

Orckit-Corrigent's Products and 3M Services Support Selected by Regional German Telecommunication Service Provider e.discom for New Packet Transport Network Deployment

New networking infrastructure will enable low latency and high priority traffic for carrier, enterprise and residential subscribers

Tel-Aviv, Israel – December 07, 2011 – Orckit-Corrigent Ltd. (NasdaqGM: ORCT), a leading Packet Transport Network (PTN) vendor, today announced that e.discom Telekommunikation GmbH, a regional German telecommunication service provider, has selected to deploy Orckit-Corrigent's MPLS and MPLS-TP based CM-4000 PTN switches and the accompanying CM-View network management system, complemented by 3M Services' comprehensive support platform, to enable low latency and high priority traffic for the delivery of carrier, enterprise VPN and residential broadband services on a converged networking layer. About one million US dollars initial purchase order was accepted and shipment started at 2011 third quarter.

"e.discom is deploying a next-generation packet transport network that will deliver strong quality-of-service under very well-defined service-level-agreements to our carrier and enterprise customers," said Mr. Gunter Hoheisel, head networks and infrastructure of e.discom. "Orckit-Corrigent's solutions successfully completed telemetry tests that included delay and jitter measurements.

Together with 3M Services' GmbH support, we look forward to instantly leveraging Orckit-Corrigent's solutions to provide our customers with low latency and high priority broadband services," added Mr. Gunter Hoheisel.

"This decision by e.discom, a regional service provider, highlights the German market's acceptance of Orckit-Corrigent's innovative technologies and products," said Mr. Manfred Brandt, Managing Director of 3M Services. "We appreciate very much this decision and we are pleased to continue supplying e.discom with comprehensive, state-of-the-art technologies and customer care solutions."

Orckit-Corrigent's CM-4000 portfolio is a series of small-, medium- and large-capacity Packet Transport Network switches that offer any combination of Ethernet, SDH and PDH services to facilitate migration towards a unified packet network. These switches are based on dual stack IP/MPLS and MPLS-TP, packet synchronization and circuit emulation technologies, and are designed to scale up the delivery of residential, business and mobile backhauling services in next-generation telecom networks.

"Orckit-Corrigent is pleased to include e.discom in our growing global customer base," said Mr. Izhak Tamir, Co-Founder, Chairman of the Board and President of Orckit Communications. "Orckit is enjoying positive momentum and is seeing a strong increase in its customer base. Our deal with e.discom strengthens our position as a leading PTN vendor, and highlights our successful partnership with 3M Services."
