

## **Allot Completes Deployment for Millicom (Brand Name: Tigo)**

**Hod Hasharon, Israel – November 21, 2012** - [Allot Communications Ltd.](#) (NASDAQ, TASE: [ALLT](#)), a leading supplier of service optimization and revenue generation solutions for fixed and mobile broadband service providers worldwide, announced today the completion of a deployment project at 9 affiliates of Millicom International Cellular S.A (Tigo), a global telecommunication group with operations in Latin America and Africa (NASDAQ OMX: MIC).

Allot was selected by Millicom due to its integrated Allot Service Gateway solution, enabling a multitude of value-added services, deliverable in flexible packages within a single chassis. Allot enables operators to shift their day-to-day focus from network issues to providing subscribers a superior customer Internet experience. From value-based charging and analytics to improved video delivery – the Allot Service Gateway allows implementation of a vast variety of use cases tailored to each operator's customer.

"We are very proud to announce the completion of this deployment project for Millicom International Cellular S.A," said Vin Costello, Allot Vice-President and General Manager - Americas. "Our wide range of integrated services within the Allot Service Gateway enables a unified approach to mobile data optimization and monetization. Our Service Gateway strategy provides the flexibility necessary for operators to transition to a customer-centric strategy by dynamically managing their broadband offerings and enabling them to better compete."

### **About Allot**

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading global provider of intelligent solutions to optimize and monetize over-the-top Internet traffic in fixed and mobile broadband networks and large enterprises. Allot Service Gateway offers service providers a broad range of value-added services in a single platform, which include the analytics, policy control, video optimization, video caching and charging that are vital to managing fixed and mobile data, enhancing user experience, containing operating costs, and enabling service providers to generate revenues from their broadband networks. Allot's rich portfolio of solutions leverages dynamic actionable recognition technology (DART) to transform broadband pipes into smart networks that can rapidly and efficiently deploy value added Internet services. ### ***Safe Harbor Statement***

Information provided in this press release may contain statements relating to current expectations, estimates, forecasts and projections about future events that are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally relate to the Company's plans, objectives and expectations for future operations. These forward-looking statements are based upon management's current estimates and projections of future results or trends. Actual results may differ materially from those projected as a result of certain risks and uncertainties. These factors include, but are not limited to: our ability to increase the breadth and functionality of the Service Gateway platform, changes in general economic and business conditions; the Company's inability to develop and introduce new technologies, products and applications; loss of market; and other factors discussed under the heading "Risk Factors" in the Company's annual report on Form 20-F filed with the Securities and Exchange Commission. These forward-looking statements are made only as of the date hereof, and the Company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
