AudioCodes (**NASDAQ: AUDC**), a leading vendor of advanced voice networking and media processing solutions for the digital workplace, today announced that Time2Market, a USA-based leading unified communications system integrator and cloud service VoIP provider, has selected AudioCodes [Mediant Virtual Edition \(VE\) SBCs](#) to power the core of its growing Cloud Complete hosted Skype for Business offering. Time2Market also selected [AudioCodes 400HD IP phones](#) to deliver a high quality user experience.

The service and virtualized SBCs provide scalability and high voice quality while also utilizing the SILK voice codec. The AudioCodes VE SBCs deliver secured SIP trunk connectivity and are deployed in an active-active geo-redundancy configuration for continuous service availability. Multi-tenancy support facilitates efficient usage of cloud resources while enforcing strict isolation between tenants. The 400HD IP phones enhance worker productivity, are intuitive for adoption and empower IT organizations with management tools that help control operational expenditure (OpEx).

“We keep growing our traffic on the pair of Mediant VE SBCs,” commented Hugh Oakes, founding member and managing director of Time2Market. “Since being deployed in our environment, the Mediant SBCs have turned a fragile element of our infrastructure into a strength. Our partnership with AudioCodes helped us build a compelling value proposition for our customers.”

“We are pleased to be partnering with Time2Market,” added Nimrode Borovsky, Vice President of Global Marketing of AudioCodes. “Our One Voice for Skype for Business focus is designed to empower our business partners to deliver innovative solutions for their customers. Virtualization plays a key role in building hosted services, and our SBCs are ideal for such deployments.”
