MARKET OUTLOOK

The Australian sharemarket has been one of the strongest performing in the world during this calendar year. This has been primarily due to a robust economy and a favourable environment for resource companies. However, a high oil price and a soft U.S sharemarket should see Australian equities consolidate in the short to medium term.

PORTFOLIO STRUCTURE & STRATEGY

As at 31 July 2004 equities made up approximately 65% of the portfolio, while fixed interest, cash, and listed debt made up the remaining 35%. We continue to focus on companies with strong earnings per share growth, trading on attractive earnings multiples, that are well positioned in growth industries and have proven management. We continue to research heavily to find companies that meet this profile.

DIVIDENDS

The final dividend will be announced with the full year result in late August.
