

**FOR IMMEDIATE RELEASE**

## **Compugen to Host Conference Call to Discuss Exclusive License Agreement with Gilead for COM503, Novel Immuno-Oncology Pre-Clinical Program Harnessing IL-18 Biology**

- Conference call today, December 19, 2023, 8:30 AM ET to discuss the license agreement

HOLON, ISRAEL, December 19, 2023 - Compugen Ltd. (Nasdaq: CGEN) (TASE: CGEN) a clinical-stage cancer immunotherapy company and a pioneer in computational target discovery, today announced that it will host a conference call at 8:30 AM ET today, to discuss the exclusive license agreement with Gilead announced today, for the development and commercialization of its anti-IL-18 binding protein program including COM503, a pre-clinical potential first-in-class high affinity antibody targeting IL-18 binding protein with potential to treat multiple tumor types.

### **Conference Call Details**

To access the live conference call by telephone, please dial 1-866-744-5399 from the U.S., or +972-3-918-0644 internationally. The call will be available via live webcast through Compugen's website, located at the following [link](#).

Following the live webcast, a replay will be available on the Company's website.

### **About Compugen**

Compugen is a clinical-stage therapeutic discovery and development company utilizing its broadly applicable predictive computational discovery capabilities to identify new drug targets and biological pathways for developing cancer immunotherapies. Compugen has developed two proprietary product candidates: COM701, a potential first-in-class anti-PVRIG antibody and COM902, a potential best-in-class antibody targeting TIGIT for the treatment of solid tumors. Compugen also has a clinical stage partnered program, rilvegostomig (previously AZD2936), a PD-1/TIGIT bispecific antibody where the TIGIT component is derived from Compugen's clinical stage anti-TIGIT antibody, COM902, in Phase 3 development by AstraZeneca through a license agreement for the development of bispecific and multispecific antibodies. In addition, the Company's therapeutic pipeline of early-stage immuno-oncology programs consists of programs aiming to address various mechanisms of immune resistance, of which the most advanced program, COM503, is in IND enabling studies. COM503 is a potential first-in-class, high affinity antibody which blocks the interaction between IL-18 binding protein and IL-18, thereby freeing natural IL-18 in the tumor microenvironment to inhibit cancer growth. Compugen is headquartered in Israel, with

offices in San Francisco, CA. Compugen's shares are listed on Nasdaq and the Tel Aviv Stock Exchange under the ticker symbol CGEN.
