(ASX: WOR)

WorleyParsons awarded Construction Management Support contract for S11D Project with Vale

Vale has awarded WorleyParsons a construction management support contract for the S11D project. Vale's multi-billion dollar S11D project will be a world class 90 million tonnes per annum iron ore processing facility located approximately 1,940 km north east of Sao Paulo in Para State, Brazil.

WorleyParsons has been working on the S11D project since 2010. The award of the construction management support contract allows WorleyParsons to transfer all the design knowledge and know-how accumulated over the past 4 years into the construction phase of the project. Construction management support services will entail overseeing the assembly, transport and installation of the modular ore processing facilities.

Commenting on the award, WorleyParsons' Chief Executive Officer, Mr Andrew Wood said "We thank Vale for providing us the opportunity to continue our involvement in this project and thereby ensuring the continuity of our services into the construction phase. We remain fully committed to supporting Vale to achieve its business objectives for the S11D project."
