

Weebit Nano retail investor briefings – new dates

14 October 2022

Weebit Nano Limited (ASX:WBT), a leading developer of next-generation memory technologies for the global semiconductor industry, is pleased to announce that new dates have been confirmed for Chairman Dadi Perlmutter and CEO Coby Hanoch's visit to Australia.

They will be hosting a number of retail investor briefings in November. The briefings will provide an opportunity for Dadi and Coby to give an update on the business and its outlook, as well as take questions from attendees.

Details of the events are listed below:

Sydney briefing (coincides with the Annual General Meeting)

- Date: Wednesday 16 November
- Time: 10-11:30am (AEDT)
- Location: King & Wood Mallesons, Level 61, Governor Phillip Tower, 1 Farrer Place, Sydney
- Presenter(s): Dadi Perlmutter & Coby Hanoch

Melbourne briefing

- Date: Thursday 17 November
- Time: 12-1pm (AEDT)
- Location: Lower Ground Floor, 477 Collins Street, Melbourne (conference room)
- Presenter(s): Dadi Perlmutter & Coby Hanoch

Perth briefing

- Date: Monday 21 November
- Time: 12-1pm (AWST)
- Location: The Vault at Riff, 45 St Georges Terrace, Perth
- Presenter: Coby Hanoch

In order to attend, you must RSVP to Clare Elsworth at: clare.elsworth@automicgroup.com.au

Approved for release by the CEO of Weebit Nano Limited.

About Weebit Nano Limited

Weebit Nano Ltd. is a leading developer of next-generation semiconductor memory technology. The company's ground-breaking Resistive RAM (ReRAM) addresses the growing need for significantly higher performance and lower power memory solutions in a range of new electronic products such as Internet of Things (IoT) devices, smartphones, robotics, autonomous vehicles, 5G communications and artificial intelligence.

Weebit's ReRAM allows semiconductor memory elements to be significantly faster, less expensive, more reliable and more energy efficient than those using existing Flash memory solutions. Because it is based on fab-friendly materials, the technology can be quickly and easily integrated with existing flows and processes, without the need for special equipment or large investments.
