

Investor Day 2017

1

Disclaimer

- The information in this presentation about the WorleyParsons Group and its activities is current as at 30 April 2017 and should be read in conjunction with the Company's Appendix 4D and Interim Financial Report for the half year ended 31 December 2016. It is in summary form and is not necessarily complete. The financial information contained in the Interim Financial Report for the half year ended 31 December 2016 has been reviewed, but not audited by the Group's external auditors. The financial information presented to YTD March 2015 and the Third Quarter financial information has not been reviewed or audited by the Group's external auditors.
- This presentation contains forward looking statements. These forward looking statements should not be relied upon as a representation or warranty, express or implied, as to future matters. Prospective financial information has been based on current expectations about future events and is, however, subject to risks, uncertainties, contingencies and assumptions that could cause actual results to differ materially from the expectations described in such prospective financial information. The WorleyParsons Group undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of the release of this presentation, subject to disclosure requirements applicable to the Group.
- Nothing in this presentation should be construed as either an offer to sell or solicitation of an offer to buy or sell WorleyParsons Limited securities in any jurisdiction. The information in this presentation is not intended to be relied upon as advice to investors or potential investors and does not take into account your financial objectives, situation or needs. Investors should consult with their own legal, tax, business and/or financial advisors in connection with any investment decision.

3

Context: market inflexion point

Energy and resources consumption continues to increase while investment is not keeping pace.

- We are almost through one of the biggest energy and resource industry transitions in 40 years.
- Consumption continues to grow while investment in supply to meet that demand is not keeping pace
- Our customers are indicating returns to capex and opex growth
- There is a disproportionate growth in emerging markets
- Digital disruption of engineering is putting a premium on innovative people with real world know how

4

Context: our business is reshaped and resized

Reshaping the business over the last 3 years has us well positioned for a market return

- We have reshaped the business into four business lines reflecting our customers' structures
- We have significantly reduced overhead
- We are prepared for the continued change in the energy and resource markets

5

OneWay™
to Zero Harm

6

7

Financial Update

Tom Honan
Group Managing Director,
Finance / CFO

8

Introduction

**Our business is leaner,
with lower overhead,
more focused
on delivering
customer value**

- Market inflexion - backlog is increasing
- Highly confident in meeting cost reduction targets
- Staff numbers stabilised and utilisation on target
- Cash collection measures starting to have an impact

9

Business consolidated

23,100
People

108
offices

42
countries

10

Headcount stabilized

Staff Numbers - stabilised

Staff Utilization – on target

11

On track to meet increased cost reduction target of \$450 million

12

Focus on ensuring key overhead savings remain sustained as the business grows

13

Focus on ensuring key overhead cost areas remain right sized as the business grows

Business Development	- Investment in improved BD effectiveness - Global Sales and Marketing group operating to ensure focus on priority opportunities and best practice sharing
Bench/Project Support	- Sustainable improvements in utilization of billable staff through - Increased transparency and active management of performance vs targets - Adoption of flexible work models
Property	- Optimized property portfolio - Capacity retained where future expansion and growth is targeted
Information Technology	- Transformation of IT function with significant benefits - New optimized global/regional operating model - On-going simplification and standardization
Functional	- Regional model established with pooled resources offering efficiencies in leadership and ability to scale up at reduced cost - On-going standardization of key functional processes to enable additional resource aggregation and a leaner structure
Management	Streamlined management structure which removes duplication and increase focus on client service delivery

14

Working Capital Update

- Update on \$230m from four SOE
 - Cash received \$17m
 - In transit \$33m
 - Additional \$32m expected next week
 - The balance is continuing in process
- DSO improvements on underlying business
 - DSO reduced by 7 days from December 31 to April 30
 - 16/28 businesses have improved from December 31
- Competitor review shows collections have slowed in past 24 months

15

Industry DSO has been rising over last 2 years

DSO by quarter (1 Jan 2010 - 1 Jan 2017)
12 months rolling average Top 11 Companies

DSO for 11 Major Oil & Gas Services Peers

16

Backlog is increasing

Energy Day
2017

WorleyParsons
resources & energy

24

Business lines

aligned to customer organisation structures

25

Our markets

26

Bulk of our business is **small projects** and **asset services**

3 key messages *about our business*

We are focused on projects of all sizes

- 90% of our revenue comes from smaller projects and opex contracts

We have a significant infrastructure business

- Infrastructure has grown to >20% of revenue

Competitor consolidation and diversification has heightened our ability to compete

- 8 major competitors will become 6

We help our customers meet the world's **changing resources and energy needs.**

Biggest energy industry transition in 40 years, for which we are well positioned

Disproportionate growth in emerging markets, where we have an enviable track record

Digital disruption of engineering putting a premium on innovative people with real world know how

  **WorleyParsons**
resources & energy

30

Strategic priorities

Acting concurrently on priorities across three horizons

31

Our core market **remains attractive** into the future

Energy mix projections to 2035-40

- Multiple long-term energy outlooks with varying predictions
- All outlooks indicate a modest growth in oil, with gas growing more rapidly than oil
- The rapid expansion of LNG is likely to lead to a globally integrated gas market
- Oil demand grows, but the pace of demand slows with the increasing penetration of electric cars

IEA: International Energy Agency
EIA: US Energy Information Administration
MIT: MIT Joint Program on the Science and Policy of Global Change
IEEJ: Institute of Energy Economics Japan
IHS: IHS Energy
PIRA: PIRA Energy Group
XOM: ExxonMobil
CNPC: CNPC Economics & Technology Research Institute

32

Under investment is creating a **supply demand gap**

- Three years of suppressed investment leads to a potential supply demand gap without significant increase in investment
- To fill the gap, future annual approvals must exceed 21 billion barrels, greater than any average level seen since the 1970s

Source: IEA World Energy Outlook 2016; Rystad Energy for historic levels

33

Worldwide oil production is **declining at an increasing rate**

- Existing fields decline on an average 5-7% p.a., equivalent to around 4.5-6 mbd of lost production every year
- By 2040 the world needs to replace over four times the current crude oil output of Saudi Arabia (>40mbd), just to keep output flat

Source: IEA World Energy Outlook 2016, HSBC Peak Oil Reps

34

Global supply is increasingly **reliant on fields that have a higher rate of decline**

- Small fields typically decline twice as fast as larger fields
- Global supply is increasingly reliant on these higher declining fields and a resulting supply squeeze is likely to happen well before oil demand peaks

Source IEA World Energy Outlook 2013.
Average declines are weighted by cumulative production to 2012. Decline rates are calculated as compound annual decline rates since peak.

35

Customers are **better positioned to invest in production**

Source: IEA (2016) World Energy Investment

- ~30% decline in operational costs since 2013 price peak, more for US UCOG
- Resulting in lower financial break-even prices for most plays
- Total resource estimate for recoverable reserves has been lifted indicating that a higher number of wells will be economical at these prices
- Going forward, we are serving an industry that is far leaner & fitter

36

Strengthening Customer Capex Budgets

- Trend indicates continued strengthening

Source: Source: Factset. Broker consensus capex estimates for Anadarko Petroleum, BP, Canadian Natural Resources, Chevron, China Petroleum & Chemical, CNOOC, ConocoPhillips, Devon Energy, Eni, EOG Resources, ExxonMobil, Gazprom, Occidental Petroleum, Oil & Natural Gas Corp, PetroChina, Repsol, Rosneft, Royal Dutch Shell, Statoil, Suncor Energy, Surgutneftegas and Total as at May 2017.

38

Long term relationships with top spending customers

Top Global Operator Spend: 3-year CAPEX & OPEX Spend (US\$B): 2017-2019 at \$50bbl/oil price

Source Rystad Energy: Exploration & Production services group spend, \$50bbl/oil sensitivity, includes spend upstream only, excludes 'other partner(s) US' category, as at 16th May 2017

- Existing long-term service agreements with 8 of the top 15 global operators
- Recently secured 5-year enterprise framework agreement with Shell
- Strategic focus on National Oil Companies (NOCs) increasingly important

39

Impact of electric vehicles not a game changer yet

Global car fleet currently consumes 1/5th total oil production

2016

900 million

1.2 million

with electric vehicles (EVs) comprising less than 1% of global fleet

2035

1.8 billion

100 million

by 2035, global fleet is expected to double with electric vehicles comprising less than 6%

- There is a great deal of **uncertainty in electric vehicle (EV) targets**
- Assuming a range of EV targets, **the impact to oil demand to 2035 is moderate** and overall oil demand remains in its growth trajectory

Source: International Energy Agency (IEA), BP Energy Outlook 2017

40

3 key messages

about our markets

North American Shale is only one part of meeting global energy need

- Significant investment required in all regions
- Onshore and Offshore
- Greenfield and Brownfield
- Conventional and Unconventional

The hydrocarbons development activity will continue to grow at the current oil price

- Oil & Gas companies can spend and develop at current oil prices

New Energy investment will be supplementary to long term growth in investment in oil & gas

- There is no short term material impact on oil & gas demand
- We are well placed for the significant investment in infrastructure for new energy

41

Summary

- Demand is growing
- Supply balanced
- CAPEX returning
- We are well positioned for future growth
 - Right Capability
 - Geographically

42

Refined strategy architecture

Pillar 1

Viable and competitive business

- ensuring performance discipline by every unit of the organization
- maintaining a competitive cost structure and sustainable business (including GDC)
- current performance = future business

OPERATIONAL EXCELLENCE

45

Pillar 2

All our value to all our customers

- intensive group pursuit of global large opportunities (Swarm)
- intensive campaigns to take proven offerings to known customers (Sprint)
- expanding our existing Integrated Solutions capability

All focused on areas of strategic priority

GROW THE BUSINESS

46

59

Saudi Arabia – A robust platform has been built

WorleyParsons is a trusted name in Saudi Arabia.

3 offices, 1500 staff: **Al Khobar, Riyadh and Yanbu**

PANEL CONTRACTS

- 35 years of General Engineering Services (GES/ GES+) services
- 13 years of offshore Maintain Potential Program (MPP)
- 4 years of Master Services Agreement (MSA) for Saudi Electric

MEGA PROGRAMS

17 multibillion dollar programs delivered including:

- JCP & NCP Petrochemical complex
- SAMREF Clean Fuels program
- Ma'aden Alumina, Phosphate and Infrastructure programs
- Riyadh metro

60

Saudi Arabia – Growing together in our core markets

Growing capital and operational expenditure across all Sectors

Saudi Arabia Upstream Exploration and Production CAPEX & OPEX (US\$ Billions) at \$50/bbl oil price sensitivity

Upstream Oil & Gas

Source: Global Data

2017

Successfully capturing the growth in spend across Saudi Arabia

>60% growth in revenue in Saudi Arabia since 2014

Key drivers for growth:

- 2030 Vision - Target to become the second largest exporter of refined oil products by 2018
- Saudi Aramco plans to spend \$334bn across the oil and gas value chain by 2025

Sources: MEED Middle East Business Intelligence; Rystad Energy; Global Data

WorleyParsons
resources & energy

61

Saudi Arabia – Beyond Oil

SECTOR

OUTLOOK

OUR DIFFERENTIATED POSITION

Chemicals & Petrochemicals

- Petrochemicals growing at 6% p.a.
- Market size: US\$64 in 2020
- Comprises 60% of non-oil investment

- Global master service agreement with SABIC
- FEED for SABIC ethylene project
- Supporting outbound Aramco and SABIC spend

Mining & Metals

- Forecast to triple in size in the next decade to become the 3rd economic pillar
- Market size: US\$70B in 2030

- US\$4.5B Phosphate and Infrastructure Project
- US\$10.8B Bauxite Mine and Alumina refinery
- Early studies for Mansourah and Massarah Gold

Power & Water

- Both power & water demand growing at 8%
- ~US\$135B to meet power demand to 2026
- ~US\$25B planned for desalination to 2020

- EPCM services for PP-13 & PP-14 CCGT Power
- Integrated team with SEC (Panel Contract)
- Jazan Power Project, 4000MW IGCC

Transport

- 8% y-o-y growth to 2020
- US\$180B billion projects underway
- US\$450B transport infrastructure planned

- IPMT Riyadh Metro Project
- US\$5B King Abdullah Port (Detailed Design)
- Master Planning Services for Arriyadh

2017

62

Saudi Arabia - Investing in national transformation through the WorleyParsons Academy

- In support of Vision 2030 KSA has released the **National Transformation Program 2020 (NTP)** aimed at diversifying from oil and creating employment by remodelling supply chains
- For Aramco this is reflected in the **In Kingdom Total Value Add (IKTVA)** program.

OUR DIFFERENTIATED POSITION

Investing in national transformation through the WorleyParsons Academy

1. Major commitment and investment in recruiting and training Saudi nationals
2. Strategic partnerships with universities, technology providers and accreditation agencies
3. Developing and elevating Saudi nationals to project leadership, technical leadership and executive management roles

63

Belt & Road (B & R) Initiative

- Connecting China with countries and establishing trade corridors
- \$150+ billion in funding recently pledged by China
- Chinese companies have set up 56 economic cooperation zones in over 20 countries

Source: BMI

Sources: Business Monitor International (BMI), PwC

64

Belt & Road – Positioning for cross-sector investment

SECTOR	OUTLOOK	OUR DIFFERENTIATED POSITION
Infrastructure	- Asia accounts for 60% of B&R investment - Large focus on transport (ports and rail) - Trade routes enhancement and new routes	- Proven MOU with China Harbors (CHEC) - Low-cost Ports GDC in Chennai - Global leaders in heavy haul rail
Power	- Power generation and networks represent 40% of planned B&R spend - Coal and hydropower sectors primarily	- Cradle to grave coal-fired power capability - Global partnership with Siemens - Delivering projects with major Chinese EPCs
Oil & Gas	- Natural gas and LNG sectors in South and South East Asia - Central Asia to remain key energy exporters	- Mtwara to Dar es Salaam Pipeline in Tanzania with CPTDC - Multiple gas projects with CNOOC in Asia
Minerals & Metals	Focus is mainly on Central Asian states such as Kazakhstan, where rich deposits of copper, gold and uranium	- Established offices in Kazakhstan - Centre of excellence in South Africa

Sources: Business Monitor International (BMI), Engineering News

WorleyParsons
resources & energy

65

Belt & Road - Supporting Chinese investors and EPCs to succeed in overseas market

OUR DIFFERENTIATED POSITION

- Largest international EPCM company in China
- Established strategic partnership with 10+ leading Chinese investors and EPCs across all sectors
- Complete geographic coverage
- Strong relations with government entities and potential in Belt & Road countries

Actively pursuing US\$10B+ in Belt & Road projects across Russia, Central Asia, Middle East & South East Asia

WorleyParsons
resources & energy

66

Summary

Saudi Arabia

- Robust and diversified business built on strong delivery record
- Significant investment across oil & gas, infrastructure, power & minerals & metal sectors in the next 5-10 years and well positioned to increase our market share
- Leading the way in localization through the WorleyParsons Academy

Belt & Road Initiative

- Significant China presence and strategic partnership with Chinese investors and EPC
- Local presence, delivery track record across sectors in the Belt & Road countries
- Well-positioned to capitalize on the investment in the Belt & Road countries

67

Investor Day
2017

Q&A

105

Investor Day
2017

Closing Remarks

Andrew Wood – CEO

106

Who we are**Where we play***Understanding our market***How we win***Our strategic pillars***How we measure***Our key metrics*

Concluding Remarks

- WorleyParsons has been reshaped and resized
 - Our staff numbers have stabilized, our utilization rates are on target and our overheads are significantly reduced
 - We are winning more work, our backlog has increased
- Our markets are at an inflexion point – improving outlook for resources and energy
- Have clear set of strategic priorities and a transparent, disciplined process to implement that strategy

107
