

## Vodafone Germany Makes Web Surfing Secure With Allot WebSafe Personal

*Allot WebSafe Personal delivers a Web Security-as-a-Service solution to protect and enhance subscriber and enterprise internet experience*

**May 26, 2015** – Hod Hasharon, Israel – [Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT), a leading global provider of intelligent broadband solutions that empowers communication service providers to optimize and monetize their networks, enterprises to enhance productivity and consumers to improve their digital experience, announced today that [Allot WebSafe Personal](#) is powering Vodafone Germany's newly launched Secure Net offering, a network-based Security-as-a-Service (SECaaS) solution for mobile users.

Through full integration with the [Allot Service Gateway](#), Allot WebSafe Personal enables Vodafone Germany to rapidly roll out value-added web security services including anti-malware and parental control that increase customer loyalty and generate incremental revenue. Vodafone Germany's small and medium-sized business (SMB) and enterprise customers are also served by Allot's SECaaS solution, which protects user endpoints and enhances business productivity.

"Digital threats on mobile devices are rising in magnitude and sophistication. Our Secure Net service powered by Allot allows customers to use the mobile Internet safely and economically by filtering out harmful content and malware before it reaches the mobile device, all without impacting device performance or battery life," said Frank Vahldiek, Director Consumer Services at Vodafone Germany. "The Secure Net service is accessible from any Vodafone-connected mobile device and provides peace of mind to parents who worry about their child's online activity or to users who fear viruses and phishing scams while surfing the Web".

Any broadband operator can deploy Allot WebSafe Personal in multi-tenancy mode, which allows consumers to customize their own security settings, or in a single-tenancy mode that offers a standard set of security features for all users. The service also offers on-demand reporting, enabling users to generate their own reports that outline online activities in easy-to-read graphs.

"Vodafone Germany chose Allot because of its best-of-breed network-based SECaaS offering, which is designed for ease of operation at the highest scale," said Gary Drutin, Chief Customer Officer at Allot Communications. "Leveraging our recent acquisition of Optenet, Allot is committed to enabling a safe and secure mobile experience for users around the globe."

### **Forward Looking Statement**

This release may contain forward-looking statements, which express the current beliefs and expectations of Company management. Such statements involve a number of known and unknown risks and uncertainties that could cause our future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to: our ability to compete successfully with other companies offering competing technologies; the loss of one or more significant customers; consolidation of, and strategic alliances by, our competitors, government regulation; lower demand for key value-added services; our ability to keep pace with advances in technology and to add new features and value-added services; managing lengthy sales cycles; operational risks associated with large projects; our dependence on third party channel partners for a material portion of our revenues; and other factors discussed under the heading "Risk Factors" in the Company's annual report on Form 20-F filed with the Securities and Exchange Commission. Forward-looking statements in this release are made pursuant to the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
