

Elbit Systems' UK Subsidiary Awarded \$137 Million Contract to Supply the Future Target Acquisition Solution for Soldiers of the British Armed Forces

Haifa, Israel, January 21, 2021 – [Elbit Systems](#) Ltd. (NASDAQ: ESLT, TASE: ESLT) (“Elbit Systems” or “the Company”) announced today that its UK subsidiary, Elbit Systems UK Ltd. (“Elbit Systems UK”), was awarded an approximately \$137 million (approximately £100 million) contract by the UK Ministry of Defence to provide the British Armed Forces with the future target acquisition solution for Joint Terminal Attack Controllers and Fire Support Teams under the Dismounted Joint Fires Integrators (“D-JFI”) program. The contract will be performed over a five-year period.

The D-JFI solution to be provided by Elbit Systems UK, is a networked, passive and active target acquisition solution that acquires, generates and communicates target information to effector systems for effective engagement of joint precision and non-precision fires. The solution is empowered by Artificial Intelligence and will interface with the radio communication systems of the British Army, Royal Air Force and Royal Marines. The D-JFI solution draws on the Company's operational experience in providing dismounted network combat solutions. It integrates several of its technologies, including: the TORCH-X™ Battle Management Application; the Hattorix™ system for undetectable generation of high-precision targets, the CORAL Multi-Spectral electro-optical payload for enhanced target acquisition in day and night and the Rattler™ XR long range laser designator. The D-JFI solution will enable fast and secured transmission of target information across the British and Allied Armed Forces, allowing swift and accurate utilization of artillery and close air support.

Martin Fausset, CEO of Elbit Systems UK, said: “It is essential for our Armed Forces to be able to operate swiftly and accurately in hostile environments. The systems to be supplied by Elbit Systems UK represent our commitment to continuously provide the most advanced technology to those on the frontline. The D-JFI solution will provide operational advantage to the British Armed Forces in an increasingly complex battlefield.”

About Elbit Systems

Elbit Systems Ltd. is an international high technology company engaged in a wide range of defense, homeland security and commercial programs throughout the world. The Company, which includes Elbit Systems and its subsidiaries, operates in the areas of aerospace, land and naval systems, command, control, communications, computers, intelligence surveillance and reconnaissance (“C4ISR”), unmanned aircraft systems, advanced electro-optics, electro-optic space systems, EW suites, signal intelligence systems, data links and communications systems, radios, cyber-based systems and munitions. This press release may contain forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Israeli Securities Law, 1968) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current facts. Forward-looking statements are based on management's current expectations, estimates, projections and assumptions about future events. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions about the Company, which are difficult to predict, including projections of the Company's future financial results, its anticipated growth strategies and anticipated trends in its business. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; changes in global health and macro-economic conditions; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; changes in the competitive environment; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak only as of the date of this release. Although the Company believes the expectations reflected in the forward-looking statements contained herein are reasonable, it cannot guarantee future results, level of activity, performance or achievements. Moreover, neither the Company nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. The Company does not undertake to update its forward-looking statements.
