Results for the *Underlying Business* are determined by adjusting *statutory reporting measures* under Australian Accounting Standards for the impact of one-off and/or non-operational items such as gains/expenses associated with asset sales and acquisitions.

There was nil impact from one-off and/or non-operational items during the period, meaning each of the measures for the *Underlying Business* was in line with the *statutory reporting measures*. Accordingly, *Statutory NPBT* was \$2.59M, an increase of up 14.7% on the PCP *Statutory NPBT* of \$2.26M which included a net positive impact from one-off income/expenses of \$452k relating to the sale and purchase of business assets.

Tax expense impact on Statutory Results and PCP comparison

Statutory income tax expense was \$482k, a significant increase on the PCP when the Company recorded an income tax expense of just \$68k due to favourable movements in deferred tax assets and liabilities. This resulted in *Statutory NPAT* for the period being \$2.11M (PCP \$2.19M). The result is in line with the Company’s expectations.
