

FOR IMMEDIATE RELEASE

Secura Secures S\$64.2 million in School Security Contracts Under MOE's New Integrated Facilities Management Model

SINGAPORE - 11 August 2026 - Secura Group Limited ("**Secura**" or the "**Group**"), through its wholly owned subsidiary Soverus Pte Ltd ("**Soverus**"), is pleased to announce that it has secured two security services contracts under the Ministry of Education's ("**MOE**") new integrated facilities management ("**IFM**") operating model, with a total contract value of approximately S\$64.2 million for an initial five-year contract period.

For several years, Soverus has been entrusted with providing security services to MOE schools across the North and North-East zones, supporting a safe and secure environment for students, educators and school communities. Following MOE's transition to the IFM operating model, school facilities management services are now delivered through appointed IFM providers. Under the IFM model, Soverus has successfully secured two security contracts from two IFM providers, maintaining its presence in the MOE school sector.

The contracts will commence on 1 September 2026 for an initial term of five years, with an option to extend for a further five years, subject to the terms and conditions of the respective agreements.

Mr Kan, Chief Executive Officer of Secura, said:

"These contract awards are particularly significant as they were secured following MOE's transition to an IFM operating model. The awards reflect Soverus's established track record in the education sector, strong operational capabilities and consistent service standards. Our upgraded 24/7 command centre, enhanced with AI-enabled capabilities, strengthens real-time monitoring, incident management and operational oversight, enabling us to better support our officers on the ground and deliver consistent service standards across the schools entrusted to us. We appreciate the confidence that our partners have placed in us and remain committed to delivering reliable security services that support safe learning environments."

Looking ahead, Secura will continue to focus on operational excellence, service innovation and workforce development to support the evolving needs of customers across the education, public sector and commercial segments.

The contracts are expected to contribute positively to the Group's earnings per share and net asset value per share for the financial years ending 31 December 2026 to 2031.

ABOUT SECURA GROUP LIMITED

Secura Group Limited ("Secura") is one of Singapore's leading providers of an integrated suite of security products, services and solutions. Its security guarding business, **Soverus Pte Ltd**, provides unarmed manned security guarding services and operates a state-of-the-art 24-hour command centre equipped with remote CCTV surveillance and video analytics for round-the-clock monitoring of premises. Alongside this, **Soverus Kingdom Systems Pte Ltd**, specialises in the delivery and integration of digital security and access control solutions. With close to a decade of industry experience, Soverus Kingdom supports clients with technology enabled systems that enhance security, operational efficiency and compliance requirements.

The Group also operates one of Singapore's most established security printing businesses, **Secura Singapore Pte Ltd** founded in 1976 and commemorating its 50th anniversary this year. Leveraging decades of specialised expertise, the business produces a wide range of secure, high-quality documents incorporating anti-counterfeit features, including bank cheques, passbooks, educational certificates and other value documents, serving institutions that require trusted and reliable document security.

Complementing its physical and document security capabilities, Secura provides a comprehensive suite of cybersecurity services through **OneSecure Asia Pte. Ltd**. These services include 24/7 security operations centre (SOC) monitoring, detection of web spoofing and site defacement, and mitigation of Distributed Denial-of-Service (DDoS) attacks, enabling organisations to strengthen their digital defences with continuous threat detection and expert technical support.
