Free Text / Full Dilution Calculation Details

For the purpose of calculating the holding rate on a fully diluted basis, the exercise of 18,431,360 long-term warrants, exercisable via a cashless mechanism (net exercise), for 3,096,296 exercisable shares was taken into account. Since the exercise of the warrants is subject to meeting a target price set for this purpose, depending on the warrant series, the number of shares was calculated according to the higher of (1) the target price set for the series; or (2) the closing share price as of December 21, 2025. Below are the details of the share price used for calculating the exerciseable shares:

- 14,966,334 warrants based on a share price of 19.88 NIS, being the target price for exercising these warrants;
- 824,770 warrants based on a share price of 25.78 NIS, being the target price for these warrants;
- 797,340 warrants based on a share price of 29.24 NIS, being the target price for these warrants;
- 1,842,916 warrants based on a share price of 22.72 NIS, being the target price for these warrants.

The number of exercisable shares that will actually be allotted from the long-term warrants will vary depending on the share price at the date of exercise (provided it exceeds the target price for exercise).
