

Leading Russian System Integrator Technoserv Partners with Networking Vendor Orckit-Corrigent

Technoserv's Carrier Ethernet Transport Solution is Enhanced with TDM Migration Technologies Provided by Orckit-Corrigent CM-4000 Metro Aggregation Switches

Moscow, Russia. October 25, 2010 – Technoserv, the leading provider of products and technologies and the largest Russian company dedicated to system integration, IT-services and engineering facilities, today announced that it has selected networking vendor Orckit-Corrigent's (NasdaqGM: ORCT) CM-4000 Carrier Ethernet Transport switches to enhance its networking portfolio, allowing Technoserv to better meet the growing demand for telecommunication services in Russia and CIS.

"Technoserv is pleased to partner with Orckit-Corrigent. The integration of Orckit-Corrigent's CM 4000 platform into our solutions will significantly boost our telecommunication and mobile portfolio and provide us with the ability to meet the demands of our customers across Russia and CIS," said Mr. Borodyansky, CIS Director at Technoserv. "The combination of the professionalism and agile approach of the Orckit-Corrigent team with the company's exceptional technology expertise convinced us that they are the right partners for this important expansion and we look forward to leveraging their knowledge and industry experience."

"Orckit-Corrigent is pleased to partner with Technoserv – Russia's largest system integrator, and to introduce our innovative technologies and solutions to the Russian and CIS markets," said Mr. Rami Shavit, President Russia & CIS at Orckit-Corrigent. "We continue to develop the best available solution for TDM migration to a unified packet transport environment and look forward to helping Technoserv roll-out Carrier Ethernet and TDM migration solutions that carry any type of PDH and SDH traffic over 10 Gigabit Ethernet networking infrastructure." Mr. Rami Shavit concluded.

Orckit-Corrigent's CM-4000 Carrier Ethernet + Transport (CE+T) metro aggregation switches are based on MPLS and MPLS-TP technologies and designed to deliver packet-based services and to help telecommunication service providers migrate their existing PDH and SDH services to the fast growing, data-oriented, Carrier Ethernet networks.
