

Leading Cargo Services Provider in Europe Deploys Allot's Multiservice Platform to Improve Business Services and Productivity

Worldwide Flight Services France selected Allot application visibility, policy control and DDoS protection to enable smooth cargo operations and business continuity

HOD HASHARON, Israel, October 18, 2017—[Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT), a leading global provider of innovative network intelligence and security solutions for service providers and enterprises worldwide, announced today that [Worldwide Flight Services](#) (WFS) has implemented Allot's [Secure Service Gateway \(SSG\)](#) unified solution for real-time network intelligence, control and security across their entire network. Allot SSG provides end-to-end visibility of all network traffic, allowing WFS to assure and protect critical application performance and user Quality of Experience (QoE) for remote sites at France's busiest airports.

WFS is one of the world's leading providers of ground handling services for airlines and airports, serving more than 300 airlines and airports in 22 countries on five continents.

"With Allot application visibility and policy control, we provide more granularity on the network side and then give more efficiency to our security and more priority to our operations customers," said Toufik OUANAÏM, IT France Manager at WFS. "This in turn enables us to continue delivering high-quality service and excellent customer satisfaction."

Allot SSG unifies the functionality of Allot's industry leading Service Gateway platform with powerful web security and DDoS protection capabilities to offer a single, scalable solution to support the requirements of enterprises for network visibility, control, and security.

"The increased complexity of enterprise networks and need for support of multitude of connected devices and device types present an increased challenge when it comes to managing the network. In addition, organizations face a rise in the magnitude and sophistications of cyber-attacks," said Ronen Priel, vice president of product management and marketing at Allot. "It is critical for businesses to have granular network visibility and intelligence so they can quickly identify and fix problems before they impact productivity and service quality."
