Following the examination of the data, TASE's CEO will be requested to transfer to the maintenance list shares and convertible securities of the companies on the list presented in section 3. above, if on the date of the review they do not comply with the Maintenance Rules and do not meet the conditions of the exemption.

5. Additional maintenance cause :

Blitz - The company's shares was transferred to the Maintenance list on July 22, 2024, on the cause of non compliance with the minimum value of public holdings requirement (the cause of public holdings value)

Based on the company's data as of December 31, 2024, and since public holdings percentage in the company's shares were 14.61%, the company also does not meet the requirement for minimum public holding percentage and hence the cause of public holdings percentage cause also applies to the company " the additional maintenance cause ".
