REPORT ON REVIEW OF INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS TO THE SHAREHOLDERS OF ORIENT INSURANCE PJSC

Introduction

We have reviewed the accompanying interim condensed consolidated financial statements of Orient Insurance PJSC and its subsidiaries (the "Group") as of 31 March 2016, which comprise the interim consolidated statements as of 31 March 2016 and the related interim consolidated statements of profit or loss and other comprehensive income, cash flows and changes in equity for the three-month period then ended and explanatory notes. Management is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"). Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, *"Review of Interim Financial Information Performed by the Independent Auditor of the Entity"*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing. Consequently, it does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

2 BASIS OF PREPARATION AND CHANGES TO THE GROUP'S ACCOUNTING POLICIES

Basis of preparation
The interim consolidated financial statements for the three months ended 31 March 2016 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at 31 December 2015.

Changes in accounting estimates
The accounting policies are consistent with those used in the previous year. The accounting estimates used in the preparation of these financial statements are consistent with those used in the preparation of the financial statements for the year ended 31 December 2015 except for a change in the basis of calculation of the unearned premium reserve as noted below.

As per Federal Law No.6 of 2007, relating to Establishment of Insurance Authority and regulation of Insurance operations, a new financial regulation for insurance companies was issued on 28 January 2015. The financial regulation provided an alignment period to the insurance companies between one to three years from the publication of financial regulation in Public Gazette from 29 January 2015 to align the operations to the covenants of the regulations therein.

Unearned premium reserve
Until 31 December 2015, the reserves were calculated at 50% of annual premiums earned net of reinsurance for life and medical and 40% of annual premiums earned net of reinsurance for general business.

With effect from 1 January 2016, to comply with the new regulations introduced by the Insurance Authority of United Arab Emirates, the unearned premium reserve for all the classes of insurance is calculated on a time proportion basis, except for Marine cargo class of business which is calculated at 25%.

As a result of the change, profit for the period is lower by AED 4,848 thousand and unearned premium reserve at 31 March 2016 is higher by AED 4,848 thousand.

2 BASIS OF PREPARATION AND CHANGES TO THE GROUP'S ACCOUNTING POLICIES (continued)

New standards, interpretations and amendments
The new and revised relevant IFRSs effective in the current period had no significant impact on the amounts reported and disclosures in these interim consolidated financial statements. Annual Improvements 2012-2014 cycle which became effective from 1 January 2016 also did not have an impact on the financial position or performance of the Group during the period.

These condensed consolidated financial statements do not include all disclosure and should be read in conjunction with the consolidated financial statements for the year ended 31 December 2015. In addition, results for the three months ended 31 March 2016 are not necessarily indicative of the results that may be expected for the financial year ending 31 December 2016.

14 FAIR VALUE OF FINANCIAL INSTRUMENTS

A. Determination of fair value and fair value hierarchy
The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2: valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

Level 3: valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

	Level 1	*Level 2*	*Level 3*	*Total fair value*

Financial instruments recorded at fair value

Included in the Level 1 category are financial assets that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Financial assets measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions are assets for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Group's own models whereby the majority of assumptions are market observable.

Non market observable inputs means that fair values are determined in whole part or in part using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main asset classes in this category are unlisted equity investments limited partnerships. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price from the perspective of the Group. Therefore, unobservable inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available, which might include the Group's own data.
