Total Companies Onboarded to Yojees Platform Over Time

HOW COVID-19 IS A TAILWIND FOR TECHNOLOGY

Cross-Border Deliveries

- Shutdowns in ports across China has meant **land transport intra-asia is critical.**
- Slow lead times as there is limited airfreight capacity. **Businesses need to explore alternative routes to get their goods to market.**
- High cost of sea freight makes **trucking even more appealing**

Fulfillment Centres

- Stock shortages – High demand has put pressure on transport partners to be **more responsive and flexible and provide greater visibility to end recipients.**
- Staff shortages – With an influx of orders, fulfillment centres are having to rapidly increase their workforce to satisfy demand. This is exacerbated by high numbers of staff on sick leave **means a broader range of transport partners is critical to meet demand**

Regional Warehouses

- 'Just in time' has become '**just in case**' as brands move more stock earlier causing backlogs and overstocking main warehouses **further fragmenting land transport**

Consumers

- Huge increase in demand for goods, and expectation for tracking has made **transporters more accountable for technology adoption**
- Zero touch digital delivery means **technology is critical**
