MARKET OUTLOOK

The current geopolitical uncertainty has led to recent stock market declines. The removal of this uncertainty in the coming months should provide some relief, and may even be the impetus for a rally.

PORTFOLIO STRUCTURE & STRATEGY

As at 31st January 2003 equities made up approximately 57% of the portfolio, while fixed interest, cash and debt securities made up the remaining 43%. We continue to focus on companies with strong earnings per share growth, trading on attractive earnings multiples, that are well positioned in growth industries and have proven management. We continue to research heavily to find companies that meet this profile.
