October 2025

Introduction

| Weebit Overview: Leading Vendor of ReRAM IP

Advanced Non-Volatile Memory (NVM) Now Entering Production

Founded: 2015

Located: Israel & France
>50 personnel (90% engineers/scientists; 13 PhDs)

Multiple commercial deals

Including tier-1 IDM onsemi;
ongoing discussions/evals with >20 foundries/IDMs/product companies

Business model

IP licensing to semiconductor companies & fabs

Fast-growing markets

Edge AI, automotive, microcontrollers, power management/analog ICs...

R&D partner

CEA-Leti, a leading microelectronics research institute

Proven, protected technology

Fully qualified per JEDEC and AEC-Q100; available for chip designers; >90 patents/applications

ASX: WBT

S&P/ASX 300

MSCI
Global Small Cap Index

Semiconductors: A Snapshot

AI Supercycle Accelerates \$1T Semiconductor Revenues Earlier Than Expected (~2 years)

TSMC Intends to Expand Its Investment in the United States to US\$165 Billion to Power the Future of AI

Nvidia to invest \$5bn in Intel after Trump administration's 10% stake

India is betting \$18 billion to build a chip powerhouse.

| Embedded Non-Volatile Memory (NVM) is Strategic IP

Ubiquitous across Growing Applications

- AI, IoT, automotive, industrial, medical, consumer, defense
- Enables device intelligence, security, and resilience

Foundational to Modern Electronics

Critical for:

- Firmware and code storage
- AI weights and data tables
- Configuration data and ID keys
- Data logging

Drives Differentiation

- Performance: faster operation, better endurance
- Power consumption: Both run-time and sleep power
- System integration: Enabling single-chip solutions
- Secured: Prevent from chip hacking

Strategic across the Supply Chain

- Designers: simplify architecture; reduce BOM
- Foundries: added value vs. competition
- OEMs: smarter, more secure products
- Ecosystem: differentiate and monetize IP

roadmap from MRAM
to ReRAM

Weebitnano
THE NEXT NVM IS HERE

**The only
independent
ReRAM
supplier**

ReRAM – Innovative NVM for a New Era

Weebit ReRAM

- ❖ Scales to advanced geometries where flash can't
- ❖ Ultra-low power
- ❖ Cost-effective
- ❖ Easy to integrate
- ❖ Highly reliable even at high temperatures
- ❖ Immune to EMI and radiation
- ❖ Fully qualified per JEDEC and AEC-Q100
- ❖ >90 patents/applications

Weebit: The only independent provider of qualified ReRAM

The Rise of ReRAM

Note: The embedded emerging NVM market size is evaluated based on assumptions of the average chip area occupied by a given memory technology (Yole)

onsemi was spun out of Motorola as ON Semiconductor in 1999

onsemi data from the onsemi Quarterly Investor Presentation Fourth Quarter 2024

First Weebit ReRAM license to a top-tier Integrated Device Manufacturer (IDM)

- ❖ Currently being integrated into onsemi's Treo™ platform
 - ◆ Targets most advanced automotive and industrial applications
 - ◆ Combines Power Management, Compute and Sensing on a single die
 - ◆ Manufacturing 65nm BCD in a 300mm US production fab
- ❖ Weebit ReRAM will enable high-density NVM
 - ◆ Brings more intelligence to a range of onsemi's power products
 - ◆ Provides power-efficiency and cost-effectiveness
- ❖ September 2025 update: First tape-out of embedded ReRAM modules at onsemi 300mm US fab
 - ◆ Onsemi expected to use this in next-generation products

**IDMs manufacture their own products,
shortening time-to-production and potentially
accelerating time-to-royalties**

Weebit ReRAM in Automotive

Increasing number of semiconductors per car

- ❖ ~1,000 - 3,000 chip per car; an electric Audi or Volkswagen contains up to 8,000 chips*

Automotive in need of new NVM technologies

- ❖ Growing needs for emerging NVM: code storage, trimming, data logging...
- ❖ Can effectively scale to advanced process nodes, <28nm

Parameters of Weebit ReRAM align with automaker specifications

- ❖ High-temp reliability, EMI immunity, high endurance, fast switching speed, longevity, secured

Completed AEC-Q100 150°C Operation Qualification

Key to getting designed into automotive MCUs & other components

- ❖ Demonstrated **stability at 150°C operation for up to 100K endurance cycles****
- ❖ Including cycling and post-cycling high-temp data retention

Beyond Automotive

- ❖ Many **industrial** and **IoT** applications require high-temp and extended endurance
- ❖ With AEC-Q100 we can service over 99% of applications

Completed qual in SkyWater S130 using module with 1T1R cell architecture

** Flash equivalent

| The Journey to New AI Architectures with ReRAM

TODAY'S TWO CHIP SOLUTION

- Wasteful in terms of size & cost
- Prohibitive power
- Constrained data bandwidth and performance
- Insecure, vulnerable to hacking

SINGLE CHIP NEAR-MEMORY COMPUTE

- External NVM eliminated
- Eliminates most data movements → Low-power
- More efficient storage: **4X greater capacity** than SRAM

IN-MEMORY COMPUTE WITH RERAM

- Computation performed *within* memory arrays
- **Completely eliminates** data traffic → Ultra-low power
- Enables **Analog Compute** → Store larger models efficiently

NEUROMORPHIC COMPUTE WITH RERAM

- Future systems will mimic brain behavior
- Fast real-time processing on **massive amounts of data**
- Three orders of magnitude **(x1000) better energy efficiency**

ReRAM-based architectures are central to the transformation of AI, **bringing memory and compute together** for faster, more brain-like intelligence

Opportunities Ahead

Addressing Fast-Growing Semiconductor Markets

>US\$265 Billion TAM in Customer Markets

IP Business Model – Foundries & Fabless

Benefits of IP Model

- ❖ Low COGS
 - ◆ Direct costs are associated with supporting and maintaining IP
 - ◆ No inventory
- ❖ High gross and operating margins
 - ◆ Once IP is created, it gets sold multiple times
 - ◆ Royalties go directly to the bottom line

IP Business Model – Benefits with IDMs

- ❖ IDMs design, manufacture and sell their own devices
- ◆ Develop products quickly for target end markets
- ◆ Can integrate IP in multiple designs / products

Accelerated
time-to-market and
time-to-revenue

| Every Foundry Deal Represents Multiple Customer Opportunities

Weebit's Differentiation

- Only **independent** provider of **qualified** ReRAM technology
- **ASX 300** (ASX:WBT)
- >A\$90 cash e/o 1Q FY26

- Located: Israel & France
- >50 personnel (**90% engineers**; 13 PhDs)
- R&D partner  
- Experienced management

- Low-power, cost-effective, reliable NVM
- Scales where flash can't
- Targeting **fast-growing markets**: edge AI, automotive, power / analog ICs, MCUs, ...
- Qualified and ready for production

- Licensing **Semiconductor IP** for embedded markets
- Research towards **IMC and neuromorphic**
- Exploring solutions for future **discrete markets**
- Unrivalled design team delivers **high-quality IP**; enables **fast time-to-market** for customers

- **Multiple commercial deals**, including tier-1 IDM onsemi and top-10 foundry DB HiTek
- Ongoing discussions and evals with **>dozen vendors** (foundries, IDMs, product companies)
- **Several products in design** with Weebit ReRAM

Disclaimer

This presentation contains certain statements that constitute forward-looking statements. Examples of such statements include, but are not limited to, statements regarding the design, scope, initiation, conduct and results of our research and development programs; our plans and objectives for future operations; and the potential benefits of our products and technologies. In some cases, forward-looking statements can be identified by the use of terminology such as “may,” “will,” “expects,” “plans,” “anticipates,” “estimates,” “potential” or “continue” or the negative thereof or other comparable terminology. These statements involve a number of risks and uncertainties that could cause actual results and the timing of events to differ materially from those anticipated by these forward-looking statements. These risks and uncertainties include a variety of factors, some of which are beyond our control. All forward-looking statements and reasons why actual results may differ are based on information available to us when initially made, and we assume no obligation to update these forward-looking statements or provide reasons why actual results might differ or the information set forth herein.

In addition, we do not make any representations or warranties, express or implied, with regard to the information included in this presentation of any other related document or information disclosed or furnished in connection thereto, including, without limitation, with respect to the accuracy, reliability, completeness or its sufficiency for any particular purpose. This information is proprietary and confidential of Weebit and is provided on a confidential basis and may not be disclosed or used without our prior written consent. You acknowledge that the disclosure and use of the information may be further prohibited under applicable securities or other laws.

This presentation is made for informational purposes only and does not constitute an offer to sell any interest in Weebit nor does it form the basis of any contract or agreement between the parties.

Third party data

This presentation includes or is otherwise based on information obtained from publicly available information including industry analyst firms and other information publicly released by corporations and government departments. Weebit has not independently verified or audited this information. Accordingly, the accuracy and completeness of such information is not guaranteed. This data has been accurately reproduced and, as far as Weebit is aware, no facts have been omitted that would render the information provided inaccurate or misleading. Investors should note that market data is inherently predictive and subject to uncertainty and is not necessarily reflective of actual market, industry and macroeconomic conditions. Specifically, there is no assurance that any of the forecasts or projections will be achieved. Forecasts and projections involve risks and uncertainties and are subject to change based on various factors, including those discussed above.
