WorleyParsons awarded EPC contract for MacKay River Commercial Oil Sands Project

WorleyParsons, in conjunction with our consortium partner CPECC Canada Ltd (a subsidiary of the China Petroleum Engineering and Construction Corporation), is pleased to announce the award of a contract for the engineering, procurement, fabrication and construction (EPC) of the field facilities for the MacKay Operating Corporation – MacKay River Commercial Project Field Facility Phase 1. The MacKay River Commercial Project plant site is located northwest of Fort McMurray in Alberta, Canada. When completed, the project will be capable of producing 35,000 barrels of bitumen per day.

WorleyParsonsCord, the construction group for WorleyParsons in Canada, will be responsible for execution of the project scope that includes the engineering, procurement, modularization and field construction of nine steam assisted gravity drain well pads and associated gathering lines.

The estimated revenue for WorleyParsons from this contract is \$387M CAD.

Andrew Wood, Chief Executive Officer of WorleyParsons said: "WorleyParsons is excited to be working with MacKay Operating Corporation, and our consortium partner CPECC, on the MacKay River project. We believe that our integrated EPC project delivery model combining the local strength of WorleyParsonsCord, with the expertise and capacity of our partner CPECC, offers an exciting new approach for the successful delivery of this project".
