About Yojee Limited (ASX: YOJ). Yojee is a cloud-based software as a service (SaaS) logistics platform that facilitates the flow of freight movements into a single ecosystem, making the complex process of managing land transport simple and accessible to all players whilst reducing carbon emissions for a greener planet. Rarely is a single carrier servicing an entire goods journey from sender to end customer, or exclusively using one type of transportation method. Yojee provides connectivity and more efficient planning along the entire journey.

Yojee's customers are predominantly third-party logistics providers (3PL) and logistics subcontractors (2PL) who benefit from:

- 
1. **Managing, Tracking and Auditing goods movements.** All job and location data is made easily accessible and can be shared with up and down-stream providers end to end. Customers experience improved delivery windows.
 2. **Route and schedule optimisation.** Tracking data allows 2PL and 3PL operators to generate cost savings through Yojee's powerful optimisation capability across vehicle selection, utilisation and routing.

Yojee's solution is flexible and integrates seamlessly through API's into existing logistics provider systems to access and share key data across part or all of the goods journey. The more segments that use Yojee, the more powerful it becomes. Yojee's business is focused on Asia and is expanding rapidly. Yojee's platform has evolved through recent technological developments in cloud-based computing and information processing capability.

Yojee services the logistics market at Enterprise and their SME partners with a focus on APAC and to date has signed multi-year enterprise-level agreements with four global top 10 freight forwarders operating in the region. Yojee has strong corporate citizenship working with industry to reduce carbon emissions, by removing paper and logistics congestion through digitisation and vastly improving efficiency, speaking to our social license to operate.
