AudioCodes announces acquisition of Ai-Logix

Acquisition to expand AudioCodes' voice over packet communications boards business into the call logging and recording market

Lod, Israel–May 12, 2004 – AudioCodes Ltd. (Nasdaq: AUDC), a leading provider of Voice over Packet (VoP) technologies and Voice Networks products today announced that it has acquired privately-held Ai-Logix, Inc., of Somerset, New Jersey. Ai-Logix is a leading provider of advanced voice recording hardware technology for the call logging and voice recording industries. Ai-Logix had revenues of approximately \$13 million in 2003.

AudioCodes paid \$10 million in cash at the closing for all of the outstanding shares of Ai-Logix. In addition, AudioCodes will be required to pay an additional purchase price in 2005 based on the achievement of revenue milestones by the Ai-Logix business in 2004. This installment is currently estimated to be up to \$10 million. Upon closing of the acquisition, Ai-Logix became a wholly owned subsidiary of AudioCodes Inc., which is a wholly-owned subsidiary of AudioCodes Ltd. Ai-Logix's current management will remain in place.

A recent Venture Development Corporation VoP market study names AudioCodes a leader in the VoP communication boards market with a market share of 30% to 35%. According to Datamonitor, the contact center market and the call logging and recording industries are rapidly adopting IP-based networking solutions. With the acquisition of Ai-Logix, AudioCodes plans to enter the call recording

market with its VoP communications boards by leveraging Ai-Logix's technology, strategic partnerships and customer base.

Recent trends evidence a growing momentum in the use of voice over packet technology in new network deployments and an expected shift of communications budgets in the enterprise market towards IP-based architectures. The call recording industry is experiencing similar trends. According to Datamonitor, revenues of the entire voice recording products market were approximately \$900 million in 2003 and are expected to grow to \$1.3 billion by 2007, with revenues of complete hardware based solutions constituting roughly 35% of this market. A significant portion of future voice recording and call logging revenues is expected to be generated from deployments of VoIP architectures.

“We are impressed with Ai-Logix's successful track record in defining and implementing company strategy and responding effectively to changing customer requirements,” said Shabtai Adlersberg, President and CEO of AudioCodes. “Ai-Logix is a leading vendor in the call logging market and its products are designed into the solutions of major vendors in the call logging industry including Verint Systems, Inc., Witness Systems, Mercom Systems, Envision, Voice Print and E-talk. We are pleased to welcome Ai-Logix's employees to the AudioCodes' worldwide team.”

“Integrating AudioCodes' VoIP capabilities into our products will enable us to provide our customers with enriched functionality in accordance with evolving telecommunication technologies,” said Moshe Tal, President and CEO of Ai-Logix.

AudioCodes' management will discuss the matters referenced herein in a conference call this Thursday morning (May 13, 2004) at 9:00 a.m. (EDT). Those who wish to listen to the call live over the web may do so by going to the following site: www.audiocodes.com
