Tel Aviv Stock Exchange Ltd.

Dear Sir/Madam,

Motion for certification of a class action against yes TV & Communication Services Ltd.

An immediate report is hereby provided that on May 3, 2026, the Company received notice from the subsidiary - yes TV & Communication Services Ltd. ("yes") - that on this day yes became aware of a motion for certification of a class action, along with a lawsuit, which were filed against it in the Central District Court.

According to the claim in the motion, yes violates the provisions of the law, among other things by not specifying the price of the service or product prior to the increase and by how much the price increased within the framework of price increase notices it sends to its subscribers. In doing so, it is claimed, the subscriber's ability to understand the impact of the price increase is harmed, and among other things, the possibility of negotiating regarding it is prevented.

The motion states that the amount of the class action cannot be estimated at this stage, and that it is higher than NIS 2.5 million.

yes is studying the details of the motion and neither it nor the Company can estimate its prospects at this stage.

Sincerely,

Bezeq The Israel Telecommunication Corp Ltd.
