2. The related party debt relates to funds provided by Woodfield Investments Limited (an entity related to Paul Hyslop) and will be paid back in cash from the proceeds of the Offer following completion of the rights issue. Refer to the Interim Financial Report and Appendix 4D dated 22 February 2024 for further details regarding the related party debt as previously disclosed.

The above table is a statement of the Board's current intentions as at the date of this Offer Document. However, Shareholders should note that, as with any budget, the allocation of funds set out in the above table may change depending on a number of factors, including the outcome of operational and development activities, regulatory developments, market and general economic conditions and environmental factors. ** These dates are indicative only and are subject to change.

3.4 Partial Underwriting

The Offer is partially underwritten by Evolution Capital Pty Ltd (ACN 652 397 263) up to \$1,442,322 (equivalent to up to 53,419,349 Shares) (**Underwritten Amount**). Refer to Section 6 for details of the terms of the underwriting.

The Underwriter will only subscribe for the Underwritten Amount less the number of Shares applied for by Eligible Shareholders and therefore will be underwriting the "first" 53,419,349 Shares (being, the first 50% of the Offer) and subject to applications will not necessarily underwrite a portion of the Shortfall.

The Underwriter has agreed to underwrite the Underwritten Amount, on the condition (as included as a condition precedent in the Underwriting Agreement) that director and

substantial holder Paul Hyslop takes up at least half of his Entitlement (being, 18,611,875). Accordingly, the Underwriter is effectively underwriting 34,807,474 Shares.

The Underwriter has also been appointed as the lead manager of the Offer. The terms of the lead manager appointment and total fees payable are set out in Section 6.

The Company, in consultation with the Underwriter, will ensure that the Offer (including the equitable dispersion of any Shortfall Shares) complies with the provisions of Chapter 6 of the Corporations Act and is otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

The Underwriter is not presently a Shareholder in the Company. The issue of Shares to the Underwriter under this Offer may increase its interest in the Company and dilute the shareholding of other Shareholders to the extent that they elect not to participate in the Offer or are ineligible to participate in the Offer.

3.5 Entitlements and acceptance

Details of how to apply under the Offer are set out in Section 4 of this Offer Document.

The Entitlement of Eligible Shareholders to participate in the Offer will be determined on the Record Date. Your Entitlement is shown on the Entitlement and Acceptance form accompanying this Offer Document.

You can also apply for Additional Shares under the Shortfall Offer in addition to your Entitlement by following the instructions set out in Section 4. The Shortfall Offer is described in Section 4.5 below.

3.6 No rights trading

The rights to New Shares under the Offer are non-renounceable. If you do not take up your Entitlement to New Shares under the Offer by the Closing Date, the Offer to you will lapse.

- (b) “50% take up” assumes that Mr Hyslop and his associates take up 100% of their Entitlement (37,223,750 Shares) and Eligible Shareholders other than Mr Hyslop and his associates take up 50% of their Entitlement (34,807,474 Shares); and
- (c) “0% take up” assumes that Mr Hyslop and his associates take up 100% of their Entitlement (37,223,750 Shares) and Eligible Shareholders other than Mr Hyslop and his associates take up 0% of their Entitlement (0 Shares) and the Underwriter takes up the balance of the Underwritten Amount (16,195,599 Shares).
- (d) “0% take up” assumes that Mr Hyslop and his associates take up 100% of their Entitlement (37,223,750 Shares) and Eligible Shareholders other than Mr Hyslop and his associates take up 0% of their Entitlement (0 Shares) and the Underwriter fails to take up the balance of the Underwritten Amount (0 Shares).

OSY Group Limited

In the unlikely event the Underwriter waives the condition that Mr Hyslop and his associates must take up at least half of their Entitlement included in the Underwriting Agreement and Mr Hyslop and his associates take up 0% of their Entitlement (0 Shares) and other Eligible Shareholders take up 0% of their Entitlement (0 Shares) and the Underwriter subscribes for the full partially Underwritten Amount being 53,419,349 Shares and allows OSY Group Limited to take up 20,000,000 Shares included within the Underwritten Amount, OSY Group Limited will hold a voting power of 7.49%. The Company does not anticipate this scenario will eventuate and is included for information purposes only.

Underwriter

In the unlikely event the Underwriter waives the condition that Mr Hyslop and his associates must take up at least half of their Entitlement included in the Underwriting Agreement and Mr Hyslop and his associates take up 0% of their Entitlement (0 Shares) and other Eligible Shareholders take up 0% of their Entitlement (0 Shares) and the Underwriter subscribes for the full partially Underwritten Amount being 53,419,349 Shares (assuming OSY Group Limited either fails to sub-underwrite or is not allocated any Shares by the Underwriter), the Underwriter will hold a voting power of 20%. The Company does not anticipate this scenario will eventuate and is included for information purposes only.

In the event of a Shortfall under the Offer, Mr Hyslop and his associates will not apply for Shares under the Shortfall Offer.

As set out in Section 4.5, on the basis of the allocation policy, no person will acquire (other than potentially the Underwriter), through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Offer.

3.17 Risk Factors

An investment in New Shares should be regarded as speculative. Please refer to Section 5 of this Offer Document for further details.

3.18 Taxation implications

The Directors do not consider it appropriate to give Shareholders advice regarding the taxation consequences of subscribing for New Shares under this Offer Document. The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Shareholders.

Shareholders should consult their professional tax adviser in connection with subscribing for New Shares under this Offer Document.

3.19 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of the Corporations Act and its Shares are enhanced disclosure securities quoted on ASX and, as such, the Company is subject to regular reporting and disclosure obligations under the Corporations Act and the Listing Rules.

Specifically, the Company is required to notify ASX of information about specific events and matters as they arise for the purposes of the ASX making that information available to the securities markets conducted by the ASX. In particular, the Company has an obligation under the ASX Listing Rules (subject to certain exceptions) to notify the ASX immediately of any information of which it is or becomes aware which a reasonable person would expect to have a material effect on the price or value of its securities.

This Offer Document is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include information that would be included in a disclosure document or which investors ought to have regard to in deciding whether to subscribe for Shares under the Offer. Investors should

therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

All announcements made by the Company are available from its website www.zoono.com or the ASX www.asx.com.au.

4.5 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Offer Document and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.027 being the price at which Shares have been offered under the Offer.

No Applicant under the Shortfall Offer has any assurance of being allocated all or any Shares applied for. The allocation of Shortfall Shares by Directors will be influenced by the following factors:

- a) number of shares bid for by particular Applicants;
- b) the timeliness of the bid by particular Applicants;
- c) the Company's desire to expand its spread of institutional shareholders;
- d) the size and type of funds under management of particular Applicants;
- e) overall anticipated level of demand under the Offer;

The Company will not be liable to any person not allocated Shares or not allocated the full amount applied for. No Shares will be issued via the Shortfall Offer to any related parties of the Company.

5. RISK FACTORS

5.1 Introduction

The Shares offered under this Offer Document should be considered speculative because of the nature of the Company's business.

There are numerous risk factors involved with the Company's business. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which securities will trade.

The following is a summary of the more material matters to be considered. However, this summary is not exhaustive and potential investors should examine the contents of this Offer Document in its entirety and consult their professional advisors before deciding whether to apply for the New Shares.

5.2 Key investment risks

Potential investors should be aware that subscribing for Shares in the Company involves a number of risks. Prospective investors should read this Offer Document in its entirety before deciding whether to apply for Shares under this Offer Document.

These risks together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of the Shares in the future. Accordingly, an investment in the Company should be considered highly speculative. Investors should consider consulting their professional advisers before deciding whether to apply for Shares pursuant to this Offer Document.

(a) Potential for dilution

In addition to potential control impacts set out in Section 3.10, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 50% (as compared to their holdings and number of Shares on issue as at the date of this Offer Document).

It is not possible to predict what the value of the Company or a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.095 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.

(b) Control Risk

Mr Paul Hyslop and his associated entities is currently the largest Shareholder of the Company and has a relevant interest in approximately 34.84% of the Shares in the Company. Paul Hyslop is a Director of the Company and a beneficiary of the MEG Trust. Assuming Mr Hyslop takes up his full Entitlement and no other Shareholders accept their entitlements and the Underwriter fails to subscribe for Shares, Paul Hyslop's voting power in the Company could be as high as 44.51%.

Mr Hyslop's significant interest in the capital of the Company means that it is in a position to potentially influence the financial decisions of the Company, and its interests may not align with those of all other Shareholders.

Mr Hyslop holds a relevant interest in more than 25% of the Company which means that it has the potential to prevent a special resolution from being passed by the Company (such resolution requiring at least 75% of the votes cast by members entitled to vote on the resolution). Special resolutions are required in relation to approve certain Company matters including potentially seeking the delisting of the Company, amending the Constitution, approving the voluntary winding up of the Company and, if at any time the share capital of the Company is divided into different classes of Shares, approving the variation of the rights attached to any such class.

(c) **Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(d) **Going Concern**

The Company's Interim Financial Report for the half-year ended 31 December 2023 (**HY23**) (**Financial Report**) includes a note on the financial condition of the Company. The Interim Financial Report explains that:

Notwithstanding the group incurred an operating cash outflow of \$1,598,811 during the half-year and had cash balance of \$136,311 as of 31 December 2023, the financial report has been prepared on the going concern basis which assumes the continuity of normal business activities and the realisation of assets and settlement of liabilities in the ordinary course of business.

In making this assessment, the directors have considered:

- The plans and forecasts reviewed by the directors for the next twelve months anticipate the business will continue to improve the operating cash flows through cost control measures and sale or realisation of the inventories.
- Undrawn facility of \$540,000 from the Company's Managing Director at the date of this report.
- A capital raise planned in the next few months and is likely to be by way of a pro-rata non-renounceable rights issue or other private placement of its shares.

The directors therefore are of the opinion that the group will be able to pay its debts as and when they become due and payable, and no asset is likely to be realised for an amount less than the amount at which it is recorded in the financial report.

Accordingly, no adjustments have been made to the financial report relating to the recoverability and classification of recorded asset amounts or to the amounts and classification of liabilities that might be necessary should the group not continue as a going concern.

(e) **Competition and Failure to Attract New Customers Risk**

The Company's products and services need to find acceptance in a competitive market and the Company needs to demonstrate an ability to retain existing customers and attract new customers. Market acceptance and customer retention depend on many factors, including identifying and obtaining access to relevant markets, convincing users of the attractiveness of the Company's products and services, and its ability to enhance existing products and services and potentially develop new products and services to meet market demands and opportunities, customer service, competition and pricing.

The market in which the Company operates is comprising many product and service offerings. As such, it is difficult to ascertain the knowledge and confidence of consumers in products and services like those of the Company and the estimate of market demand may not be accurate. In addition, the sales cycles for the types of customers which the Company is targeting can be slow and have been, or could reasonably be expected to be, affected by many factors including the COVID-19 pandemic.

The Company's ability to develop and/or acquire additional product and service offerings could be adversely affected if it is unable to respond effectively and/or in a timely manner to the strategies and actions of competitors and potential competitors or the entry of new competitors into the market. This may in turn impede the financial condition and rate of growth of the Company.

Key to the Company's ability to mitigate this competition risk is in achieving appreciable market share and differentiation from its key competitors. The Company has sought and will continue to seek to mitigate competition risk by maintaining key industry certifications and best practice, and by ongoing monitoring of existing and emerging competitors.

(f) **Logistic Risk**

There is a risk that the supply chain for the raw materials and finished goods could be materially disrupted with the result that sufficient quantities of raw materials or finished products are not delivered on time. This could result from the occurrence of a natural disaster that affects the delivery of raw materials or finished products to customers or an event that impacts the delivery of raw materials or finished products to customers, such as disruptions to airlines, sea-freight or trucking providers. The occurrence of such an event could result in the inability to sell and deliver the Company's products, with an associated loss of revenue and (potentially) brand damage, increased costs flowing from alternative transport and delivery arrangements, or a combination of both.

Supply and distribution risk depends on third party service providers to transport and deliver its products, it is subject to the risk of delays in transportation of its products and/or any increase in the cost of such services. Accordingly, the Company's financial performance may be adversely affected if any delays with transportation cause loss of stock, impact consumer sentiment of the Company's products or entitle customers to compensation or if the Company is unable to pass on any increased freight costs to its customers.

(g) **Manufacturing/Production Disruption**

Raw material prices are material operating expenses for the Company. There is a risk that there could be significant increases to raw material prices. Such increases could significantly increase the Company's cost of production and have a material adverse effect on the Company's financial performance. Further, any material disruptions in the manufacture and supply of raw materials to the Company, and the Company being

unable to source alternative supplies on similar terms or at all, could have a material adverse effect on the Company's operations and financial performance.

(i) **Business Strategy Risk**

The Company's future growth and financial performance is dependent on the Company's ability to successfully execute its business strategy. This will be impacted by a number of factors, including the Company's ability to expand through new channels.

The Company seeks to identify desirable opportunities from time to time. Accordingly, the plans and strategies of the Company may evolve such that the existing operations of the Company may change. Such change could include, amongst other matters, acceleration of the development of one or more of the product and services of the Company, the acquisition of one or more products or services from another party or the disposal of one or more of the existing products or services of the Company.

As a result, the current strategies, approaches and plans may not reflect the strategies, approaches and plans of the Company at a later date. Any such changes have the potential to expose the Company to heightened or additional risks.

(h) **Dependence on Key Customers**

The Company is dependent on its ability to retain its existing customers. The Company has contractual obligations and rights with respect to a number of agreements it is a party to. These agreements may include provisions which allow for termination for convenience or otherwise. No assurance can be given that all such agreements will be fully performed by all contracting parties or that the Company will be successful in securing compliance with the terms of each agreement by the relevant contracting party. If a contracting party or parties were to breach or terminate an agreement, the Company's business, operations and financial performance could be adversely affected.

(i) **Inability to Retain Key Staff**

The Company currently employs a number of key management personnel and the Company's future depends on retaining appropriately qualified and experienced personnel. The loss of any of these employee's services could materially and adversely affect the Company and may impede the achievement of its product development and commercialisation objectives. Furthermore, the successful development of the Company may require the services of additional appropriately qualified and experienced staff. There can be no assurance that the Company will be able to attract appropriately qualified and experienced additional staff and this may adversely affect the Company's prospects of success.

(j) **Inventory**

Consumer preferences are constantly changing, and new trends may emerge. There is a risk that the Company may therefore fail to accurately predict the future sales of its various product lines and management of its inventory. Given the Company is currently holding surplus inventory, there is also a risk that the Company may be required to impair a portion of its existing inventory. Any failure to accurately manage inventory levels may materially and adversely affect the Company's cash flows, financial performance and ability to meet its current liabilities. Given the current surplus inventory has a long expiry date, the Company does not anticipate it will be required to impair or otherwise not be able to realise value for its existing inventory.

5.3 Risks associated with the Company's Intellectual Property and Trade Secrets

(a) **Dependence on intellectual property**

Obtaining and protecting intellectual property rights over all the items connected with the Company's products, or offerings will be essential to realising its future growth potential. The prospects of the Company's products, and offerings generating a profit and increasing in value depend significantly on its ability to retain interests in all relevant intellectual property, maintain trade secret protection and operating without infringing the proprietary rights of third parties. In this regard, the Company and its Directors offer no assurance that any intellectual property which it develops or acquires will afford the Company or the holder commercially significant protection of its products or technologies, or that any of the projects that may arise from technologies will have commercial applications the Company expects. However, no assurance can be given that any measures taken to protect its interests in intellectual property will be sufficient. There is a risk that as yet unknown third parties may assert intellectual property claims in relation to the Company's products. Irrespective of the merit of any rights or claims asserted by third parties, such claims may adversely affect the Company. There is also a risk that the Company's investment may be indirectly adversely affected if a third party claim or asserted right reduces confidence in the longer-run viability of the Company's products.

(b) **Infringement of third party IP rights**

If a third party accuses the Company of infringing its intellectual property rights or if a third party commences litigation against the Company for the infringement of patent or other intellectual property rights, the Company may incur significant costs in defending such action, whether or not it ultimately prevails. Costs that the Company incurs in defending third party infringement actions would also include diversion of management's and technical personnel's time. In addition, parties making claims against the Company may be able to obtain injunctive or other equitable relief that could prevent the Company from further developing discoveries or commercialising its products and services. In the event of a successful claim of infringement against the Company, it may be required to pay damages and obtain one (1) or more licences from the prevailing third party. If it is not able to obtain these licences at a reasonable cost, if at all, it could encounter delays in product and service delivery and loss of substantial resources while it attempts to develop alternative products and services. Defence of any lawsuit or failure to obtain any of these licences could prevent the Company from commercialising available products and services and could cause it to incur substantial expenditure.

(c) **Trade Secrets Risks**

The Company relies on its trade secrets, which include information relating to the production of its products. The protective measures that the Company employs may not provide adequate protection for its trade secrets. This could erode the Company's competitive advantage and materially harm its business. The Company cannot be certain that others will not independently develop the same or similar technologies on their own or gain access to trade secrets or disclose such technology, or that the Company will be able to meaningfully protect its trade secrets and unpatented know-how and keep them secret.

5.4 General Risks

(a) General Economic Conditions

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's research, development and production activities, as well as on its ability to fund those activities.

(b) Market Conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and technology stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.

(c) Force Majeure Events

Events may occur within or outside Australia that could impact upon the global and Australian economies, the operations of the Company and the price of the Shares. Such events include but are not limited to acts of terrorism, an outbreak of international hostilities, fires, floods, earthquakes, labour strikes, civil wars, natural disasters, outbreaks of disease or other natural or man-made events or occurrences that can have an adverse effect on the demand for the Company's services and its ability to conduct business. The Company will have only a limited ability to insure against some of these risks.

(d) Litigation Risks

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

(e) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(f) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Offer Document.

(g) **Government**

Changes in government, monetary policies, taxation and other laws can have a significant influence on the outlook for companies and investor returns.

(h) **Climate Risk**

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

(i) **Reliance on Key Personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(j) **COVID-19 Risk**

The outbreak of the coronavirus disease (**COVID-19**) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

The COVID-19 pandemic may also give rise to issues, delays or restrictions in product processing and packaging and the Company's ability to deliver products to customers, which may result in cost increases or adverse impacts on sales. In addition, the effects of COVID-19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders or the COVID-19 pandemic may also give rise to issues, delays or restrictions in relation to logistics and the Company's ability to freely move products to and from locations may cause delays or cost increases. The effects of COVID -19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders.

The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors through supplementary disclosure.

(k) **Ukraine Conflict**

The current conflict between Ukraine and Russia (Ukraine Conflict) is impacting global economies and financial markets. The nature and extent of the effect the Ukraine Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic uncertainty caused by the Ukraine Conflict and the wider effect the conflict has on global economies and financial markets.

The Directors are monitoring the potential secondary and tertiary macroeconomic impacts of the Ukraine Conflict, including the fluctuations in commodity and energy prices and the potential risk of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the Ukraine Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving Russia, may adversely impact the Company's operations and are likely to be beyond the control of the Company. The Company is monitoring the situation closely and considers the impact of the Ukraine Conflict on the Company's business and financial performance to, at this stage, be limited. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain.
