at the beginning of the financial year and held constant through the reporting period. At balance date, if interest rates had been 80 basis points higher or lower and all other variables were held constant, the Consolidated Entity’s net result would increase or decrease by \$1,758 (2024: \$719). This is mainly attributable to the Consolidated Entity’s exposure to interest rates on its variable rate cash holdings.

f) Credit risk

The Consolidated Entity seeks to trade only with recognised, trustworthy third parties and it is the Group’s policy to perform credit verification procedures in relation to any customers wishing to trade on credit terms with the Consolidated Entity. The Consolidated Entity has no significant concentrations of credit risk.

g) Liquidity risk

Prudent liquidity management involves the maintenance of sufficient cash, marketable securities, committed credit facilities and access to capital markets. It is the policy of the Board to ensure that the Consolidated Entity is able to meet its financial obligations and maintain the flexibility to pursue attractive investment opportunities through keeping committed credit lines available where possible, ensuring the Consolidated Entity has sufficient working capital and preserving the 15% share issue limit available to the Company under the ASX Listing Rules.

h) Net fair value

The carrying amount of financial assets and liabilities recorded in the financial statements approximate their fair value at 30 June 2025.

Accounting policy: investments and other financial assets

Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement, except for financial assets at fair value through profit or loss. Such assets are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless, an accounting mismatch is being avoided.

Financial assets are derecognised when the rights to receive cash flows have expired or have been transferred and the consolidated entity has transferred substantially all the risks and rewards of ownership. When there is no reasonable expectation of recovering part or all of a financial asset, it’s carrying value is written off.

Financial assets at fair value through profit or loss

Financial assets not measured at amortised cost or at fair value through other comprehensive income are classified as financial assets at fair value through profit or loss. Typically, such financial assets will be either: (i) held for trading, where they are acquired for the purpose of selling in the short-term with an intention of making a profit, or a derivative; or (ii) designated as such upon initial recognition where permitted. Fair value movements are recognised in profit or loss.

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income include equity investments which the consolidated entity intends to hold for the foreseeable future and has irrevocably elected to classify them as such upon initial recognition.

Impairment of financial assets

The consolidated entity recognises a loss allowance for expected credit losses on financial assets which are either measured at amortised cost or fair value through other comprehensive income. The measurement of the loss allowance depends upon the consolidated entity’s assessment at the end of each reporting period as to whether the financial instrument’s credit risk has increased significantly since initial recognition, based on reasonable and supportable information that is available, without undue cost or effort to obtain.

Where there has not been a significant increase in exposure to credit risk since initial recognition, a 12-month expected credit loss allowance is estimated. This represents a portion of the asset’s lifetime expected credit losses that is attributable to a default event that is possible within the next 12 months.

Where a financial asset has become credit impaired or where it is determined that credit risk has increased significantly, the loss allowance is based on the asset’s lifetime expected credit losses. The amount of expected credit loss recognised is measured on the basis of the probability weighted present value of anticipated cash shortfalls over the life of the instrument discounted at the original effective interest rate.

For financial assets measured at fair value through other comprehensive income, the loss allowance is recognised within other comprehensive income. In all other cases, the loss allowance is recognised in profit or loss.

15. Commitments and contingencies

	2025	2024
	\$	\$
Within one year – exploration	224,000	201,515
Within one year – office lease	-	-
One to five years – exploration	-	-
	224,000	201,515

There are no contingent liabilities as at the date of this report, other than for the Resettlement Action Plan totalling US\$3.5 million where commencement of resettlements and any commitments are contingent on the consolidated entity making a Final Investment Decision (FID) to develop the Bunyu Graphite project which is contingent on an appropriate level of development funding being sourced.

On production and sale of graphite products from the Bunyu Graphite project, the previous owners are entitled to a 3% net smelter royalty on the sale of dried concentrate. At the Company’s election, at any stage in the future the Company may pay US\$2.0 million to reduce the royalty rate to 1.5%. On production and sale of gold products from the Guinea project, Kabunga Holdings are entitled to a 2% net smelter royalty on the sale of the end gold product.

Changes to the legal framework governing the natural resources sector in Tanzania were passed by the Tanzanian Parliament in early July 2017 and the Company advised the ASX of the impact of the new legislation on 7 July 2017. One impact was the Tanzanian Government would have a 16% non-dilutable free carried interest in Volt's Tanzanian subsidiary which increases from a current interest of nil.

The 16% interest is to apply to mining operations under a mining licence or a special mining licence. The Company is not aware of any further guidance or application of this change to date. The Consolidated entity currently retains a 100% interest in Volt's Tanzanian subsidiary which holds the Bunyu Graphite Project.

During the previous year the Company had launched a counterclaim against the sellers for US\$12.7M on the ZG Project (refer to note 10) and is currently on-going with the sellers. The company confirmed with their lawyers on 5 August 2025 there has been no change to the warranty claim. The Board believe that the counterclaims have strong merits.

16. Financial reporting by segments

AASB 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance.

The function of the chief operating decision maker is performed by the Board collectively. Information reported to the Board for the purposes of resource allocation and assessment of performance is focused broadly on the Group's diversified activities across different sectors.

The Group's reportable segments under AASB 8 are Corporate and Geographical locations:

	Corporate \$	Volt Resources Tanzania (Graphite) \$	Volt Energy Materials \$	Zavalievsky Graphite \$	Guinea Gold \$	Total \$

Accounting policy: parent entity financial information

The financial information for the parent entity, Volt Resources Limited, disclosed in this note has been prepared on the same basis as the consolidated financial statements, except as set out below.

Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of Volt Resources Limited. Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

Share-based payments

The Consolidated Entity measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined using a Black-Scholes model.

21. Events subsequent to year end

On 17 July 2025 the Company, extended the \$500,000 Convertible Note day by an additional 12 month pushing the maturity date to August 2026. No change were noted to the other terms.

On 22 July the Company received an additional \$500,000 (before costs) from Riverfort Global.

Other than the above, there are no other events subsequent to year end.

22. Investments in Associate and Joint Arrangements

	2025	2024
	\$	\$
Opening Balance	-	-
Acquisition cost (Zavalievsky Graphite)	-	-
Movement Intercompany loan	157,633	305,597
Volt Resource's share of ZG Group loss – 70%	-	-
Impairment of Investment in Zavalievsky Graphite/loans	(157,633)	(305,597)
Carrying Value	-	-

Share of loss not brought to account as net investment carried is nil.

On 26 July 2021, the Company completed the acquisition of a 70% interest in the ZG Group. Given the joint control of the ZG Group, the Company's 70% interest is accounted for using the equity method in the consolidated financial statements. ZG Group is governed by the three shareholders and a three-member Supervisory Board where key decisions require unanimous approval of all shareholders or Supervisory Board members.

Accounting policy applied:

A Joint arrangement is where the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exist only when the decisions about relevant activities require the unanimous consent of the parties sharing control. The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries. The Group's investment in its joint arrangement is accounted for using the equity method. Under the equity method, the investment in a joint arrangement is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the joint venture since the acquisition date.

The statement of profit or loss reflects the Group's share of the results of operations of the joint venture. The aggregate of the Group's share of profit or loss of a joint venture is shown on the face of the statement of profit or loss outside operating profit and represents profit or loss after tax.

	2025	2024
	\$	\$
Revenue	1,384,918	1,283,405
Other Income	61,921	34,190
Cost of Sales	(1,432,592)	(1,919,315)
Gross Profit	14,247	(601,720)
Foreign exchange gain/(loss)	(392,731)	(1,236,386)
Impairment of Non-current assets	-	-
Other expenses	(370,989)	(833,169)
Finance cost	(96,501)	(164,970)
Finance penalty costs	(1,576,589)	(1,543,412)
Loss before income tax	(2,422,563)	(4,379,657)
Income tax (expense)/benefit	(1,739)	(2,592)
Loss after income tax	(2,424,302)	(4,382,249)
Current Assets	929,552	799,258
Non-current Assets	-	-
Current Liabilities	(15,065,949)	(11,664,036)
Non-current Liabilities	(434,417)	(1,492,420)
Net Assets	(14,570,814)	(12,357,198)

The non-current assets of the joint venture have been written-off due to the impairment indicators present, in particular the uncertainty caused by the ongoing war in the Ukraine.

Consolidated Entity Disclosure Statement

The consolidated entity disclosure statement has been prepared in accordance with S295(3A)(a)) of the Corporations Act 2001 and includes the required information of Volt Resources Limited and the entities it controls in accordance with AASB 10 Consolidated Financial Statements.

In determining tax residency, the Consolidated Entity has applied the following interpretations:

- Australian Tax Residency
- Court legislation and judicial precedent has been applied, including regard to the Tax Commissioner’s public guidance.
- Foreign tax residency where appropriate.
- Independent tax advisors have been engaged to assist in the determination of tax residence to ensure applicable foreign tax legislation has been complied with

DIRECTORS' DECLARATION

- 1) In the opinion of the directors of Volt Resources Limited (the 'Company'):
 - a. the accompanying financial statements and notes and the additional disclosures are in accordance with the Corporations Act 2001 including:
 - i. giving a true and fair view of the Consolidated Entity's financial position as at 30 June 2025 and of its performance for the year then ended; and
 - ii. complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations regulations 2001; and
 - b. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
 - c. the consolidated entity disclosure statement is true and correct;
- 2) The financial statements and notes thereto are in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board.
- 3) This declaration has been made after receiving the declarations required to be made to the directors in accordance with Section 295A of the Corporations Act 2001 for the financial year ended 30 June 2025.

This declaration is signed in accordance with a resolution of the Board of Directors.

Asimwe Kabunga
Executive Chairman
26 September 2025

INDEPENDENT AUDITOR'S REPORT

To the Members of Volt Resources Limited

Report on the Audit of the Financial Report

Qualified Opinion

We have audited the financial report of Volt Resources Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes to the Consolidated financial statements, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion, except for the possible effects of the matter described in the *Basis for Qualified Opinion* section of our report, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 30 June 2025 and of its financial performance for the year then ended; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Qualified Opinion

As disclosed in Note 22, the Group's 70% joint venture interest in the Zavalievsky Graphite ('ZG') Group is equity accounted and the investment and loan receivables have a nil carrying value as at balance date. The auditor of ZG Group has issued an adverse opinion with respect to ZG Group's financial report for the year ended 30 June 2025. As at the date of approval of the financial report, we have been unable to obtain sufficient, appropriate audit evidence in relation to the summary financial information disclosed in Note 22 of the financial statements in relation to ZG Group. Had we been able to obtain sufficient, appropriate evidence in relation to the summary financial information in relation to ZG Group, matters might have come to our attention indicating that adjustments might have been necessary to the summary financial information disclosed in relation to ZG Group.

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* ("the Code") that are relevant to our audit of the financial report in Australia.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1(b) in the financial report, which indicates that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matters described in the and *Basis for Qualified Opinion* and *Material Uncertainty Related to Going Concern* sections, we have determined the matter described below to be the key audit matters to be communicated in our report.

Key Audit Matter	How our audit addressed the key audit matter
<p>Exploration and evaluation assets Refer to Note 9</p> <p>In accordance with AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i>, the Group capitalises all exploration and evaluation expenditure including acquisition costs.</p> <p>Our audit focused on the Group’s assessment of the carrying amount of the capitalised exploration and evaluation asset, as this is the most significant asset of the Group. We planned our work to address the audit risk that the capitalised expenditure may no longer meet the recognition criteria of the standard. In addition, we considered it necessary to assess whether facts and circumstances existed to suggest the carrying amount of the exploration and evaluation assets may exceed their recoverable amounts.</p>	<p>Our procedures include but were not limited to:</p> <ul style="list-style-type: none"> - Obtained an understanding of the key processes associated with management’s review of the carrying values of each area of interest. - Considered management’s assessment of potential impairment indicators in addition to making our own assessment. - Obtained evidence that the Group has current rights to tenure over its areas of interest. - Considered the nature and extent of planned ongoing activities. - Substantiated a sample of expenditure by agreeing to supporting documentation; and - Examined the disclosures made in the financial report.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group’s annual report for the year ended 30 June 2025, but does not include the financial report and our auditor’s report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- (a) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and
- (b) the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*, and

for such internal control as the directors determine is necessary to enable the preparation of:

- (a) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- (b) the consolidated entity disclosure statement that is true and correct and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we

conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial report. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON THE REMUNERATION REPORT

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the Directors' Report for the year ended 30 June 2025.

In our opinion, the Remuneration Report of Volt Resources Limited for the year ended 30 June 2025 complies with Section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with Section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Summary of Results of the Entity's Annual Review of its Mineral Resources and Ore Reserves

The Company carries out an annual review of its Mineral Resources and Ore Reserves as required by the ASX Listing Rules. As of 30 June 2025, the Company reviewed the Mineral Resource and Ore Reserve inventories and found:

- The Graphite Ore Reserves will no longer be reported by the Company due to the changes in the 2016 Pre-feasibility Study assumptions and estimates since the Graphite Ore Reserves were reported.
- A reduction in the Graphite Mineral Resource estimate due to the expiry of the tenements on which some of the mineral resources were located.
- All other Mineral Resource estimates and Ore Reserve statements follow JORC 2012 guidelines.

- Opportunities for the Company to convert lower classified Mineral Resources into higher classification, and
- Opportunities to convert appropriate Mineral Resources into Ore Reserves, with follow up exploratory work including but not limited to infill drilling and further metallurgical test work.

MATERIAL CHANGES

Earlier in 2025 several PL's expired following their ten-year anniversary, leaving the Company with two ML's and the two surrounding PL's, all of which fall within the Bunyu 1 area. This removes the B2 and B3 mineral resources and the MRE table below has been updated from last year's annual report to reflect this. The below table (Table 1) has the remaining tenements listed and has been checked against the Tanzanian cadastre portal.

Table 1: Current Tanzanian Tenure

Location	Tenement Number	Status change during quarter	Volt's Interest
Tanzania – Lindi Rural District	ML 591/2018	None	100%
Tanzania – Lindi Rural District	ML 592/2018	None	100%
Tanzania – Masasi District	PL 12448/2023	None	100%
Tanzania – Masasi District	PL 11715/2021	None	100%

The company does acknowledge that a draft JORC Code (2025) has been released for comment and review (<https://www.jorc.org/>). As this is a draft its provisions do not yet apply but could be relevant for the 2026 resource and reserve review.

Mineral Resource and Ore Reserve Statements

All Mineral Resources and Ore Reserves announced by Volt Resources Ltd are within the Republic of Tanzania. Volt Resources the consolidated entity, is targeting graphite mineralisation within the Republic of Tanzania.

As of the 30 June 2025, the Graphite Mineral Resources for Volt Resources were:

Bunyu Project	Mt	TGC (%)
Measured		
Bunyu 1 (previously Namangale)	20	5.3
Total Measured	20	5.3
Indicated		
Bunyu 1 (previously Namangale)	122	5.2
Total Indicated	122	5.2
Inferred		

Bunyu 1 (previously Namangale)	264	5.0
Total Inferred	264	5.0
Total Resource	406	5.0

Notes:

1. The Mineral Resource is inclusive of the Ore Reserves.
2. Inconsistencies in totals are due to rounding.
3. Refer to announcement “Pre-Feasibility Study Completed” dated 15 December 2016.
4. This Mineral Resource statement has been compiled in accordance with the guidelines of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code – 2012 Edition).
5. Mineral Resources were based on cut-off grades of 2.5% TGC for Namangale North.

As per clause 49 of the JORC 2012 Code, to detail the specifications of the minerals reported above, the following table lists the breakdown of the various resources’ flake size

Size		Namangale 1 (now Bunyu 1)
µm	Label	%
500	Super Jumbo	1
300	Jumbo	13
180	Large	29
150	Medium	12
75	Small	27
-75	Fine	18

Notes:

1. Inconsistencies in totals are due to rounding.
2. Refer to announcement “Pre-Feasibility Study Completed” dated 15 December 2016.

As of the 30 June 2025, the Graphite Ore Reserves for Volt Resources were restricted to the Stage 1 Feasibility Study Update announced 14 August 2023, and any previously reported JORC Reserves based on the 15th of December 2016 ASX announcement “Pre-Feasibility Study Completed” are now to be considered historical.

Governance Arrangements and Internal Controls with respect to Mineral Resource and Ore Reserve Estimates

The Company ensures that all Mineral Resource and Ore Reserve calculations are subject to appropriate levels of governance and internal controls.

Exploration Results are collected and managed by competent qualified geologists and metallurgists. All data collection activities are conducted to industry standards based on a framework of quality assurance and quality control protocols covering all aspects of sample collection, topographical and geophysical surveys, drilling, sample preparation, physical and chemical analysis and data and sample management.

Mineral Resource and Ore Reserve estimates are prepared by qualified independent Competent Persons. If there is a material change in the estimate of a Mineral Resource, the modifying factors for the preparation of Ore Reserves, or reporting an inaugural Mineral Resource or Ore Reserve, the estimate and supporting documentation in question are reviewed by a suitably qualified independent Competent Person.

The Company reports its Mineral Resources and Ore Reserves on an annual basis in accordance with the JORC Code 2012 Edition.

The Ore Reserves and Mineral Resources Statement is based on and fairly represents information and supporting documentation prepared by competent and qualified independent external professionals.

The Mineral Resources Statement has been approved by a Competent Person, Mr Mark Biggs of ROM Resources Ltd, a member of the Australasian Institute of Mining and Metallurgy (Member # 10788). Mr Biggs is an independent consultant and has no shareholding in the company.

Competent Person's Statement

The information above is extracted from the announcement dated 15 December 2016. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.

On 31 July 2018, the Company announced an updated subset of the Mineral Resources and Ore Reserves relating to the Stage 1 higher grade portion of the Bunyu 1 deposit. The subset is further detailed in a separate section with separate competent person statements below.

The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement. Nevertheless, for ease of access, please see the relevant Competent Person's statements below:

The information in this report that relates to Mineral Resources is based on information compiled by Mr Mark Biggs, a Competent Person who is a member of the Australasian Institute of Mining and Metallurgy. Mr Biggs is a Director of ROM Resources Pty Ltd. Mr Biggs has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. In November 2018 Mr Biggs successfully completed the inaugural AusIMM JORC Online Certificate. Mr Biggs consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Stage 1 Mineral Resources and Ore Reserve

An updated subset of the Mineral Resources and Ore Reserves relating to the Stage 1 higher-grade portion of the Bunyu 1 deposit was announced on 14 August 2023 and is further detailed below.

In accord with the Stage 1 Feasibility Study for the Bunyu Graphite Project Tanzania dated 14 August 2023 – The Bunyu 1 (Stage 1): Mineral Resources & Ore Reserves tables below, relate to the Stage 1 higher grade portion of the Bunyu 1 deposit, not the entire Bunyu 1 deposit as detailed above.

The July 2018 resource model was developed for investigation of the Stage 1 pit designs. The global Mineral Resource for Bunyu 1 reported with the 2016 Pre-feasibility Study results, on 15 December 2016 has not been re-estimated. The July 2018 model is restricted to above 240 mRL and includes only the top two layers of mineralisation within the southern area and the top four layers of mineralisation within the northern area. Geological interpretation has identified additional mineralised layers that are not included in the July 2018 resource model: seven within the northern area, eight within the south area and two within the eastern area.

The Mineral Resources have been reported for the July 2018 model at a 2.93% TGC cut-off grade and are included in the Table below. This cut-off grade was determined from technical and economic assessment of the mineralisation within the Stage 1 Feasibility Study (FS) pits by Oreology. This resource tabulation is not a resource

statement for the entire Bunyu 1 project and is presented for validation of the July 2018 resource model which has been used as the basis of the August 2023 FS Update and associated Ore Reserve.

Bunyu 1 (Stage 1): Mineral Resources (restricted above the base of model surface and above 240-mRL) reported above a cut-off grade of 2.93% TGC.

Classification	Mt	TGC (%)
Measured	8.0	5.8
Indicated	31.9	5.6
Inferred	36.9	5.1
Total	76.8	5.4

Note: this update does not cover the global Mineral Resources at Bunyu 1

The July 2018 mineral resource model was used to determine the Ore Reserve developed to support the 2023 Bunyu 1 Stage 1 FS Update, and the associated mine production schedule. The selected mining scenario, based on the outcomes of an open pit optimisation, was for three pits to be developed over 13 years with a total of 5.4Mt of mill feed being mined.

The scope of the 2023 Bunyu 1 Stage 1 FS Update was to develop a project plan for a relatively small component of the Bunyu 1 deposit.

To detail the specifications of the minerals reported above, the following table lists the breakdown of the Bunyu 1(Stage 1) resources' flake size:

Size		Bunyu 1 (Stage 1)
µm	Label	%
500	Super Jumbo	1
300	Jumbo	11
180	Large	27
150	Medium	15
-150	Small to Fine	46

Notes:

1. Inconsistencies in totals are due to rounding.
2. Refer to ASX announcement "Positive Stage 1 Feasibility Study Bunyu Graphite Project, Tanzania" dated 30 July 2018.

The Bunyu 1 (Stage 1): Ore Reserves

Material		Ore		Waste	Total	Strip Ratio
Location	Classification	kt	TGC %	kt	kt	
North	Proved	1,449.6	5.93%	191.9	2,075.5	0.10
	Probable	434.0	5.73%			
	Subtotal	1,883.6	5.88%			
Central	Proved	479.0	6.10%	578.8	1,408.2	0.70
	Probable	350.5	5.56%			
	Subtotal	829.4	5.87%			
South	Proved	0.0	0.00%	2,764.1	5,494.6	1.01
	Probable	2,730.5	6.46%			
	Subtotal	2,730.5	6.46%			
TOTAL	Proved	1,928.6	5.97%	3,534.7	8,978.3	0.65
	Probable	3,515.0	6.28%			

Material		Ore		Waste	Total	Strip Ratio
Location	Classification	kt	TGC %	kt	kt	
	Total	5,443.6	6.17%			

The 2023 Bunyu 1 Stage 1 FS Update Ore Reserve comprises 35% Proved and 65% Probable Ore Reserves. Both the 2023 Bunyu 1 Stage 1 FS Update Ore Reserve and Mineral Resource underpinning it have been prepared by competent persons in accordance with JORC requirements. The 2023 Bunyu 1 Stage 1 FS Update mining schedule was designed to generate a steady state of 400,000tpa of plant feed annually from Year 2, resulting in an average feed grade of 6.17% TGC.

Competent Person's Statements

The information in the 2023 Bunyu 1 Stage 1 FS Update for the Bunyu Graphite Project Tanzania dated 14 August 2023 that relates to Mineral Resources is based upon information compiled by Mrs Christine Standing who is a Member of Australian Institute of Geoscientists. Mrs Standing is an employee of Datamine Australia Pty Ltd (Snowden Optiro) and has sufficient experience relevant to the style of mineralisation, the type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mrs Standing consents to the inclusion in this annual statement of a summary based upon her information in the form and context in which it appears.

The information in the 2023 Bunyu 1 Stage 1 FS Update for the Bunyu Graphite Project Tanzania dated 14 August 2023 that relates to Ore Reserves was compiled by Mr Ross Cheyne who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Cheyne is an employee of Orelogy Consulting Pty Ltd and has sufficient experience relevant to the style of mineralisation, the type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Cheyne consents to the inclusion in this annual statement of a summary based upon his information in the form and context in which it appears.
